Congressional Record

PROCEEDINGS AND DEBATES OF THE 95th CONGRESS, SECOND SESSION

SENATE—*Tuesday, March 14, 1978*

(Legislative day of Monday, February 6, 1978)

The Senate met at 8:30 a.m., on the expiration of the recess, in executive session, and was called to order by Hon. QUENTIN N. BURDICK, a Senator from the State of North Dakota.

PRAYER

The Chaplain, the Reverend L. R. Elson, D.D., offered the following prayer:

Let us pray.

"Lord of all life, below, above
Whose light is truth, whose warmth is love,
Before Thy ever-blazing throne
We ask no lustre of our own.

"Grant us Thy truth to make us free,
And kindling hearts that burn for Thee
Till all Thy living altars claim
One holy light, one heavenly flame."
—Oliver Wendell Holmes, 1848.

O Thou Light of lights, burn out of us all that is base and mean and ugly and shine into our souls that we may be guided by the pure light of Thy presence until our work is done and done well. Then grant that we may rest in the peace of those who are righteous in Thy sight.

In Thy holy name we pray. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 14, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable QUENTIN N. BURDICK, a Senator from the State of North Dakota, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. BURDICK thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

Mr. ROBERT C. BYRD addressed the Chair.

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent, as in legislative session, that the Legislative Journal be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

NOMINATIONS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the two nominations under Department of Justice.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object, I would only advise the majority leader that both these items under New Reports, Department of Justice, are cleared for action on this calendar, and we have no objection to them.

Mr. President, I would revise my remarks to identify those two nominations as the first two items appearing under Department of Justice, being James R. Williams, of Ohio, and Richard W. Nehring, of Iowa, that are cleared on this calendar for action at this time.

The ACTING PRESIDENT pro tempore. The nominations will be stated.

DEPARTMENT OF JUSTICE

The second assistant legislative clerk read the nomination of James R. Williams, of Ohio, to be U.S. attorney for the northern district of Ohio.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The second assistant legislative clerk read the nomination of Richard W. Nehring, of Iowa, to be U.S. marshal for the southern district of Iowa.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nominations.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Rhode Island (Mr. CHAFEE) is recognized, as in legislative session, for not to exceed 15 minutes.

Mr. CHAFEE. I thank the Chair.

S 2739—FEDERAL BUILDINGS ARTISTIC ENHANCEMENT ACT

Mr. CHAFEE. Mr. President, every day we and our staffs come to work in buildings rich in works of art and historical heritage. Do we take these surroundings for granted? I do not think so—at least I hope not. Our Capitol and indeed all the artistic and cultural treasures of Washington, D.C., call forth thousands of visitors from homestate communities each year. But Washington, D.C., has no claim to being the only locus point of fine American art. The Smithsonian Institution recognizes this and has established its sites program for the loan of Smithsonian treasures to other groups. Nor is artistic talent limited to one or a few locations. Many of our country's communities can boast of fine artists.

Mr. President, I make these remarks to preface my introduction today of legislation to provide a program for acquiring, exhibiting, and circulating works of art and history among Federal buildings. I am very pleased that Senator MOYNIHAN has agreed to be a principal cosponsor of this bill. When we think of the millions of people who work in and visit Federal buildings daily, it makes sense to refuse to condemn these buildings to a sterile existence.

My bill will provide: First, a program for exhibiting and circulating, among GSA-managed Federal buildings, works of art loaned by contemporary American artists. Artists from various geo-

Statements or insertions which are not spoken by the Member on the floor will be identified by the use of a "bullet" symbol, i.e., ●

graphical locations will be represented. GSA would seek assistance from the National Endowment for the Arts in selecting the artists.

Second, the bill directs the General Services Administration to work with the Smithsonian Institution to develop for Federal buildings, exhibits of Smithsonian works which reflect the heritage of our Nation. The exhibits would circulate among our Federal buildings, with special preference given to smaller communities which do not have convenient access to museums of art and history. Also, this program would give thousands of people from communities, large and small, who cannot visit Washington, a chance to view cultural and historic treasures from the Smithsonian. This section would be coordinated with the Smithsonian Sites program.

Finally, the legislation provides statutory authority to an existing GSA program to acquire and install works of art in Federal buildings under the agency's jurisdiction, and would extend this authority to buildings leased by GSA, as well.

As we recall, this is a new venture. We already have some guidance in legislation suggesting that in GSA-owned buildings there be works of art, but this would extend it and make it mandatory that works of art be in GSA-leased buildings.

The Administrator shall utilize one-half of 1 percent of the total funds expended for construction, alteration, and repair of public buildings and one-twentieth of 1 percent expended for the lease of public buildings, for the purposes set forth in this bill. Thus, the program will not be a financial drain on existing budgets, nor will it involve large authorizations. Yet we shall realize great benefits from our dollar through initiatives to bring our artistic heritage to many more communities.

Mr. President, in 1976, the Committee on Environment and Public Works and the Congress passed the Public Buildings Cooperative Use Act. This legislation was a major step in opening our Federal buildings to use by the community, both during and after work hours. In addition, the act authorized the use of Federal building entry-level space for shops and restaurants. The legislation I will introduce today will continue and broaden the commitment to make our Federal buildings a source of pride to their respective communities. It would say to the GSA: "We want you to continue the art-in-architecture program at the current level, at a minimum. We do not want the one-half of 1 percent decreased to three-eighths or one-fourth of 1 percent or zero, depending on the whims of current management."

From 1972 through the end of fiscal year 1977, GSA commissioned 55 works of art at a cost of approximately $2.8 million, for Federal buildings across the country. The program was originally limited to new construction in the past and was temporarily cut to three-eighths of 1 percent for awhile. However, the program has recently been expanded to existing structures, making art possible for historic landmarks. For example, the old post office in Washington, D.C., which will soon undergo an $18 million renovation, will include works of art and will also incorporate the multiuse concept. And I propose to expand the Federal buildings art program to GSA-leased buildings, as well.

The Committee on Environment and Public Works has jurisdiction over GSA's public buildings program. As a member of that committee, I look forward to working with GSA and representatives of the Federal and private art community to explore the initiatives in this legislation.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2739

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Buildings Artistic Enhancement Act."

SEC. 2. The Public Buildings Act of 1959, as amended, is amended by adding at the end thereof the following new section:

"SEC. 18 (a) (1) The Administrator of General Services, with the advice and assistance of the Chairman of the National Endowment for the Arts (hereinafter referred to as the Chairman), shall acquire by loan, or by lease at nominal fees, works of art by living American artists. Works of art acquired under this subsection shall be organized into exhibitions and circulated on a rotating basis by the Administrator among public buildings throughout the United States. Such works of art shall be selected from artists representative of the different regions of the United States and its territories, and shall include diverse media.

"(2) (A) The Administrator, in conjunction with the Chairman of the Smithsonian Institution, shall develop exhibitions which reflect the artistic, cultural, social, scientific, and industrial heritage of the United States or illustrate the continuing development of the Nation's art, culture, society, science, and industry.

"(B) The Administrator shall circulate and show exhibits developed under this subsection in public buildings throughout the United States. Preference shall be given to public buildings in communities that otherwise do not have convenient access to museums of art and history.

"(C) The Administrator shall reimburse the Smithsonian Institution an amount not less than the cost to the Institution of carrying out the provisions of this subsection.

"(b) (1) The Administrator, with the advice and assistance of the Chairman, shall acquire by purchase and install suitable works of art in public buildings (including temporary installation in leased buildings), and provide for necessary services to keep and preserve such works of art in a state of high quality. In carrying out this subsection, the Administrator shall insure that (A) preference is given works of art that reflect the common heritage, or the unique characteristics, of the region of the country in which they will be installed, (B) public buildings selected to receive such works of art are equitably distributed within the United States and its territories, and (C) such works of art reflect the diversity of artistic media and techniques.

"(2) In carrying out the provisions of this section, the Administrator, with the advice and assistance of the Chairman, shall establish such procedures as may be necessary to encourage artists, including local artists, to participate in such program, and to award commissions, with or without competition. He shall encourage the selection of a variety of compatible works for the enhancement of each such public building.

"(c) (1) The Administrator is authorized to utilize for the purposes of this section one-half of one per centum of the total sums available in fiscal year 1979 and each fiscal year thereafter for the design, construction, repair, renovation, alteration, and acquisition of public buildings, and one-twentieth of one per centum of the sums available for the lease of public buildings.

"(2) Funds available under this subsection shall be available, without fiscal year limitation, to the Administrator for the purposes set forth in subsections (a) and (b) of this section: *Provided,* That not to exceed 15 per centum of such funds shall be expended for purposes set forth in paragraph (a) (1), not to exceed 10 per centum shall be expended for purposes set forth in paragraph (a) (2), and not to exceed 75 per centum of such funds shall be expended for purposes set forth in subsection (b).

"(d) As used in this Act, the term 'works of art' includes, but is not limited to, paintings, sculptures, mosaics, tapestries, crafts, ceramics, and photographs."

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Delaware (Mr. ROTH) is recognized, as in legislative session for not to exceed 15 minutes.

Mr. BAKER. Mr. President, will the Senator from Delaware yield to me for a moment?

Mr. ROTH. I am happy to yield to the distinguished minority leader.

Mr. BAKER. Mr. President, under the order previously entered, I am allocated 15 minutes on special order time this morning. I ask unanimous consent that I may yield that 15 minutes to the distinguished Senator from Delaware for his purpose.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROTH. I thank the senior Senator from Tennessee for his thoughtfulness in granting me his time.

THE PANAMA CANAL TREATIES

Mr. ROTH. Mr. President, the Senate's decision on the Panama Canal Treaties will have very important implications for the future security and the economy of the United States. I am proud of our predecessors in this body who at the turn of the century showed the wisdom and foresight to recognize our interests in the canal, advise and consent to the 1903 treaty with Panama, and appropriate millions of dollars to construct a facility that is a lasting monument to American technology and industry.

Seventy-five years later, the Senate is again called upon to make a historic decision. With the passage of time, our stake in the Panama Canal has not diminished. It has expanded as our involvement in the world has expanded. At the beginning of this century, the United

States did not have security interests and commitments around the world. Now we have, and the Panama Canal is vital to our ability to meet these commitments. At the beginning of this century, international trade accounted for only a very small part of our economy. Today, exports provide jobs for millions of American industrial workers and farmers, and we import many raw materials that are critical to maintaining a healthy American economy.

I disagree with some who say that the canal is no longer important to the United States or that it will no longer be by the end of this century. Only two decades ago, many people were saying the same things about our railroads. Even more recently, it was conventional wisdom that coal was on its way out as a major energy source.

There is little more permanent in our world than the location of oceans and continents. A glance at the globe confirms the importance of a few geographical chokepoints—the Straits of Gibraltar, the Suez Canal, the Straits of Malacca, and the Panama Canal. These strategic waterways will continue to have vital importance to international commerce and the world's navies. The key issue in our debate in the Senate, therefore, is not whether or not the Panama Canal remains important to the United States because it does, but what kinds of arrangements with the Republic of Panama will best protect our security and economic interests in the use of the canal. These treaties must be judged not on the basis of emotional arguments, nationalism, or the legal issue of who has sovereignty. We must judge them on whether or not they advance American security and commercial interests. On this issue, intelligent and patriotic Americans disagree.

Over the past few weeks, I have listened to the debate and have kept an open mind on these treaties. I have talked to supporters and to opponents. It is my belief that it is important in evaluating these treaties to understand the basic thrust of what they do.

The general thrust is that the United States retains very substantial rights in the Panama Canal through the year 1999. After that time, American strategic and economic interests are protected only by the so-called Neutrality Treaty. For this reason, I believe that the Neutrality Treaty is the key document we are considering, and for this reason, I voted with the leadership in urging that the neutrality treaty be considered first.

I do not believe the Neutrality Treaty adequately protects American interests after the year 1999, and for this reason I will not vote for it. It does not represent a sound basis for constructing a new partnership with the Republic of Panama; instead it carries the seeds of future conflict. The Neutrality Treaty does not provide any effective role for the United States in operating and maintaining the canal beyond the year 1999. These very fundamental deficiencies cannot be rectified by the leadership amendments. The changes that would be needed are so fundamental and far-reaching that the only means of salvaging this treaty would be to return it to the President with instructions to completely renegotiate a number of important provisions.

As presently drafted, and as amended by the leadership amendments, the Neutrality Treaty does provide the United States with the right to intervene militarily should the regime of neutrality set out in the treaty be violated. It also imposes certain obligations on Panama regarding the maintenance of the canal, tolls, and rules of transit. Panama pledges not to allow foreign countries to operate the canal or to maintain military forces, defense sites or military installations in the Republic of Panama. These obligations, however, are often vaguely worded. They are not unambiguous. They are subject to different interpretations by the United States and Panama. Moreover, they are paper rights and obligations. There is no effective mechanism to enforce them except in one case—a major conventional war.

Consider the question of tolls. The Neutrality Treaty provides that tolls and other charges shall be "just, reasonable, equitable, and consistent with the principles of international law." It does not provide for any U.S. participation in setting toll rates. "Just," "reasonable," and "equitable" are all very imprecise and subjective terms. What does "just" mean? What is just to one man may be rank injustice to another man. What does "equitable" mean? One may argue that it means no higher rate is charged to one country than another, but it is not difficult for me to imagine a Panamanian Government arguing that it is equitable to charge ships of developed countries more than ships of developing countries. What is "reasonable" rate? OPEC countries argue that extortionist oil prices are reasonable. What principles of international law govern toll rates?

The supporters of this treaty argue that Panama will have a national economic interest in maintaining rates competitive with other forms of transportation. In my judgment, it is very foolish to rely on a presumed identity of the interests of the country that operates the canal. It is unwise to trust in imprecise and uncertain projections of competitive transportation costs over the period that this treaty will operate, which theoretically extends forever. There are no easy alternatives to the canal. Shipping around Cape Horn at the southern tip of South America adds 9,000 miles to the distance between the east and west coast, while the other alternative would be transshipment by train or truck across the continental United States, adding extra handling and other costs.

It is not at all unlikely that the United States and Panama will have differences of opinion on toll charges or on the rules governing transit. Nor is it unlikely that the two countries will have differences on the amount of revenue that should be used for the purpose of maintaining the canal in tip-top working order. In these cases, what mechanisms does the Neutrality Treaty provide to resolve the dispute?

There is no mechanism for arbitration. There is no requirement for a fact-finding body or for referral to an international body such as the World Court or the Organization of American States. The only alternatives provided the United States are those of traditional diplomacy and the right of military intervention to protect the regime of neutrality.

Military intervention is not an effective means of settling a dispute on an economic issue, such as the rate of tolls. After the year 1999, it would require mounting a military operation from the continental United States or Puerto Rico. The costs of such an operation would be staggering—both financially and politically. Consequently, even the threat of military intervention would not be an effective bargaining tool on the economic disputes that could arise at the end of American control in 22 more years.

Consider now our right to transit under the Neutrality Treaty. In a war similar to World War II, the United States could and probably would intervene to protect its use of the Panama Canal against any immediate threat. But the more likely kind of military contingency would be a limited war or crisis like the Cuban missile crisis of 1962. This kind of war would require the United States to move military ships or men through the canal in a hurry. We would have the right under the leadership amendments to send our ships to the head of the line, but what good will that do if leftist labor unions in Panama prevented or delayed these ships from moving through the locks. What if the Panamanian Government itself announced that it was sympathetic to the opponents of the United States and closed the canal for several days for repairs.

These are hardly far-fetched scenarios. Our only recourse under the neutrality treaty would be to send in American troops to protect our transit rights, but once again, this is not a viable means of enforcing our rights. Such action would only precipitate a second crisis and require new military actions on a second front in addition to the already existing military requirements. It would precipitate fighting around the canal, presenting a high risk that it would be put out of operation for days, weeks, or months completely thwarting the original purpose of the intervention.

In sum, Mr. President, military intervention is an effective means of defending American rights under the regime of neutrality only in the most extreme circumstances. There is no protection provided in the treaty against the more likely threats of petty harassments or disputes on economic issues.

The United States has a very important asset in the canal. I believe a new partnership with Panama is needed, that with creative and farsighted diplomacy such a partnership could be developed protecting the interests of both the

United States and Panama. Such a partnership would involve the United States and the Republic of Panama jointly operating the canal for the benefit of world commerce, jointly setting rates and rules of transit. It would also join the two countries in a firm commitment to construct a new sea-level canal if their joint interests and international shipping required it. Such a partnership would recognize the legitimate interests of Panama as the nation occupying the strategic isthmus between the world's two greatest oceans and the legitimate interests of the United States as the builder of the canal and its largest user.

Mr. President, it has been predicted that if these treaties are rejected, there could be serious disturbances in Panama. I do not think this danger should be lightly discarded. I believe, however, that the two treaties taken together create a situation that in the long run is fraught with greater dangers for the kind of close American-Panamanian relations that are needed to maintain our use of the canal. The transition period through the year 1999, as outlined in the Panama Canal Treaty and proposed implementing legislation, will, in my judgment be a very difficult one, with many possibilities for a series of American-Panamanian crises. And, as I have pointed out, after the year 1999, vital American economic and military interests are not adequately protected creating the risks of a continuing difficult relationship. In sum, the treaties are unlikely to accomplish their central purpose—the establishment of a new and better arrangement protecting American use of the canal.

I, therefore, wholeheartedly endorse the suggestion made by Senator GRIFFIN to return these treaties to the President for renegotiation. I believe the Senate should advise the President of the kind or kinds of provisions we find desirable and that a special Senate advisory committee on the Panama negotiations should be established to work with the executive branch in devising new and beneficial arrangements with the Republic of Panama protecting this most important asset to both our nations.

Mr. President, I yield back the remainder of my time.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MARK O. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

UNITED STATES-ROMANIAN ECONOMIC RELATIONS

Mr. MARK O. HATFIELD. Mr. President, in less than 1 month, the President of Romania, the Honorable Nicolae Ceausescu, will be coming to the United States to meet with President Carter to discuss various issues of mutual concern to both of our countries. Of course, one of the major topics of discussion will be the future of the long-term economic relations between the United States and Romania, particularly as they relate to an extension of most-favored-nation tariff treatment for Romania.

With the granting of MFN to Romania 3 years ago through the United States-Romanian Trade Agreement, Congress took a major step toward normalizing trade between our two nations. In 1976 U.S. trade with Romania reached $448 million, an increase of about 40 percent over the 1975 two-way figure. Even more revealing is the growth in trade between 1965 and 1977. From a trade total valued at $8 million in 1965, bilateral trade reached $79.5 million in 1970, and preliminary figures show that it has climbed to an alltime high of almost $500 million in 1977. The United States has continued to maintain a positive trade surplus in each of these years, helping our balance-of-payments position.

Because I recognize the realities of global economic interdependence, I believe it is in the best long-term economic interests of the United States to expand our ties with Romania. I hark back to my days as Governor of Oregon when we organized some of the first trade missions to Japan. Now our State supplies some 60 percent of Japan's wheat imports and we maintain a healthy local trade surplus. At that time, I stressed that trade builds two types of bridges—economic and personal. We have certainly seen such bridges built with the Romanians over the past years as a direct result of the most-favored-nation trade status which we have accorded the Romanians.

Mr. President, it is my belief that an expansion of our commercial relations with Romania can play a significant role in encouraging her economic and political independence. In fact, a central reason for urging a continuation of MFN treatment for Romania is the unique role it occupies among the Comecon countries. The independence shown by President Nicolae Ceausescu in his political and economic relations with the Soviet Union and fellow Warsaw Pact and Comecon allies is well-recognized and should be encouraged. I do not pretend that Romania is an ally of the United States, but she is a country with whom we can minimize our differences as we broaden our ties. Because of the independence shown by Romania, I believe that it would certainly be appropriate for discussions to take place between the appropriate congressional committees and the State Department regarding suggestions that a more long-term extension of MFN status be granted to Romania.

As the author of a human rights amendment to last year's Omnibus Multilateral Institutions Act of 1977 (which was defeated on the Senate floor because some thought it too strict), I am naturally interested in questions surrounding Romania's emigration policies. As my colleagues are well aware, such concerns are fundamentally linked to the granting of MFN status. From the information that I have reviewed, it appears that Romania is making positive efforts to liberalize its emigration policies. Certainly when compared with the situation before MFN, there have been marked improvements. While I firmly believe that the emigration issue should continue to be monitored closely to insure that emigration remains an option for those wanting to leave the country, I am convinced that it is only within the framework of a firm relationship between our two countries, of which MFN forms a part, that such positive results as we have seen in the past few years can be encouraged and expanded.

Mr. President, I would hope that the Carter administration will carefully study the future long-term economic relations between the United States and Romania, and that it will take appropriate actions to solidify the growing cooperation between our two countries. Again, such discussion might begin with a reevaluation of the present 1-year extension of MFN to Romania.

I ask unanimous consent that the time I have consumed in speaking may be considered as having come out of the time of the Senator from Tennessee.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

QUORUM CALL

Mr. MARK O. HATFIELD. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE FOUNDING FATHERS SAY A TREATY CANNOT DISPOSE OF FEDERAL PROPERTY WITHOUT ENABLING LEGISLATION

AMENDMENTS NOS. 84 AND 85 AND DECLARATION NO. 1

Mr. GOLDWATER. Mr. President, I wish to direct the attention of the Senate once again to the fundamental question of whether or not the President can, by a treaty, dispose of territory or property of the United States, without the enactment of authorizing legislation by the Congress. The answer to this question underlies the validity of the two pending treaties and we cannot ignore it.

To assure that the issue gets the attention it deserves, I am submitting today two amendments to the basic treaty and one declaration to the Neutrality Treaty, each of which provide that U.S. property in the Canal Zone will not be given away without strict adherence to article IV of the Constitution. This article gives to Congress the specific power to dispose of Federal property.

Mr. President, the first amendment I submit for printing provides that the Panama Canal Treaty will become effective only upon the enactment of the implementing legislation which the Carter administration says it will seek to carry out the transfer to Panama of U.S. military bases now located in the zone.

The second amendment would provide that the treaty shall take effect only

upon enactment of specific legislation by the Congress authorizing disposal of all the property belonging to the United States in the zone.

The declaration which I am submitting is a possible alternative to the above amendments. The declaration would be attached to the ratification resolution of the Neutrality Treaty. It would provide that before the instruments of ratification could be exchanged, the Congress shall have enacted legislation authorizing the transfer of all property belonging to the United States in the Canal Zone.

Mr. President, I believe it is urgent we should start now to seriously consider the basic constitutional question involved.

For this reason, I will review today why I believe the question is so important to the future of the country.

Frankly, I am disappointed that the administration up to now has not gone into the fundamental, constitutional issue. The State Department, for example, has ignored the Constitution itself by attempting to divert the debate to a question of precedents. I have previously described in detail why these highly dubious precedents are irrelevant to the Panama Canal Treaty.

Rather than go over an analysis of these claimed precedents once again, I wish to discuss today the meaning of the Constitution itself. Surely, the State Department is not contending that if the Constitution has been violated in the past, this is a reason for violating it in the future.

Therefore, let us put aside any discussion of precedents, and instead direct our attention to what the Constitution means.

Mr. President, I believe there are at least three grounds on which the Constitution makes it clear that property belonging to the United States in the Canal Zone cannot be transferred to Panama without the specific authority of both Houses of Congress.

First, there is strong authority for the doctrine that where a treaty attempts to carry into operation one of the powers specifically delegated to the Congress, that treaty does not become effective until it has obtained the sanction of the legislative department, that is to say, both Houses of Congress.

Second, there is convincing evidence that the Constitution confers upon Congress exclusively the power to dispose of property belonging to the United States.

Third, it seems clear that even if the President has concurrent power by a treaty to deal with the disposal of public property, the Constitution gives Congress the power to preempt the subject.

I. LEGISLATIVE SANCTION REQUIRED OF TREATIES WHICH OPERATE ON SUBJECTS EXPRESSLY DELEGATED TO CONGRESS

Mr. President, this issue has been with us as long as the Constitution. The matter was debated at great length in the House of Representatives in 1796, when President Washington asked the House to pass appropriations implementing the Jay Treaty with Great Britain. The published debates fill almost 400 pages of the Annals of Congress, with debate on the constitutional powers of the House having started on March 7 and only ended on April 7.

The episode is best remembered for the attempt by the House to call on President Washington for the disclosure of certain papers relating to the treaty negotiations and his refusal to provide the documents on the ground that the House does not have a role in the making of treaties.

However, what is forgotten about this early confrontation between the President and legislature is the fact that the House insisted on asserting its discretionary power to put treaties into effect which bear on the powers specifically delegated to Congress. The House of Representatives adopted a resolution by an overwhelming vote in 1796 stating that when a treaty attempts to regulate any of the subjects submitted by the Constitution to the power of Congress, it must depend, for its execution, on a law to be passed by Congress.

Moreover, the House deliberately changed the resolution providing for implementation of the Jay Treaty by striking out the words "provision ought to be made by law" for carrying into effect the treaty and substituting the words "it is expedient to pass the laws necessary" for carrying the treaty into effect. Although the House eventually approved appropriations for the Jay Treaty, it made abundantly clear by this amendment that it was not bound to pass the appropriations, but had a discretion in carrying the treaty into effect.

In 1871, the House passed an identical resolution to the one it had adopted in 1796. This resolution reads as follows:

> [W]hen a treaty stipulates regulations on any of the subjects submitted by the Constitution to the power of Congress, it must depend for its execution as to such stipulations on the law or laws to be passed by Congress; and it is the constitutional right and duty of the House of Representatives in all such cases to deliberate on the expediency or inexpediency of carrying such treaty into effect, and to determine and act thereon as in their judgment may be most conducive to the public good.

Today, the House has in effect acted on the matter once again. There presently are more than 230 Members of the House of Representatives who have joined in sponsoring a resolution declaring that the Panama Canal treaties are without effect until the Congress approves enabling legislation.

The position consistently taken by the House has also been adopted by the Senate in the past. For example, in 1815, a joint House-Senate conference committee issued a report on legislation implementing regulations established by the treaty of 1815 with Great Britain, which affected duties on imports. The report contained the following statement:

> [I]t is by no means the intention of the Senate to assert the treaty-making power to be in all cases independent of the legislative authority. So far from it, that they [the committee] are believed to acknowledge the necessity of legislative enactment to carry into execution all treaties which contain stipulations requiring appropriations, or which might bind the nation to lay taxes, to raise armies, to support navies, to grant subsidies, to create States, or to cede territory. * * *

I repeat, Mr. President, that the Senate admitted as early as 1815 that implementing legislation is necessary to transfer Federal property under a treaty with a foreign power.

The reasoning, which supports the necessity for enabling legislation to carry out treaties calling for the exercise of one of the powers expressly delegated to Congress, has been explained by no less an authority on the Constitution than James Madison. In a brilliant speech delivered on March 10, 1796, Madison demonstrated that the President and Senate can make treaties relating to the same subjects as the powers specifically vested in Congress, but require legislative sanction in order to carry such treaties into effect.

Now, Madison did not argue that the Constitution excludes from treaties altogether the enumerated subjects submitted to the power of Congress. He also rejected as an absurdity the notion that a concurrent authority might be exercised by the treaty and legislative powers on the same subjects, each of them liable to be superseded by the other. Rather, he believed that when a treaty embraces legislative objects, implementing legislation becomes necessary to give it effect.

A fundamental objection which Madison had to the concurrent powers theory, in his words, is—

> that if the treaty power alone could perform any one act for which the authority of Congress is required by the Constitution, it may perform every act for which the authority of that part of the Government is required.

If the President and Senate can exercise one of the enumerated powers by treaty alone, Madison said, then they can also exercise any of the others. It did not seem possible to him to draw any line between the enumerated powers.

Madison pointed out that according to the construction maintained by the other side, the President and Senate by means of a treaty might make the United States party to a war. He said:

> They might stipulate subsidies, and even borrow money to pay them; they might furnish troops to be carried to Europe, Asia or Africa . . . for the purpose of co-operating, on given contingencies with an ally, for mutual safety, or other common objects.

Those of my colleagues who hold that a treaty alone cannot commit the United States to go to war, without a declaration of war or other specific legislative authorization, might do well to heed the warning given by Madison. If they accept now the constitutional theory that a self-executing treaty can exercise one of the specific powers conferred upon Congress—the authority to dispose of Federal property—then they will concede that a treaty can also commit the United States to carry on war.

If any reasonable line can be drawn, except one arbitrarily made to serve the immediate purposes of the treaty proponents, it ought to be submitted. Otherwise, as sure as night follows day, we will be setting an open-ended precedent should the Senate consent to these treaties.

In the words of Professor Berger of Harvard Law School, the successors to the present Carter administration spokesmen "will say that they have a precedent. The Senate retreated and in

the future they will insist on it as a matter of Executive right."

Madison was joined in his argument by Albert Gallatin, one of the political giants of the Jeffersonian Republicans. He said:

> The Treaty-making power is limited by the Constitution, when in the first section of Article I it is said that "All Legislative power" is granted to Congress.

Although the treaty power is expressed without any limitation in article II, Gallatin contended the words "All legislative power" in article I limited the undefined power of treaties. Under the general rule of statutory interpretation, he argued that the specific governs the general. Thus, Gallatin said:

> If any other specific powers were given to a different branch of the government, they must limit the general powers.

Like Madison, he believed that unless it is allowed that "the special powers granted to Congress limit the general power of treatymaking, there are no bounds to it, it must absorb all others, * * * and act without control." Gallatin did not say that such a treaty is unconstitutional, but he did say that it was not the supreme law of the land until it received the sanction of the legislature.

The Constitution declares that treaties made "under the authority of the United States" shall be the supreme law of the land. Gallatin argued from this that a treaty which affects powers vested in Congress is not made "under the authority of the United States" until Congress passes a law to carry it into effect.

Another point made by both Gallatin and Madison was that British Parliamentary practice, which illuminates the understanding of the framers as to the meaning of many of the terms and phrases used in the Constitution, subjected treaties made by the King to legislative sanction. They quoted the famous British jurist, Blackstone, to show that the power of treatymaking in England was as extensively vested in the King as it can possibly be said to be here in our Executive and the Senate. Yet the consent of Parliament was necessary to the completion of a treaty in England when it touched on legislative powers.

The practice in 18th century England has particular relevance to the meaning which the framers gave to the treaty power because many of them considered treaties to be on a similar footing in both countries. At the Virginia Convention, for example, Mr. Nicholas made a direct comparison between treaties in England and treaties made by the President and Senate.

At the Pennsylvania Convention, James Wilson, one of the most influential members of both the Federal and State conventions, drew a similar parallel. He said:

> That though the House of Representatives possess no active part in making treaties, yet their Legislative authority will be found to have strong restraining influence upon both President and Senate.

He said, in England:

> If the King and his Ministers find themselves, during their negotiations, to be embarrassed, because an existing law is not repealed, or a new law is not enacted, they give notice to the Legislature of their situation, and inform them that it will be necessary, before the treaty can operate, that some law be repealed, or some be made.

"And will not the same thing take place here?" he asked.

During the same debate in Congress in 1796, five Congressmen from North Carolina who had been members of the convention in that State on ratifying the Constitution, took the position that the general impression of the convention was that the treatymaking power was limited by the need for legislative sanction of treaties touching on powers vested in Congress.

For example, Representative Holland said:

> It was said [at the Convention of North Carolina], that the President, with two-thirds of the Senate, could make Treaties and make stipulations unfavorable to commerce. But those in favor of its adoption (of which I had the honor to be a member) said, that commercial regulations had been previously and expressly given to Congress, and to them secured. Under that conception I was in its favor; but should have been opposed to it upon the other construction.

Congressman Holland, together with four of his former colleagues in the North Carolina Convention, Nathan Bryan, James Gillespie, Matthew Locke, and Absalom Tatom, each favored the Resolution of 1796 asserting the power of the House of Representatives over the implementation of treaties which embrace legislative subjects.

Consistent with this interpretation of the Constitution, there also is the statement made at the Massachusetts Convention on adoption of the Federal Constitution by Mr. King. He emphasized that "the Treaty-making power would be found as much restrained in this country as in any country in the world."

Another member of the Massachusetts Convention, Mr. Choate stated that "as the regulation of commerce was under the control of Congress, it could not be regulated by Treaty without their consent and concurrence."

So by a study of the debates in the Conventions of the States which ratified the Constitution, it is shown by abundant proof that the framers and friends of the Constitution construed it to limit the effect of treaties until Congress had passed enabling legislation in those cases where treaties encroach upon the enumerated legislative powers. Remember it is not to the enemies of the Constitution, who tried to portray it in unpopular terms, that we must look, but it is the friends of the Constitution, who will give us accurate guidance as to how the majority actually explained and accepted the Constitution.

Another interesting point made by Albert Gallatin during the debate on the 1796 resolution is that the very words used by the framers in conferring the treaty power—"to make treaties"—were universally understood by the law of nations to require implementing legislation whenever the conditions of a treaty were of a legislative nature.

Gallatin argued that all the writers on international law who were known to the framers of the Constitution "recognized as a principle of the law of nations, that in all limited governments, the powers vested in the other branches of government, and especially in the legislative body, operated as limitations to the general power of making treaties, lodged in the Executive."

Gallatin explained that according to international law "the power given generally to the Executive of making contracts with other nations, does not imply that of making legislative regulations, but that when the contract happens to embrace legislative objects, the assistance of the Legislature becomes necessary to give it effect."

Thus, Mr. President, if we will study the past and review what words meant to the brilliant men who wrote and voted for the Constitution, we can gain an insight into the true meaning of its provisions.

II. CONGRESS IS VESTED WITH EXCLUSIVE POWER TO DISPOSE OF FEDERAL PROPERTY

Mr. President, there also is strong historical evidence that the majority who voted for the Constitution at State ratification conventions believed the power to dispose of Federal property was vested in Congress as an exclusive power.

Governor Randolph, who was a delegate both to the Federal and Virginia conventions, discussed this very issue at the State convention. In answer to the charge that thereis no restriction with respect to making treaties, he replied that the Constitution provided "the most express restriction" on yielding property rights of the Nation in article IV, which empowers Congress to dispose of territory or property of the United States.

Randolph was not the only one who took this view. Francis Corbin added at the Virginia convention that the people were protected against bad treaties by another provision of the Constitution. Corbin said that if property is sought to be transferred by an agreement in the nature of a commercial treaty—a description which certainly fits a treaty relating to commerce through the Panama Canal—"the consent of the House of Representatives would be requisite, because of the correspondent alternations that must be made in the law."

Mr. President, this view is entirely in accord with a Constitution that is marked throughout with limitations and checks. In fact, it has even been adopted by the Senate in the past.

In 1942, for example, Senator Tom Connally, chairman of the Foreign Relations Committee made an elaborate defense of the role of the entire Congress in disposing of Federal property.

During Senate debate on a joint resolution authorizing an executive agreement for the transfer of certain land in the Canal Zone to Panama, Senator Connally said:

> Those who are opposing the measure object because the matter is brought before the Senate in the form of a joint resolution. They say it should be in the form of a treaty.
>
> Mr. President, I am and have been and in the future shall continue to be ardent in my maintenance of the integrity and the rights of the Senate of the United States in all its proper functions as a branch of

the Government; but the matter covered by the joint resolution has to be passed by the Congress sooner or later in some form, for the simple reason that under the Constitution of the United States, Congress alone can vest title to property which belongs to the United States. The Constitution itself confers on Congress specific authority to transfer territory or lands belonging to the United States. So, if we had a formal treaty before us and if it should be ratified, it still would be necessary for the Congress to pass an act vesting in the Republic of Panama the title to the particular tracts of land; because "the Congress" means both bodies. The House of Representatives has a right to a voice as to whether any transfer of real estate or other property shall be made either under treaty or otherwise.

So said Tom Connally on behalf of the Senate Foreign Relations Committee in 1942.

CONGRESS HAS PREEMPTED THE SUBJECT OF THE PANAMA CANAL

The third ground on which I believe the canal treaties must be conditioned upon the passage of enabling legislation is that Congress has preempted the subject.

George Leonard, a well-known attorney with considerable experience in constitutional matters, raised this point before the Senate Subcommittee on Separation of Powers last year. He reminded us that Congress has legislated relative to the canal ever since its origin. In the Spooner Act of 1902, he reminded us, Congress authorized the President to acquire property and "perpetual control" of a strip of land in the then territory of Colombia, and to "perpetually maintain, operate, and protect thereon a canal" from the Caribbean Sea to the Pacific Ocean. Thus, it was pursuant to the will of Congress in the Spooner Act that the Panama Canal Treaty of 1903 was negotiated and concluded.

Since that time, Congress has established courts, enacted civil and criminal codes, provided for defense, and maintained, administered, and operated the canal and the Canal Zone.

In the face of this considerable activity by Congress concerning the canal, Mr. Leonard makes a persuasive case that Congress has preempted any concurrent power that the President may have had to dispose of the canal by treaty alone.

Mr. President, to illustrate the point that the Executive at no time may utilize the treaty power in opposition to legislation by Congress which has preempted the field, Mr. Leonard has cited the recent court case of *Consumer's Union* v. *Rogers*, 352 Federal Supplement 1319. In this case, the District Court of the District of Columbia made a significant statement about the field of foreign commerce, which is an example of a field where concurrent powers exist between the President and the Congress.

The court said:

All parties recognize that if in fact Congress has preempted the relevant field of foreign trade and commerce, then the President lacks authority to act in a manner inconsistent with the requirements of the preemption legislation.

This 1973 case brings out the point I am making. Even if it can be shown by the administration that the treatymaking power possesses concurrent authority with Congress to deal with the disposal of property belonging to the United States, it loses this authority once Congress has acted on the identical subject.

Mr. President, in summary, I believe the evidence is overwhelming that the Panama Canal Treaty cannot take effect until Congress has passed enabling legislation; and I request the State Department or someone supporting the administration position to answer, if they can, Madison and the other framers of the Constitution who believed implementing legislation to be necessary in order to carry out treaties as the ones before us.

I am today submitting two amendments and a declaration which will allow us to vote on this matter, and so that my colleagues may review them. I ask unanimous consent that they shall be printed in the RECORD.

There being no objection, the amendments and declaration were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 84

At the end of article I, add the following: "5. The provisions of this Treaty relating to the disposal of any real property of the United States of America which is located in the former Canal Zone and which, on the day before the date of entry into force of this Treaty, was under the jurisdiction of a Secretary of a military department of the United States of America shall take effect only if the Congress of the United States of America enacts legislation providing for the transfer of such property to the Republic of Panama.

AMENDMENT NO. 85

At the end of article I, add the following: "5. The provisions of this Treaty relating to the disposal of property or territory belonging to the United States of America shall take effect only if the Congress of the United States of America enacts implementing legislation providing for the transfer of such property or territory to the Republic of Panama.".

DECLARATION NO. 1

Before the period at the end of the resolution of ratification, insert a comma and the following: "subject to the declaration that the United States shall not exchange its instrument of ratification of the Treaty until after the enactment of legislation which implements the provisions of the Panama Canal Treaty relating to the disposal of property or territory belonging to the United States by providing for the transfer of such property or territory to the Republic of Panama".

QUORUM CALL

Mr. GOLDWATER. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CHURCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

TREATY CONCERNING THE PERMANENT NEUTRALITY AND OPERATION OF THE PANAMA CANAL

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume the consideration of Executive N, 95th Congress, 1st session, which the clerk will report.

The assistant legislative clerk read as follows:

Executive N, 95th Congress, 1st session, treaty concerning the permanent neutrality and operation of the Panama Canal.

The ACTING PRESIDENT pro tempore. The pending question is on the agreeing to the amendment by the Senator from Alabama (Mr. ALLEN), on which there are 2 hours, to be equally divided and controlled by the Senator from Alabama (Mr. ALLEN) and the Senator from Idaho (Mr. CHURCH), and with the vote relating thereto delayed until 2 p.m.

Mr. CHURCH. Mr. President, I yield myself 1 minute.

A few days ago our distinguished colleague, Senator MCINTYRE, of New Hampshire, made a remarkable address in support of the pending treaties. For his action, he has been properly characterized as a profile in granite.

Today in the Washington Post, columnist Marquis Childs has written a column in praise of Senator MCINTYRE's courage.

Mr. President, I ask unanimous consent that the text of the Marquis Childs column be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MCINTYRE'S STAND AGAINST THE RADICAL RIGHT

(By Marquis Childs)

The Panama Canal treaties, heaven help the Republic! In the Senate chamber with its glossy pseudo-elegance, owing something perhaps to MGM, Sen. Harry F. Byrd Jr. (I-Va.) is droning on with all the vibrancy and dynamism of a sleepy night watchman in a marshmallow factory. He is repeating the warmed-over testimony of retired admirals and generals opposed to the treaties.

Tactics of obstruction and delay are dragging out the process of ratification until it has become an intolerable charade. The 15 or so undecideds have no real reason to perch on the fence, since all the arguments pro and con have been rehearsed a dozen times.

It has a welcome relief when with remarkable forthrightness and courage a senator who had every reason to duck and waver stood up and declared for the treaties. Thomas J. McIntyre (D-N.H.), whose term expires this year, is marked for extermination by the radical right led by Gov. Meldrim Thomson and his partner William Loeb, publisher of the Manchester Union-Leader.

"By proceeding from the flawed premise that all of us are alike," McIntyre said, "it is easy for ideologues to conclude that we must see every issue as they see it—unless there is something sinister in our motivation. And they proceed from that premise with an arrogance born of the conviction that they and they alone have a corner on patriotism, morality and Gods own truths, that their values and standards and viewpoints are so unassailable they justify any means, however coarse and brutish, of imposing them on others."

McIntyre had hardly finished speaking when Loeb opened up with a front-page editorial, a favorite device, attacking him and quoting him as having made a disparaging remark about the voters in his home town of Laconia. A wire service story in the same edition belied the quote in the Loeb editorial.

Elected to a short term and then twice reelected to full terms, McIntyre as a member

of the Senate Armed Services Committee has won a reputation for a sane and reasonable approach to defense and security. Under normal circumstances he would have little trouble this fall. But Thomson and Loeb, working with the state Conservative Caucus, are getting a firmer grip on the state.

Thomson has hinted he might run against McIntyre for the Senate seat. He is busy building himself up around the country as a leader of the radical right. In Los Angeles he made an inflammatory speech to a convention of the John Birch Society attacking President Carter for leading "America along the path of communism to national suicide."

If he runs for the Senate, he will give up what is likely to be sure reelection to a fourth two-year term as governor. Looking forward to 1980, Thomson puts a high premium on the governorship since, again, New Hampshire will be the first state with a presidential primary. That will be Thomson's opening to start the ball rolling for a conservative candidate.

That would presumably be Ronald Reagan, the former governor of California, although Loeb, whom McIntyre has called "the master practitioner of the politics of threat and vengeance," has some doubts about Reagan's conservation. The Thomson-Loeb partnership has been busy drumming possible Republican candidates out of consideration.

Foremost, of course, is Sen. Howard Baker of Tennessee, a leader of the pro-treaty forces. John Connally of Texas has been roundly denounced as a dangerous one-worlder. The only acceptable Republican is Sen. Robert Dole of Kansas. In the long winter in tax-free New Hampshire, they dream of tickets for 1980—Reagan and Dole or Reagan and Thomson or—but this is pretty far out—Thomson and Dole.

Even in his own fiefdom. Thomson is now and then rebuked. Accepting an invitation to visit South Africa, he called the State Department "un-American" and John Vorster "one of the great world statesmen of today." Fourteen of New Hampshire's religious leaders issued a statement saying that "our Christian consciences will not allow the [governor's] statement to go unanswered." And naturally Loeb rushed to Thomson's defense, calling the clergymen innocents who had been brainwashed and praising the regime in South Africa "for doing their best to bring these blacks out of the jungle."

McIntyre's decision in favor of the treaties was obviously not an impulsive act. He had spent many weeks in careful study of the treaties themselves and the pros and cons put forward at the start of the controversy.

His decision should be an example to waverers who face odds much safer than those that confront the senator from New Hampshire. The potential Republican opposition thus far is not too impressive. Leaving aside the weight in the political scales, McIntyre has stood up against the computerized New Right, and for that alone he deserves high marks.

AMENDMENT NO. 77

The ACTING PRESIDENT pro tempore. The Senator from Alabama.

Mr. ALLEN. May I ask the clerk to state the amendment which is the pending business?

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN), for himself, Mr. NUNN, Mr. HARRY F. BYRD, JR., Mr. DOLE, Mr. HELMS, Mr. LAXALT, Mr. HATCH, and Mr. THURMOND, proposes an amendment numbered 77:

To strike out the period at the end of Article V and insert in lieu thereof a comma and the following: "subject to the condition, to be included in the instrument of ratification of the Treaty to be exchanged with the Republic of Panama, that nothing in this Treaty shall preclude the Parties from making in accordance with their respective constitutional processes any agreements or arrangements to facilitate performance at any time after December 31, 1999, of their responsibilities to maintain the regime of neutrality established in the Treaty, including agreements or arrangements for any United States military presence after that date in the Republic of Panama that the Parties may deem necessary or appropriate."

Mr. ALLEN. Mr. President, I yield such time as he may require to the distinguished Senator from Virginia, Mr. HARRY F. BYRD, JR., who is one of the cosponsors of the amendment.

Mr. HARRY F. BYRD, JR. Mr. President, the pending proposal, as I understand it, was drafted by the distinguished Senator from Georgia (Mr. NUNN), who is a cosponsor of the amendment offered by the Senator from Alabama (Mr. ALLEN).

The Senator from Georgia, in drafting this proposal, has considered offering it as a reservation to the treaty. If it is going to have greater meaning, it should be incorporated in the treaty as an amendment.

This proposal, as I view it, is not nearly strong enough. As a cosponsor of this amendment, I would prefer that it be a much stronger amendment. However, if it is to be considered as a reservation—and I understand that was the original proposal—I think it would be much better to incorporate it into the treaty as an amendment.

What this amendment seeks to do is to make clear that if the proposed new treaties are approved, the United States will not be prevented by these treaties from discussing with the Republic of Panama the possibility of continuing to have the use of what are now American military bases in the Canal Zone.

(Mr. SARBANES assumed the chair.)

Mr. HARRY F. BYRD, JR. Mr. President, what these proposed treaties do is give to the United States the duty and the obligation of defending the neutrality of the canal, but, simultaneously, it denies to the United States the rights to use military bases in the Canal Zone in order to protect the Panama Canal.

As the able former chairman of the Joint Chiefs of Staff, Admiral Moorer, told the Committee on Armed Services, speaking as a military expert, if these treaties are approved, the United States would be assuming an obligation, assuming a duty, as Dictator Torrijos stated, a duty to defend the canal. Yet we would not have the tools with which to make possible that defense. The pending amendment—and I emphasize it was drafted, I understand, by the Senator from Georgia (Mr. NUNN) as a reservation—would give the United States some little leeway, at least, in opening negotiations with Panama for the continued use of what are now American bases there.

Mr. President, as I have listened to this debate through many days, spread over a period of 3 to 4 weeks, I have heard so much said about what we must do in the way of making concessions and giving away American property to the Republic of Panama. We must do this, the proponents say, in order to develop more friendly and amicable relations with that nation. Well, the way that argument impresses me is that it is the same old philosophy that the U.S. Congress and the U.S. Senate have been using for so long now, that the way to operate our foreign policy is to use our financial resources to try to buy the friendship of other nations. I am convinced, Mr. President, that we, as individuals, cannot buy friends. I am convinced that we, as a nation, cannot buy friends.

The one difference between the Panama Canal Treaty and the vast foreign aid programs that this country has been utilizing for so many years, the basic difference is that along with giving Panama vast sums of American tax dollars, we will also be giving Panama a vast amount of property now owned collectively by the taxpayers of the United States.

According to the Panama Canal Company, the depreciated book value of American-owned property in Panama is approximately $1 billion. According to the Panama Canal Company, the replacement value of the canal, of the port facilities, of the air bases, of the other military bases that the United States has built there, approaches $10 billion. All of that will be given away. All of that will be given away if these treaties are ratified. Along with all of that property, along with an expanded foreign aid program to Panama, the United States will be simultaneously denied the right to use these bases in the defense of the Panama Canal should it be necessary to go to the defense of that waterway in order to keep it open. That Panama Canal is vitally important to the United States; it is important from a defense point of view; it is important from an economic point of view.

I think the American people, as they hear more of these debates, are coming more and more to realize that these treaties are very dangerous to the welfare of the United States, as well as being very expensive to the taxpayers of the United States.

I, for one, am very reluctant to have our Government, our Nation, assume the duty of keeping open and defending the Panama Canal and yet, simultaneously, denying ourselves the right to use any property there for the purpose of accomplishing the result of defending that canal.

The pending amendment, sponsored primarily by the able Senator from Alabama (Mr. ALLEN) and cosponsored by the Senator from Georgia (Mr. NUNN), by myself as Senator from Virginia, by the Senator from Kansas (Mr. DOLE), by the Senator from North Carolina (Mr. HELMS), by the Senator from Nevada (Mr. LAXALT), by the Senator from Utah (Mr. HATCH), and by the Senator from South Carolina (Mr. THURMOND), seeks at least to keep open the door a little bit by stating that nothing in the treaties shall prevent the United States from opening discussions with Panama so that,

in the future, we might be able to use bases there if it becomes necessary.

I say again that, in my judgment, this amendment is not strong enough, it does not do the job. But unless we are going to take the view that we do not want to even leave open the possibility of negotiating for the use of these bases, then I think it would be very desirable for the Senate to adopt the pending amendment. I should prefer a much stronger one and perhaps, at a later date, a stronger one will be offered. In the meantime, this is a vehicle, an amendment that would be desirable, I feel, to add to the pending treaties.

I thank the Senator from Alabama.

Mr. ALLEN. Mr. President, I thank the distinguished Senator from Virginia for his eloquent, forceful, and analytical remarks, which certainly show that if this proposition is to be added anywhere, it needs to be added as an amendment to the treaty rather than as a reservation.

Mr. President, I will yield to the distinguished Senator from Idaho if he wishes to answer the distinguished Senator from Virginia.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. ALLEN. Mr. President, I yield myself such time as I may require.

Mr. President, two propositions that I have addressed remarks to were discussed yesterday by the distinguished Senator from New York (Mr. JAVITS). One of these principles was a point of order that I raised with respect to the leadership amendment on the ground that it was not an amendment, even though it was so labeled on the sheet of paper on which the amendment was printed.

I contended in raising the point of order that the paper really was only an understanding. I made the point that all it did was to give a construction of words that were already in the treaty, to give the understanding of the United States with respect to the language of the treaty, and that it added no substance to the provisions of the treaty.

The Chair ruled against my point of order and I did not take an appeal.

I find that on yesterday, Mr. JAVITS, who certainly is a well-recognized authority on international law, certainly one of the ablest Members of the Senate, if, in fact, not the ablest, and certainly in my judgment he is the ablest Member of the Senate, said, not discussing this point of order that I raised, but still discussing this principle, and I quote from his remarks appearing in today's RECORD at page 6546:

> It seems quite settled in terms of international law that there are two propositions. Proposition No. 1 is that whether you call something an interpretation, an understanding, or a reservation, that does not make it so, just because you give it a name. That is just as true of the word "amendment." In short, everyone of these things has to be agreed on by the other government before it becomes an element of agreement between the parties.
>
> The only question, therefore, is the juridical question: If we do ratify this treaty as it is, has the other government accepted it in a perfectly and proper and legal way?

So, Mr. President, I appreciate the recognition, and I so regard it, by the distinguished Senator from New York (Mr. JAVITS), after the fact, that no matter what a document calls itself, it is judged by what it does.

All the leadership amendment does is to insert an understanding as to the meaning of the treaty.

It would seem to me that the point of order should have been sustained.

I have also made this proposition, and enunciated this principle, as the leadership has stonewalled against all amendments, as they are calling on the Senate to give its approval to these treaties without changing a single word in the treaty except for the leadership amendments that they say occupy a different status. They are asking us not to amend the treaties other than the leadership amendments, saying that any amendment is going to kill the treaties. Well, I differ with that.

Even if they did call a new plebiscite, why would that kill the treaty?

But I made this statement, Mr. President, that no matter how often or in what manner we amend these treaties, Mr. Torrijos is going to say, and he is the one-man government, as we all know, in Panama, "These amendments are acceptable. It is perfectly all right. I will send a note transmitting an instrument of ratification."

He is not going to give up the $100 million a year that his government is going to receive just because amendments have been added here in the Senate. So, why this fear of amendments? Why should not the Senate be allowed to shape these treaties? Why should we be told to take the treaties just as they are, following the leadership amendments, which are absolutely inadequate, as I view them, to protect our national interests?

I have contended that, no matter what we do with regard to amending the treaties, they will be accepted and, if they are accepted, Mr. President, I have contended that there will be nothing that we can do about it.

We cannot question the validity of their acceptance. If they say they have accepted the treaty after we have finished amending it, well, it is accepted by the Government of Panama and we cannot question that acceptance.

Let us see what the distinguished Senator from New York (Mr. JAVITS) said, not on the contention that I am making right at this moment, but generally. Let us see what he says about that, reading further from page 6546 of today's RECORD, reflecting yesterday's proceedings:

> And the other fundamental proposition, which I gather from the international law on the subject, is that it is the determination of that government, with relation to its constitutional processes, which is not open to collateral attack. If that government decides that it ratifies its constitutional processes, by which it does ratify, so long as it is a recognized government within international law—it certainly is by the United States—that represents the acts of that government.

Exactly what the Senator from Alabama has been contending all along.

But amendments have been offered here on the floor by Senators who are trying to strengthen these treaties and the leadership, having, certainly, a substantial majority of Senators supporting their position, says that they are either frivolous, or they are redundant, or they are unnecessary, but, certainly, not to be agreed to. That is what we are faced with, Mr. President, if we try to strengthen these treaties.

I maintain that no Senator can say categorically and with certainty that any amendment or any series of amendments would cause the defeat of these treaties at the hands of Panama.

I read from Mr. JAVITS' statement on yesterday:

> If that government decides that it ratifies its constitutional processes by which it does ratify—

I think his language was taken down in jumbled fashion, possibly in the printing—

> so long as it is a recognized government within international law—it certainly is by the United States—that represents the acts of that government.

Going back several lines: "which is not open to collateral attack."

So if Torrijos said, "I ratify it," the Government of Panama ratifies it. How are we going to say it was not properly ratified? It is not open to collateral attack.

Mr. JAVITS says that his remarks are confined to the leadership amendments, but I would say that what is sauce for the goose would be sauce for the gander. Just because the leadership amendments would be all right and might be accepted without a plebiscite, why should amendments offered by those who are not part of the monolithic leadership group not be all right as well?

Mr. President, we have tried to amend these treaties in order to protect the interests of the United States and our right and our ability to defend the canal after the year 2000. Here, again, I suppose the public wonders why in the world we are working on a treaty which does not go into full effect until the year 2000, when we have not even decided the question of whether or not we are going to give the Panama Canal away and the conditions under which we are to give it away. Yet, that is what the leadership has decreed the Senate must do. They put this treaty first, even though we tried to shift the order of consideration back to the realistic position of considering first whether we are going to give the canal away, before we worry about defending it in the year 2000.

Under the treaties—and I am leading up to why we are offering this really weak amendment—we tried to give the President of the United States the option to keep our troops in Panama after the year 2000 because, under the treaty, all our troops, every one of them, has to be out of Panama by the year 2000. We sought to amend the treaties to provide that if the President of the United States deemed that it was necessary, for the defense of the canal and for maintaining its neutrality, to keep a military presence in Panama beyond the year

2000, by so certifying to the Government of Panama, we could do so.

The leadership rejected that amendment. Under their system, they gave us have the right to defend the canal; but, as the distinguished Senator from West Virginia (Mr. ROBERT C. BYRD) said, they deprive us of the means of defense because all our troops have to be out of Panama. How are we going to defend it from outside unless we invade Panama for that purpose?

Also, the leadership amendment says that as we do exert our efforts to defend the canal after the year 2000, we cannot do anything to interfere with the internal affairs of Panama, we cannot do anything that would encroach on the territorial integrity of Panama, and we cannot do anything to upset the political independence of Panama—which means, without exactly coming out and saying so, that we cannot do anything to upset the dictatorial regime in Panama.

Then we had an amendment, the leadership having turned thumbs down on that, that said:

> Well, if we are in a state of war, if the United States is at war with another nation, we would be allowed to keep troops in Panama beyond the year 2000 and 6 months after the expiration of the state of war.

The leadership said, "No. That is a bad amendment. We cannot take that."

If we are at war, we have to pull out, and thereby deprive us of our right to maintain troops in the Panama Canal Zone for the defense of the canal.

That amendment was rejected. Other amendments were offered, one after another, giving us, the United States, some opportunity to maintain troops in Panama beyond 2000, if it were necessary for the defense of the canal, under varying cricumstances, stating in different language the circumstances under which they would be allowed to stay. Every one of those amendments was turned down.

So, with respect to strong amendments giving us well-defined rights to keep troops in Panama if it were necessary for the defense of the canal, the leadership has turned those down. They say, "Approve it like it is. Don't change a word."

Mr. President, I believe the U.S. Senate should occupy a little loftier role than that. This is not just a debating society, to debate this issue, and then the leadership say, "Well, you debated it long enough. Let's vote now and vote it down." And that is what happened.

A number of Senators are being talked with by the administration and the leadership—I assume that is the joint leadership—about "What will it take to get you to vote for these treaties?" I think it is rather interesting, Mr. President, right here in the last couple of days of consideration of these treaties, that the administration and the leadership are having to literally move heaven and earth to try to get these treaties through the Senate. What is wrong with the treaties, if they cannot get Senators in sufficient number to come over to supporting the treaties? There is plenty wrong with the treaties, Mr. President.

In the first place, the canal should not be given away. In the second place, it should not be left without adequate defense by the United States.

So, in effect, Mr. President, the leadership and the administration—and if I am wrong in these assertions, I am sure that I will be corrected when the leadership speaks on this amendment—in effect they are saying, "What will it take to get you to vote for these treaties?" I have not been questioned on the subject, but I have been informed by Senators who have been questioned. I cannot support the treaties. I cannot vote to give the canal away.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. ALLEN. Yes; I yield.

Mr. ROBERT C. BYRD. Mr. President, speaking for the leadership, the leadership has never asked any Senator what it will take to get him to vote for these treaties. The leadership has tried to explore the concern of the Senators, but not only Senators who are not yet committed, but also Senators who are already committed, and out of those discussions have come certain reservations which will be offered by Senators and which I hope will be approved.

But let me debunk the Senator's idea and any thought of such an idea that the leadership has approached other Senators to ask them what it would take to get their votes.

Mr. ALLEN. Very well.

Has the Senator agreed to support the Nunn reservation?

Mr. ROBERT C. BYRD. I will support it.

Mr. ALLEN. I think that answers the question and justifies my position.

Mr. ROBERT C. BYRD. Is the Senator saying that I asked Senator NUNN what it would take to get his vote?

Mr. ALLEN. Possibly that was not the right wording, but the Senator has agreed to support the Nunn reservation, and the Senator understands that, in return for this reservation being agreed to, the distinguished Senator from Georgia will vote for the treaties; is that correct?

Mr. ROBERT C. BYRD. No commitments were requested and none were made.

Mr. ALLEN. I see.

Mr. ROBERT C. BYRD. I just want to make the record clear. I do not want the Senator to get away with any kind of statement that the leadership has asked Senators what it would take to get their votes.

Mr. ALLEN. Since the Senator has raised this question, has the distinguished majority leader requested any Members of the Senate to vote for the treaties?

Mr. ROBERT C. BYRD. I have talked with Senators.

Mr. ALLEN. Sir.

Mr. ROBERT C. BYRD. I have talked with Senators about their votes on the treaties. But I have never said "What will it take to get your vote?" That is my responsibility.

Mr. ALLEN. I was not giving that as a direct quote of the Senator. I was giving that as the effect of what is taking place here.

Mr. ROBERT C. BYRD. The Senator implies that when he says, you see—that is the implication, that is the inference, that people who are listening to this debate are to draw, and it is the wrong inference. I do not intend to sit idly by and let that inference be drawn without challenging it.

Mr. ALLEN. Very well.

Since the Senator is raising this point then, has the Senator discussed with Senators just what they would like to have in the treaties?

Mr. ROBERT C. BYRD. I have discussed with the Senators what their concerns—the Senator smiles as though he has scored a point. I have discussed not only with Senators who are not committed but also Senators who are committed. I am a Senator who is committed, and I had some understandings and reservations drawn myself.

I am not going to offer those, but I will join with others who are. But I was committed, and other Senators are committed, with whom I have explored the same concern, and some of the Senators who are committed will probably join in cosponsoring the reservation.

Mr. ALLEN. The Senator then, to use his words, has spoken to other Senators about the concerns they have with respect to the treaties that have prevented them from voting for the treaties.

Mr. ROBERT C. BYRD. In answer to the Senator, I have spoken with Senators who are committed against the treaties about their concern.

Mr. ALLEN. In an effort to get them to——

Mr. ROBERT C. BYRD. Oh, no, not in an effort to change their votes. What has the Senator done? He started out months ago against these treaties from the beginning—and I respect him for that. He has stood up for his viewpoint, but he has from the very beginning taken a position against the treaties.

Mr. ALLEN. That is correct.

Mr. ROBERT C. BYRD. It does not make any difference what reservations are relevant, what reservations have been offered, it makes no difference. He made up his mind early. He has been against the treaties from the beginning.

Mr. ALLEN. That is right.

Mr. ROBERT C. BYRD. He offered amendment after amendment after amendment.

Mr. ALLEN. That is right.

Mr. ROBERT C. BYRD. I suppose perhaps not so much in the hope that they will be agreed to but, perhaps, in the hope if they are agreed to they will defeat the treaties, because that is what his object is. He makes no bones about that.

Mr. ALLEN. Well, the distinguished majority leader, talking to Senators who are uncommitted, about their concerns——

Mr. ROBERT C. BYRD. And Senators who are committed.

Mr. ALLEN. All right. Talking to Senators who are committed about their concerns, I do not believe, and if I am in error I am sure the distinguished majority leader will point it out, I do not believe the distinguished majority leader has asked the Senator from Alabama

what has concerned him about the treaties.

Mr. ROBERT C. BYRD. No, because the Senator from Alabama was against these treaties from the beginning, before he listened to the debate, before he saw the committee report, before he did anything. He announced his position. He was against the treaties, period. That is it.

Mr. ALLEN. Yes.

Mr. ROBERT C. BYRD. I will be glad to talk with the Senator about his concern, but I do not think it will do any good for me to talk to him about it.

Mr. ALLEN. The Senator was not concerned about what concerned the Senator from Alabama then?

Mr. ROBERT C. BYRD. I am answering the Senator's question.

Mr. ALLEN. I asked the Senator a question. I do not recall the Senator's asking me a question. What was the question? What is your question?

Mr. ROBERT C. BYRD. I responded to the Senator's statement that I had not contacted him about his concerns.

Mr. ALLEN. Well, did the Senator contact me about my concerns?

Mr. ROBERT C. BYRD. No. I said there was no reason to.

Mr. ALLEN. In other words, somebody you knew was not going to change his mind you did not bother to contact him, but you did talk to people who were not committed to the treaties; is that correct?

Mr ROBERT C. BYRD. And people who were committed, I repeat it for about the third time.

Mr. ALLEN. Very well.

The Senator from Alabama did not come to this position just recently, and I might say I took the stand on this issue and had it in my newsletter in October 1971.

Mr. ROBERT C. BYRD. And made 24 speeches, good speeches, excellent speeches.

Mr. ALLEN. I believe the Senator from West Virginia back in 1974 had a different position from what he has now, did he not?

Mr. ROBERT C. BYRD. Yes, I am glad to respond to that question. The Senator from West Virginia in 1974 did not have before him these treaties, but now we have treaties that have been negotiated over a period of 13 years under four Presidents and under both political parties, so we now have two treaties that are the results of those negotiations.

In my opinion, after having carefully studied the treaties, read the committee report, studied the hearings, gone to Panama with the senatorial delegation to ascertain facts for ourselves, I have come to the conclusion that these two treaties are to the advantage of the United States, and that to renegotiate them, as we might have to do if an amendment were to be agreed to, would, I believe, not redound to the best interests of the United States, and I do not think a renegotiation, which would result from the attaching of any of the Senator's amendments to the treaties——

Mr. ALLEN. I disagree with the Senator.

Mr. ROBERT C. BYRD (continuing). Would result in treaties that would be as advantageous to our own country as are these.

So, yes, in 1974 I was speaking to a concept, an idea. Someone passed around a resolution or something asking, "Will you sign?" It is a little bit like the catch phrases that have gone out during the debate on this treaty, "Do you believe in giving the Panama Canal away," or some such, and that was an idea that was a concept that was not before the Senate.

But we have a different situation here. We have the real thing before us. We have the treaties before us that have resulted from all of these negotiations under both parties and under four Presidents, and the time is coming to show down on it, and so I reached my decision after careful thought, after careful scrutiny of the treaties. I have come to the conclusion that they are in the best interests of the United States.

So I think that a man who changes his mind shows he is a wiser man today than he was yesterday because today he sees, he studies, he has thought the matter through, he has something before him, and he decides to come down to that. He should not be held to something he may have said in 1974 when he did not have these treaties, precisely these treaties, in front of him, you see. So I am glad the Senator gave me the chance to argue.

Mr. ALLEN. I appreciate that. I just wonder why, the Senator is talking about having something before him and not having anything before him before, and I wonder why he was so quick to come to a conclusion in 1974 without having anything before him?

Mr. ROBERT C. BYRD. Well, I do not know, I do not know. Perhaps it was a mistake, but the Senator from Alabama came to a quick conclusion.

Mr. ALLEN. Yes, he did. He made a study of it at that time.

Mr. ROBERT C. BYRD. The Senator from Alabama came to a quick conclusion when he had nothing before him.

Mr. ALLEN. He had something before him because these negotiations were before him for 13 years.

Mr. ROBERT C. BYRD. But he did not have the treaties before him.

Mr. ALLEN. No.

Mr. ROBERT C. BYRD. He looked at it, he just looked at the pig in a poke and he said, "I am against it, period." He made 24 speeches.

Mr. ALLEN. Yes, and I have stuck by them.

Mr. ROBERT C. BYRD. Absolutely, the Senator stuck by them.

Mr. ALLEN. The Senator shifted his position.

Mr. ROBERT C. BYRD. No, no. This Senator has not shifted his position.

Mr. ALLEN. Then I misunderstood the Senator. I thought he said in 1974 he was against it, now he is for it.

Mr. ROBERT C. BYRD. No. My position has been the same, one and the same, once I had the treaties before me. I had an opportunity to study them, study them carefully, study the hearings, went into the matter very thoroughly, finally reached my decision, and I stuck to that decision.

Mr. ALLEN. Well, I understood the Senator to say in 1974 he was opposed to the concept of giving the Panama Canal away.

Mr. ROBERT C. BYRD. The Senator did not misunderstand me. There was no treaty text before us in 1974; the Senators knows that.

Mr. ALLEN. No, no treaties, but you opposed giving the canal away at that time.

Mr. ROBERT C. BYRD. Oh, giving it away.

Mr. ALLEN. Yes.

Mr. ROBERT C. BYRD. Listen to this catch phrase. We are not donating it.

Mr. ALLEN. Well transferring it, whatever you call it.

Mr. ROBERT C. BYRD. Well, I am using the Senator's words.

Mr. ALLEN. Yes; that is giving it away.

Mr. ROBERT C. BYRD. All right.

Mr. ALLEN. Very well; the distinguished Senator made a statement that I am going to reply to. I would say to the distinguished majority leader that I hate to respond harshly to the statement of the Senator, but when he came in to the floor from his office after having heard my remarks on the floor, he was speaking in pretty harsh terms to the Senator from Alabama.

Mr. ROBERT C. BYRD. I did not mean to be harsh. I was simply stating the leadership position and defending the leadership against a charge. I did not think that charge ought to go unanswered. The charge was that the leadership sought to find out from Senators what would get their vote, implying that the leadership was asking Senators to sell their votes.

Mr. ALLEN. No, no.

Mr. ROBERT C. BYRD. I am not talking about money.

Mr. ALLEN. No, the Senator from Alabama is not that desperate.

Mr. ROBERT C. BYRD. Well, but you were implying——

Mr. ALLEN. Mr. President, I did not make any such statement.

Mr. ROBERT C. BYRD. Whatever the Senator said, the leadership has not asked any Senator what it would take to get his vote. No Senator.

Mr. ALLEN. All right. So you asked them what their concerns are; is that right?

Mr. ROBERT C. BYRD. Yes; if the Senator wishes——

Mr. ALLEN. Very well, I will amend my remarks, then, to say that the leadership has asked Senators on both sides of the question what their concerns are about the treaty, and Mr. NUNN having expressed his concerns, the distinguished majority leader has agreed to support the reservation that he has entered.

Mr. ROBERT C. BYRD. He asked me if I would allow him to put my name on the reservation, and I said, "Yes."

Mr. ALLEN. Yes. Well, now, I might invite the distinguished Senator, inasmuch as the pending amendment is the precise wording of the Nunn reservation, only it is an amendment to the treaty, if he would also be willing to add his name as a cosponsor of this amendment.

Mr. ROBERT C. BYRD. I would like to ask the Senator——

Mr. ALLEN. And if not, why not?

Mr. ROBERT C. BYRD. I will be glad to answer that, but I would like first to ask the Senator, if his amendment is adopted, will he vote for the treaties?

Mr. ALLEN. No, I will not do that, because this amendment is practically meaningless, just like the reservation is practically meaningless.

Mr. ROBERT C. BYRD. So the Senator is doing a vain thing.

Mr. ALLEN. Yes; I have done a lot of vain things. I have offered two dozen amendments, all of which have been stonewalled by the leadership, which is proof that the leadership is stonewalling every amendment except the leadership amendments, and asking the Senate to rubberstamp those.

Mr. ROBERT C. BYRD. No, we are not stonewalling. When the Senator offered amendment after amendment, he finally saw that his stonewalling was not having any effect, and he withdrew his amendments. That was where the stonewalling occurred.

Mr. ALLEN. I do not quite get the connection on stonewalling.

Mr. ROBERT C. BYRD. The Senator never gets the connection except when he is using the word.

Mr. ALLEN. Well, let me respond, since I have the floor. I would feel that stonewalling is resisting someone's efforts to do something. The Senator from Alabama has been seeking to strengthen these treaties by giving defense rights to the United States as to the canal. Now, that is not stonewalling; that is fighting against the stonewalling which the leadership is doing.

I note that the Senator is conferring with staff.

Mr. ROBERT C. BYRD. I am not conferring with staff.

Mr. ALLEN. I hope they give a good suggestion to him. I have no staff people assisting me.

Mr. ROBERT C. BYRD. Well, the Senator from West Virginia can take care of himself very well.

Mr. ALLEN. Yes, I know the Senator can.

Mr. ROBERT C. BYRD. And without any staff people.

Mr. ALLEN. Yes.

Mr. ROBERT C. BYRD. I did not ask the staff people one word; not one. They had asked something of me, and I had the courtesy to listen.

Mr. ALLEN. I want to ask the distinguished Senator——

Mr. ROBERT C. BYRD. I have not answered the Senator's question yet. The reason why I opposed this amendment is that any amendment to this treaty, in my judgment, automatically opens it to renegotiation. A reservation does not automatically open the treaties to renegotiation, and the position of the leadership has been that as they are drawn and as they have been negotiated throughout 13 years of negotiation, these treaties represent the most advantageous treaties that we can expect to get in this situation. Any amendments would open them up to renegotiation, which would allow the other party to put forth new demands; and it is for that reason that we have opposed the amendments.

Mr. ALLEN. Yes. I thank the Senator. I want to disagree with him on his feeling or his contention that an amendment would cause a renegotiation of the treaties, or that an amendment would, as the distinguished Senator from West Virginia, the majority leader, has said on more than one occasion here—that certain amendments that the Senator from Alabama offered would, if adopted, kill the treaties. I want to comment on that.

In my judgment, no number of amendments would of necessity kill the treaties or subject the treaties to further negotiation. We are dealing with a one-man government. If he says that the treaties are satisfactory, he can accept the treaties, and we would not be able to raise any question about them.

I do not feel that dictator Torrijos is going to turn down the $100 million a year that he would get under these treaties—and I am not picking that figure out of the air. Economic Minister Baretta of Panama said that in the 22 years of the Panama Canal Treaty, Panama would receive $2,262 billion. That is a little over $100 million a year. He is not going to allow a few amendments to keep him from receiving this $100 million a year, because it will prop up his dictatorial regime there in Panama.

Now I want to quote from the distinguished Senator from New York (Mr. JAVITS) on yesterday, as to the point of us being able to go beyond their concept of what it takes to agree to the treaties after we amend them here. It is on page 6546 of yesterday's CONGRESSIONAL RECORD, the RECORD that came out today:

> And the other fundamental proposition, which I gather from the international law on the subject, is that it is the determination of that government, with relation to its constitutional processes, which is not open to collateral attack. If that government decides that it ratifies its constitutional processes, by which it does ratify, so long as it is a recognized government within international law—it certainly is by the United States—that represents the acts of that government.

So, Mr. President, in my judgment—and I guess I am entitled to have a judgment on it, just as the distinguished Senator from New York has a right to have a judgment——

In my judgment, if we add dozens of amendments to the treaty, Mr. Torrijos would submit the matter to a plebiscite or he can say, well, this is within the spirit of the treaties and it is within the spirit of the memorandum that I agreed to with the President. They are OK with me. And all he would have to do is send a note of ratification to the President and we would not be able to question, in my judgment, because Senator JAVITS says it is a recognized government in international law and we would not be able to——

Mr. GRIFFIN. Will the Senator from Alabama yield for a very brief inquiry?

Mr. ALLEN. Yes, I will.

Mr. GRIFFIN. I have something I want to say about the spirit of the pending amendment before we vote. I do not know whether——

Mr. ALLEN. I yield some time to the distinguished Senator from Michigan.

Mr. GRIFFIN. This has been an interesting discussion but I——

Mr. ALLEN. The Senator from Alabama did not initiate the discussion. My good friend over there, the distinguished majority leader, initiated this peripheral discussion, but——

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. ALLEN. I would say to the distinguished Senator from Michigan, if the distinguished majority leader would bear with me for a moment, that I admit it is a weak amendment. I have tried to put strong amendments in. We were prevented from doing that by a vote of the Senate. This is the reservation, and I wish the distinguished majority leader would state—he is looking at the Senator from Alabama's amendment—if this is not in fact the wording of the nonreservation that he says he is going to support, but since we have been unable to get strong amendments adopted, the Senator from Alabama and some 10 cosponsors of the amendment said that it would be stronger as an amendment rather than as a reservation because the distinguished majority leader said that reservations do not take any negotiation.

Now, I yield——

(Mr. CHURCH assumed the chair.)

Mr. SARBANES. Will the Senator yield on our time?

Mr. ALLEN. I yield to the distinguished Senator from Michigan.

Mr. SARBANES. In fairness to Senator JAVITS——

Mr. ALLEN. I read it word for word.

Mr. SARBANES. You did not read it all. That is the trouble.

The PRESIDING OFFICER. The Senator on his own time may read anything he wants.

Mr. SARBANES. I appreciate that. I appreciate the Senator from Michigan deferring—I do think this is time to respond to the Senator from Alabama, if I may.

The distinguished Senator from Alabama in quoting Senator JAVITS should have kept on reading. It is all fine and good to take part of the quotation and not go on with the balance of it.

Mr. ALLEN. I took three or four paragraphs.

Mr. SARBANES. I agree with the Senator's laudatory comments earlier about the abilities of the distinguished Senator from New York. Right after the section the distinguished Senator from Alabama read, the able Senator from New York continued on in the RECORD to say—and I am now quoting Senator JAVIT'S:

> And having been to Panama and gone over the question with Torrijos himself, the end result is that that government, acting through its own processes, according to its constitution, construes the plebiscite which was taken as having approved this treaty with all that it means and all that the memorandum of understanding between the President of the United States and General Torrijos, the leader, as he is called, of the Republic of Panama, represented the understanding which is already contained in the treaties.
>
> Now, we construe it to require amendment and so we made an amendment. They have simply stated that the way they put it to

their people by this agreement simply carried out what was in the treaty already.

And then later the Senator questioned Senator JAVITS.

Mr. ALLEN. That is right.

Mr. SARBANES. And Senator JAVITS was very careful in his response to the Senator from Alabama and the Senator from Alabama said to Senator JAVITS—and I hope he will track me now in the RECORD because I am going to quote him.

Mr. ALLEN. Wait a minute. Is the Senator skipping about?

Mr. SARBANES. I am now on page S3519.

Mr. ALLEN. The Senator is skipping about.

Mr. SARBANES. I am moving——

Mr. ALLEN. I did not think the Senator wanted to do that.

Mr. SARBANES. I am moving to the exchange between the Senator from New York and the Senator from Alabama.

Mr. ALLEN. What is the intervening part?

Is the Senator worrying about me and just reading part of what——

Mr. SARBANES. I am happy to go on reading the intervening part.

Mr. ALLEN. I read three or four paragraphs without skipping at all. Now the Senator is skipping about.

Mr. SARBANES. Well, Senator JAVITS then continued.

Let us read the intervening part because it only bolsters further the argument I am making:

Now, how they construe it and how we construe it does not matter. The end point is that we agree and that we agree juridically as two governments on these propositions. They, say, well, the treaty said so anyhow. We said, so let us put it in writing.

I have used that argument here before and we have put it in writing, and it is just as much a matter of the treaty and a part of the contract as if it were an amendment, but how they approved that is something which they as a government judge and they have judged, based upon their juridical and their constitutional processes, that they can ratify this treaty as it is, if it contains these two amendments which we have made or without a plebiscite. Now, the last proposition, Mr. President, is I think a very important one and that is the standing and status in international law of the Panamanian Government. There is no question about the fact that we recognize it and that it is generally recognized throughout the world as the legitimate Government of Panama, and that an international law for these purposes—

Mr. ALLEN. Just a moment. If I might ask the Chair, who has the floor?

Mr. SARBANES (reading):

of treatymaking is not subject to collateral attack.

Mr. ALLEN. I approved——

The PRESIDING OFFICER. The Senator from Maryland has the floor.

Mr. ALLEN. Mr. President, I suggest to the distinguished Senator that I have yielded only for him to make a comment. I did not yield the floor.

Mr. SARBANES. Well, the Senator has asked me to read from the CONGRESSIONAL RECORD.

The PRESIDING OFFICER. It is the understanding of the Chair that the Senator from Maryland has asked to speak.

Mr. ALLEN. That is not the understanding of the Senator from Alabama.

Since the Chair has overruled me, I will also be very careful not to yield to the distinguished Senator from Maryland at his request if that is what the Chair is going to approve.

Mr. ROBERT C. BYRD. Mr. President, I respectfully say to the Chair that it was my understanding that the Senator from Alabama yielded to the Senator from Maryland for the purpose only of reading some matter from the RECORD on the Senator from Maryland's own time.

Mr. SARBANES. On my time, but I do think he did——

Mr. ALLEN. The Senator——

Mr. ROBERT C. BYRD. But I did not think that the Senator from Alabama had yielded the floor.

Mr. SARBANES. I think that is correct.

The PRESIDING OFFICER. The Chair understands correctly, and the Senator from Alabama still has the floor.

Mr. ALLEN. I thank the distinguished Presiding Officer, the distinguished Senator from Idaho (Mr. CHURCH) for his revised ruling.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield for a unanimous-consent request only.

Mr. ALLEN. I yield.

COMMITTEE MEETING

Mr. SARBANES. Mr. President, I ask unanimous consent that the Subcommittee on Employment, Poverty and Migratory Labor and the Subcommittee on the Handicapped of the Human Resources Committee be authorized to meet during the session of the Senate today to hold hearings on the reauthorization of Head Start and other programs within the Community Services Administration.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SARBANES. Proceeding on my own time, because the Senator was anxious that we set out the whole statement and I think in fairness to Senator JAVITS we should do so. Senator JAVITS then went on:

I have summarized the legal situation which motivated the Foreign Relations Committee to act as it did.

And he then introduced in the RECORD a textual brief from the State Department.

The Senator from Alabama then questioned Senator JAVITS.

Mr. ALLEN. Correct.

Mr. SARBANES. And the Senator from Alabama asked him:

The Senator seems to be saying—I hope he will correct me if I am wrong—that if the Senate should amend one of the treaties or both of the treaties in ways, in addition to the leadership amendment, that the Government of Panama, that being, I assume, Dictator Torrijos, could determine whether or not its constitutional processes required the submission of the amended treaties to further plebiscite.

Is that correct?

And Senator JAVITS responded:

The Senator is not making any broadscale generalizations of that character. The Senator is confining himself to this particular agreement between President Carter and Mr. Torrijos. I do not know what other amendment the Senate may adopt. When we adopt it, I will give my opinion on that one, but all I am discussing now, as a matter of law, as I see it, is this particular situation, and on this particular situation I do not feel that our ratification requires the condition that there be another plebiscite in Panama. That is what I am saying.

And the Senator from Alabama pursued that same point with the Senator from New York and he continued to respond in the same vein throughout the questioning.

Now in fairness to the Senator from New York, I think it ought to be recognized that what he addressed himself to was the joint statement, of the two national leaders and the amendments of the leadership which put that statement into the treaties.

Mr. ALLEN. Wait a minute. The Senator——

Mr. SARBANES. And the fact that the substance of these amendments had been put to the people of——

Mr. ALLEN. Well, the Senator is departing.

Mr. SARBANES (continuing). Panama in the plebiscite.

Mr. ALLEN. I thought the Senator wanted to read what Senator JAVITS said.

Mr. SARBANES. I did read what Senator JAVITS said.

Mr. ALLEN. Let us finish it because there is more to come.

Now if the Senator wants to read the whole statement, I request that he read it.

Mr. SARBANES. The rest of it repeats.

Mr. ALLEN. No, it does not. I wish the Senator, since he pointed out the Senator from Alabama did not read the whole statement and he wanted to read it——

Mr. SARBANES. I read enough of Senator Javits' statement to show that the position which the Senator from Alabama was earlier placing Senator JAVITS in was not the position he took on the floor yesterday.

Mr. ALLEN. He has not finished reading the statement which he stated he was going to read.

Mr. SARBANES. Does the Senator contend that Senator JAVITS did not adhere to this position throughout the dialog?

Mr. ALLEN. I am not stating anything. I just ask that he read the statement, as he stated he was going to.

Mr. SARBANES. Very well:

Mr. ALLEN. The Senator is not saying the rule would apply to other amendments?

Mr. JAVITS. I will not say that because I do not know, but when the Senator gives me an amendment, which is adopted by the Senate, then I will give him my opinion.

Mr. ALLEN. Well——

Mr. JAVITS. I am not going to speculate on that. The Senator may but I am not.

Mr. ALLEN. Well, then we get to the proposition that we started with originally and that is that it is up to the Government of Panama to determine by their own constitutional proceses whether or not a plebiscite is required.

Mr. JAVITS. Whether or not, in this situation, on this agreement, in view of the inter-

pretations which they put on it and that we put on it a plebiscite is required. They have decided it is not. It is my argument that the ratification of this particular treaty with these two conditions or amendments without a plebiscite is fully binding on Panama and on the United States.

Mr. ALLEN. Yes.

Mr. JAVITS. That is all I am saying.

I am not arguing as to what might be, and what amendment. If there is one, I am simply confining myself to this state of facts, taking them all together.

Mr. ALLEN. As I understand it, though, the Senator stated that it will be up to the Panamanian Government to act and that their action could not be attacked collaterally.

Mr. JAVITS. It could not be attacked as to this particular state of facts. That is all I am arguing. No other. That is all.

Mr. ALLEN. If that applied to this set of facts, it applied to all sets of facts on the matter of collateral attack.

Mr. JAVITS. The Senator can argue that all he pleases. That is his problem.

All I am saying in my argument only is on this state of facts with these amendments. I do not believe that the ratification is open to collateral attack. That is it.

Mr. ALLEN. The Senator is not reading that with as much emphasis as he read the other. I wonder what he has in mind.

Mr. SARBANES. It is difficult for the Senator to maintain the same degree of emphasis throughout as it is possible for the Senator from Alabama to maintain:

Mr. ALLEN. I would conclude from what the Senator has said then, that no matter how many amendments we placed on it, if the Panamanian Government, that is, dictator Torrijos did not want to submit it to a plebiscite we could not attack it collaterally.

Mr. JAVITS. That is the Senator's conclusion. It is not either yes or no, in my opinion. All I am giving is an opinion on this state of facts.

Mr. ALLEN. Well, the Senator does not say that I am not correct, apparently.

I thank the Senator for yielding.

Mr. President, I think that exchange makes it very clear. The description which was given earlier in the course of this debate of the position of the distinguished Senator from New York was not accurate, and in fairness to him I thought it important to set out that full exchange. I think this makes it very clear that Senator JAVITS was passing judgment with respect to the need or the necessity of a plebiscite only with respect to the two amendments offered by the leadership which carried forward into the treaty the joint statement reached between President Carter and General Torrijos.

I thank the Senator for yielding.

Mr. SARBANES (subsequently said). Mr. President, I ask unanimous consent that earlier in the day in the course of the exchange with Mr. ALLEN concerning Senator JAVITS' comments that there be printed at the end of my comments a letter from Herbert Hansell, legal adviser to the State Department, which Senator JAVITS wanted included in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE PANAMANIAN CONSTITUTION AND THE OCTOBER PLEBISCITE

Under the Constitution of Panama, the National Assembly of Panama has the function "to approve or reject public treaties signed by the Executive." (Pan. Const. Art. 141(1).).

Treaties involving the Panama Canal or the Canal Zone, however, must be submitted to a national plebiscite. Article 274 of the Constitution provides:

"Treaties which are concluded by the executive with respect to the existing canal, the zone adjacent thereto and the defense of the Canal as well as to the construction of a new Canal at sea level or a third row of locks must be submitted to a national plebiscite."

The 1977 Panama Canal Treaties were submitted to a plebiscite pursuant to Law No. 33 of September 13, 1977, which provided for "yes" or "no" votes on the following proposition:

"I am in agreement with the new Panama Canal Treaty, the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal and the Connected and Annexed Agreements between the Governments of Panama and the United States of America Signed by them on Wednesday, September 7, 1977."

The Senate is in the process of amending the Neutrality Treaty to incorporate the text of the October 14 Carter-Torrijos joint statement.

The October joint statement, which interpreted the terms of the Neutrality Treaty, was publicized to the Panamanian populace prior to the plebisicite on the Treaties.

The question under consideration is of course one of Panamanian law. There apparently is no conclusive Panamanian authority on the point. On the basis of our examinations of available source materials and consultations with authorities available to us, we have reached the conclusion with respect to the October Statement that another plebiscite would not be necessitated by insertion of the October Statement into the Neutrality Treaty. We have been advised by the Panamanian Government and Panamanian legal authorities that they have reached the same conclusion.

HERBERT J. HANSELL,
Legal Adviser.

Mr. ALLEN. I thank the Senator.

Mr. President, how much time remains to the Senator from Alabama?

The PRESIDING OFFICER. Four minutes remain.

Mr. GRIFFIN. Mr. President, I would like to be recognized in my own right. Perhaps I can have some time from the other side, if they will not use it all. I would certainly like to have more than 4 minutes. I ask the Senator from Maryland if he could make some time available?

Mr. ALLEN. I will be glad to yield 4 minutes.

Mr. GRIFFIN. The Senator from Michigan would like to have more than 4 minutes. We have not had any discussion yet on the merits of this amendment, at least that I am aware of.

Mr. SARBANES. In fairness to the Senator from Michigan, who I know wants to make a statement, even though we are on opposite sides with respect to the amendment, if I yielded an additional 6 minutes, which would give him 10 minutes, would that be sufficient?

Mr. GRIFFIN. I thank the Senator from Maryland as well as the Senator from Alabama.

Mr. ALLEN. I thank the Senator from Maryland for his generosity. I know he does not want to deprive the Senator of any time. I yield 4 minutes.

Mr. GRIFFIN. Mr. President, it seems to me we should examine this amendment which we are about to vote on more carefully, particularly since the language of this amendment is similar to the reservation which will later be presented and about which we have been, I take it, reading in the newspapers. I do not know whether the newspapers are accurate or not, but I understand that some of the undecided Senators have been concerned that after the year 2000 the United States would have no military presence in Panama. As I understand it, they are seeking something that would indicate that the United States would have more authority after the year 2000 than is contemplated on the street.

Mr. ALLEN. Will the Senator yield?

Mr. GRIFFIN. Yes.

Mr. ALLEN. I assure this is the precise wording of the Nunn reservation. I assure that from Mr. NUNN himself. The only difference is that this is being offered as an amendment whereas Senator NUNN offers it as a reservation. He prefers, by becoming a cosponsor of this amendment, the amendment route.

Mr. GRIFFIN. I thank the Senator from Alabama. The Senate and everyone else interested in following this debate ought to be aware, then, that we are talking about the same language, whether it is offered as an amendment or as a reservation.

The operative or the important words in this amendment go like this:

Nothing in this treaty shall preclude the parties from making in accordance with their respective constitutional processes any agreements or arrangements to facilitate performance at any time after December 31, 1999, of their responsibilities to maintain the regime of neutrality established in the treaty, including agreements or arrangements for any United States military presence after that date in the Republic of Panama that the parties may deem necessary or appropriate.

As a lawyer I find it very difficult to understand what that adds to the treaty.

Could I have the attention of the Senator from Alabama?

Mr. ALLEN. Yes.

Mr. GRIFFIN. I would like to hear his response. Does this amendment suggest that there is something in the treaty which would preclude the Republic of Panama and the United States from negotiating a new treaty if they so desired?

Mr. ALLEN. No, there is not. Article V states that after the expiration of the term of the Panama Canal Treaty, the Republic of Panama only shall maintain troops in Panama. That would not preclude the right of the parties to negotiate an agreement where troops could come in.

Mr. GRIFFIN. I thank the Senator.

Mr. ALLEN. The Senator from Alabama, in referring to the materiality or

strength of this amendment, is merely saying that if we are going to have the Nunn reservation it ought to be an amendment rather than a reservation.

Mr. GRIFFIN. I thank the Senator from Alabama. It seems to me the answer to his question—I certainly invite the comment of any other Senator—is that this amendment means precisely nothing. It means nothing as an amendment and it would mean less as a reservation, because, with or without this language, the two countries of Panama and the United States can always negotiate another agreement which would affect or modify the treaty we are about to vote on. Is that not correct?

Mr. ALLEN. If the Senator will yield, yes, that is correct. The purpose of the amendment is to show that the leadership will vote this down, since it is an amendment, but later on today they will accept it as a reservation.

Mr. GRIFFIN. I understand what the Senator from Alabama is trying to do, and I hope everybody else does, too. I agree with him.

Mr. ALLEN. The leadership will find new merit in the amendment when it becomes a reservation.

Mr. GRIFFIN. The point is that this amendment or this language, presented in the form of a reservation, will add absolutely nothing whatever to the treaty. Is that not true?

Mr. ALLEN. Yes; I would certainly agree on that. But the leadership is going to find new merit in it when it becomes a reservation.

Mr. GRIFFIN. I find it very, very strange that any Senator, if there are any, who is otherwise opposed to the treaty could suddenly find it possible to support the treaty by the adoption of this kind of language, whether as an amendment or as a reservation.

Mr. ALLEN. I agree with the Senator.

Mr. GRIFFIN. You know, if any Senator can explain to me what this does or what this adds, I would certainly like to listen to him. All it says is that nothing in the treaty precludes the two countries—namely, the Republic of Panama and the United States—from negotiating another agreement if they want so to negotiate. Well, of course they can. Nobody has ever said they could not, and there is not a word in the treaty anywhere that says they cannot.

I find it beyond all sense and reason that we would be considering seriously language of this kind and that any Senator would suggest that he would change his mind about voting on the ratification of the treaty with the adoption of language such as this. It does not add a thing.

Let me read it again:

> Nothing in this Treaty shall preclude the Parties from making in accordance with their respective constitutional processes any agreements—

That is fine—

> or arrangements to facilitate performance at any time after December 31, 1999, of their responsibilities to maintain the regime of neutrality established in the Treaty, including agreements—

So, it applies to all agreements, including these agreements—

> or arrangements for any United States military presence after that date in the Republic of Panama that the Parties may deem necessary or appropriate.

In other words, that the parties may agree upon. Well, we are saying, we are adding language to this treaty that says there is nothing in the treaty to prevent the parties from having further negotiations at a later date to have a new treaty.

Of course, there is nothing to prevent that. There is nothing in the 1903 treaty to keep us from negotiating this treaty, and if this treaty is ratified, there will be no reason why the United States and the Republic of Panama could not sit down a week later and write another treaty. If it can be agreed to and ratified, they could have a new treaty. This means absolutely nothing. It is absurd, ridiculous, and frivolous. I cannot believe that the leadership would seriously come in here and contend to the Senate and the country that this is going to mean anything when it is offered as a reservation. I want to hear the Senators get up and explain how this means that they are going to change their votes by the adoption of this. I am going to vote against it, both as an amendment and as a reservation, because it tends to mislead the Senate and the public.

Mr. CHURCH addressed the Chair.

The PRESIDING OFFICER (Mr. HODGES). The Senator from Idaho (Mr. CHURCH).

MR. CHURCH. Mr. President, I suppose that the most helpful way to sort out the arguments that have been made this morning is to proceed in simple sequence. First of all, let us assume that the Senate were to reject both the amendment to the treaty itself, offered by the Senator from Alabama, and then were to vote later in the day to reject the reservation, which I understand will be offered by the Senator from Georgia.

In that event, article V of the treaty would remain in full force and effect. Article V reads:

> After the termination of the Panama Canal Treaty, only the Republic of Panama shall operate the Canal and maintain military forces, defense sites and military installations within its national territory.

Assuming that sequence of events and assuming that the treaty were then to be ratified, if nothing happened between then and the end of the century it would be necessary for the United States to remove its troops from the Canal Zone and, following December 31, 1999, only Panamanian troops could occupy Panamanian soil.

Now, the Senator from Michigan says, well, it is open to the United States and Panama, sometime between now and then, to enter into a new treaty. Of course. It is always open to nations to negotiate new treaties which supplant old treaties if they are willing to do it; just as it is always open to Congress to pass a new law which will supplant an old law or modify it or repeal it. There is nothing that we can do here to handcuff the future.

Nevertheless, if article V is left in its present form, then it will be necessary to amend this treaty in the future, if American troops are to remain in Panama after the end of the century. That being the case, it is wrong to characterize either the amendment offered by the Senator from Alabama or the reservation later to be offered by the Senator from Georgia as meaningless. Indeed, what we would accomplish through the adoption of such an amendment or reservation would be to eliminate any future need to alter or amend the provisions of this treaty, in order to keep American forces in Panama after the end of the century. That could be done by a simple status of forces agreement between Panama and the United States. That could be done without the need for negotiating a new treaty.

Mr. GRIFFIN. Will the Senator yield?

Mr. CHURCH. So it is quite wrong, Mr. President, to assert that the amendment or reservation, in whatever form the Senate may choose to adopt it, is meaningless.

I shall yield to the Senator as soon as I have finished with my argument.

The next question we face is whether the Senate should adopt this proposal in the form of an amendment to the text of the treaty itself, or whether we should adopt the proposal in the form of a reservation to the articles of ratification.

Mr. President, there is a good reason why the Senate should adopt this proposal in the form of an amendment to the articles of ratification. In the first place, that is normally the way the Senate attaches conditions, reservations, or limitations, upon a treaty.

Until the Panama Canal Treaty and this Neutrality Treaty came along, the Senate had not amended the text of a treaty in 56 years. The reason we have not done so is that the regular, the customary, procedure has been to effect changes, not by altering the terms of the contract entered into by the two governments, but by making those changes through amendments to the instrument of ratification.

It is in this manner that the Senate customarily exercises its constitutional power to grant or withhold its consent to treaties.

We do not undertake to rewrite treaties on the floor of the Senate. Drafting treaties is an executive function, not a legislative function.

We have not been involved in the negotiating process that brings these treaties to the Senate. That, too, is an executive function, not a legislative function.

The Constitution vested in the Senate of the United States the right to give, or refuse to give, consent to a treaty; its power usually exercised by the action it chooses to take on the articles of ratification. If the Senate wishes to impose some condition upon its consent, which will have the effect of changing a given provision in a treaty, then customarily it has done so by adopting an amendment, or reservation, to the articles of ratification.

Now, that is what should be done in this case. As far as the legal effect is concerned, it is the same.

If the Senate of the United States amends the articles of ratification to say that we consent to this treaty upon the condition that it will be open to the United States to negotiate with Panama

for the retention of American forces in Panama after the end of this century, then the whole treaty is subject to that condition. The consent of the Senate is based upon that condition. If Panama accepts the condition, it will do so in its own instrument of ratification, in which case the treaty, so conditioned, will take effect. If Panama refuses to accept the condition, there can be no treaty because the Senate has only given its conditional consent.

So, Mr. President, we can accomplish everything that the Senator from Alabama would do with an amendment to the text of the treaty, we can accomplish it with the same binding effect by following our customary procedure of amending the articles of ratification.

It is wise for the Senate to proceed in that fashion because then we are not tampering with the text of the treaty itself and we are not risking that such changes in the text might result in another plebiscite in Panama that could torpedo these treaties.

Those who oppose the treaties, of course, want that to happen and try for changes in the treaty, any way they can.

They know that we will be free to negotiate to keep American forces in Panama after the year 2000 by amending the articles of ratification. They know that accomplishing that goal means we would not, in the future, have to negotiate to alter, amend, or change the treaty before us.

But their purpose is not to accomplish that goal. Their purpose is to force some change in the wording of the treaty that would complicate the situation and raise problems in Panama, due to its constitutional requirment for a plebiscite, and thus contribute to the defeat of the treaties themselves.

For those of us who believe that the treaties are the best way for the United States to preserve continued use of the Panama Canal in the future; for those of us who agree with the Chiefs of Staff that these treaties represent the best way to keep the canal secure in the years to come; for those of us who believe that these treaties represent a good bargain, fairly struck, based upon principles we have customarily proclaimed; for those of us who believe that in this changing world it is no longer feasible for the United States to preserve a colony in a foreign land against the wishes of the inhabitants of that country; for those of us who believe that these treaties will improve not only our good relations with Panama, but also will lay the groundwork for a new era of good relations with all of our neighbors south of the border; for those of us who believe that these treaties will strengthen the national security of the United States, the way to accomplish this goal, the way to leave the door open for troop negotiations in the future, is to amend the articles of ratification.

So I strongly urge the Senate to reject this amendment now, which is why I will move to table it, and then to consider the matter again, as it should properly be considered, as an amendment to the articles of ratification.

Mr. President, I am willing to yield back the remainder of my time. But I promised to yield to the Senator from Michigan, and I am happy to do so now.

Mr. GRIFFIN. I wonder if I may ask the Senator from Idaho a question or two.

One of the most important provisions of this Neutrality Treaty, so far as the Panamanians are concerned, is article V, which says that all the troops will be out of Panama by the year 2000 and no troops will be there except Panamanian troops.

My reading of the discussions in Panama preceding the plebiscite and everything I have been able to learn about what was going on in Panama indicates to me that, so far as the negotiators were concerned and so far as others were concerned, that is a very vital provision. Regardless of what we think of it, it is vital in terms of their interests.

I just want to be sure I understand what the Senator from Idaho is arguing. Is he trying to say that there can be a later agreement that would modify that provision and that it can be done by a reservation that would not have to be subject to a plebiscite of the Panamanian people now, and that later it should not have to be subject to a plebiscite?

Suppose there is a subsequent agreement that the United States will maintain troops in Panama after the year 2000. What is necessary for Panama to agree to that, under this language, if it is adopted as a reservation?

Mr. CHURCH. If we adopt an amendment to the articles of ratification, it is then up to the Panamanians to determine whether or not that requires a plebiscite under their law.

Mr. GRIFFIN. And if it were adopted as a reservation?

Mr. CHURCH. My answer is based upon the premise that the Senate adopts an amendment in the form of a reservation to the articles of ratification. In that event, it is up to the Panamanians to decide, under their law, whether such a reservation requires another plebiscite.

I am not an authority on Panamanian law. All those familiar with Panamanian law appear to agree that a change in the text of the treaty, other than one that already has been agreed upon by the two governments and confirmed by the earlier plebiscite, such as the amendments offered by the leadership, in all probability would require another plebiscite in Panama.

That is simply an opinion on Panamanian law presented by those who are knowledgeable. The Senator from Idaho would not presume to interpret Panamanian law for the Panamanians. After all, they are the ultimate judge of their own law and constitutional processes.

Mr. GRIFFIN. The Senator from Idaho is suggesting to the Senate that the same thing could be accomplished in a substantive way by doing it as a reservation rather than as an amendment. Is that correct?

Mr. CHURCH. Yes; so far as our purpose is concerned, the same thing can be accomplished by amending the articles of ratification as by amending the treaty itself.

Mr. GRIFFIN. First of all, I think that if the Senator will check the authorities, he will find that, under international law, if the substance of a treaty is changed in any way, whether it is by amendment, reservation, or understanding, the same constitutional processes must be followed or it is not going to be valid under international law.

Second, it seems to me that it should be very important to the United States that the treaty we end up with is a treaty that is agreed to by the people of Panama. As I have said over and over again, to answer that we do not care what their processes are and that we are going to leave it to Dictator Torrijos to decide whether or not this is going to be subject to a plebiscite is not exactly serving our interests. If we end up only with a treaty with a temporary dictator and not an agreement with the people of Panama, we certainly have not solved the problems we are seeking to solve in the Senate.

Mr. CHURCH. Mr. President, I cannot follow the argument of the Senator from Michigan.

Whether we wanted to or not, there is no way for us to decide for Panama what their law or their Constitution may require of them. It is a question that must be left to them to decide.

We do know that changing the text of the treaty, in all likelihood, will necessitate another plebiscite. Those knowledgeable in Panamanian law advise us that this is their best opinion.

If we are going to provide that article V of this treaty, as well as all other parts of the treaty, are subject to the condition that the United States and Panama can, in the future, negotiate whether or not American forces will remain in Panama after the end of the century, without requiring either a new treaty or changes in the present treaty, then the best way to do that is to amend the articles of ratification. I strongly urge the Senate, if it is disposed to support this proposal, to do so in that manner.

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. CHURCH. I am happy to yield to the distinguished Senator from Maryland, who has been exceedingly cogent and effective in his arguments on behalf of these treaties during the past 4 weeks. I want to tell him how much I appreciate his contribution to this debate.

Mr. SARBANES. I thank the Senator.

I simply want to say to the Senator from Michigan that the concern he expressed about the nature of Panamanian acceptance of the arrangements is one that I welcome and share. But I point out to him that rejection of that concern, insensitivity to that concern, has been reflected on the floor of the Senate by opponents of these treaties, excluding the Senator from Michigan, who has reflected such concern both in the committee and again on the floor.

Mr. GRIFFIN. I thank the Senator from Maryland for making that point.

Mr. SARBANES. However, prior to the distinguished Senator from Michigan taking the floor, the distinguished Sena-

tor from Alabama, once again—as he has done time after time—said that "Dictator Torrijos will accept anything, that it is a one-man government; that he can do anything he wants; that there is no need to worry about another plebiscite. Do anything you want to these treaties and send them down—in his terms—to Dictator Torrijos."

It is very clear that the Panamanians felt that the arrangement had to be submitted to a plebiscite. The question of a plebiscite is an important matter, as the distinguished Senator from Idaho pointed out very carefully.

I find it passing strange that the very people who are pushing so hard to amend this treaty, some of those same people are engaged in this debate in such a way as almost to insure that if you had another plebiscite in Panama no approval could be obtained because of the nature of the characterization made of Panama and the Panamanian people by some in this debate.

This debate is being carried in Panama on radio by simultaneous translation so that the people of that country can follow the debate in the U.S. Senate. I hope they understand, as we understand in this country, that each Member of the Senate is elected by the people of his State and is free to speak as he chooses; that in those instances in which the abilities or the capacities of the Panamanian people have been questioned or these instances in which their understanding of the 20th century has been questioned or in which they have been told that a relationship which they have perceived as unfair for more than 70 years has really been a tremendous accommodation by the United States, that such opinions represent only the views of that individual Senator.

What is taking place on the part of some of the opponents of this treaty is, on the one hand, they seek amendments to the text of the treaty to compel a new plebiscite since that changed text would not have been before the electorate in Panama in the previous plebiscite and, at the same time, they use in the course of this debate such negative characterizations of the Panamanians as to virtually assure that nothing submitted to a new plebiscite would have a chance of approval.

Now, that is one of the tactics that is taking place. I see the Senator from Michigan standing, and I hope he appreciates that at the outset I excluded him from this tactic because I understand the nature of his concerns in this area, and I think they are sensitive ones, and I appreciate them. But I reaffirm what I said with respect to the tactics that are being used by some of the opponents.

There are people now getting up on the floor of the Senate and offering amendments who have been against any treaty from time immemorial, and who have admitted as much on the floor of the Senate. Before there were any treaties before this body. before we had any document to consider, had any text to look at, they knew they were against it—against anything. Now those opponents are going to have to face the fact that if their position were to prevail what is going to occur in Panama and what is going to occur with respect to the Panama Canal? This is not an issue without consequences on both sides. There are consequences which will flow from the rejection of these treaties just as there are consequences that will flow from their acceptance, and the choice which Members of the Senate have to make, and which the people in the country have to recognize, is that they have to make a judgment as to what those consequences will be, a wise judgment.

What is going to occur in Panama? What will happen with respect to our use of the Panama Canal? What will happen with respect to our relationship in Latin America, and how will we proceed from this point?

The choice, if these treaties are rejected, is going to be a choice either between maintaining the American position, as we choose to define it, by force or eventually negotiating a new set of arrangements with Panama.

I submit to you that we will never negotiate a new set of arrangements—which of course the other party must agree to—as favorable and as accommodating and as protective of American interests as what is contained in these documents. If you reject these treaties and go back for a new set of negotiations, I submit to you that what is in these documents will be the starting point—the beginning point—for the new negotiations, not the ending point. We have obtained rights in these documents that are enormously important to the United States: The right to keep troops in our facilities in Panama for the next 22 years. No other country has given us that term of years for the maintenance of the American presence.

We have the right thereafter—after the end of the century—to take whatever action we deem necessary to maintain the neutrality of the canal. That is a right without any limitation as to time. It goes on and on and on, and gives us the authority to use our power to maintain the neutrality of the canal.

We are given the right of priority passage for our warships to go to the head of the line, again a right without any limitation as to time.

Mr. CHURCH. Mr. President, will the Senator yield on that point?

Mr. SARBANES. I yield to the Senator from Idaho.

Mr. CHURCH. The rights we obtained in these treaties are unique. We often speak of the NATO alliance and its importance to the defense of the western world, yet we have no such rights under the NATO alliance.

I recall that, during the last war in the Middle East, the Yom Kippur war, the United States was denied use of NATO bases in all Western European countries. We could not use those bases, even though we were attempting to deal with a very serious crisis that could have ignited a general war. Only Portugal permitted us use of air bases in the Canary Islands during that emergency.

I think it should be emphasized, as the Senator from Maryland has done, that in the Panama treaties the United States obtains extraordinarily important concessions not found in any other treaty this country has entered into with other foreign powers.

I believe that Secretary Brown, our Secretary of Defense, made the same essential point when he said:

> The canal was built for shipping, not slogans. We seek to guarantee transit of vessels, not theoretical claims of title. These goals we have sought, as I said at the beginning, are practical. The issues before you are practical ones. Our negotiations have obtained instruments which, more certainly than thousands of forces and their armaments on the spot, will assure those practical objectives for generations to come.

So again, Mr. President, I hope that the Senate will not change the text of the treaty since it can accomplish its purpose with equally binding legal effect by amending the resolution of ratification.

I am prepared, Mr. President, to yield back the remainder of my time.

Mr. SARBANES. Mr. President, will the Senator yield for a moment?

Mr. GRIFFIN. Mr. President, will the Senator yield for 30 seconds?

I want to thank the Senator from Maryland for his kind reference, and I want to join the Senator from Idaho in commending the Senator from Maryland for his able leadership on the other side of the issue. He has been articulate and he has been a very able lawyer. Despite the fact that we have vigorously opposed each other on most of the issues, I join the Senator from Idaho in paying tribute to the Senator from Maryland who has carried a lot of the burden, I know, for the other side.

I might just say the Senator from Kansas has been trying to get a word in edgewise on this amendment. I understand the time is going to expire very shortly. I do not know whether any time will be available to him.

Mr. CHURCH. Mr. President, how much time remains to the two sides?

The PRESIDING OFFICER. The Senator from Alabama has no more time. The Senator from Idaho has 5 minutes.

Mr. CHURCH. I am happy to oblige the Senator by giving proponents' time to him, but we have only 5 minutes left. Would the Senator like 3 of the 5 minutes? Mr. President, I yield 3 minutes to the distinguished Senator from Kansas.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

(Mrs. HUMPHREY assumed the chair.)

Mr. DOLE. Madam President, let me say, first of all, that we are getting down to the nitty-gritty now on this debate, and there is more and more interest, obviously, being expressed by Members of the Senate and by others who sometimes watch the Senate.

I guess what is being suggested now by the distinguished Senator from Alabama and others who have cosponsored his amendment is that we want to keep the door open just a little bit—and that is really all the amendment does; it does not do very much. The Senator from Alabama never said it did anything, but the point was made, I think, later, that if this does not do anything, what does

the reservation do? It cannot possibly do anything, and that is the point the Senator from Kansas wanted to make.

I offered an amendment last Friday on this floor that simply added 10 words to article V. It added the words "except as the United States and Panama may otherwise agree." It was not a very significant amendment from the standpoint of making any agreement after the year 2000; it just left the door ajar.

That amendment was tabled. It was denounced as unnecessary, as obstructionist—all the reasons that we have heard here time after time.

I commend the distinguished Senator from Maryland, but I do take issue with the argument that everyone who offers an amendment is somehow flatly opposed to the treaties. Certainly that is not the position of the Senator from Kansas. I have had an opportunity to have some input in the so-called leadership amendments, and I have said from the start that if we could make some changes, I would support the treaties.

It is obvious to this Senator that we are now reaching accommodation time. The votes are not there. We will get one vote this way, one that way, and sooner or later we will have a magic number, 67. Whether that magic number comes today or tomorrow, or whether it comes on Thursday at the last minute, will depend on just what changes may be necessary to accommodate Senators who have real problems with these treaties.

They are not the best treaties. They can be improved. But we are told that if we offer an amendment, somehow we will obstruct the process, and we are told there has not been an amendment for 56 years. I think it is more accurate to say 44 years—but treaties have been amended in this body, and I just suggest that we have a responsibility, too.

So, Madam President, I am a cosponsor of this amendment, which is based on the same concept as the amendment I proposed last Friday.

This simple clause would keep the door open just a crack to the possibility that both Panama and the United States will agree at some point that a continued American military presence is necessary.

The Senator from Kansas will not reiterate. We have already had discussion on the general problem, the general concern. We have repeated on this floor the concerns of Admiral Holloway and General Wilson and others who support the treaty, who are concerned about Article V.

We have discussed that point with regard to my earlier amendment No. 58. It is clear on the record that American military advisers feel that a continued military presence beyond 1999 is important for "efficient" and "economical" defense of the canal in the next century.

I say to my colleagues that this may be the one last opportunity we will have to keep the door open—not for imposing our continued presence upon Panama, but for reaching mutual agreement that the presence is desirable and needed. None of us knows what conditions may confront us in the year 2000, yet we are expected today to determine that there will be no need for U.S. troops or bases to protect the canal at that time. We are effectively foreclosing any option that our two countries might find such an arrangement agreeable—unless we add these simple words to the end of article V.

Madam President, I am all the more convinced that this provision is critical in light of information that American negotiators proposed similar language during treaty negotiations advised by his own sources—sources very close to the treaty negotiations—that our negotiators laid the following language on the table for negotiation, and that this was their bargaining position up until mid-1977:

ARTICLE V

After the termination of the Panama Canal Treaty, only the Republic of Panama shall operate the canal and maintain military forces, defense sites and military installations within its national territory, except as the United States and Panama may otherwise agree.

That was what was laid on the table—a perfectly reasonable and responsible position that would have kept the options for both nations open, without endangering the interests of either. That was the amendment language proposed by the Senator from Kansas last Friday.

When the Senator from Kansas sought further information on this stage of the negotiations, he was advised by his source that:

This phrase was dropped because the Panamanians refused to accept the possibility that the question of a continued U.S. participation in the defense of the canal after the year 2000 would be contemplated. Until this phrase was dropped, it has been the consensus of the U.S. Government and its clear intention that adequate arrangements for defense of the canal after the year 2000 might well include retaining U.S. troops or bases in Panama. There was no Panamanian concession made in return for the dropping of this provision. It was dropped in May of 1977.

If, in fact, Madam President, there was "no Panamanian concession made in return for the dropping of this provision," then I can see no reason why the Senate should feel constrained against placing a like provision back in article V. I must say that this Senator cannot imagine why the crucial 10 words were dropped without any equal concession by Panama. Perhaps the distinguished members of the Senate Foreign Relations Committee, who are more familiar with the secret treaty negotiations than the Senator from Kansas, could shed some light on this point. I think all of us would welcome such information.

The important thing to consider is that amendment No. 77 offers a responsible, fair, even-handed and open-minded approach to what is admittedly a delicate issue. It keeps the door open—not to colonialism, not to intrusion, but to mutual agreement. It is an approach that recognizes the vital elements of equality and mutuality that should guide our relations in future years.

I feel the emphasis should be focused on that key word, "agreement." Only when our two countries "agree" that continued presence is desirable and necessary, would this option be exercised.

That is reasonable, that is responsible, and I hope my colleagues will join me in supporting this amendment.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. SARBANES. Madam President, I want to close out this debate by quoting the testimony of David McCullough, the historian and author of the highly acclaimed book, "The Path Between the Seas," which, as has been frequently noted, many, on both sides, have been quoting in this debate. He said:

I support the treaties because I support the canal. I know its importance; I know our interest in it is vital. . . .

Inevitably there will be risks involved, there will be problems along the way. But the risks of holding fast, of trying to hang on to what has been, cannot help but be far greater. Things simply can't go on as they are in Panama. . . .

The Panama Canal is expressive of one of the oldest, noblest desires in the human heart, to bridge the divide and to bring people closer together. These treaties are expressive of that same desire. They are a progressive step, an act of strength and confidence and of good will.

Madam President, these treaties are an opportunity to develop a relationship between the American people and the Panamanian people which can be held up as an example to the entire world of how a large, powerful nation can cooperate with a small nation and respect their sense of pride and their sense of dignity. We have the opportunity here to place our relationship on a basis of mutual accord and cooperation, of mutual respect, with a sense of the dignity of the two peoples, and we ought not to lose that opportunity, Madam President.

The PRESIDING OFFICER. All time has expired.

Mr. CHURCH. Madam President, I ask unanimous consent that at the hour of 2 p.m., when the vote must come on this amendment, a motion to lay on the table may be made, and I ask unanimous consent that it be in order at this time to order the yeas and nays on that motion.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. CHURCH. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. CHURCH. I ask unanimous consent, Madam President, that the yeas and nays n.ay be ordered at 2 o'clock.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order, the Senator from Nevada (Mr. LAXALT) is recognized for not to exceed 30 minutes.

Mr. LAXALT. Madam President, first of all, I thank the Chair for affording me this time at a critical point in the debate. I am going to yield some of this time to the Senator from Pennsylvania (Mr. SCHWEIKER). Late yesterday afternoon the Senator from Pennsylvania indicated that he had completed his deliberations in connection with his decision on the Neutrality Treaty, and he asked me at that time whether or not time could be

reserved for him for the purpose of stating to the U.S. Senate here today the basis and reasoning that went into his decision, and to make the announcement of the decision itself.

I, therefore, yield whatever time he requires to the Senator from Pennsylvania (Mr. SCHWEIKER).

Mr. SCHWEIKER. Madam President, shortly after the Panama Canal Treaty agreement was announced by President Carter, I told my constituents I would listen to both sides and objectively evaluate the arguments before making this most important decision.

I pointed out then that there were three general areas of concern I wished to explore: First, the ability of the United States to defend the Panama Canal after the year 2000; second, whether the economic arrangement for the transfer of the canal actually was self-liquidating, and, third, the provision giving Panama the right to veto our construction of a sea level canal outside Panama. These three areas have, in fact, become the center of the canal controversy.

We have been presented with an unfortunate choice between giving up the canal and our military presence on the one hand, or on the other hand rejecting a treaty which has given rise to great expectations among the people of Panama.

After months of careful study, I have concluded that the reason for this dilemma in which Members of the Senate find themselves placed is that the American negotiators did not represent the best interests of the United States.

Our negotiators did not represent our best defense interests. They chose to vacate all of our bases and remove our military presence by the year 2000. Much has been made of the fact that the neutrality treaty gives us the right to defend the canal after the year 2000. But having the right to do something and actually being able to exercise that right are not necessarily identical. For example, in many countries of the world, such as the Soviet Union, people have very elaborately defined rights on paper, but, in reality, dare not exercise these rights.

Simply having the theoretical right to defend the canal does not, in fact, guarantee that the United States will be able to exercise that right. If, for example, the leaders of Panama were to invite Cuban troops and Soviet pilots into the Canal Zone, our paper right to defend the Canal Zone might not be worth very much. Of course, we would have the option of invading a country defended by Russian pilots and Cuban troops. However, recalling so well the Cuban missile crisis, I question whether we would put ourselves in the position of being labeled an aggressor in the eyes of the world and at the same time being accused of taking the world to the brink of world war III and an American-Soviet nuclear conflict. Then Panamanians, of course, would argue that their invitation to these troops was an internal matter and no business of ours. Under these circumstances having the right to defend the canal and being able to exercise that right are two entirely different matters. I believe this is a fatal defect in the treaties.

Our American negotiators did not represent our best strategic interests. In World War II, of course, we did not allow enemy ships to go through the canal. It is rather natural to assume that the country which bought and built the canal would have the right to exclude its enemies in time of war from the canal. Yet under the terms of the new treaties, we would be required to stand idly by while our enemies used that canal because our negotiators had bargained away our right.

Our negotiators did not represent our best economic interests. Originally the Carter administration told us the treaties would not cost the taxpayers a dime. Now we find the facts completely contradict that position. Comptroller General Staats and Canal Zone Governor Parfitt now tell us that even with a 30-percent increase in tolls, there is great doubt that after the year 1984 canal revenues will be sufficient to finance the $80-to-$100 million annual payments expected by Panama. And the treaty leaves open the possibility that Americans might have to pay the difference from 1984 to 2000. In addition, it is now admitted that just transferring the Panama Canal to Panama and terminating our interest there will cost between $700 million to $1 billion. This, too, is completely contradictory to what we were first led to believe.

Our negotiators did not represent our best commercial interests. It has become increasingly clear that, with the substantial national debt Panama has accumulated, along with its continuing annual budget deficits, the temptation will be great to divert canal revenues from canal maintenance to meet these domestic needs. And the treaty leaves open the possibility that Americans might have to pick up the tab for canal operating and maintenance costs.

Our negotiators did not represent our best transportation interests with their proviso giving Panama veto power over construction of any sea level canal outside Panama. It is inconceivable to me that we should have wanted to put this provision in the treaty in the first place. Whether we will want to build a sea level canal outside Panama is unknown but retaining the right to do so is very important. It is not in our best interest to give Panama monopolistic control over all possible routes by eliminating the competition of other possible routes in Nicaragua or Colombia.

Our American negotiators must recognize how poorly they represented our interests. Our interests were so ill-defined that both countries have interpreted key sections of the treaties in completely different ways. One of the first requisites of a good treaty is that both sides understand and agree upon exactly what it means. Clearly this has not been the case with the Panama Canal Treaties.

Senator GRIFFIN, in his minority views accompanying the committee report, has discussed these differing interpretations chronologically. Although some of these differences apparently have been patched over, many others still exist today. This is the worst way in the world to begin a new relationship and implement a new treaty that affects our vital economic and defense interests.

Much has been made of the significant breakthrough these treaties represent after a 13-year negotiating period. The more I study the treaties, the more I am convinced that this so-called breakthrough is not so significant because many of our vital defense, strategic, economic, commercial, and transportation interests have been sacrificed by our negotiators. We have an agreement today only because our American negotiators were willing to concede these major points—something other administrations in other times refused to do.

In short, I will vote against both treaties because our negotiators did such a poor job. They have given away everything—including the kitchen sink.

Part of our debate has focused on the proper role of the Senate in ratifying the treaties. I recall very well that at the time of the Carswell nomination, the White House argued that the Senate's only role was to accept or reject Carswell on the basis of narrow standards the White House had set down. It seems to me the same argument is being made now by the White House which insists we have no right to establish a Senate standard defining our Nation's best interests. And so instead of letting the Senate work its will, the White House has indiscriminately opposed virtually all significant amendments. In effect they are saying that only the executive branch has the right to shape the treaties, that we in the Senate only have the right to say "yes" or "no." I reject that concept. I do not believe the advice and consent role of the Senate is so limited.

In short, we are being asked to ratify these treaties as they stand, or like Chicken Little, the administration says, the sky will fall in. I reject that argument too. In fact, I believe that if voted down, the Neutrality Treaty could be further amended either on the floor of the Senate or in the Foreign Relations Committee to reflect the obvious and growing belief that these treaties in their present form do not represent our best interests. The treaties should be amended to reflect the best interests of the United States as well as the best interests of Panama.

There is no question that a number of us who have decided to oppose these treaties believe it is time for a new relationship with Panama. We feel Panama should play a much larger role in that future relationship. But it is inconceivable to me to say that the Senate can only choose between maintaining the status quo or completely relinquishing our best interests.

I will vote no on the Panama Canal treaties because I believe the American people deserve better.

Mr. LAXALT. Madam President.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. LAXALT. How much time does the Senator from Nevada have remaining?

The PRESIDING OFFICER. The Senator has 18 minutes.

Mr. LAXALT. I thank the Chair.

I commend the Senator from Pennsylvania for what I consider to be a very cogent, a very well-reasoned statement

in reference to his position on the Neutrality Treaties. I think in a few short minutes he has distilled literally hundreds of hours that we have spent here on the Senate floor trying to define what the issues are.

He has now come to the point where he feels that basic issues relate to the right of this United States after the year 2000 to properly defend its canal. Of course, this is of major importance.

Under the terms of the treaty, and it is going to be eventually resolved here one way or the other, at the present time we are excluded. Our physical presence will be for naught at the year 2000. We then are going to be left in the position of attempting to negotiate in some manner with Panama, to be able to protect our interests in the canal at that time.

As we pointed out time after time on this floor, that is fraught with peril, because one of the basic thrusts of the debate and of the negotiations has been that the ratification of these treaties, each one of them, will result in better relationships with the Panamanians.

If the matter of defense and the matter of military presence is left unresolved, obviously that represents a potential source of serious friction between our two countries.

I, for one, have been at a total loss in trying to determine if the thrust is that surely after the year 2000 we will be able once again to regain the military presence. Why do we not put it in the four corners of the instrument? Where is the harm of that position?

From the standpoint of our own security, from the standpoint of hemispheric security and, yes, from the standpoint of Panamanian security, it should be within the four corners.

He has done an excellent job, too, I think, in defining economic problems.

We have heard that since the beginning of this debate, when it was made to appear that no taxpayer money was going to be involved, in connection with these treaties. It has now become abundantly clear, coming from administration sources themselves, that it is going to cost an abundant amount of money to finance these treaties. The comments of the Senator from Pennsylvania in respect to the release and the waiver of our rights, in reference to the sea level canal, are also critical.

So, in summary, without taking additional time at this point, I once again commend the Senator from Pennsylvania (Mr. SCHWEIKER) for a very courageous and cogent statement at this point in this debate, where every single vote counts. It is that close. We certainly welcome his support.

I yield now, for whatever time he may require, to the Senator from Kansas.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Madam President, I thank my distinguished colleague. It seems to the Senator from Kansas, as I indicated just a few moments ago, that the Senate is now getting down to the nub of the problem, I guess, or the nub of the controversy, more specifically: Will the treaties be ratified or will the treaties be rejected?

The Senator from Kansas must say that if the treaties should be rejected, then I think those who have stonewalled any efforts to approve the treaties on the floor must bear the responsibility. The Senator from Kansas has not supported every amendment which has been offered, but it does seem that a case can be made for trying to strengthen the treaties, and it does seem to this Senator that good faith efforts have been made to strengthen the treaties. Time after time after time we have been told, "We cannot do that because General Torrijos would not like that. It might require another plebiscite." Whatever version you want to assume or accept.

We have offered 8-word amendments, 10-word amendments, 12-word amendments, and we were told on this floor by the distinguished leader of the protreaty forces, the distinguished Senator from Idaho (Mr. CHURCH) that we could not add one word to the treaty, not one word.

I think they have made their position quite clear.

But that stone wall could crumble, as we near the time for a vote, and this Senator counts the votes, depending on what happens in two or three places, that there cannot be more than three or four undecided Senators, and neither side can claim victory.

I would hope that those who are so concerned about changing even one word would take a look at the treaties, take a look at some of the amendments, and then try to accommodate not the desires of some Senator, but accommodate the desires of the American people who want the best possible treaties.

I would only conclude by suggesting that on last Friday the Senator from Kansas offered a very simple amendment. It was not very complicated. It just added words to article V. Article V says:

> After the termination of the Panama Canal Treaty, only the Republic of Panama shall operate the canal and maintain military forces, defense sites and military installations within its national territory.

That is article V.

Back in 1977, just a year ago, in fact less than a year ago, there was some language which was on the negotiating table, eight words, and they added to article V the following: "except as the United States and Panama may otherwise agree." Well, it is 10 words.

It seems to the Senator from Kansas that was a fairly responsible amendment. It kept the door open. It said we had a right to make an agreement for some presence after the year 2000. That amendment was laid on the table just as every amendment has been laid on the table by the protreaty forces in their efforts to stonewall. So far they have been successful. But now the time is coming.

Mr. LAXALT. Will the Senator yield?

Mr. DOLE. I am happy to yield.

Mr. LAXALT. Is it true that we here in the Senate have a constitutional responsibility to advise and consent on treaties?

Mr. DOLE. That has always been my understanding, but I am beginning to wonder after listening to all the pleas on the other side that we cannot change one word, not one word.

Mr. LAXALT. Has not the posture of this debate, from the very outset on the leadership amendment, been one that we cannot correct one word in those treaties?

Mr. DOLE. That is right. If they found a spelling error, I assume we would have to get Torrijos' approval before we could change it. I am not sure that this meaningless reservation which will be cleared this afternoon has been cleared with General Torrijos. I assume it has. If there was any chance that it would require a plebiscite, it would require his prior approval.

That has been the trend of the debate. We can offer good amendments and they are ignored, they are ridiculed. It seems to this Senator we can surrender our rights as Senators, surrender our rights as responsible Members of this body, and say, "Well, we do not want to do anything that might upset General Torrijos, that might require another plebiscite."

We all want to accommodate the President of the United States. We all want the President of the United States to succeed whether it be foreign policy or domestic policy. On the other hand, I am sure he wants us to perform our duties as Senators.

Mr. LAXALT. We do not want to accommodate anyone by becoming a rubber stamp in this Chamber and that is precisely what we are becoming, is it not?

Mr. DOLE. That is what it seems to be. I am sure the President understands our responsibility. He has been diligent to persuade Senators to support the treaties. I do not quarrel with that, but I have not seen forthcoming from the other side amendments to the treaties. They are understandings, or they are accommodations, whatever they are, to secure votes. It seems to me if we are concerned about the treaties, we should amend the treaties. If we are concerned about some other thing, we will figure out another arrangement.

I appreciate the Senator from Nevada yielding. I believe the distinguished Senator from Nebraska is waiting.

Mr. CURTIS. Will the distinguished Senator yield?

Mr. LAXALT. The Senator will gladly yield to the Senator from Nebraska however much time remains. How much time remains, Madam President?

The PRESIDING OFFICER. The Senator has 8 minutes remaining.

Mr. LAXALT. I yield whatever time he may require to the distinguished Senator from Nebraska.

Mr. CURTIS. I thank the distinguished Senator from Nevada.

Madam President, I sat here yesterday and heard a most outstanding speech. It was scholarly, it was sound, and it was informal. There have been many good speeches. This time I refer particularly to the statement of the distinguished Senator from Michigan (Mr. GRIFFIN). I commend him for his long hours of work on this treaty and the thought he has given to it.

He brought us some facts yesterday that should challenge every Senator. He pointed out that Secretary of State

Vance, back on January 13, said in substance:

If you amend the treaty, it has to go back to Panama for another plebiscite.

He pointed out that the chief Panamanian negotiator held the same view; that the dean of the political science school of Panama University likewise agreed; that a distinguished professor of law held the same view.

He pointed out that all the political parties, even though they are banned under dictator Torrijos, held the same view as Secretary Vance.

Then it came along that there are a couple of special amendments, leadership amendments, part of the polishing, part of the sugar coating. Then the report on page 7 was cited by the distinguished Senator.

The committee is informed by the Department of State that the Government of the Republic of Panama has concluded that no new plebiscite would be required for the approval of the two (leadership) amendments.

Madam President, what kind of a government of law is that, that the status of an amendment determines who offers it; that the leadership amendments mean something different than any other amendments?

Madam President, this is not one of the Senate's finest hours, when we adopt a premise of that kind. It invites the ridicule and the derision of the proponents of the treaty, which we anticipate. We anticipate it. The word goes out over the air, we must end colonialism.

Madam President, I sometimes wonder about those who would blacken the character of the builders of the Panama Canal: the great Theodore Roosevelt, Dr. Walter Reed, Dr. Lazear and others, who made this contribution to humanity—they were evil characters. But the great Torrijos is a benevolent man, even though he came to power with a gun. They have not had any election since 1916. Civil rights are banned. Individuals are in jail without a trial, and political parties are banned. Yet the great Torrijos is to be followed, and we are to tell the American people that we should be ashamed of the builders of the Panama Canal.

It is not supported by history. Everyone knows we have lived through a few decades where there have been those, as part of the destructive processes of our country, who have tried to debunk history. But it is not true here.

Why do we have it referred to as colonialism? When you have a colonial power, they go into their territory by force, they take out their valuable resources. What did we ever take out of Panama? Nothing. What did we put in Panama? We built a canal that has been a blessing to all mankind. We have operated it for the good of all people.

Never were the tolls increased until just 2 or 3 years ago, when, because of inflation, it had to be done. We promised the world we would operate it at cost and this we have done.

Whenever you have a colonial power, they draft the subjects into their military forces. Have we ever done that with Panama? No. There are none of the characteristics of the colonial power.

As to the reference to the U.S. relation to Panama because of what we have done for Panama, they have the highest per capita income in all Central America. As I cited the other day, in our foreign aid program, we have given more per capita to Panama than to any other country in the world.

Mr. President, I am not ashamed of Theodore Roosevelt or the builders of the Panama Canal. I am not ashamed of those brave doctors who conquered disease and made it possible. I challenge the proponents of this treaty to cite any injustice that we have invoked in the operation of that canal, where we have been unfair to any people, any ships, any nationality.

Oh, no one has any objections, in the light of all the present-day expenses, to more generous treatment of the Panamanians. But it is not necessary to add to the retreat, all around the globe, of the forces of stability and freedom in order to change some of the finances in reference to the Panama Canal. This is part and parcel of the retreat and the desertion of freedom around the world.

Madam President, I try to stay here practically all the time for these debates and I am waiting for a proponent of this treaty to tell us how the canal will run better if the United States goes.

The PRESIDING OFFICER. The Senator's time has expired.

Under the previous order, the Senator from Georgia (Mr. TALMADGE) is recognized.

Mr. TALMADGE. Madam President, the Panama Canal Treaties are the result of negotiations spanning some 14 years and the administrations of four Presidents.

Had I been President Johnson, President Nixon, or President Ford, I would not have conducted negotiations to relinquish U.S. control over the Panama Canal.

Had I been President Carter, I would not have signed these treaties.

But, the treaties were negotiated. They have been signed by the President. They have been ratified by a plebiscite of the Panamanian people.

The U.S. Senate and the American people are presented with a fait accompli.

Now, we must decide the best course of action. That decision, above all else, must be in the long-range best interests of the United States.

In acting on these treaties, we must look forward, not backward.

I determined at the outset to study these treaties in all their ramifications as closely as I could, in order that I might make a judgment in the national interest and consistent with the future safety and security of the United States and the world.

I have read everything available on the treaties. I have talked to and questioned military experts and foreign policy advisers.

I have met with business people, clergymen, attorneys, farmers, and citizens from all walks of life who have given me their reasons for either favoring or opposing these treaties.

All have had the best interests of the United States at heart. So do I.

Although opinion is greatly divided, there is unanimous and universal agreement on one issue: the Panama Canal must be kept open and operating.

That is the overriding consideration. We must determine how best to insure that the canal remains open for U.S. commerce and military defense.

It is in this light that Senators must decide on whether to approve these treaties or not.

We are confronted with a great dilemma. It must be resolved. We cannot erase it by undoing what already has been done.

On the one hand, if these treaties are ratified, we will turn over to the Government of Panama, in the year 2000, a valuable national asset with a replacement value of almost $10 billion.

We will relinquish control and ownership of the Panama Canal that is so important to our National security, international commerce, and the economy of the United States.

On the other hand, if the treaties are rejected, what many people regard as today's hottest emotional issue may turn out to be tomorrow's disaster.

Panama and her neighbors and supporters throughout all of the Americas are strongly and totally committed to these treaties.

We could wipe out overnight the good neighbor policy which the United States has nurtured since it was first made diplomatic policy in this hemisphere by President Roosevelt in 1933.

Just as all the eyes of the world were focused on the United States during construction of the canal—so now are all the nations of the world, especially those of Latin and South America, anxiously awaiting action by the U.S. Senate in voting to ratify or reject the treaties.

I do not know, frankly, what will occur between now and the year 2000 and beyond if these treaties are ratified.

If they are approved, it is my personal hope and prayer that the United States will be entering into a working partnership with Panama to insure that the canal will be kept open and operating for vessels of the United States and all nations.

That is our paramount objective. It also must be the paramount objective of Panama.

We have amended the treaties, and I was a cosponsor to give the United States "first access" rights in time of war or emergency.

We have amended the treaties, and I was a cosponsor to provide that the United States may use military force, if necessary, to preserve neutrality of the canal and to keep it operating, not only until the year 2000, but beyond the year 2000.

The further amendment that I was a sponsor of, and I believe the Senate will agree to, will permit the United States, with the approval of the Government of Panama, to permit troops to be stationed in the Canal Zone after the year 2000.

I am a cosponsor and I hope that the Senate will approve a further amendment that would not inhibit the U.S. Government from building another canal

with a third country without the consent of Panama itself.

Now, to turn the argument around, if these treaties are rejected I am fairly sure of what will happen.

A preponderance of evidence presented by military and diplomatic experts indicates with little doubt that there will be strife, violence, sabotage, and perhaps even armed conflict between U.S. soldiers and Panamanian citizens.

Under such conditions, the canal would be closed and put out of operation a substantial part of the time.

In that event, we would be standing guard over a worthless piece of real estate, of not much use to anyone.

The argument is made that we are having to act under an implied threat.

It is more than implied. We face a very real threat to the security and the economy of the United States.

That is why, in acting on these treaties, we must come down to this fundamental question: What is the best interests, now and in the future, of the United States?

I went through the Panama Canal twice while serving in the U.S. Navy during World War II.

It is only 10 miles wide, and surrounded by rivers, lakes, mangrove swamps, and mountains.

It could very easily be sabotaged by small guerrilla teams lobbing rocket shells into the locks.

The possibilities for sabotage are virtually infinite and this kind of thing could occur over and over again.

Determined guerrillas, operating from jungles more dense than those in Vietnam, could keep the canal closed more than it is open.

Military experts estimate that it could require as many as 100,000 U.S. troops to stand guard over the canal.

We cannot operate the Panama Canal at the point of a bayonet.

Under such conditions, which would lead to armed confrontations between American troops and Panamanian civilians, it would only be a matter of time before the American people demanded that we extricate ourselves, or Panama and her friends and allies kicked us out entirely.

In that case, there would be no defense treaty.

There would be no "first access" rights.

There would be no guarantee of neutrality for the Canal Zone.

We would have nothing.

In addition to the likely military consequences, armed enforcement costs could run into billions of dollars over the years in new military construction and maintenance.

The U.S. Treasury cannot stand this extra burden.

We must ask ourselves what price we are willing to pay to retain title and ownership of the canal.

Moreover, if the canal cannot be kept open and operating, what does it matter who claims title to the property?

I do not think the American people are prepared to risk guerrilla warfare.

I do not think we are prepared to defoliate the whole Isthmus of Panama to prevent guerrilla tactics.

I do not think we want to commit an army to Panama or spend billions of dollars trying to keep the canal open and operating.

This brings us back to the fundamental question of what is in the best long-term interests of the American people.

The future of our country cannot be built or maintained on "gunboat diplomacy."

In the troubled world in which we live, the future and security of our Nation can be assured only through the exercise of consummate skill and foresight.

It is unfortunate that ratification of these treaties has become the focal point of our country's foreign policy.

Many problems are far more important to national security than the canal treaties.

The most important international problem confronting our Nation today is the need for some kind of enforceable and binding agreement to limit nuclear arms and to lessen the likelihood of a nuclear war with the Soviet Union which would destroy civilization as we know it.

We also must devote our energies and resources to avert the possibility of another explosion in the Middle East, which could bring the United States and the Soviet Union to a nuclear confrontation.

In addition, we are faced with increasingly sensitive situations in Ethiopia and Somalia, and the Horn of Africa.

The most important national issue facing the United States today is the deplorable state of our economy which is bringing down the dollar abroad and firing inflation here at home.

We do not have a sound economic policy. We do not have a national energy policy.

Trade deficits threaten to destroy the value of the dollar. The situation will worsen until we free ourselves from the chains of foreign oil.

These are but a few of the critical problems which demand total commitment by the U.S. Government and the American people.

We cannot afford a conflagration here in our own hemisphere.

We do not want to destroy the bargaining power or diplomatic credibility of the United States.

We must be able to deal effectively with the Soviet Union in the nuclear arms agreement—to continue efforts to settle the crisis in the Middle East—and to effectively negotiate with other nations to improve our trade balance and save the dollar.

The world shrinks each day. More and more our survival depends on getting along in this world.

All of us have emotions. We are patriotic. We love our country. We are proud of its past.

Our heritage is dear to all of us. Our national policy certainly must not abandon these values and these beliefs.

But we must advance them in an enlightened manner and with the full interests of the country protected.

No longer can the United States allow itself to be maneuvered into the role, voluntarily or involuntarily, of a goliath in its business with other nations, small ones in particular.

The day has passed when any nation can have its way through use of military force alone.

Taking into account all these considerations, and after thoughtful deliberation, I have reached the conclusion that individual Senators must act in accordance with their own best judgment.

That is what I have attempted to do after soul-searching and prayer.

As for me, I have realized from the onset of this crucial issue that whatever judgment is made must as much as possible come from the head rather than the heart.

Realizing and taking into account all these facts and circumstances, it is my belief that the only hope for keeping the Panama Canal open and operating securely in the years ahead is afforded by these treaties.

In that knowledge, and based upon what I must regard as the best interests of my country and her people, I will vote "aye" on ratification.

Mr. CHURCH. Mr. President, will the Senator yield?

Mr. TALMADGE. I yield to my distinguished colleague, the Senator from Idaho.

Mr. CHURCH. Mr. President, the address just given by the distinguished senior Senator from Georgia balances, as well as any I have heard, considerations of principle and pragmatism. I regard it as a highly statesmanlike address, and I commend the Senator for it.

Mr. TALMADGE. I am grateful to the distinguished senior Senator from Idaho for the generosity of his comments.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. FORD). Under the previous order, the junior Senator from Georgia is recognized until 12:30.

THE UNITED STATES AND THE PANAMA CANAL

Mr. NUNN. Mr. President, like most Americans I would prefer permanent American control of the Panama Canal in an environment characterized by a cooperative and friendly Panama. Unfortunately, we do not live in an ideal world. The goals of permanent American control and a friendly Panama are incompatible.

Four American Presidents have supported negotiations aimed at establishing a new set of relationships between the United States and Panama with respect to the canal. The treaties before us represent the culmination of those negotiations. They represent 14 long years of hard and sometimes rancorous bargaining between two countries. The treaty of 1903 can no longer provide a realistic framework for United States-Panamanian relations. Even the most vigorous opponents of the treaties now under consideration—including Governor Reagon and my colleagues and friends Senators DOLE, HATCH, THURMOND, HELMS, MCCLURE, and LAXALT—concede that the 1903 treaty must be supplanted by a new relationship.

Mr. President, casting a vote on the Panama Canal and neutrality treaties is a difficult decision for many of us. At certain times during the debates both proponents and opponents have tended to exaggerate or oversimplify some of the arguments. Emotion has sometimes clouded calm consideration of the legitimate issues surrounding the treaties. The enormous importance of the canal to the country of Panama as an economic and social enterprise has at times not been adequately separated from the significance of the canal to the United States as a military asset.

I envy those who quickly reached a judgment on the treaties and who casually dismiss opposing views as having little or no merit. The treaties are complex. Their language is often ambiguous. Their consequences are uncertain. In my view, passage of the treaties does not guarantee an untroubled future relationship with Panama.

I have sought to strengthen the treaties through amendment. As I stated last November, I could not support the treaties as originally submitted to the Senate. The treaties' vague and equivocal language concerning U.S. defense rights beyond the year 1999 and the priority passage of U.S. vessels in times of emergency would have laid the foundation for conflicting interpretations. These potential differences someday could have jeopardized the very regime of neutrality the treaties seek to establish for the canal.

Accordingly, I joined many of my colleagues in cosponsoring the amendments of Senators BYRD and BAKER which clearly provide the United States the right to intervene militarily to protect the canal after the year 1999, and which further clearly provide U.S. ships the right to go to the head of the line in time of emergency. I am pleased that those amendments passed overwhelmingly and are now part of the treaties.

I am also dissatisfied with article V of the Neutrality Treaty, which prohibits the United States from retaining any military installations in Panama beyond the year 1999. In my view, a small but select U.S. military presence in Panama beyond 1999 would be highly desirable for both of our nations and for all who use the canal. I do not believe that our negotiators were as tough on this issue as they could have been. I believe we could have negotiated treaties which would have provided U.S. base rights in Panama beyond 1999 while at the same time accommodating Panama's commercial and nationalistic interests with respect to future control and operation of the canal.

Accordingly, I have sponsored a change in the treaties specifying that the United States and Panama in the future could, by mutual consent, begin negotiations for an extension of a U.S. military presence in the Canal Zone beyond the year 1999. I have been assured by both the leadership of the Senate and the executive branch that this significant change is now acceptable, and I will be introducing that later today. To me this is a very important improvement. While U.S. base rights will not be guaranteed after the year 1999, this change permits such rights to be negotiated by the parties. I believe that a maturing relationship based on a true partnership in the canal will change public opinion in Panama prior to the year 2000, and that the Panamanian people will see the great advantage of a small but meaningful U.S. military presence to assist them in protecting the canal.

The second treaty we will consider provides that the United States will not negotiate with any other nation for a sea-level canal between now and the year 2000. I have also joined several other Senators in sponsoring changes which would allow the United States to negotiate with countries other than Panama for possible future construction of a sea-level canal. Even though a sea-level canal may not prove to be economically feasible, I do not believe we should limit our flexibility in this regard. I am hopeful that this change will also be accepted by the Senate.

Mr. President, some have suggested that the treaties should be ratified on the basis of Latin American opinion or our image in the Third World. While this is a factor, I do not believe it should be a decisive factor. International opinion is fickle, transitory, and often uninformed. It should not take precedence over our own national security interests.

Some have suggested that the treaties should be ratified on the basis of President Teddy Roosevelt's alleged colonial transgressions. I do not agree. Panama owes its very existence to President Teddy Roosevelt. As conservative columnist George Will—who supports the treaties—has pointed out, the way to restore Panama to its precolonial status is "not to cede control of the canal to Panama but to cede Panama to Colombia, from which Panama seceded."

I do not have any illusions about General Torrijos and the nature of his regime. Nor, for that matter, do I assume that the treaties will not cost the American taxpayer. I have carefully studied the testimony before the Armed Services Committee by U.S. Comptroller General Elmer B. Staats, Canal Zone Governor, H. R. Parfitt, and Frank A. Nicolai, executive vice president of American Management Systems, Inc. Additional revenue for Panama will come from increased tolls rather than the American taxpayer. Other costs of implementing the treaties, however, will be borne by the American Treasury.

Between now and the year 2000, the United States could well confront costs totaling $1 billion or more for items not covered by Panama Canal tolls. These costs could include the costs of relocation of U.S. forces from Panama to the United States, early civil service retirement for U.S. employees of the Canal Company, forfeiture of interest payments to the U.S. Treasury, and contingent payments to Panama. Other potential liabilities of the U.S. Government include $345 million in foreign military sales credits, AID housing guarantees, Export-Import Bank credits, and Overseas Private Investment Corporation loan guarantees to Panama.

Overshadowing these financial clouds on the treaties' horizon is the distinct possibility that, in the 1980's, the canal itself may no longer be a financially viable enterprise. To the extent that it is not, the U.S. Government will have to subsidize it until the year 2000. If the treaties are ratified, of course, and if the canal remains a losing asset beyond 1999, losses will be borne solely by Panama. In short, the potential costs of ratification to the taxpayer could total as much as $1.4 billion over the next 22 years.

Some have suggested that the canal is becoming obsolete or unimportant. I do not agree. The canal remains beneficial to our defense and our commerce. Closure of the canal by any means would disrupt our maritime commerce and would impose additional burdens on our naval forces which could be shouldered only through increases in the defense budget.

In my view, Mr. President, there is no silver lining in the cloud of ratification. Ratification will not solve all of our problems with respect to the future operation of the canal. Some provisions of the treaties themselves are likely to be the source of future disagreements between the United States and Panama.

For example, the treaties have conferred on the United States and Panama possibly conflicting interests in devising future canal toll rate structures. Moreover, Panama has already voiced interpretations of other treaty provisions—such as the $10 million contingency payment—which differ from our own. I am hopeful that these economic ambiguities will be corrected and clarified as the Senate considers the Panama Canal Treaty, and I will support efforts to do so. It is also possible that Panamanian assumption of control over the canal after the year 2000 will lead to less efficient operation of the canal.

I believe that in the final analysis the issue is not whether ratification will end a nagging American headache in Central America—it would not. The issue is whether failure to ratify the treaties will transform that nagging headache into a crippling migraine.

Mr. President, in reaching a decision in the best interest of this Nation we must also consider the serious probable consequences of failure to ratify the treaties. I would like to discuss that with my colleagues this afternoon. Based on overwhelming military testimony, the one threat to the canal—other than a nuclear attack—against which there is no effective defense, is a guerrilla-terrorist campaign supported by a local population hostile to the United States.

Our principal national security interest in the canal is, as it always has been, the free and uninterrupted passage of our warships and commercial vessels through the canal. This interest overrides any consideration of world opinion, the character of the Hay-Bunau-Varilla Treaty of 1903 or the moral stature of General Torrijos. It also overrides the questions of sovereignty within the Canal Zone. Would it really matter whose flag flew over the Gatun locks if the powerplant servicing the locks had been wrecked by anti-American saboteurs?

Even vigorous opponents of the trea-

ties concede that failure to ratify them is likely to increase popular Panamanian resentment against the United States, thus increasing the chances for local violence directed against the canal. Many opponents are also prepared to concede that this violence could ultimately assume the form of an organized guerrilla-terrorist campaign supported by Cuban professionals and Soviet arms. Indeed, the preponderance of military testimony before the Armed Services Committee, as well as numerous private conversations I have had with active and retired military leaders lead me to the conclusions that a rejection of the treaties would almost certainly result, at some point, in guerrilla-terrorist activities against the canal and the American military presence.

The real issue then, Mr. President, is not whether rejection of the treaties would heighten potential internal threats to the canal, but whether the United States could effectively deal with these threats without the active support and cooperation of the Panamanian people and government.

It is important to realize, Mr. President, that the Joint Chiefs of Staff unanimously support these treaties. These are the same military leaders who dissented from the White House position on both the Korean withdrawal and the B–1 cancellation. I have talked to each of these men personally and privately, and I am certain that their public position is also their honest private view.

It is also interesting to note that whereas several—although by no means all—former Chiefs of Naval Operations and fleet commanders have voiced opposition to the treaties, most former Army Chiefs of Staff, as well as many retired Army officers familiar with the inherent problems of protecting the canal against internal threats, strongly favor the treaties. Retired Generals Lucius Clay, Maxwell Taylor, Matthew Ridgway, J. Lawton Collins, William Westmoreland, and Arthur Collins support the treaties. So, for that matter, do former Commander in Chief Pacific Adm. Noel Gaylor, former Chief of Naval Operations Elmo Zumwalt and former 7th Fleet Commander and Naval Academy Superintendent Vice Adm. William P. Mack.

The support of these prominent and knowledgeable military men rests upon a judgment similar to that expressed by Gen. J. Lawton Collins in a recent letter to Chairman STENNIS. In that letter, General Collins states, and I quote:

> Our experience in the jungles of the South Pacific and Viet Nam demonstrated that it is almost impossible to prevent sabotage or surprise attacks by infiltrating guerrillas if they are supported by the native population. I feel certain that we could not protect the locks and the dams that impound the water essential for the operation of the canal without the active, friendly cooperation of the Panamanians.
>
> Since the canal is the chief source of revenue for Panama, it is in the interest of the Panamanians to cooperate with the United States in protecting the canal. I am convinced that we can get such cooperation if we ratify these treaties and do not needlessly alienate Panama . . . With their support we may be able to keep the canal open in the event of war. Without such support it will be impossible to insure the continuous operation of the canal.

A similar judgment was recently expressed in an article in the Officer magazine by retired Gen. Arthur Collins—no relation to the other General Collins whom I have quoted—who served in Panama and later became Deputy Commander of the U.S. Strike Command. With the indulgence of my colleagues, Mr. President, I would like to quote it at some length.

Mr. President, I know that my time is about to expire. Would it be possible for me to get another 10 or 12 minutes?

The PRESIDING OFFICER. The Chair would state to the Senator that there is a previous order that relates to recognition of the Senator from South Carolina. The Senator from Georgia may ask unanimous consent to extend his time.

Mr. CHURCH. Mr. President, I ask unanimous consent that the distinguished Senator from Georgia may have an additional 12 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. I thank my colleagues.

Proceeding with the quotation from Gen. Arthur Collins, he stated:

> This is the era of the extremist, the terrorist, the guerrilla. Extremists with terrorist tendencies abound in the Free World and the Third World. Defeat of the treaty would provide the cause and the slogans they need to creat conflict in Panama where there is a strong sense of nationalism. Guerrillas would be easy to recruit and the local populace would be sympathetic and provide sanctuary, support, and good intelligence. Cuba would almost surely offer these "democratic freedom fighters" training cadres and light weapons from Soviet arsenals.
>
> Small lightly armed forces, operating from just outside the Zone, could suddenly emerge from the jungle to attack canal facilities or ships in the canal. From the Canal Zone borders to any target in the Zone is at most five miles, a set of locks, school, housing area, power plant, or whatever the target might be. Hostile groups could strike from either side of the Zone so selection of targets and timing of attacks would be made easy for guerrillas operating from secure bases in Panama. Ammunition, arms, radios and other equipment could be hidden in the small villages that dot the borders of the Canal Zone.
>
> Portable rockets and mortars would complement the small groups attacking U.S. installations. Locks and maintenance and support facilities would be key target areas and all are within range of these weapons: attacks would be frequent. A rocket hitting a school, fuel farm, or tanker could be devastating.
>
> In brief, a small well-directed hostile group would have an enormous capacity for inflicting damage on U.S. citizens and embarrassing the United States. Their attacks would be disruptive, sometimes damaging, often fatal, and most difficult to stop.
>
> Such a situation would be less likely to occur if the Panamanian government had a direct hand in the continued operation of the canal. If the treaties are not ratified, however, the Panamanian government might not have much control, not much interest. Patriotism is not unique to the United States; emotions run strong in small nations too, and resentment of the United States is long standing. So it is not unlikely that the government of Panma would stand back; after all, it wouldn't be their property under attack.

Mr. President, "Save the canal" is the common theme of those who oppose the treaties; however, it is also an appropriate theme for those who will vote for the treaties. The question is how do we save it for our own use—by ratifying or by rejecting the treaties?

I am not suggesting that ratification of the treaties will provide us an absolute guarantee against the emergence of the kind of threat outlined by General Collins. Retired Chief of Naval Operations Elmo Zumwalt testified before the Foreign Relations Committee that "even if these treaties are ratified, the canal can be put out of action."

However, he added—and I agree:

> The significant difference will be that we will have a Government of Panama which is more likely to be working with us than it would be if we do not ratify the treaties, and that increases by some appreciable degree the likelihood that we can prevent sabotage.

Admiral Zumwalt's testimony was strongly supported by that of the present Vice Chief of Naval Operations, Adm. Robert Long. After reviewing the potential external threat to the canal, Admiral Long stated:

> The second threat to our continued use of the canal is the internal threat from subversive, clandestine, or local guerrilla activities. The defense against such a threat in the formidable jungle terrain of the canal area would be extremely difficult, particularly in view of the vulnerability of the lock system to disruption as the result of relatively minor damage to critical mechanical components.
>
> Defense against a persistent and continuing internal threat would be particularly difficult. Defending against the internal threat is significantly enhanced if the cooperation of the local interests, the Panamanians and Central Americans, can be maximized. On the other hand, our ability to defend and protect the canal so as to insure its continued operation would become extremely difficult in the face of an adversary relationship with our Latin neighbors or an active hostility on the part of the local population.

Mr. President, according to Gen. D. P. McAuliffe, who now commands U.S. Forces in the Canal Zone, defense of the canal against a Commmunist-backed guerrilla-terrorist threat supported by a hostile local population, and an indifferent or antagonistic Panamanian Government, would require an open-ended commitment of no fewer than 40,000 and up to 100,000 additional U.S. ground troops.

The costs of such a contingency make the potential costs associated with the implementation of the treaties pale in comparison. The United States currently maintains about 9,500 troops in the Canal Zone. My rough estimates indicate that deployment of 50,000 troops on temporary assignment to Panama—1 to 2 years—would require an expenditure of about $65 million for deployment and temporary construction costs alone. Comparable costs for 100,000 troops on temporary duty would be about $125 million. If it became necessary to permanently base these additional troops in Panama to secure the canal, the cost could total as much as $1 to $2 billion in military construction alone.

If the threat persisted, and if fulfillment of the normal NATO or Asian mis-

sions of those U.S. Forces redeployed to Panama continued to be essential to our national security, the cost of expanding our force structure to replace those forces in Panama could total as much as $1 to $2 billion each year.

It is readily apparent that defending against either a short-term or long-term guerrilla threat would be very expensive. If the treaties are rejected and if the threat lasted for say 10 years—as was the case in Vietnam—the cost to the U.S. taxpayer would be tens of billions of dollars. This does not even include the cost of actual tactical operations on the battlefield. Thus, in terms of comparing the costs to the U.S. taxpayer over the next 22 years—the "worst case costs" if the treaties are ratified is $1½ to $2 billion. The "worst case costs" if the treaties are not ratified would be many times this amount.

In summary, Mr. President, I believe that rejection of the treaties by the Senate is likely to cause serious consequences. These consequences include attempts to disrupt the canal. They include an expansion of U.S. Forces in the Canal Zone. They include a substantial increase in defense spending with no increase in overall U.S. power measured against our principal adversary. They include the emergence of new opportunities for the Soviet Union and its Cuban henchmen to fan the flames of anti-Americanism throughout Latin America and the Third World.

Mr. President, in 1964, before our substantial involvement in Vietnam, the United States enjoyed a substantial advantage in almost every category of military power in comparison with the Soviet Union. Today, 50,000 American dead, thousands wounded, and $150 billion later, we are struggling to maintain parity with the Soviet Union in military power; we are legitimately concerned that the Russians may gain a decisive military superiority unless present trends are reversed.

We live in an era of dramatically expanding Soviet military power and shrinking American force levels; in an era of increased Soviet military and political pressure in Europe, northeast Asia, and Africa; and in an era of growing U.S. dependence on foreign, seaborne raw materials.

One of the great pillars of America's strength during the past century has been the absence of hostile neighbors in our own hemisphere. This is a meaningful advantage we still possess, compared to the Soviet Union's border problems. We have rarely been compelled to orient a significant portion of our military forces toward the protection of our own territory from Canada or our good neighbors south of the Rio Grande.

For our Nation to become bogged down in defending the canal against a guerrilla-terrorist campaign would provide the Soviet Union a golden opportunity to achieve major military and propaganda gains in Central America, and to exploit these gains in many places throughout the world as they did during the Vietnam era.

We must remember that the treaties now before this Chamber preserve for the next 22 years an American military presence in the Canal Zone and that they preserve for the next 22 years American rights and capabilities to defend the canal with forces already in place. Moreover, the changes I have sponsored in the treaties will keep open the possibility of preserving an American military presence in Panama indefinitely.

Mr. President, with these national security considerations paramount in my mind, I have decided to vote for ratification of the treaties as amended and changed.

Finally, I feel the treaties should be placed in their proper perspective. In the final analysis, no treaty or legal document ever written can bar a nation from doing what it deems necessary to preserve its national security interests. As George Will pointed out in a recent column before the amendments passed clarifying our defense rights:

> A treaty is only a parchment barrier, which means no barrier, to a nation's protection of its vital interests against weaker nations. If in an emergency the U.S. lacks the will to do what is necessary rather than what a treaty explicitly says the U.S. can do, then the U.S. lacks the will to do the unpleasant things it would have to do to protect the canal after rejecting the treaties.

Moreover, defeat of the Panama Canal treaties—whatever their merits or lack thereof—could deal a severe blow to presidential effectiveness in the conduct of foreign policy. I do not believe the Senate should ignore the effect of these treaties on the Office of the President of the United States.

I am proud that we have a Georgian in the White House. I am not, however, concerned primarily because the President is from Georgia or because he is a Democrat. I believe an objective analysis of my record on foreign policy and national security issues during the terms of Presidents Nixon, Ford, and Carter demonstrates that I approach these critical issues for our Nation in a nonpartisan manner.

If the Senate rejects these treaties which have been negotiated by four Presidents—two Democrats and two Republicans—I believe that a dangerous erosion of executive branch effectiveness in foreign affairs would inevitably result and thus adversely affect our foreign policy long after the Carter Presidency. We must remember that the history of the past 10 years is that of increasingly battered presidential authority.

I would immediately override this concern and vote against the treaties if I felt that these treaties, or any other treaty, jeopardized our national security or endangered our economy. For reasons I have already discussed, I foresee more potential national security problems if we reject the treaties than if we ratify the treaties.

Finally, the Panama Canal and neutrality treaties bring to mind Lincoln's wise counsel. Quoting former President Lincoln:

> The true rule, he once said, in determining to embrace, or reject any thing, is not whether it have any evil in it; but whether it have more evil, than of good. There are few things wholly evil, or wholly good. Almost everything . . . is an inseparable compound of the two; so that our best judgment of the preponderance between them is continually demanded.

I thank my colleague for yielding me the additional time.

The PRESIDING OFFICER. Under the previous order, the hour of 12:30 p.m. having arrived, the Senator from South Carolina (Mr. THURMOND) is recognized to call up an amendment on which there shall be 1½ hours, to be equally divided and controlled by the Senator from South Carolina (Mr. THURMOND) and the Senator from Idaho (Mr. CHURCH), with a vote in relation thereto to occur following the vote on the Allen amendment.

The Senator from South Carolina is recognized.

AMENDMENT NO. 73 AS MODIFIED

Mr. THURMOND. Mr. President, I send my amendment to the desk, with a slight modification in the original amendment, and ask the clerk to report.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

Mr. THURMOND (for himself, Mr. ALLEN, Mr. DOLE, Mr. GOLDWATER, Mr. HATCH, Mr. HELMS, Mr. LAXALT, and Mr. SCOTT) proposes Amendment No. 73, as modified:

ARTICLE IX

The American Battle Monuments Commission is authorized—

(1) to arrange for the removal of the remains of citizens of the United States of America from Mount Hope Cemetery to the American sector of Corozal Cemetery not later than two years after the date of entry into force of this Treaty, except that if the nearest living relative of any citizen of the United States of America whose remains would be moved objects in writing to the American Battle Monuments Commission not later than six months after such date, then the remains of such citizen shall not be moved; and

(2) to operate and maintain, without compensation to the Republic of Panama, the American sector of Corozal Cemetery, which sector shall be only under the flag of the United States of America."

The PRESIDING OFFICER. The Senator from South Carolina has 37 minutes.

Mr. THURMOND. What is the time of the order for the amendment?

I understood that I would have an hour-and-a-half.

The PRESIDING OFFICER. The time of 12:30 arrived, and the Senator from Georgia was given an additional 12 minutes.

Mr. THURMOND. Well, that should not count against this amendment, should it?

The PRESIDING OFFICER. The vote has to come on the amendment by the previous order at 2 o'clock.

Mr. THURMOND. Mr. President, this amendment protects the honor and sanctity of the remains of Americans buried in the Panama Canal Zone.

There are two cemeteries in the Canal Zone containing the remains of American citizens. Mount Hope Cemetery on the Atlantic side of the canal contains the remains of 1,332 Americans, of whom 175 are veterans. The graves of 3,395 Americans, including 741 veterans, are located in the Corozal Cemetery on the Pacific side of the canal. Immediately upon ratification of the treaties now be-

fore the Senate, Mount Hope Cemetery will pass to Panamanian control. The Corozal Cemetery, however, will remain under U.S. control until the canal is completely turned over to Panama.

Mr. President, the sanctity of the American gravesites in the Canal Zone must be protected. The problem of what should be done to protect the honor of the American dead buried in the Canal Zone has been thoroughly aired in the House Veterans Affairs Committee under the chairmanship of the Honorable RAY ROBERTS of Texas. Congressman ROBERTS is to be commended for his foresight in bringing this issue of importance and interest to veterans and, indeed, all Americans to public light. On January 23, 1978, Congressman ROBERTS raised the issue in the House of Representatives as to what disposition should be made of the graves of the American dead in Panama. Mr. President, this question was considered very carefully in the House and Mr. ROBERTS made an important statement relative to the options available to meet this problem.

I believe the surest approach is adoption of my amendment as article IX to the pending treaty.

Mr. President, as is indicated in the statement by Congressman ROBERTS, three alternatives have been proposed for protecting our national interests in the American graves in Panama. The first alternative would involve negotiating an agreement wherein Panama would maintain the cemeteries in question. A second proposal would authorize the American Battle Monuments Commission to assume responsibility for maintaining the graves of the Americans buried in the two cemeteries. A third proposal would call for the disinterment of the remains of all Americans in the two cemeteries and for their eventual reinterment in a National cemetery in the United States. A fourth alternative, of course, and the one pursued by the Department of State in negotiating the treaties, would be to do absolutely nothing. As a matter of fact, Richard Wyrough, Deputy Director and Senior Advisor for Treaty Affairs with the Department of State, who testified before the House Subcommittee on Cemeteries and Memorials on this issue on March 1, 1978, indicated that the Department of State simply did not address the cemetery matter at the treaty negotiations. Although it is abundantly clear that the provisions of the treaties call for Senate abdication of its responsibilities in the area of national defense, the blatant failure of American negotiators to protect our Nation's interests in these graves raises speculation as to what other interests involving traditional American notions of human decency were not addressed or protected in the treaty negotiations.

Mr. President, the amendment which we propose offers the only rational course to pursue in this matter. It simply provides for the disinterment of the remains of the American dead in the Mount Hope Cemetery and their reinterment in the Corozal Cemetery within two years from the effective date of this treaty. Next of kin of deceased Americans buried in the cemeteries who object to the removal of the remains of their kin may prevent such disinterment by registering their objection within 6 months of the effective date of the treaty with the American Battle Monuments Commission. The amendment would further authorize the American Battle Monuments Commission to exercise jurisdiction over the American Sector of the Corozal Cemetery in perpetuity without payment or taxation. A separate amendment which I am offering to the treaty would grant the United States the exclusive right to fly the U.S. flag over such American sector.

Mr. President, the amendment which we offer presents a scheme for caring for the remains of our American dead in the Canal Zone similar to that recommended by National Commander-in-Chief of the Veterans of Foreign Wars John Wasylik in his testimony before the Senate Veterans Affairs Committee on March 7, 1978.

I might say, Mr. President, that this is the very recommendation that the Veterans of Foreign Wars made to the Senate Veterans' Affairs Committee.

The proposal also has the support of the American Legion, the Disabled American Veterans, AMVETS, the Non-Commissioned Officers Association, the Reserve Officers Association, and numerous other veterans organizations. I am sure this amendment would have the support of that body whose opinions have been largely unheeded in all the negotiations on the treaties—the great majority of the American people. Finally, the amendment would assure the effectuation of a course of decency. It would not leave the protection of the sanctity and honor of these gravesites to future negotiations, the eventual occurrence of which would be extremely doubtful.

I hope that this proposal, one which is made without partisanship, receives the full support of my comrades.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 31 minutes remaining.

Mr. THURMOND. Mr. President, I would like to reserve the remainder of my time in case the opposition has anything to say at this time.

The PRESIDING OFFICER. Who yields time?

The Senator from Maryland.

Mr. SARBANES. Mr. President, with respect to the amendment which the distinguished Senator from South Carolina has offered, which is, of course, an amendment to the text of the treaty, and which addresses a matter which I believe is of importance to every Member of the Senate, the distinguished Senator from California (Mr. CRANSTON), chairman of the Senate Committee on Veterans' Affairs, who has been a very effective and forceful leader of that committee in its consideration of problems which affect our Nation's veterans, in a letter to the Members of the Senate has addressed himself to this amendment.

He has suggested in that letter an alternative way of dealing with this matter which I think is quite constructive, which would address the situation which the Senator from South Carolina has described, and to which his amendment is addressed. It would address it in a way that more adequately meets the problem with which we are concerned.

I see the distinguished Senator from California is present. It had been my intention to read the letter he has sent to each Senator into the record. However, he may wish to proceed in his own way and I yield to him at this point for that purpose.

Mr. CRANSTON. I thank the Senator.

The PRESIDING OFFICER. The Senator from California.

Mr. CRANSTON. I thank the Senator from Maryland (Mr. SARBANES) very much for yielding to me. I thank him more for the truly effective leadership he has provided on the floor of the Senate in the effort that so many of us are making on behalf of these treaties, which we believe are deeply in the interests of our country, its scurity and well-being, and, indeed, its peace.

The Senator from Maryland has been remarkably diligent and remarkably effective. Many of us in this body, and many more outside this body, are deeply in his debt.

Mr. President, I regret very much that I rise in opposition to the amendment of my good friend from South Carolina. In our capacities as chairman and ranking minority member, respectively, of the Committee on Veterans' Affairs, Senator THURMOND and I rarely disagree on matters affecting veterans and their survivors.

In fact, he and I are clearly in agreement on the underlying issues he has brought before the Senate. I feel strongly, as he does, that a fair and enduring solution must be found to the problems which he has so effectively outlined.

Certainly, every effort should be made to secure and provide appropriate continuing honors for the remains of the veterans, approximately 350 of whom are war dead, and the other U.S. citizens buried in the two cemeteries in the Canal Zone—the Mount Hope Cemetery and the Corozal Cemetery. I have expressed my very strong conviction in this regard to the administration. And there is no disagreement on this point, inside this body or outside this body.

Both the Department of Defense and the Department of State, as well as the White House, are in full agreement that we must obtain a satisfactory resolution of this problem prior to the date on which the treaties would go into effect and thereby remove the jurisdiction now exercised by the Canal Zone government over the territory in which the Mount Hope Cemetery is located. This would occur 6 months after the exchange of ratification instruments between our Government and the Government of the Republic of Panama.

However, I do find myself in disagreement with my colleague from South Carolina about the form in which his amendment proposes to deal with this matter. The amendment that he proposes, if adopted, would clearly require a plebiscite in Panama since it would grant continuing rights to our country to operate the American

sector of the Corozal Cemetery after 1999. It would do that by amending the treaty now before this body. I must oppose that amendment for all of the reasons previously stated in debate on the treaties in regard to amendments. Although I am fully sympathetic—and I stress this—with the goal involved—that is, to bring about the same result: The securing of the remains of all Americans buried in the Canal Zone, and the operation, under the U.S. flag, of the American sector of the Corozal Cemetery by the American Battle Monuments Commission, in perpetuity and without charge. These are the same terms and conditions that apply to all overseas cemeteries operated by the Commission on behalf of this Nation.

I do not believe it is necessary, and I do not believe it is appropriate, however, to seek to impose this result on the Government of Panama. I have no reason to believe that we cannot in a matter of months secure an appropriate executive agreement from the Government of Panama under which this important result would be obtained. Indeed, the State Department has expressed no reason why this cannot be worked out smoothly and well in advance of the transfer of any jurisdiction over Canal Zone territory. I would point out to my colleagues that the routine and recognized method of obtaining such jurisdiction for an American Battle Monuments Commission cemetery—indeed the method designated in the law itself—is the execution of an executive agreement between our country and the other nation.

There are two other matters at stake here. First is the question of the arrangements for the orderly removal of all American remains from the Mount Hope Cemetery to the Corozal Cemetery during the 6 months following ratification. Again, there is no disagreement on this. The administration is fully prepared to undertake a responsible and prompt program to see that these remains are secured and brought under the control of our forces remaining in Panama until the year 2000, and thereafter administered pursuant to the executive agreement which I fully believe would be forthcoming. Again, there is no disagreement on the goal, but no amendment to the treaties is necessary to bring about this result.

Second is the question of the continued flying of our flag over the Corozal Cemetery American sector after the treaties go into effect. Senator THURMOND indicated last Thursday, when he first submitted this amendment, that he intended to offer an amendment to deal with this situation.

Again, we are in full agreement on our goals. As a matter of fact, the U.S. flag is flown as a standard procedure over all American Battle Monuments Commission cemeteries overseas, everywhere on the face of this Earth.

However, we believe that the best way to deal with this issue—which may be a very sensitive one both from our standpoint and from the standpoint of the Panamanians—would be to take advantage of the specific provision in article VII, paragraph 3, of the Panama Canal Treaty which provides that the two parties may, by agreement, expressly provide for the display, during the life of that treaty, of the U.S. flag at places other than those specified in that treaty.

Mr. President, I believe there is an effective way to deal with this situation as well as the first two I have described by the alternative I am about to outline.

This alternative is set forth in the reservations which the Senator from West Virginia (Mr. RANDOLPH), an esteemed member of our Veterans' Affairs Committee, the distinguished majority leader (Mr. ROBERT C. BYRD), the ranking majority member of our committee (Mr. TALMADGE), and I intend to propose to the treaty in the form of an amendment to the resolution of ratification of the Neutrality Treaty. This amendment has been submitted for printing by the Senator from West Virginia, and a copy has been placed on the desk of every Senator.

This amendment to the ratification resolution would establish three reservations in connection with the Senate's giving advice and consent to the Neutrality Treaty. The three reservations would deal fully and effectively, we believe, with each of the issues which I have just outlined.

Specifically, the first reservation would state that the governments of both countries will negotiate an executive agreement for the permanent operation of the American sector of the Corozal Cemetery by the American Battle Monuments Commission on the normal terms and under the normal practices, privileges, and immunities associated with the administration of overseas cemeteries by the American Battle Monuments Commission. This would include the display of the U.S. flag over the American sector at the Corozal Cemetery after the year 2000. As I mentioned earlier, the State Department has agreed to proceed with these negotiations immediately upon ratification. This kind of executive agreement is the standard method for securing the right for administration of an overseas cemetery by the ABMC.

Second, we would add a reservation that the U.S. flag would continue to be flown over the American sector of the Corozal Cemetery pursuant to the express provision for agreements to that effect contained in article VII, paragraph 3, of the Panama Canal Treaty. We believe that upon exchange of ratification instruments by the two Governments, this reservation would constitute an agreement between the parties within the terms of those provisions of the Panama Canal Treaty. This would secure the flying of our flag in honor of those now buried or to be buried in Corozal.

Finally, we would add a third reservation fully spelling out the obligation of our Government to arrange for the orderly removal of remains from the Mount Hope Cemetery in the 6 months following ratification. The language of the reservation would express the obligation of our Government to make public announcement of the removal plan, take all appropriate steps to notify next of kin, and arrange for removal to the Corozal Cemetery, unless the next of kin requests transportation back to this country for burial in a U.S. national cemetery or, after full advice of the adverse consequences of such an alternative, requests that the remains be left in the Mount Hope Cemetery. Also, within 30 months after the entry into force of the treaties, next of kin of any persons buried at Corozal will have the option of removal of the remains to a U.S. national cemetery. All this will be done at U.S. Government expense. Again, the administration has agreed to all this as well.

Mr. President, I urge again that we not go about dealing with this issue through a treaty amendment. The administration is in agreement regarding the policies involved here. I am satisfied that we can resolve all three matters fully and fairly through the alternative of the reservations to the neutrality treaty which will be proposed in the amendment to the resolution of ratification which I have just described, and which we shall offer this week.

I regret that the Calendar which determines the order in which amendments must be considered and actions taken has made it impossible to bring up our amendment prior to the amendment brought up by the Senator from South Carolina, but I have no doubt about the fact that our amendment can carry. I have no doubt about the fact that it will achieve the goals that all of us in this body share. I have no doubt, therefore, that it is in the best interests of our country to defeat the pending amendment.

The PRESIDING OFFICER (Mr. DECONCINI). Who yields time?

Mr. THURMOND. Mr. President, I believe I have 30 minutes left.

The PRESIDING OFFICER. The Senator has 30 more minutes.

Mr. THURMOND. Mr. President, I hold in high esteem the able Senator from California, and I know of his dedication to help our veterans. I also hold in high esteem the distinguished Senators from West Virginia (Mr. RANDOLPH and Mr. ROBERT C. BYRD). I know of their interest to help veterans, too. However, I do not think that the reservation which they are offering here is the proper procedure.

I realize that the adoption of this amendment might require another plebiscite. However, if this is the proper course to pursue, why should we not follow it, even if it does require a plebiscite? Mr. President, I think we have to vote on amendments on the basis of what is best for this country—in this case, what is best for the veterans and their families. This is the only way that I feel we can do justice to the American people. The differences in my approach and that espoused by the able Senator from California I shall point out.

In the first instance, the amendment that we have offered would be binding. Under an amendment reservation of the Mount Hope Cemetery would be assured. We have this cemetery in the Canal Zone now and we would merely reserve the American sector of the Corozal Cemetery where all these veterans and Americans

could be buried. We now have the Canal Zone and this cemetery in perpetuity. We have it forever. All I am asking is that we not give up the portion of the cemetery where the Americans are buried. Let us reserve that, because it certainly cannot affect the operation of the canal. So why give that up?

Even if proper disposition of this issue does call for an amendment to the treaty, and even if passage of such amendment would require another plebiscite, if it is a proper course to pursue, I think we ought to do it.

I remind the Senate that the reservation that will be offered here is to the resolution of ratification. The fact that such reservation would not be binding is important. In other words a reservation to the resolution of ratification would not be binding, whereas the amendment which we are offering would be. I think this distinction is important.

Under Panamanian law, only that which is included in the body of the treaty is considered binding. I am sure that those who favor the treaties would agree with that. Understandings and reservations are not considered in any way binding. Notwithstanding this fact, however, those who would try to accomplish the result that I am trying to achieve are offering a reservation.

A reservation, therefore, would not be binding on Panama to protect the cemeteries as would an amendment.

Mr. President, under Panamanian law, any document submitted for ratification by plebiscite must be clearly designated. The Carter-Torrijos understanding, now incorporated in articles IV and VI of the Neutrality Treaty, was not so specified and, as such, is subject to a legal challenge in Panama.

Mr. President, the amendment which we offer calls for a positive course of action. Under the reservation, which will be offered, the fate of the cemetery issue is left to future negotiations. My point in this matter is underscored by the recent testimony of Richard Wyrough, Deputy Director and Senior Adviser for Treaty Affairs, Office of Panamanian Affairs, before the House Veterans' Affairs Committee, Subcommittee on Cemeteries and Burial Benefits, on March 1, 1978.

This is his statement:

Mr. Chairman and Members of the Subcommittee: I am very pleased on behalf of the Department of State to be able to discuss with you the Administration's plans concerning the proper care under the new treaties of Americans buried in what is now the Canal Zone. I was a member of the United States delegation that negotiated the treaties, and I must say that it is a matter which was not specifically addressed during the negotiations. We first examined the question sometime after the treaties were signed in September 1977 as we began to turn our attention to the details of planning their eventual implementation.

The Administration has explored in a preliminary way several possible solutions to the problem. We have not yet, however, approached the Panamanians with our ideas, although they are aware of the matter.

As Assistant Secretary Blumenfeld mentioned, our immediate concern has been with Mt. Hope cemetery, since it will be one of the properties turned over to Panama when the treaties are implemented. One option we have considered, inasmuch as Mt. Hope is actively being used by Panama today and would presumably continue to be so when it reverts to actual Panamanian control, is to negotiate an agreement for the maintenance of the American sector of the cemetery. Possible problems in connection with this option include funding, assuring proper American oversight responsibilities of the maintenance work, and assuring general access to American gravesites for relatives and friends of those who are interred in the cemetery.

A second option is to offer a proposal to the next of kin of the deceased Americans buried at Mt. Hope whereby the United States Government at its expense would disinter the remains, transport them to the United States and reinter them at a site chosen by the relatives. All other costs associated with the move, such as purchase of the burial plot, headstone, etc., would be borne by the next of kin. Apart from the question of where to find the funding for our Government's portion of this proposal, there are other problems, such as the difficulty in locating the next of kin, what to do with the remains of those not claimed by next of kin, making arrangements for next of kin who claim the remains, but cannot afford the costs involved, etc.

As you can see, the problem is a thorny one, and the possible solutions I have discussed are not without their drawbacks. However, as Assistant Secretary Blumenfeld mentioned, we do have a proposal to put before you which we think presents a feasible approach to the matter. In closing, I should like to mention that the matter is not, as I mentioned earlier, something that we have discussed in detail with the Panamanians. While we do not anticipate any particular difficulties, we cannot be certain at this point as to their reaction.

If I may, then, yield to General Adams who will offer the details of the American Battle Monuments Commission's proposal.

Mr. President, Mr. Wyrough, who was a member of the U.S. delegation that negotiated the treaties, says that the cemetery problem was a matter which was not specifically addressed during the negotiations.

Since this issue was not addressed during the negotiations, how do we know what Mr. Torrijos will do? How do we know what Panama will agree to?

In the closing sentence of his statement, Mr. Wyrough asserts that no one can be certain at this point as to Panamanian reactions of Senate efforts to resolve the cemetery problem.

Does not Mr. Wyrough's statement make clear that no one knows what Torrijos will agree to? No one really knows what will finally be agreed upon. Therefore, why take the chance?

Why not adopt this amendment, which is supported by the American Legion, the Veterans of Foreign Wars, AMVETS, the Disabled American Veterans, the Noncommissioned Officers Association of the United States, and the Reserve Officers Association of the United States?

These organizations have no axe to grind. None of these organizations has an axe to grind. They are simply interested in the veterans of our country. Our Nation's veterans are the people who fought to preserve our freedom. They are buried down there and these veterans organizations want to be sure that their remains are properly cared for. Therefore, they favor the amendment which we offer.

I realize again, as I have said, that there is some opposition because of the possibility of another plebiscite.

Suppose another plebiscite is held? If the people of Panama will not agree to protect properly the remains of the Americans buried there, why should we enter into the treaty anyway? If the Panamanians are agreeable to respect our Nation's interest in those graves, then they would act favorably on the plebiscite.

Mr. President, another point I want to mention is that our amendment would provide that the American flag only will fly over the American sector of the Corozal Cemetery.

However, the reservation which will be offered looks to article VII of the Panama Canal Treaty. This article states that the entire territory of the Republic of Panama will be under the Panamanian flag, which must always occupy the position of honor even in the U.S. areas of use.

Mr. President, if the Senate adopts the reservation, that means that the Panamanian flag, even in the American sector of the cemetery down there, will occupy an honored position over the American flag.

I do not believe that is what the American people want. I do not believe that is what they would approve of. That is certainly not what the veterans organizations in this country approve of.

Why should we take a back seat and fly our flag under the Panamanian flag? Again, that does not seem to make much sense.

Mr. President, I might say here that our amendment provides that the American Battle Monuments Commission shall operate the American sector without compensation to Panama.

In other words, our amendment provides that there will not be any compensation paid to Panama. However, the reservation is silent on the point of compensation.

We certainly do not want to have to pay Panama for the privilege of operating an American sector in the Corozal Cemetery. Suppose they hold out for payment? What will happen if we ratify this treaty and leave this point to future negotiations?

Mr. President, I say further that under our amendment the remains of the deceased American citizens would be transferred to the American sector of the Corozal Cemetery and the American Battle Monuments Commission would have the right to operate it in perpetuity. Again, the reservation which will be offered is silent on the point of how long the Battle Monuments Commission will be permitted to operate the cemetery. Suppose Panama later says, "Well, we want you to get out entirely, take the bodies out entirely."

As I read a few moments ago, reservations are not binding under Panamanian law. When reservations and understandings are not considered in any way binding on Panama, how can we be sure we are going to get results, unless we amend this treaty?

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 17 minutes remaining.

Mr. THURMOND. I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. HART. Mr. President, will the Senator from Maryland yield for a unanimous-consent request?

Mr. SARBANES. I yield.

Mr. HART. Mr. President, I ask unanimous consent that Genta Hawkins, of my staff, have the privilege of the floor during the deliberations on the pending measure and throughout the debate on the treaty.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SARBANES. Mr. President, how much time remains to the managers of the bill?

The PRESIDING OFFICER. Twenty-three minutes.

Mr. SARBANES. Mr. President, I want to address a number of the points that were made by the distinguished and able Senator from South Carolina, who has set out this matter so well before this body.

First of all, the term "reservation" in treatymaking, according to general international usage, means a formal declaration by a State when signing, ratifying, or adhering to a treaty, which modifies or limits the substantive effect of one or more of the treaty provisions as between the reserving State and other States party to the treaty.

So a reservation has a real substantive effect, and the proposal which the Senator from California (Mr. CRANSTON) has indicated will be submitted on his behalf and on behalf of Senator RANDOLPH, Senator TALMADGE, and Senator ROBERT C. BYRD is a proposal which carries with it a real effect. It is designed to deal with this situation in a way different from that suggested by the Senator from South Carolina and, I am frank to say, in a more complete and more constructive way.

A reservation would involve a change in the international obligations to be undertaken by the United States by the treaty and would have to be communicated to, and agreed to by, the other party. It would be made as an amendment to the articles of ratification. It then would be put as part of the articles to the Panamanians for acceptance. Of course, the treaty is conditional upon acceptance of the items contained in the resolution of ratification, including reservations offered by Senators CRANSTON, RANDOLPH, TALMADGE, and ROBERT C. BYRD, that would deal with the subject matter to which the Senator from South Carolina has addressed himself.

Just to review that, the reservations provide:

(1) that, before the date of entry into force of the Treaty, the two Parties shall begin to negotiate for an agreement under which the American Battle Monuments Commission would, upon the date of entry into force of such agreement and thereafter, administer, in accordance with the practices, privileges, and immunities associated with the administration of cemeteries outside the United States by the American Battle Monuments Commission, including the display of the flag of the United States, such part of Corozal Cemetery in the former Canal Zone as encompasses the remains of citizens of the United States;

(2) that the flag of the United States may be displayed, pursuant to the provisions of paragraph 3 of article VII of the Panama Canal Treaty, at such part of Corozal Cemetery in the former Canal Zone as encompasses the remains of citizens of the United States; and

(3) that the President—

(A) shall have announced, before the date of entry into force of the Treaty, his intention to transfer, consistent with an agreement with the Republic of Panama, and before the date of termination of the Panama Canal Treaty, to the American Battle Monuments Commission the administration of such part of Corozal Cemetery as encompasses the remains of citizens of the United States; and

(B) shall have announced, immediately after the date of exchange of the instruments of ratification, plans, to be carried out at the expense of the United States Government, for

(i) removing, before the date of entry into force of the Treaty, the remains of citizens of the United States from Mount Hope Cemetery to such part of Corozal Cemetery as encompasses such remains, except that the remains of any citizen whose next of kin objects in writing to the Secretary of the Army not later than three months after the date of exchange of the instruments of ratification of the Treaty shall not be removed; and

(ii) transporting to the United States for reinterment, if the next of kin so requests, not later than 30 months after the date of entry into force of the Treaty, any such remains encompassed by Corozal Cemetery and, before the date of entry into force of the treaty, any remains removed from Mount Hope Cemetery pursuant to subclause (i); and

(C) shall have fully advised, before the date of entry into force of the Treaty, the next of kin objecting under clause (B) (i) of all available options and their implications.

Mr. President, that is a very comprehensive way of dealing with the situation. In fact, it addresses a number of problems which are not touched upon in the proposal of the distinguished Senator from South Carolina, including one of the points he raised in the course of speaking, concerning the cost of these transfers. This reservation carries with it the provision that the President shall have announced, immediately after the date of exchange of the instruments of ratification, plans to be carried out at the expense of the U.S. Government, and then sets out the plans that our Government will carry out at our expense with respect to the removal of remains of our citizens, and will offer to people the various choices that are contained in the proposed reservations.

The reservations seek to deal with this matter in some detail; they seek to deal with it comprehensively. They are designed really to answer the concerns which people have raised. As accomplished by a reservation to the articles of ratification, they then would require the concurrence of Panama in the articles of ratification, and the reservations then would have effect, and we would be able to implement the provisions which I have just read to the Members of the Senate.

This is an effective way of dealing with this problem. It is a constructive way of dealing with it. In fact, it is a most comprehensive and detailed way of addressing this problem. For the families who are so deeply concerned and involved with this matter, it sets out a series of options which seeks to respond to all their understandable human concerns.

Mr. President, I submit that the proposal which the Senator from California Mr. CRANSTON and Senator RANDOLPH, TALMADGE, and ROBERT C. BYRD intend to offer, and which the Senator from California spoke about earlier in some detail, is the way to address the situation that is now before us.

Mr. President, how much time remains on this side?

The PRESIDING OFFICER. Fifteen minutes.

Mr. SARBANES. I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. THURMOND. I yield myself such time as I may require.

Mr. President, if this amendment is defeated, I will support the reservation that will be offered. But I submit that a reservation is not as strong as an amendment. I think the distinguished Senator from Maryland will agree with that, will he not—that a reservation is not as strong as an amendment to the treaty?

Mr. SARBANES. I say to the Senator that a reservation has a binding effect and can accomplish in every respect what an amendment can do. In this instance, of course, I feel that this reservation, in terms of how it deals with the matter, even more successfully meets the problem.

You will recall that what Senator Lodge offered to the Versailles Treaty were reservations, and I do not think there is any question that the reservation is what the Senate has used in the last 56 years to accomplish substantive changes, and I do not think there is any question that a reservation has real effect, real and binding effect.

Mr. THURMOND. If the Senator had to rank them in order of strength, an amendment to the treaty or a reservation, which would he rank first?

Mr. SARBANES. I frankly would say to the Senator they both carry comparable effect. Now some people make the assertion that an amendment to the treaty is of greater effect, but it is clear that both are of binding effect. The reservation is of binding effect. A reservation constitutes a condition to our consent to the treaty. In other words, we, in effect, will have conditioned, through a reservation made to the Articles of Ratification, our consent to the treaty, and that condition will require the concurrence of the other government, in this instance Panama, and, therefore, has an effect.

Let me simply read again the statement:

The term "reservation" in treaty-making, according to general international usage, means a formal declaration by a State when signing, ratifying, or adhering to a treaty, which modifies or limits the substantive effect of one or more of the treaty provisions as between the reserving state and other states party to the treaty.

So it has a binding effect and, therefore, I think this reservation would deal with the situation which the Senator has brought to our attention.

Mr. THURMOND. Mr. President, I think the mere fact that a plebiscite might be required upon the adoption of an amendment is evidence in itself that an amendment to the treaty is stronger than a reservation. If an amendment and a reservation are the same, why do you object to the amendment?

Mr. President, Mr. Wyrough in his statement before the Veteran's Affairs Committee of the House made this statement:

> One option we have considered, inasmuch as Mt. Hope is actively being used by Panama today and would presumably continue to be so when it reverts to actual Panamanian control, is to negotiate an agreement for the maintenance of the American sector of the cemetery.

Then he goes on to say that there are "Possible problems in connection with this * * *"

Exactly what you would have to do if you did not dispose of this issue by putting it in the treaty would be to negotiate. Years of negotiating may be required and more money paid to Panama.

Mr. Wyrough further indicates that another possible problem in connection with this option includes funding.

That is a problem right there. That is what Mr. Wyrough says, funding, and funding means money. It means money that America will have to pay to Panama in order to get the privilege of operating an American sector in the Corozal Cemetery. Apparently $8 to $10 million is not enough for the cemetery.

Mr. Wyrough also mentions a third problem that would require negotiation—that of assuring proper American oversight responsibilities of the maintenance work.

In other words, we would even have to get Panama's permission to assure the proper oversight for the maintenance of this work.

> and assuring general access to American gravesights for relatives and friends of those who are interred in the cemetery.

Mr. President, you would have to get an agreement with Panama on that. Why, American families could not even visit these graves unless there was an agreement providing that they could do so. So there are all kinds of questions here that one would have to negotiate if a reservation is adopted. However, the amendment which we offer would reserve that sector of the American portion for the gravesights of our veterans.

Mr. President, there is no comparison, in my judgment, with the importance of putting this in a treaty in the form of an amendment as compared to a reservation. Again, I say I do not see why there is any great objection to having a plebiscite.

We have turned down amendment after amendment here on the floor of this Senate, and I think it has been a great mistake. This Senate has turned down, for instance, an amendment offered by the distinguished Senator from Alabama that would maintain a military presence after the year 2000 if the President certifies it as necessary for the defense of the canal. If the President says it is necessary for the defense of the canal, why did the Senate turn it down?

We have turned down a provision to allow U.S. military presence after 1999, if the President deems that Panama is under the domination of a foreign power. Think of that. Is it not unthinkable if the President of the United States in 1999 says that Panama is Communist or it is under the domination of a foreign power that then we cannot have any military presence there? That amendment would have allowed us to retain presence there under those circumstances.

Mr. President, it seems there is a tendency to turn down every amendment regardless of how valid it is, how helpful it would be to the American people and to our Government. I am just amazed at how far the Senate has gone in this debate in turning down amendments which it knows, or ought to know, are for the best interests of the people of the United States.

Another amendment that was turned down is one which stated the treaty would not be construed as permitting warships of nations at war with the United States to have the right of undisturbed transit of the canal. In other words the amendment would not permit warships of other nations at war with the United States to have the right of undisturbed transit of the canal. Why, the Senate turned that down.

It seems they are determined to turn down everything for fear you would have to have another plebiscite.

Suppose you do have to have another plebiscite and Panama turns it down? All they will do is come back and negotiate another treaty.

Mr. President, I think this treaty, in its present form, is not in the best interests of America. This treaty, in its best form, is not in the best interests of the families of the deceased American veterans buried down there for the reasons I have stated.

I hope the Senate will see fit to adopt this amendment. I realize they have turned down all other amendments for fear there would have to be a plebiscite. But that is certainly not a sound reason for denying this amendment. This amendment should receive the unanimous support of my colleagues.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator yield?

Mr. THURMOND. I yield to the distinguished Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, I concur in the views expressed by the able Senator from South Carolina. I think it is very unfortunate that a majority of the Senate refuses to consider any significant amendment to the proposed treaties.

The American people, I think, deserve some protection. These treaties do not in any way, in the judgment of the Senator from Virginia, protect the defense and economic interests of the people of the United States.

Some of these amendments, if they had been adopted, the proposed treaties would be considerably improved. But a majority of the Senate has taken the view that it would be inappropriate, for some reason or another, for the Senate to adopt any significant amendment to the treaties worked out by President Carter and General Torrijos.

The claim is constantly made that if a significant amendment is added to the treaty that that would require a new plebiscite in Panama. So what? So what? Why should not there be another plebiscite in Panama if the U.S. Senate, in an effort to protect the defense interests of the United States, concludes that an amendment or amendments should be added to the treaties? Panama is getting a tremendous benefit from these treaties.

But take just one item, the American property, bought and paid for by the people of the United States, with a depreciated book value of more than $1 billion, will be turned over to Panama. That same property, the canal, the air bases, the seaports, the land, all of that have a replacement value, according to the Panama Canal Company, of almost $10 billion. Yet the proponents of the treaty contend, "No, we cannot add any amendments because that might require a plebiscite in Panama."

Well, the Panama Canal, I submit, has been beneficial to the United States, it has been beneficial to Panama, and it has been beneficial to the world. The United States has had the sole responsibility for this international waterway ever since it was built, and Panama has benefited from it just as the United States has benefited. As a result of the U.S. presence in Panama, that small country has the highest per capita income of any Central American nation. It has the fourth highest per capita income of any of the 18 Latin American nations. And yet Panama is a small nation of only 1,700,000 persons.

I deplore the fact that the Senate, by a majority vote, is unwilling to adopt any significant amendments, and I have the feeling that this is one reason why the American people, if one can judge their sentiment, are becoming even more determined in their opposition to these proposed treaties.

Mr. THURMOND. Mr. President, I would like to ask the distinguished Senator from Virginia if it makes sense, if in the first place we turned over the Panama Canal, an $8 billion to $9 billion investment, and paid Panama over $2 billion to take it, if we go further and put in this treaty a provision with regard to the cemetery down there where American bodies will be transferred, to have to pay Panama additional compensation for that.

Mr. HARRY F. BYRD, JR. I cannot conceive, may I say to the Senator from South Carolina, how any Member of the Senate could oppose adding an amendment to this treaty saying that the bodies of Americans in the American cemetery there could be removed.

Mr. THURMOND. Or adding a provision onto this reservation that the American flag will take a second place and be under Panama's flag, which it will probably be if we do not adopt this amendment; does that make sense?

Mr. HARRY F. BYRD, JR. Not to the Senator from Virginia, I might say. I cannot see how the Senate can reject certain amendments to these treaties which say that the flag of the United States shall fly over the American cemetery in Panama. It is a very important point to the relatives of those individuals who lie in that cemetery.

Mr. THURMOND. Now, Mr. Richard Wyrough, the Pan-American affairs officer who helped negotiate these treaties, admitted in his statement that there are three things that will have to be negotiated if these treaties are adopted without amendment to the treaties we are suggesting. First is the question of funding, the question of how much we are going to pay them to allow these bodies to be moved to the American sector of the Corozal Cemetery.

Mr. HARRY F. BYRD, JR. You mean the American taxpayers will have to pay that?

Mr. THURMOND. The American taxpayers will have to make that up. They will have to pay Panama; Mr. Wyrough says funding is a question we will have to negotiate.

Another question is American oversight of the maintenance of the work. We will even have to get their permission to see that these bodies are properly moved, and that the maintenance of the work there after they have been moved is carried on properly, and that proper access to the gravesites is granted to the relatives. All of these things would have to be negotiated. That might take years. It would certainly take money.

All of these questions can be resolved simply by adopting our amendment. This is what would be accomplished if the American people had their way.

The PRESIDING OFFICER. The time of the Senator from South Carolina has expired.

Mr. THURMOND. My time is up, Mr. President. I thank the Chair.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. SARBANES. Mr. President, I just want to underscore that the proposed reservation which the Senator from West Virginia, Mr. RANDOLPH, and Senators TALMADGE, CRANSTON, and ROBERT C. BYRD will offer will deal with the problem in much better perspective than the amendment which the Senator from South Carolina is offering.

It is, indeed, an important point to consider the families of those who are buried in these cemeteries, the Mount Hope Cemetery and the Corozal Cemetery; and the reservation will offer to those families an option with respect to what they want done at the expense of the U.S. Government, which will include the possibility of reinterment in the United States or of placing in Corozal Cemetery, which, under the proposal, will then be operated by the American Battle Monuments Commission.

I suggest to the Members of this body that the concerns are much more comprehensively addressed in the reservation which is to be proposed, and that, therefore, the reservation should clearly be adopted in preference to the amendment.

Let me say one other word that is prompted by some comments by the distinguished Senator from Virginia, for whose very clear and lucid statements on the floor of the Senate I have great respect. That involves the question of the other amendments that have been proposed and rejected.

I think it is important to understand that these amendments are being offered, in many instances—not in all, but in many instances—by Senators who are absolutely opposed to the treaties in any way, shape, or form, with or without the amendments; offered by Senators who have made that position clear from the very outset.

In fact, there are Senators who had taken a position in opposition long before they even saw the treaty documents to examine with respect to how American interests were protected and safeguarded. Years ago they took the position that under no circumstances would they support any treaty changes or revisions, and that was their posture.

In fact, some have even taken the position in the past that there should not even be any negotiation, there should not even be consideration of revising the relationship.

In many instances, on the floor of the Senate, those very same Senators have proposed amendments. They are very clear that if their amendments are adopted, they are still opposed to the treaties, but they are proposing amendments. Then when the amendments are rejected because they are found deficient, not helpful, not effective, they become upset. After all, it takes two parties to make an agreement—you do not make a treaty with just one party; you make a treaty with two parties—it takes two parties to make a treaty. All the changes have to be judged in the light of what that does to an agreement that has been reached. All of that is pointed out to the opponents of the treaties as they press on with their amendments. Then the amendments are rejected. The opponents of the treaties underscore that fact, but the hard fact of the matter is that those offering these amendments have been very clear that they are opposed to the treaties; that adoption of the amendment would not alter their attitude towards the treaty. Many of them have been opposed to the treaties for a very long period of time, well before the documents ever came before us to read. Before we even knew what the treaty provided they were opposed to a treaty.

So, I suggest that the wailings and lamentations that we are hearing now with respect to the rejection of the amendments be perceived within that framework and within the understanding of the opposing position, which many of those who are offering the amendments have consistently taken in the past, well before we even had treaty documents before us to consider.

Mr. President, how much time remains on the amendment?

The PRESIDING OFFICER. Ten minutes remain.

Mr. SARBANES. Do I understand, Mr. President, that under the unanimous-consent order entered into on yesterday, with respect to proceedings today on the treaty concerning the permanent neutrality and operation of the Panama Canal, that at 2 p.m. the Senate will vote in respect to the amendment by the Senator from Alabama (Mr. ALLEN)?

The PRESIDING OFFICER. The Senator is correct.

Mr. SARBANES. And that that will be immediately followed by a vote in respect to the amendment by the Senator from South Carolina (Mr. THURMOND) which we have just been discussing?

The PRESIDING OFFICER. The Senator from Maryland is correct.

Mr. SARBANES. Mr. President, let me conclude this consideration by underscoring, with respect to the problem which the Senator from South Carolina has raised, that the situation to which he addressed himself was clearly recognized by the Senator from California in his statement and that the proposed reservation which he and others have put forward is designed to deal with that matter.

Now, the Senator from California on yesterday sent to each Member of the Senate a letter discussing the problem with which we are confronted and indicating what he intended to propose along with Senator RANDOLPH, Senator TALMADGE and Senator BYRD of West Virginia.

In that letter he indicated, as he stated on the floor earlier in this debate, sympathy with the goals of the amendments and his intention to see those goals accomplished.

It is important, and no one denies the importance, that the remains of Americans currently buried in the Canal Zone must be provided for in an appropriate and dignified manner before the Neutrality Treaty takes effect.

But as the Senator from California points out, both in his letter and as he did in his statement, the effective way to deal with that is through the reservations to be offered which cover every aspect of the problem. I want to underscore that feature of the reservations. The reservations cover every aspect of the problem. The reservations have been developed in order to deal with the matter comprehensively, so they deal with the matter of the American Battle Monuments Commission, so it can operate the cemeteries on the normal terms in which it does so overseas and in other countries.

The reservations also addressed the question of the flying of the American flag, and addressed the problems of the families of those that are now buried there, who may wish to choose among options as to what will be done with the remains of their loved-ones and this reservation gives them a number of choices, and it does it at the expense of the U.S. Government.

Mr. President, in view of that, I think the wise way for the Senate to proceed would be not to accept the amendment of the Senator from South Carolina but to deal with the matter comprehensively, as it is proposed to do, when the reservations come before the Senate.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. SARBANES. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SARBANES. Mr. President, earlier in the day——

The PRESIDING OFFICER. The Senator has 1 minute left.

Mr. SARBANES. A unanimous-consent request was made for the yeas and nays. I understand that it is the preference of the leadership on both sides that the yeas and nays not be obtained by unanimous consent but through a show of hands, and I ask unanimous consent, therefore, that that order be vacated.

The PRESIDING OFFICER. Is there objection to that?

Mr. THURMOND. Mr. President.

The PRESIDING OFFICER. Objection is heard.

Mr. THURMOND. I want to ask unanimous consent to have a rollcall. I want a rollcall.

Mr. ROBERT C. BYRD. There will be a rollcall.

Mr. SARBANES. I assure the Senator we intend to do that.

The PRESIDING OFFICER. Is there objection to the request by the Senator from Maryland?

Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I ask for the yeas and nays on our amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to order the yeas and nays on a motion to table the amendment by Mr. THURMOND at this time, but that vote will not come until the other vote occurs.

The PRESIDING OFFICER. Without objection, it is so ordered.

MOTIONS TO TABLE

Mr. SARBANES. Mr. President, I now move to table the amendment offered by the Senator from Alabama (Mr. ALLEN) and ask for the yeas and nays on the motion to table.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Now, Mr. President, I ask for the yeas and nays on a motion to table the amendment by Mr. THURMOND.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on the motion to table the amendment by the Senator from Alabama. The yeas and nays have been ordered, and the clerk will call the roll.

(Mr. LEAHY assumed the chair.)

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Indiana (Mr. BAYH), the Senator from Arkansas (Mr. BUMPERS), the Senator from Montana (Mr. HATFIELD), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Louisiana (Mr. LONG) are necessarily absent.

The result was announced—yeas 53, nays 41, as follows:

[Rollcall Vote No. 56 Ex.]

YEAS—53

Anderson	Hatfield, Mark O.	Metzenbaum
Baker	Hathaway	Morgan
Bentsen	Hayakawa	Moynihan
Biden	Hodges	Muskie
Byrd, Robert C.	Hollings	Nelson
Case	Huddleston	Pearson
Chafee	Humphrey	Pell
Chiles	Inouye	Percy
Church	Jackson	Proxmire
Clark	Javits	Ribicoff
Cranston	Kennedy	Riegle
Culver	Leahy	Sarbanes
Danforth	Magnuson	Sparkman
Durkin	Mathias	Stafford
Eagleton	Matsunaga	Stevenson
Glenn	McGovern	Stone
Gravel	McIntyre	Weicker
Hart		Williams

NAYS—41

Allen	Garn	Randolph
Bartlett	Goldwater	Roth
Bellmon	Griffin	Sasser
Brooke	Hansen	Schmitt
Burdick	Haskell	Schweiker
Byrd, Harry F., Jr.	Hatch	Scott
Cannon	Heinz	Stennis
Curtis	Helms	Stevens
DeConcini	Laxalt	Talmadge
Dole	Lugar	Thurmond
Domenici	McClure	Tower
Eastland	Melcher	Wallop
Ford	Nunn	Young
	Packwood	Zorinsky

NOT VOTING—6

Abourezk	Hatfield, Paul G.	Long
Bayh	Johnston	
Bumpers		

So the motion to lay on the table was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. SARBANES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The VICE PRESIDENT. Pursuant to the previous order, the Senate will now proceed to vote on the amendment offered by the Senator from South Carolina.

Mr. CHURCH. Mr. President, I move to lay on the table the amendment offered by the Senator from South Carolina.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Idaho. The yeas and nays have been ordered. The clerk will call the roll.

(Mr. LEAHY assumed the chair.)

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Montana (Mr. HATFIELD) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI) is necessarily absent.

The result was announced—yeas 58, nays 38, as follows:

[Rollcall Vote No. 57 Ex.]

YEAS—58

Anderson	Haskell	McIntyre
Baker	Hatfield, Mark O.	Metzenbaum
Bayh	Hathaway	Moynihan
Bentsen	Hayakawa	Muskie
Biden	Heinz	Nelson
Bumpers	Hodges	Pearson
Byrd, Robert C.	Hollings	Pell
Case	Huddleston	Percy
Chafee	Humphrey	Proxmire
Church	Inouye	Ribicoff
Clark	Jackson	Riegle
Cranston	Javits	Sarbanes
Culver	Kennedy	Sasser
Danforth	Leahy	Sparkman
Durkin	Long	Stafford
Eagleton	Magnuson	Stevenson
Ford	Mathias	Weicker
Glenn	Matsunaga	Williams
Gravel	McGovern	Zorinsky
Hart		

NAYS—38

Eastland	Nunn	Wallop
	Packwood	Young

NOT VOTING—4

Abourezk	Hatfield, Paul G.	Johnston
Domenici		

So the motion to lay on the table was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. SARBANES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Mr. HEINZ be recognized at this time, for not to exceed 10 minutes; that upon his yielding the floor, Mr. SCHMITT be recognized to call up his amendment, on which there is a 45-minute time limit agreement; that upon the disposition of the amendment by Mr. SCHMITT, Mr. STEVENS, and Mr. BELLMON be recognized to call up their amendment, and that it be disposed of prior to 4 p.m., in accordance with the order previously entered.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The Senator from Pennsylanvia (Mr. HEINZ).

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order. The Senator from Pennsylvania will suspend until the Senate is in order.

Mr. HEINZ. Mr. President, on Thursday the Senate will vote on the Neutrality Treaty. Without doubt, this is the critical vote that will decide the question of the proposed treaties with the Republic of Panama. I can recall few issues that have been as difficult, far reaching, and controversial—for our Nation, for the people of my State of Pennsylvania, and for the Senate.

I have said it before, and I will say it again, that the treaties negotiated last August by the administration and Gen-

eral Torrijos do not sufficiently protect our national security interests, and, as originally submitted, I do not support them. The fact that the Senate has already found it necessary to amend the treaty by adopting the Baker-Byrd amendments indicates that the Senate as a whole also found the treaties flawed.

The Baker-Byrd amendments specifically guarantee our unquestioned right to defend the canal militarily, after we transfer operational control to the Republic of Panama after the year 2000, and they guarantee the right of American warships to go to the head of the line in time of emergency. The treaties have been vastly improved by these amendments, but they have not been improved enough.

Just over 6 weeks ago, I visited Panama to see and judge for myself what effect the adoption of the treaties would have on the canal. I wanted to learn at first hand whether the treaties would actually succeed in keeping the Panama Canal open, fully secure, efficiently operated and properly maintained. I talked with members of the Panamanian Government, including General Torrijos, Panamanian clergy and opposition party members, U.S. military and civilian residents of the Canal Zone. It was in this way I formed several strong opinions about the treaties.

First, I concluded that the right to intervene militarily and to have priority of passage for our warships had to be incorporated into the treaties. This has now been done by the Baker-Byrd amendments.

Second, I became convinced that article V of the Neutrality Treaty, as currently written, effectively and permanently excludes the United States from having any base or continuing military presence in Panama after the year 2000 even if the Panamanians want us present. As sent to the Senate by the President, article V states:

> After termination of the Panama Canal Treaty, only the Republic of Panama shall operate the Canal and maintain military forces, defense sites, and military installations within its national territory.

I believe it makes no sense whatsoever to lock ourselves out of any continuing military presence in Panama after the year 2000. Neither we nor the Panamanians are in a position to judge what new and more serious threats may emerge from hostile countries during the next 22 years. Article V as written, unwisely prevents the United States and the Republic of Panama from agreeing to a continued military presence. It is for this reason that I have drafted a reservation, to be incorporated as part of the ratification document which the Republic of Panama must affirmatively accept in writing. My printed reservation No. 5 definitively states that, notwithstanding article V, "the United States shall have the right to a continued military presence in Panama if agreed to by both governments." I believe this reservation is vital to protect our legitimate security interests. If this reservation, or one at least as strong, is not incorporated into the treaty, I will not support ratification.

Third, I returned from Panama with the conviction that the treaties do not adequately assure the efficient operation and proper maintenance of the canal once it is turned over to the Republic of Panama in the year 2000. This is because there will almost certainly be tremendous internal political pressures on the Government of Panama to spend canal revenues for social welfare purposes rather than for the canal maintenance and capital equipment replacement that will be necessary. Panama is an underdeveloped country, its economy is stagnant, and its tremendous social needs are unlikely to be met within the next 22 years. Just as the Penn-Central Railroad directors yielded to the temptation to defer maintenance and modernization, with disastrous results, so too I am concerned that a similar yielding by the Panamanian Government might ultimately render the canal inoperable, perhaps in a short time. As written, the treaties provide an inadequate mandate and weak safeguards to prevent the indiscriminate siphoning off of canal revenues from proper maintenance needs. This problem demands additional assurances which I have also written as a reservation to the treaties, to be incorporated into the ratification document. My printed reservation No. 6 requires that canal revenues must be first used for proper operation and maintenance of the canal before payments can be made for any other purpose. If this reservation is not adopted, I will oppose ratification.

Fourth, I also returned concerned that the Panama Canal treaties may subject the American taxpayers to a unpleasant surprise. In particular, any balance of the $10 million per year contingency payments unpaid constantly accumulates as an obligation. If the worst occurred, and no contingency payments were made over the 22-year life of this treaty, the American taxpayers could be liable for a $220 million due bill from the Panamanian Government. This is clearly unacceptable.

For this reason, article XIII of the Panama Canal Treaty which states that the canal "shall be turned over in operating condition and free of liens and debts" must be corrected with an amendment to the ratification document that authoritatively states that any accumulated contingency payments are not obligations that become due and payable when the Panama Canal Treaty terminates. Without such a change, I could not support the treaties.

If the three reservations I have mentioned are adopted by the Senate, then I will support the treaties as modified. It is a close and difficult decision, but I believe it is the right decision.

My constituents in Pennsylvania have been properly concerned about the treaties originally negotiated by President Carter and General Torrijos. It is to satisfy these legitimate concerns that I have supported the Baker-Byrd amendments and will insist on these three additional changes. With these changes I believe we meet our essential needs for security, proper maintenance and protecting the American taxpayer.

Many of my constituents have asked why we need any new treaties with Panama. The idea of new treaties originated with the Eisenhower administration, and four successive American Presidents have negotiated for a new treaty with the Panamanians. I happen to believe, unlike some, that the 1903 treaty was a good treaty, beneficial to both the United States and Panama in its time.

The PRESIDING OFFICER. The Senator's 10 minutes have expired.

Mr. HEINZ. Mr. President, I ask unanimous consent to continue for 2 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator is recognized.

Mr. HEINZ. But times have changed and the treaties should change.

Some say we must have new treaties because the canal is indefensible. I do not agree. The canal is defensible, we know how to defend it, and we will if we have to. If the treaties are rejected, and if there is a threat to the security of the canal, I will support taking every necessary action to keep the canal open.

However, I believe that new treaties which maintain and strengthen our friendship with the Panamanian people are a much better way to insure the security of the canal and the strengthening of our relationships with the peoples of Latin America.

By changing and improving the treaties as I have described I believe we will best serve the long-term interests of the United States. It is no coincidence that leftist groups both in Panama and other nations oppose these treaties. The fact is that radical groups would like to cause trouble for the United States in Panama and in the rest of Latin America, and they will seize any opportunity we give them to do so.

A final consideration that motivates me to strengthen these treaties to merit ratification is the effect rejection would have on the Presidency. If we reject these treaties because we cannot perfect them to meet our fundamental security interests, then the Senate has done its duty. But if we reject improved and responsible treaties, we call into question throughout the world the power and influence not only of this President, but of the Presidency itself. In a world which needs the strength and leadership that can only be provided by an American President, this would be a grave risk to take.

Mr. President, the question of the Panama Canal treaties is one of the most difficult and controversial the Senate has ever faced. I have studied each question exhaustively.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. HEINZ. Mr. President, I ask unanimous consent to proceed for 1 additional minute.

Mr. MELCHER. Mr. President, I ask unanimous consent that the Senator from Pennsylvania may proceed for 3 minutes.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object, we have a real time problem here

on our hands in that Senator STEVENS wishes to address the Senate after Senator SCHMITT concludes, and all must finish by 4 o'clock.

I wonder if the Senator from New Mexico would yield 1 minute of his time?

Mr. SCHMITT. I would be happy to yield 1 minute of my time to the distinguished Senator from Pennsylvania.

Mr. HEINZ. I thank my distinguished colleague from New Mexico.

I have read my constituents letters and listened to their advice. Within the last 2 months I have held open discussions with my constituents in almost every area of my State. I am convinced my constituents oppose, as I do, the treaties as originally negotiated. And I am equally convinced that my constituents expect us to improve the treaties if we can and to ratify them if they protect our vital interests.

The PRESIDING OFFICER. The Senator's 1 minute has expired.

Mr. SCHMITT. How much more time does the Senator require?

Mr. HEINZ. Thirty seconds.

Mr. SCHMITT. I will yield 30 seconds.

Mr. HEINZ. I believe the treaty changes I have outlined will protect our vital interests, I believe these changes will be adopted by the Senate, and, when and if these changes are adopted, I intend to support the treaties.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania has 10 seconds remaining, and the Senator from New Mexico is recognized.

Mr. BAKER. Mr. President, will the Senator yield 1 minute to me?

Mr. SCHMITT. Mr. President, I yield 1 minute to the minority leader.

Mr. BAKER. Mr. President, I thank the Senator not only for yielding 1 minute to me but accommodating the requirements of the distinguished Senator from Pennsylvania.

I only rise, Mr. President, to commend the Senator from Pennsylvania for his courageous action, for his carefully reasoned point of view, and to assure him that I have the highest respect for the manner in which he has reached this decision and for the final conclusion he has now reached.

Mr. SCHMITT. Mr. President, I also wish to yield 1 minute to the distinguished Senator from Montana.

Mr. MELCHER. I thank the Senator for yielding.

Mr. President, I wish to commend the Senator from Pennsylvania for his very fine statement, but—if I could have the attention of the Senator from Pennsylvania (Mr. HEINZ) for a moment, I commend the Senator for his very fine statement and commend him reaching the conclusion that he has that the treaties need strengthening. However, I have one question, if the Senator from New Mexico will yield to the Senator from Pennsylvania to answer.

Mr. SCHMITT. Yes.

Mr. MELCHER. Would not the Senator from Pennsylvania (Mr. HEINZ) feel more confident and more assured if the reservations that he mentions, instead of being reservations, were incorporated in the body of the treaty?

Mr. HEINZ. I would have no objection to these understandings being incorporated by amendment into the resolution of ratification or otherwise incorporated into a document that is positively and affirmatively accepted in writing by the Panamanian Government. Indeed, nothing less than that will satisfy this Senator.

Mr. MELCHER. I thank the Senator for his answer. While I reach the same conclusions that he does on two of the points he raised, I feel less than confident about their acceptance in Panama, and their true meaning as parts of the treaty, unless incorporated in the body of the treaty as amendments to the treaty. For that reason, I do not find the reservations he proposes make the Neutrality Treaty satisfactory.

Mr. SCHMITT. Mr. President, I ask for the yeas and nays on amendment No. 78 when I call it up.

The PRESIDING OFFICER. The Senator would have to offer the amendment first, or ask unanimous consent.

Mr. BAKER. Mr. President, I ask unanimous consent that it be in order to order the yeas and nays at this time on amendment No. 78.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 78

Mr. SCHMITT. Mr. President, I call up my amendment No. 78, in the nature of a substitute.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New Mexico (Mr. SCHMITT) offers an amendment numbered 78, in the nature of a substitute.

Mr. SCHMITT. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

"PREAMBLE

"Recognizing that the interconnection of the Atlantic Ocean with the Pacific Ocean through Central America is of great benefit to the nations of the world and particularly to the nations of the Americas therefore making such interconnection highly desirable,

"Acknowledging that the natural geographic configuration of Central America which permits, via technology, creation of waterways which interconnect the Atlantic Ocean and the Pacific Ocean, is part of the common heritage of the Americas,

"Satisfied that this common heritage principle necessitates the keeping of any and all such Hemispheric Waterways neutral and open for use,

"Noting that there presently exists one such Hemispheric Waterway in the Americas which has been operated, since its official and formal opening on July 12, 1920, as a neutral open and effective public service for the nations of the world.

"Desiring to insure continuance of the operation of this Hemispheric Waterway as a neutral, open and effective public service for the nations of the world as well as providing for its security and continual upgrading of its facilities and structures,

"Acknowledging that this Hemispheric Waterway and the adjacent zone of land, being physically located within the Republic of Panama, has heretofore been under the use, occupation and control of the United States of America and that the United States had all the rights, power and authority within the zone which it would have possessed and exercised if it were the sovereign to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power or authority,

"Believing that use, occupation and control of this Hemispheric Waterway should vest in an organization whose membership is composed of the nations of the Americas and that this organization should assume the rights, power and authority from the United States which is necessary and proper to effectuate the principles set forth herein,

"The United States of America, the Republic of Panama, and other interested nations of the Americas agree as follows:

"ARTICLE I

"Establishment of INTERSEA

"In accordance with the principles set forth in the Preamble to this Treaty, the Parties establish the regional organization INTERSEA for the purpose of continuing the operation and maintenance of an interoceanic canal located in the Republic of Panama.

"ARTICLE II

"Scope of INTERSEA Activities

"To carry out the provisions of article I, INTERSEA shall provide on a commercial not for profit basis facilities and services for the interoceanic canal of high, functional quality and reliability to be available on an open and nondiscriminatory basis of vessels, whether civilian or military, of all nations and to insure the neutrality and security of the interoceanic canal.

"ARTICLE III

"Juridical Personality

"1. INTERSEA shall possess juridical personality and enjoy the capacity to—

"(a) conclude agreements with States or international organizations;

"(b) contract;

"(c) acquire and dispose of property;

"(d) be a party to legal proceedings; and

"(e) borrow money and issue bonds.

"2. Sach Party shall take such action as is necessary for the purpose of making effective within its jurisdiction the provisions of this Article.

"ARTICLE IV

"Financial Principles

"1. The interest in INTERSEA of each Party shall be equal to the amount arrived at by the application of its usage share to the valuation effected pursuant to Article 4 of the Operating Treaty.

"2. Each Party shall have a usage share corresponding to its percentage of all utilization of the INTERSEA canal by all Parties as determined in accordance with the provisions of Article 4 of the Operating Treaty. However, no Party, even if its utilization of the INTERSEA canal is nil, shall have an usage share less than the minimum established in the Operating Treaty, and no Party shall have an usage share more than the maximum established in the Operating Treaty.

"3. Each party may contribute to the capital requirements of INTERSEA, and shall receive capital repayment and compensation for use of capital in accordance with the provisions of Article 3 of the Operating Treaty. Upon dissolution of INTERSEA there shall be a distribution of assets in accordance with usage share percentages after all capital contributions have been repaid.

"4. All users of the INTERSEA canal shall pay utilization charges determined in accordance with the provisions of this Treaty and Article 5 of the Operating Treaty. The rates of canal utilization charge for each type of utilization shall be the same for all users of the canal for that type of utilization.

"ARTICLE V

"Structure of INTERSEA

"1. INTERSEA shall have the following organs:

"(a) the Assembly of Parties;

"(b) the Board of Governors;

"(c) the Board of Users; and

"(d) an executive organ, responsible to the Board of Governors.

"2. Except to the extent that this Treaty or the Operating Treaty specifically provides otherwise, no organ shall make determinations or otherwise act in such a way as to alter, nullify, delay or in any other manner interfere with the exercise of power or the discharge of a responsibility or a function attributed to another organ by this Treaty or the Operating Treaty.

"3. Subject to paragraph 2 of this Article, the Assembly of Parties and the Board of Governors shall each take note of and give due and proper consideration to any resolution, recommendation or view made or expressed by each other acting in the exercise of the responsibilities and functions attributed to it by this Treaty or the Operating Treaty.

"ARTICLE VI

"Assembly of Parties

"1. The Assembly of Parties shall be composed of all the Parties and shall be the principal organ of INTERSEA.

"2. The Assembly of Parties shall give consideration to those aspects of INTERSEA which are primarily of interest to the Parties as sovereign States. It shall have the power to give consideration to general policy and long-term objectives of INTERSEA consistent with the principles, purposes and scope of activities of INTERSEA, as provided for in this Treaty. In accordance with paragraphs 2 and 3 of Article V of this Treaty, the Assembly of Parties shall give due and proper consideration to resolutions, recommendations and views addressed to it by the Board of Governors.

"3. The Assembly of Parties shall have the following functions and powers—

"(a) in the exercise of its power of considering general policy and long-term objectives of INTERSEA, to formulate its views or make recommendations, as it may deem appropriate, to the other organs of INTERSEA;

"(b) to determine what measures should be taken to prevent the activities of INTERSEA from conflicting with any general multilateral convention which is consistent with this Treaty and which is adhered to by at least two-thirds of the Parties;

"(c) to enter into the Security Agreement required by Article XVI of this Treaty, and to provide for the establishment and maintenance of a standing Defense Board provided for in said Article;

"(d) to consider and take decisions on proposals for amending this Treaty in accordance with Article XIII of this Treaty and to consider and take decisions on proposals for amending the Operating Treaty;

"(e) to make biannual determinations for the purpose of representation on the Board of Governors in accordance with Article VII of this Treaty;

"(f) to establish general rules, upon the recommendation of and for the guidance of the Board of Governors concerning the establishment and adjustment of the rates for utilization of the INTERSEA canal on a non-discriminatory basis;

"(g) to consider and express its views on the reports presented by the Board of Governors concerning the implementation of general policies, the activities and the long-term program of INTERSEA;

"(h) to take decisions, pursuant to Article XII of this Treaty, in connection with the withdrawal of a Party from INTERSEA;

"(i) to decide upon questions concerning formal relationships between INTERSEA and States, whether Parties or not, or international organizations;

"(j) to consider complaints submitted to it by States other than Parties, international organizations and users;

"(k) to select the legal experts referred to in Article 8 of the Operating Treaty;

"(l) to act upon the appointment of the Director General in accordance with Article IX of this Treaty;

"(m) to adopt the organization structure of the executive organ;

"(n) to exercise any other powers coming within the purview of the Assembly of Parties according to the provisions of this Treaty; and

"(o) to enter into an agreement with the Hemispheric Canal Commission to implement the gradual assumption of management of the hemispheric canal located in the Republic of Panama along with its related facilities by the INTERSEA Organization, including those functions performed by the Consultative Committee and the Joint Commission on Environment.

"4. The first ordinary meeting of the Assembly of Parties shall be convened by the United States within one year following the date of entry into force of this Treaty. Ordinary meetings shall thereafter be scheduled to be held every two years. The Assembly of Parties, however, may decide otherwise from meeting to meeting.

"5. (a) In addition to the ordinary meetings provided for in paragraph 4, the Assembly of Parties may meet in extraordinary meetings, which may be convened either upon request of the Board of Governors acting pursuant to the provisions of Article VIII of this Treaty, or upon the request of one or more Parties which receives the support of at least one-third of the Parties including the requesting Party or Parties.

"(b) Requests for extraordinary meetings shall state the purpose of the meeting and shall be addressed in writing to the Director General, who shall arrange for the meeting to be held as soon as possible and in accordance with rules of procedure of the Assembly of Parties for convening such meetings.

"6. A quorum for any meeting of the Assembly of Parties shall consist of representatives of a majority of the Parties.

"7. Decisions on all matters shall be taken by affirmative vote cast by a three-quarters majority of the Parties whose representatives are present and voting, with each Party having one vote. At the request of any Party, a second vote must be taken on any matter pursuant to paragraph 8 and the results of the second vote shall determine the decision.

"8. Decisions on all matters brought to a second vote shall be taken by affirmative vote cast by a three-quarters majority of the Parties whose representatives are present and voting, with each Party having the number of votes equalling the number of its usage shares as described in paragraph 2 of Article IV of this Treaty.

"9. The Assembly of Parties shall adopt its own rules of procedure, which shall include provision for the election of a Chairman and other officers.

"10. Each Party shall meet it own costs of representation at a meeting of the Assembly of Parties. Expenses of meetings of the Assembly of Parties shall be regarded as an administrative cost of INTERSEA for the purpose of Article 5 of the Operating Treaty.

"ARTICLE VII

"Board of Governors: Composition and Voting

"1. The Board of Governors shall be composed of:

"(a) one Governor representing each Party whose usage share is not less than the minimum usage share as determined in accordance with paragraph 2 of this Article;

"(b) one Governor representing each group of any two or more Parties not represented pursuant to subparagraph (a) whose combined usage share is not less than the minimum usage share as determined in accordance with paragraph 2 of this Article and which have agreed to be so represented;

"(c) one Governor representing the Board of Users;

"(d) one Governor representing the host country; and

"(e) one Governor representing the United States.

"2. (a) During the period between the date of entry into force of this Treaty and the first meeting of the Assembly of Parties, the minimum usage share that will entitle a Party or pair of Parties to be represented on the Board of Governors shall be equal to the usage share of the Party holding position ten in the list of the descending order of size of initial usage shares of all the Parties.

"(b) Subsequent to the period mentioned in subparagraph (a), the Assembly of Parties shall determine biannually the minimum usage share that will entitle a Party or group of Parties to be represented on the Board of Governors. For this purpose, the Assembly of Parties shall be guided by the desirability of the number of Governors being approximately fifteen and shall make such determination by a three-quarters majority vote pursuant to paragraphs 7 and 8 of Article VI of this Treaty.

"(c) For the purpose of making the determinations referred to in subparagraph (b), the Assembly of Parties shall fix a minimum usage share according to the following provisions—

"(i) if the Board of Governors, at the time the determination is made, is composed of fifteen, sixteen, or seventeen Governors, the Assembly of Parties shall fix a minimum investment share equal to the usage share of the Party which, in the list in effect at that time, holds the same position held in the list in effect when the previous determination was made, by the Party selected on that occasion;

"(ii) if the Board of Governors, at the time the determination is made, is composed of more than seventeen Governors, the Assembly of Parties shall fix a minimum usage share equal to the usage share of a Party which, in the list in effect at that time, holds a position above the one held in the list in effect when the previous determination was made, by the Party selected on that occasion; and

"(iii) if the Board of Governors, at the time the determination is made, is composed of less than fifteen Governors, the Assembly of Parties shall fix a minimum usage share equal to the usage share of a Party which, in the list in effect at that time, holds a position below the one held in the list in effect when the previous determination was made, by the Party selected on that occasion.

"(d) If, by applying the ranking method set forth in subparagraph (c)(ii), the number of Governors would be less than fifteen, or, by applying that set forth in subparagraph (c)(iii), would be more than seventeen, the Assembly of Parties by a three-quarters vote as in paragraph 2(b), shall determine a minimum usage share that will better ensure that there will be fifteen Governors.

"(e) For the purpose of the provisions of this paragraph, usage shares determined pursuant to Article 4 of the Operating Treaty

shall take effect from the first day of the ordinary meeting of the Assembly of Parties following such determination.

"3. Whenever a Party or pair of Parties fulfills the requirements for representation pursuant to subparagraph (a) or (b) of the first paragraph of this Article, it shall be entitled to be represented on the Board of Governors; however, the host country and the United States shall be represented by one Governor apiece.

"4. In order to ensure continuity within the Board of Governors, every Party or pair of Parties represented pursuant to subparagraph (a) or (b) of the first paragraph of this Article shall remain represented, either individually or as part of such group, until the next determination made in accordance with paragraph 2 of this Article, regardless of the changes that may occur in its or their usage shares as the result of any adjustment of usage shares. However, representation as part of a pair constituted pursuant to paragraph 1(b) of this Article shall cease should one of the pair withdraw.

"5. Each Governor shall have a voting participation equal to the usage share of the Party or pair of Parties he represents, provided that no Governor may cast more than forty percent of the total voting participation of all Parties and pairs of Parties represented on the Board of Governors. To the extent that the voting participation of any Governor exceeds forty percent of such total voting participation, the excess shall be distributed equally to the other Governors on the Board of Governors. The Governor representing the User Board shall have a voting participation equal to the Governor with the lowest voting participation.

"6. For the purposes of composition on the Board of Governors and calculation of the voting participation of Governors, the usage shares determined pursuant to Article 4 of the Operating Treaty shall take effect from the first day of the ordinary meeting of the Assembly of Parties following such determination.

"7. A quorum for any meeting of the Board of Governors shall consist of either a majority of the Board of Governors, which majority shall have at least two-thirds of the total voting participation of all Parties and pairs of Parties represented on the Board of Governors, or else the total number constituting the Board of Governors minus three, regardless of the amount of voting participation they represent.

"8. The Board of Governors shall endeavor to take decisions unanimously. However, if the Board fails to reach unanimous agreement, it shall take decisions—

"(a) on all substantive questions, either by an affirmative vote cast by at least four Governors having at least two-thirds of the total voting participation of all Parties and pairs of Parties represented on the Board of Governors taking into account the distribution of the excess referred to in paragraph 5 of this Article, or else by an affirmative vote cast by at least the total number constituting the Board of Governors minus three, regardless of the amount of voting participation they represent; and

"(b) on all procedural questions, by an affirmative vote representing a simple majority of Governors present and voting, each having one vote.

"9. Disputes whether a specific question is procedural or substantive shall be decided by the Chairman of the Board of Governors. The decision of the Chairman may be overruled by a two-thirds majority of the Governors present and voting, each having one vote.

"10. The Board of Governors, if it deems appropriate, may create advisory committees to assist it in the performance of its responsibilities.

"11. The Board of Governors shall adopt its own rules of procedure, which shall include the method of election of a Chairman and such other officers as may be required. Notwithstanding the provisions of paragraph 8, such rules may provide for any method of voting in the election of officers which the Board of Governors deems appropriate.

"12. The first meeting of the Board of Governors shall be convened in accordance with the Annex to the Operating Treaty. The Board of Governors shall meet as often as is necessary but at least four times a year.

"ARTICLE VIII

"Board of Governors: Functions

"1. The Board of Governors shall have the responsibility for the operation and maintenance of the INTERSEA canal and for the design, development, construction, establishment, operation and maintenance of any INTERSEA canal improvements and, pursuant to this Treaty, the Operating Treaty and such determinations that in this respect may have been made by the Assembly of Parties pursuant to Article VI of this Treaty for carrying out any other activities which are undertaken by INTERSEA. The responsibilities described in this Article will be assumed according to the gradual assumption of management duties schedule agreed upon between INTERSEA and the Hemispheric Canal Commission. To discharge the foregoing responsibilities, the Board of Governors shall have the powers and shall exercise the functions coming within its purview according to the provisions of this Treaty and the Operating Treaty, including—

"(a) adoption of policies, plans and programs in connection with the operation and maintenance of the INTERSEA canal and the design, development, construction, establishment, operation and maintenance of any INTERSEA and canal improvements and, as appropriate, in connection with any other activities which INTERSEA is authorized to undertake;

"(b) to prepare and present to the Assembly of Parties, and to the Parties, reports concerning the implementation of general policies, the activities and the long-term program of INTERSEA;

"(c) adoption of financial policies and annual financial statements, and approval of budgets;

"(d) formulation of recommendations to the Assembly of Parties in relation to the establishment of the general rules referred to in paragraph 3(f) of Article VI of this Treaty;

"(e) periodic establishment of the rates of charge for utilization of the INTERSEA canal, in accordance with such general rules as may have been established by the Assembly of Parties;

"(f) direction of the negotiation with the Party in whose territory the headquarters of INTERSEA is situated, and submission to the Assembly of Parties for decision thereon, of the Headquarters Agreement covering privileges, exemptions and immunities;

"(g) decisions on the making of arrangements for overdrafts and the raising of loans in accordance with Article 3 of the Operating Treaty;

"(h) submission to the Assembly of Parties and the Parties of reports and recommendations on any other matter which the Board of Governors deems appropriate for consideration by the Assembly of Parties;

"(i) provision of such information as may be required by any Party to enable that Party to discharge its obligations under this Treaty or the Operating Treaty;

"(j) appointment and removal from office of the Director General pursuant to Articles VI and IX of this Treaty;

"(k) designation of a senior officer of the executive organ to serve as Acting Director General pursuant to paragraph 4(a) of Article IX of this Treaty;

"(l) determination of the number, status and terms and conditions of employment of all posts on the executive organ upon the recommendation of the Director General;

"(m) approval of the appointment by the Director General of senior officers reporting directly to him;

"(n) arrangement of contracts in accordance with paragraph 3(b) of Article IX of this Treaty;

"(o) action in accordance with Article XII of this Treaty and Article 9 of the Operating Treaty in connection with the withdrawal of a Party from INTERSEA; and

"(p) expression of its views and recommendations on proposed amendments to this Treaty pursuant to Article XIII of this Treaty and the expression of its views and recommendations on proposed amendments to the Operating Treaty pursuant to Article 10 of the Operating Treaty.

"2. In accordance with the provisions of paragraphs 2 and 3 of Article V of this Treaty the Board of Governors shall—

"(a) give due and proper consideration to resolutions, recommendations and views addressed to it by the Assembly of Parties and the Board of Users; and

"(b) include in its reports to the Assembly of Parties information on actions or decisions taken with respect to such resolutions, recommendations and views, and its reasons for such actions or decisions.

"ARTICLE IX

"Director General

"1. The executive organ shall be headed by the Director General.

"2. (a) The Director General shall be the chief executive and the legal representative of INTERSEA and shall be directly responsible to the Board of Governors for the performance of all management functions.

"(b) The Director General shall act in accordance with the policies and directives of the Board of Governors.

"(c) The Director General shall be appointed by the Board of Governors, subject to confirmation by the Assembly of Parties. The Director General may be removed from office for cause by the Board of Governors on its own authority.

"(d) The paramount consideration in the appointment of the Director General and in the selection of other personnel of the executive organ shall be the necessity of ensuring the highest standards of integrity, competency and efficiency. The Director General and the personnel of the executive organ shall refrain from any action incompatible with their responsibilities to INTERSEA.

"3. (a) The permanent management arrangements shall be consistent with the basic aims and purposes of INTERSEA, its hemispheric character and its obligation to provide on a not for profit basis, effective interoceanic canal service.

"(b) The Director General, on behalf of INTERSEA, shall contract out, to one or more competent entities, technical and operational functions to the maximum extent practicable with due regard to cost and consistent with competence, effectiveness, and efficiency. Such entities may be of various nationalities or may be an international corporation owned and controlled by INTERSEA. Such contracts shall be negotiated, executed, and administered by the Director General. Such contracts will be entered into pursuant to the agreement for gradual assumption of management duties between INTERSEA and the Hemispheric Canal Commission.

"4. (a) The Board of Governors shall designate a senior officer of the executive organ to serve as the Acting Director General whenever the Director General is absent or is unable to discharge his duties, or if the office of Director General should become vacant. The Acting Director General shall have the capacity to exercise all the powers of the Director General pursuant to this Treaty and

the Operating Treaty. In the event of a vacancy, the Acting Director General shall serve in that capacity until the assumption of office by a Director General appointed and confirmed, as expeditiously as possible, in accordance with paragraph 2(c) of this Article.

"(b) The Director General may delegate such of his powers to other officers in the executive organ as may be necessary to meet appropriate requirements.

"ARTICLE X

"Rights and Obligations of Members

"1. The Parties shall exercise their rights and meet their obligations under the Treaty in a manner fully consistent with and in furtherance of the principles stated in the Preamble and other provisions of this Treaty.

"2. All Parties shall be allowed to attend and participate in all conferences and meetings in which they are entitled to be represented in accordance with any provisions of this Treaty or the Operating Treaty as well as in any other meeting called by or held under the auspices of INTERSEA, in accordance with the arrangements made by INTERSEA for such meetings regardless of where they may take place. The executive organ shall ensure that arrangements with the host Party for each such conference or meeting shall include a provision for the admission to the host country and sojourn for the duration of such conference or meeting, of representatives of all Parties entitled to attend.

"3. The Parties agree to refrain from either individually or jointly, the construction or establishment of an interoceanic canal through Central America, and to prohibit any person or entity within the jurisdiction of a Party to do some, unless said construction or establishment is done jointly through the INTERSEA organization.

"ARTICLE XI

"INTERSEA Headquarters, Privileges, Exemptions, Immunities

"1. The headquarters of INTERSEA shall be in the host country.

"2. Each Party other than the host country shall grant in accordance with the Protocol referred to in this paragraph and the host country shall grant in accordance with the Headquarters Agreement referred to in this paragraph, the appropriate privileges, exemptions and immunities to INTERSEA, to its officers, and to those categories of its employees specified in such Protocol and Headquarters Agreement, to Parties and representatives of Parties, and to persons participating in arbitration proceedings. In particular, each Party shall grant to these individuals immunity from legal process in respect of acts done or words written or spoken in the exercise of their functions and within the limits of their duties, to the extent and in the cases to be provided for in the Headquarters Agreement and Protocol referred to in this section. The host country shall, as soon as possible, conclude a Headquarters Agreement with INTERSEA covering privileges, exemptions and immunities. The Headquarters Agreement shall include a provision that all Parties acting in their capacity as such shall be exempt from national taxation on income earned from INTERSEA in the territory of such Party. The other Parties shall also as soon as possible conclude a Protocol covering privileges, exemptions and immunities. The Headquarters Agreement and the Protocol shall be independent of this Treaty and each shall prescribe the conditions of its termination.

"3. Within the scope of activities authorized by this Treaty, INTERSEA and its property shall be exempt in all States Party to this Treaty from all national income and direct national property taxation and from customs duties. Each Party undertakes to use its best endeavors to bring about, in accordance with the applicable domestic procedure, such further exemption of INTERSEA and its property from income and direct property taxation, and customs duties, as is desirable, bearing in mind the particular nature of INTERSEA.

"ARTICLE XII

"Withdrawal

"1. (a) Any party may withdraw voluntarily from INTERSEA. A party shall give written notice to the Depositary of its decision to withdraw. The decision of a Party to withdraw shall be notified in writing to the executive organ by the Party which has designated it and such notification shall signify the acceptance by the Party of such notification of decision to withdraw.

"(b) Voluntary withdrawal shall become effective and this Treaty and the Operating Treaty shall cease to be in force for a Party three months after the date of receipt of the notice referred to in subparagraph (a) or, if the notice so states, on the date of the next determination of usage shares pursuant to Article 4 of the Operating Treaty following the expiration of such three months.

"2. If a Party appears to have failed to comply with any obligation under this Treaty, the Assembly of Parties, having received notice to that effect or acting on its own initiative, and having considered any representations made by the Party, may decide by a three-quarter vote pursuant to paragraphs 7 and 8 of Article VI of this Treaty, if it finds that the failure to comply has in fact occurred, that the Party be deemed to have withdrawn from INTERSEA. This Treaty shall cease to be in force for the Party as of the date of such decision. An extraordinary meeting of the Assembly of Parties may be convened for this purpose.

"3. Upon the receipt by the Depository or the executive organ, as the case may be, of notice of decision to withdraw pursuant to paragraph 1(a) of this Article, the Party giving notice shall cease to have any rights of representation and any voting rights in any organ of INTERSEA, and shall incur no obligation or liability after the receipt of the notice, except that the Party, unless the Board of Governors decides otherwise pursuant to Article 7 of the Operating Treaty shall be responsible for contributing its share of the capital contributions necessary to meet both contractual commitments specifically authorized before such receipt and commitments specifically authorized before such receipt and liabilities arising from acts or omissions before such receipt.

"4. Settlement between INTERSEA and a Party for which this Treaty and the Operating Treaty have ceased to be in force shall be accomplished as provided in the Operating Treaty.

"5. (a) Notification of the decision of a Party to withdraw pursuant to paragraph 1 (a) shall be transmitted by the Depositary to all Parties and to the executive organ.

"(b) If the Assembly of Parties decides that a Party shall be deemed to have withdrawn from INTERSEA pursuant to paragraph 2, the executive organ shall notify the Depositary, and the latter shall transmit the notification to all Parties.

"ARTICLE XIII

"Amendment

"1. Any Party may propose amendments to this Treaty. Proposed amendments shall be submitted to the executive organ, which shall distribute them promptly to all Parties.

"2. The Assembly of Parties shall consider each proposed amendment at its first ordinary meeting following its distribution by the executive organ, or at an earlier extraordinary meeting convened in accordance with provisions of Article VI of this Treaty, provided that the proposed amendment has been distributed by the executive organ at least ninety days before the opening date of the meeting. The Assembly of Parties shall consider any views and recommendations which it receives from the Board of Governors with respect to a proposed amendment.

"3. The Assembly of Parties shall take decisions on each proposed amendment in accordance with the provisions relating to quorum and voting contained in Article VI of this Treaty. It may modify any proposed amendment, distributed in accordance with paragraph 2, and may also take decisions on any amendment not so distributed but directly consequential to a proposed or modified amendment.

"4. An amendment which has been approved by the Assembly of Parties shall enter into force in accordance with paragraph 5 after the Depositary has received notice of approval, acceptance or ratification by all of the Parties.

"5. Tht Depositary shall notify all the Parties as soon as it has received the acceptances, approvals or ratifications required by paragraph 4 for the entry into force of an amendment. Ninety days after the date of issue of this notification, the amendment shall enter into force for all Parties.

"6. Notwithstanding the provisions of paragraphs 4 and 5 of this Article, an amendment shall not enter into force less than eight months or more than eighteen months after the date it has been approved by the Assembly of Parties.

"ARTICLE XIV

"Settlement of Disputes

"1. All legal disputes arising in connection with the rights and obligations under this Treaty or in connection with obligations undertaken by Parties pursuant to the Operating Treaty, between Parties with respect to each other, or between INTERSEA and one or more Parties, if not otherwise settled within a reasonable time, shall be submitted to arbitration in accordance with the provisions of Article 8 of the Operating Treaty. Any legal dispute arising in connection with the rights and obligations under this Treaty or the Operating Treaty between one or more Parties may be submitted to arbitration in accordance with the provisions of Article 8 of the Operating Treaty, provided that the Party or Parties involved agree to such arbitration.

"2. All legal disputes arising in connection with the rights and obligations under this Treaty, or in connection with the obligations undertaken by Parties pursuant to the Operating Treaty, between a Party and a State which has ceased to be a Party or between INTERSEA and a State which has ceased to be a Party, and which arise after the State ceased to be a Party, if not otherwise called within a reasonable time, shall be submitted to arbitration. Such arbitration shall be in accordance with the provisions of Article 8 of the Operating Treaty, provided that the State which has ceased to be a Party so agrees. If a State ceases to be a Party after a dispute in which it is a disputant has been submitted to arbitration pursuant to the first paragraph of this Article, the arbitration shall be continued and concluded.

"3. All legal disputes arising as a result of agreements between INTERSEA and any Party shall be subject to the provisions on settlements of disputes contained in such agreements. In the absence of such provisions, such disputes, if not otherwise settled, may be submitted to arbitration in accordance with the provisions of Article 8 of the Operating Treaty if the disputants so agree.

"4. All other disputes arising as a result of the operation and maintenance of the INTERSEA canal which are not covered by paragraphs 1, 2, and 3 of this Article will be under the jurisdiction of the tribunal as

established in Article 8 of the Operating Treaty. Said tribunal will also serve as the final court of appeals for the judicial system of the INTERSEA Canal Zone.

"ARTICLE XV

"Board of Users

"1. There shall be established under the auspices of INTERSEA a Board of Users consisting of representatives from nations whose shipping interests utilize the INTERSEA canal.

"2. All users of the INTERSEA canal shall be invited to a charter conference during which the organizational structure of the Board of Users shall be created and an agreement between that entity and INTERSEA formalized.

"3. The Board of Users shall be entitled to have a representative serve as a Governor on the Board of Governors as described in Article VII of this Treaty. Reasonable staff support and funding for the Board of Users shall be provided by INTERSEA to allow the Board of Users to perform its functions as set forth in this Treaty. Said Board of Users representative shall be entitled to the rights and privileges of a Governor as set forth in paragraphs 1 and 2 of Article X and Article XI of this Treaty.

"4. The Board of Users shall advise INTERSEA on matters of policy affecting the INTERSEA canal's operation, administration, and maintenance and advise INTERSEA on policy alternatives for plans for the canal's future. The Board of Users may appoint such subcommittees as it deems appropriate to carry out its functions.

"ARTICLE XVI

"Protection and Defense

"1. The United States of America, the Republic of Panama, and any member nation of INTERSEA which enters into the Security Agreement with INTERSEA, have the responsibility to assure that the Panama Canal will remain open and secure to ships of all nations and therefore commit themselves to protect and defend the INTERSEA Canal. Each Party shall act in accordance with their respective constitutional processes to defend the Canal against any threat to the regime of neutrality, and consequently shall have the right to act against any aggression or threat directed against the Canal or against the peaceful transit of vessels through the Canal.

"2. The United States of America shall have primary responsibility to protect and defend the Canal. The rights of the United States of America to station, train, and move military forces within the Republic of Panama are described in the Security Agreement. The use of areas and installations and the legal status of the armed forces of the United States of America or any other nation in the Republic of Panama shall be governed by the aforesaid Agreement.

"3. In order to facilitate the participation and cooperation of the armed forces of Parties in the protection and defense of the Canal, the Assembly of Parties shall establish a standing Defense Board comprised of an equal number of senior military representatives of each Party. Such representatives shall be charged by their respective governments with consulting and cooperating on all matters pertaining to the protection and defense of the Canal, and with planning for actions to be taken in concert for that purpose. Such combined protection and defense arrangements shall not inhibit the identity or lines of authority of the armed forces of the Parties. The Defense Board shall provide for coordination and cooperation concerning such matters as—

"(a) the preparation of contingency plans for the protection and defense of the Canal based upon the cooperative efforts of the armed forces of the Parties;

"(b) the planning and conduct of combined military exercises; and

"(c) the conduct of military operations with respect to the protection and defense of the Canal.

"4. The Defense Board shall, at five-year intervals, review the resources being made available by the Parties for the protection and defense of the Canal. Also, the Defense Board shall make appropriate recommendations to the Parties respecting projected requirements, the efficient utilization of available resources of the Parties, and other matters of mutual interest with respect to the protection and defense of the Canal.

"5. For the purposes of its primary defense mandate, under this Article, the United States shall have all the rights necessary to protect and defend the Canal, including but not limited to the rights that:

"(a) The installations owned or used by the agencies or instrumentalities of the United States pursuant to this Article and related agreements, and their official archives and documents, shall be inviolable.

"(b) The agencies and instrumentalities of the United States operating in the Republic of Panama pursuant to this Article and related agreements shall be immune from the jurisdiction of the Republic of Panama.

"(c) The Republic of Panama shall not issue, adopt or enforce any law, decree, regulation, or international agreements or take any other action which purports to regulate or would otherwise interfere with the exercise on the part of the United States of America of any right granted under this Article or related agreements.

"(d) The United States of America and the Republic of Panama shall cooperate in taking such steps as may from time to time be necessary to guarantee the security of the Forces of the United States of America and the members thereof, the civilian component of the United States Forces, the dependents of members of the Forces and the civilian component, and their property, and the contractors of the United States Forces, their dependents, and their property. The Republic of Panama will seek from its Legislative Branch such legislation as may be needed to carry out the foregoing purposes and to punish any offenders.

"(e) The vessels of war and auxiliary vessels of the United States will be entitled to transit the Canal expeditiously. This is intended, and it shall be interpreted, to assure the transit of such vessels through the Canal as quickly as possible, without any impediment, with expedited treatment, and in case of need or emergency, to go to the head of the line of vessels in order to transit the Canal rapidly.

"6. To the extent possible consistent with its primary responsibility for the protection and defense of the Canal, the United States of America will endeavor to maintain its armed forces in the Republic of Panama in normal times at a level not in excess of that of the armed forces of the United States of America in the territory of the former Canal Zone immediately prior to the entry into force of this Treaty.

"7. Nations which enter into the Security Agreement may obtain similar rights granted to the United States under paragraph 5 of this Article.

"8. This does not mean, nor shall it be interpreted as a right of intervention of any nation in the internal affairs of the Republic of Panama. Any action under this Article will be directed at insuring that the Canal will remain open, secure and accessible, and it shall never be directed against the territorial integrity or political independence of the Republic of Panama.

"ARTICLE XVII

"Treaty Concerning the Hemispheric Canal Located in the Republic of Panama

"After termination of the Treaty Concerning the Hemispheric Canal Located in the Republic of Panama, INTERSEA shall operate the Canal.".

Mr. SCHMITT. Mr. President, amendment No. 78 embodies the concept of international management and defense of the Panama Canal, which I have referred to as Intersea.

The passage of this amendment will advise the President and, indeed, the world, that the President is prepared, upon the rejection of the treaties themselves, to adhere to another type of management system rather than that which would be in the hands of one nation.

Intersea rests on a growing realization that there are truly international resources, not only on this planet but in space itself—resources which are, in the one case, technological in nature. The most well-known example of such a technological resource is the global satellite communications system managed by Intelsat—an international management system that this country helped to found.

Maritime satellites have similar potential. Earth resources satellites and weather satellites are in various ways moving toward international management.

Also, there are geographical resources. The oceans are obviously the traditional resource that has been considered of international utility. The old concept of freedom of the seas relates to the international perspective that nations have always had of the oceans.

Another area which in this century has become of international utility is the Antarctic. More distant in our future, of course, is the international character of the Moon, and that is also embodied in treaty relationships at the present time.

There are other resources which combine international utility, both technological and geographic. One which we will begin to hear more and more of in this body and elsewhere is the resources of the seabeds. Obviously we are dealing with technological resources, because it is limited geographically although extremely extensive in potential, but it takes a very vast technology to reach those resources.

Today we are discussing an international resource created by this country that is geographically confined to the Isthmus of Panama; namely, the interoceanic canal known as the Panama Canal. There is a growing tendency toward regionalism in international alliances. National elements tied together by common interests have formed increasingly into regional organizations. Intersea combines, first, an international geographic resource—namely, a narrow neck of land between continents; second, an international technological resource—namely, a canal that crosses that neck of land; and third, a regional hemispheric management organization. Intersea does not require any nation to give up or assume responsibility for the

Panama Canal; it only requires that responsibility be shared between all nations of the hemisphere.

The Intersea amendment (amendment No. 78 in the nature of a substitute) is one of four necessary agreements that would have to be further negotiated with our friends in the hemisphere: the Intersea agreement itself; an operating treaty, which would outline the operation of that regional body, a transition treaty, to get us from where we are now into that future; and finally, a security agreement that would define the mechanism by which the canal would be defended and the particular role of the United States in that defense.

The preamble of the Intersea amendment sets forth the principles upon which the negotiations to establish Intersea would be based. I quote now from the preamble to amendment 78:

"Recognizing that the interconnection of the Atlantic Ocean with the Pacific Ocean through Central America is of great benefit to the nations of the world and particularly to the nations of the Americas therefore making such interconnection highly desirable,

"Acknowledging that the natural geographic configuration of Central America which permits, via technology, creation of waterways which interconnect the Atlantic Ocean and the Pacific Ocean, is part of the common heritage of the Americas,

"Satisfied that this common heritage principle necessitates the keeping of any and all such Hemispheric Waterways neutral and open for use,

"Noting that there presently exists one such Hemispheric Waterway in the Americas which has been operated, since its official and formal opening on July 12, 1920, as a neutral open and effective public service for the nations of the world.

"Desiring to insure continuance of the operation of this Hemispheric Waterway as a neutral, open and effective public service for the nations of the world as well as providing for its security and continual upgrading of its facilities and structures,

"Acknowledging that this Hemispheric Waterway and the adjacent zone of land, being physically located within the Republic of Panama, has heretofore been under the use, occupation and control of the United States of America and that the United States had all rights, power and authority within the zone which it would have possessed and exercised if it were the sovereign to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power, or authority,

"Believing that use, occupation and control of this Hemispheric Waterway should vest in an organization whose membership is composed of the nations of the Americas and that this organization should assume the rights, power and authority from the United States which is necessary and proper to effectuate the principles set forth herein,

"The United States of America, the Republic of Panama, and other interested nations of the Americas agree as follows:

The "as follows" is the establishment of Intersea as stated in article I.

The subsequent articles of the Intersea amendment develop in considerable detail the character of this model organization called Intersea. I will not summarize for my colleagues each article, but I strongly recommend that they study several of them, and in particular the article that deals with the protection and the defense of the canal, article XVI. In this, the rights of the United States as well as the rights of the hemisphere are fully protected. I believe Intersea establishes an instrument to guarantee the defense in perpetuity of the canal by this country, in cooperation with the hemisphere.

Mr. President, the details of this model organization will change with further negotiations with our friends in the hemisphere. These details are really not at issue with this amendment. What is at issue is the message the United States sends to the rest of the world about its future, its future policy, and its preparation for the future management of international resources on this planet.

With the acceptance of the Intersea amendment as a substitute for the Neutrality Treaty, the Senate actually would be advising the President that it will consent to a new Panama Canal Treaty only if it looks to the future, only if it creates an international arrangement that is self-enforcing, and only if it creates an international institution whose good management and defense is clearly in the self-interests of its members, and not just in the interest of one nation.

Mr. President, neither ratification nor rejection of these treaties is acceptable to the American people. The United States does need a new relationship with the Republic of Panama. These treaties, however, do not establish the type of relationship which will serve the best interests of the United States, the Republic of Panama, or the other nations of the Western Hemisphere.

It is for this reason, Mr. President, that the Senate must fulfill its constitutional obligation of advising the President and offer an alternative which does meet the needs of all the nations involved with the Panama Canal.

I offer my amendment, in the nature of a substitute, as such an alternative. It is a concept of the future—that of international management and defense of an international resource. The Senate now has the opportunity to remain in the past with the administration's proposed bilateral treaties or lead the country into the future with hemispheric operation and defense of the canal. This latter alternative will provide the framework for closer relations and cooperation among the nations of the Americas; the type of relationship envisioned by President Monroe when he voiced what has become known as the Monroe Doctrine, the type of cooperation envisioned by President Kennedy when the unveiled the "Alliance for Progress."

Yesterday, the Senator from Idaho (Mr. CHURCH) stated that international cooperation is a concept of the past, one whose time has passed. I categorically reject this interpretation and I feel that my colleagues will, after some thought, reject this interpretation.

Mr. President, we have examples of successful international and regional cooperation all around us. The Senator from Idaho is correct that nationalism is a stronger force in the world today than ever before. But international or regional cooperation is not inconsistent with nationalism. On the contrary, the enlightened nationalism in the world today understands the need for cooperation in what seems like a constantly shrinking world.

I have pointed out the success of the international communications system, Intelsat. We are presently negotiating with the other nations of the world for international solutions to deep-seabed mining. Are the proponents of this treaty suggesting that we not seek a solution to this situation? It is, after all, an international resource, as is the Panama Canal. Is not an international solution appropriate to both situations?

Western European nationalism is strong yet the Common Market has grown in strength and support among the nations of Western Europe. At the same time that these nations are exhibiting greater independence, they are also working to strengthen the NATO alliance. Another example is Spacelab. Perhaps, the best example of nationalism working for the best interests of a region is the African situation. Nationalism is stronger in Africa than possibly anywhere else in the world. Yet the Organization of African Unity is an important and strong force in that part of the world.

Mr. President, a few weeks ago, the President submitted to the Senate two United Nations covenants dealing with economic and political rights of individuals throughout the world. I find it incredible that the administration sees the protection of individual rights as the domain of the United Nations but will not even acknowledge that the protection of economic and strategic concerns of the nations of the Western Hemisphere is the right of these nations working together in cooperation.

Mr. President, could it be that the administration and those Senators who often advocate international solutions to most world problems are only selective in their approach? Is the Senate being told that international cooperation is only appropriate when the administration feels it is?

We cannot provide solutions to tomorrow's problems with yesterday's solutions. This is what we are doing with the proposed treaties. My amendment, that of hemispheric operation and defense of the canal, offers a solution for the future. The events around us point to this solution for an international resource.

Intersea provides the basis for cooperation of all the nations of the Americas. Neither the so-called Neutrality Treaty, nor any bilateral treaty, can provide for the fair and efficient operation of the canal. Only a stable political and economic base can provide these guarantees. The United States has these resources and expertise. This guarantee will be enhanced by the direct cooperation and participation of the nations of both North and South America.

Mr. President, this proposal, Intersea, is the wave of the future. If adopted by the Senate, it would set the groundwork for further negotiation by the United States with the Republic of Panama and

the other interested nations of the hemisphere. I hope the Senate looks to the future and not the past when we vote on this treaty and the Panama Canal Treaty.

The vote on this Neutrality Treaty is going to be close. If the treaty is not ratified then the vote on the Intersea amendment can be a message to the administration and the world that the new negotiations will be based on a better way of doing things, a way that has the future in mind not the past.

Mr. President, I reserve the remainder of my time. The Senator from New Mexico will yield the time.

Mr. CHURCH. Mr. President, how much time——

The PRESIDING OFFICER. The Senator from Idaho.

Mr. CHURCH (continuing). Do we have on our side?

The PRESIDING OFFICER. Fifteen minutes.

Mr. CHURCH. Mr. President, the concept proposed by the Senator from New Mexico departs entirely from the treaties negotiated by the United States and Panama. It is not the function of the Senate to negotiate, or to draft treaties on the Senate floor. This is the function of the executive branch of Government. Under the Constitution, the Senate is vested with the authority to pass judgment on treaties negotiated between the President of the United States, acting through the Secretary of State, and the Chief of State of the other signator, in this case Panama.

We can either consent to the treaty by adopting the articles of ratification, we can dissent, by refusing to adopt those articles, or we can qualify our consent by adding certain conditions, reservations, or understandings, to the articles of ratification.

There is no proper way for the Senate to draft a substitute treaty, for, of course, that process necessarily involves the two negotiating governments.

(Mr. HART assumed the chair.)

Mr. CHURCH. The proposal which is now offered by the Senator from New Mexico provides for multinational control of the Panama Canal under a complex formula involving the user nations, the sovereign nation, and nations having the other principal economic and military interests in the canal. It would require Panama to relinquish its goals as expressed in these treaties. More importantly, it would require the United States to relinquish the advantages we obtain by these treaties.

The United States would lose its definitive right to manage and operate the canal during the next 22 years, and the definitive right to act unilaterally to insure the neutrality, security, and accessibility of the canal thereafter.

The United States then would be dependent on the collective judgment of a group of nations whose interests might well conflict with ours. We would be at the mercy of management and financial decisions made by the nations represented on the various boards and committees proposed by the Senator from New Mexico, with their complex voting formulas.

Under the Panama Canal Treaty the United States has the final vote on all management decisions.

The so-called Intersea proposal advanced by the Senator from New Mexico provides a forum, and a vote, for conflicting interests, both military and economic, which may not be in harmony with our own. It is not at all analogous to the commonality of interests encompassed in other international organizations, such as Intelsat.

It would require scratching 13 years of patient negotiations with Panama only to substitute a vague and uncertain concept, however innovative and worthy of consideration in a more perfect world. If this was a situation where no reasonable solution had been devised, it would be different. But the treaties present a reasonable and workable formula that has been agreed upon by the two countries.

Mr. President, I could continue detailing why the Senate should not adopt this substitute proposal. I could point out that it would require scuttling treaties which are supported by both the Latin American nations and the user nations of the world. I could point out how it would require renegotiation of the entire set of bilateral agreements represented by these treaties. I could underscore that the United States would lose its right to decide when to come to the defense of the canal and to take whatever actions might be necessary to insure its security. Since we all know that the United States is the only nation in the hemisphere which can insure the security of the canal, our right to act should not be subjected to a nebulous collective judgment.

Perhaps, Mr. President, in a more perfect world, the Senator's proposal could be considered. As I said to him yesterday, there was a time when people were still stunned by the terrible destruction wrought by the Second World War, when there were high hopes that the United Nations would preserve the peace, when some kind of regional formula for the control of international waterways, such as the Panama Canal, the straits of Gibraltar, the Dardanelles, the Suez Canal, might have been timely. But that day has passed, and the hallmark of the period which followed has not been regionalized or internationalism but rather nationalism, a fiery nationalism so intense that it brought down all the prevailing empires that had lasted for two to three centuries and had dominated continents such as Africa, Asia, and much of Latin America. This is the prevailing force of our time.

In the treaty pending before the Senate, we have attempted to accommodate the intense feeling of nationalism that exists in Panama, as indeed it does in every other country of the world.

(Mr. LEAHY assumed the chair.)

Mr. CHURCH. I suggest that, even though the proposal of the Senator from New Mexico is well motivated, even though there could have been a time in the immediate aftermath of the Second World War when such a proposal might have been seriously entertained, it is no longer practicable to attempt such an approach and make it applicable to the Panama Canal alone.

For these reasons, Mr. President, I would hope that now, in the 11th hour of this debate, on the threshold of passing judgment upon the treaties negotiated for the past 14 years between the two countries, the Senate would reject the substitute offered by the Senator from New Mexico.

Mr. HART. Will the Senator yield for not to exceed 2 minutes?

Mr. CHURCH. I am happy to yield.

Mr. HART. Mr. President, I will oppose this amendment for at least two of the reasons which the Senator from Idaho has stated; namely, that a negotiating decision was made some 13 or 14 years ago by four administrations past as to the best course of action for this country and the course which it should pursue; namely, a traditional negotiating posture.

The second reason, as the Senator from Idaho has stated, is that the scope of the Senate's authority in negotiating treaties is extremely limited, if it exists at all.

On the other hand, I would like to identify myself with the thrust of this amendment. I think the Senator from New Mexico is to be congratulated for putting into an orderly and structured form a concept which others have suggested as a concept in recent weeks. Unlike the distinguished floor manager of the treaties, I do not find this idea or proposal as fraught with peril as he seems to, from a diplomatic point of view.

I think the concept has a great deal of merit. I do not think this is the proper forum or time for its serious consideration.

If these treaties were to fail, and I hope they do not, I think the idea in one form or another as contained in this proposal deserves serious consideration by this administration. I thank the Senator from Idaho.

Mr. SCHMITT. Mr. President, how much time remains to the Senator from New Mexico?

The PRESIDING OFFICER (Mr. HART). The Senator from New Mexico has 7 minutes remaining.

Mr. SCHMITT. I thank the Chair.

Mr. President, I thank the Senator from Idaho and the Senator from Colorado for their comments, many of which were constructive. I certainly appreciate Senator HART's feeling that in the long run the idea of international management of international resources has merit.

Mr. President, I must say in rebuttal that the Intersea amendment merely sets the philosophical stage for further negotiations. It is not the Senate negotiating the treaty. We cannot do that. But it does send the message of the kind of general outline under which we would expect a new treaty to be negotiated. It also sets the practical stage for the development of an operating treaty which would take care of the activities of Intersea after the transition time, as with treaties under consideration, conceived to be the year 2000: a transition treaty that would get us to that point; and,

most importantly, a security agreement. I wish again to call the Senators' attention to article XVI, which outlines the basis by which the Senate would provide for not only the security of the canal but the legitimate interests of the United States of America. It is not something that has been thought about in an offhanded way. It is something that would be incorporated along these lines within such a treaty.

The Intersea concept, the Intersea idea, is designed for an imperfect world, not a perfect world. It was created within this structure. It is not as complex as the Senator from Idaho has led us to believe. If the amendment is studied, one sees that it creates a management and defense system that is self-enforcing. That is exactly what we need in an imperfect world.

That is what we have lacked in this imperfect world, self-enforcing mechanisms to have all the nations looking after their own self-interest—political, economic, military, and otherwise, but doing so within a framework where they reinforce each other, rather than destroy each other.

The function of the Senate, Mr. President, is to advise on what will be acceptable to the American people. We represent the American people in the negotiating process. Unfortunately, over the past 14 years, I think the American people clearly have not been fully represented in the negotiating process with the Republic of Panama.

I agree that we should not draft a treaty. We should only indicate the kind of treaty that we would find acceptable should we, in fact, find that the neutrality treaty and/or the Panama Canal Treaty, presently before us, are unacceptable.

We would not lose our rights under Intersea. As a matter of fact, the guarantee of those rights, in this Senator's opinion, is much stronger under the Intersea concept than it is under the present treaties. I think that if the Senator from Idaho and others had just considered the nature of Intersea, the nature of the amendment, they would see that that is so.

We have joined with many nations in other concepts of international management. Some of them have worked, some of them have not. I call again the attention of my colleagues to the fact that we have given up some rights, but we have gained many others, when we joined with Intelsat and with other nations in the Intelsat organization to manage an essential resource for mankind, global satellite communications.

It is 14 years, as the Senator has noted, since we began the negotiations on the Panama Canal Treaty. That is a long time. It means, unfortunately, that we are wedded to the past by the treaties that we have before us. The Senator from New Mexico merely intends to try to get the Senate to look to the future.

Again, I say that, even if this amendment is not passed, through the votes on the amendment in the nature of a substitute, we can, in fact, tell the world and the administration what we will be willing to do and what they should do if the treaties fail.

I reserve the remainder of my time, Mr. President.

The PRESIDING OFFICER. Who yields time?

Mr. ALLEN. Will the Senator from Idaho yield me some time?

Mr. CHURCH. I am constrained to ask the Senator from Alabama if he is rising to oppose the substitute?

Mr. ALLEN. I merely ask the Senator if he will yield me 3 or 4 minutes.

Mr. CHURCH. I am happy to yield 4 minutes.

Mr. ALLEN. That will be satisfactory.

The PRESIDING OFFICER. The Senator from Idaho has only 3 minutes remaining.

Mr. CHURCH. Would the Senator be satisfied with 2 minutes?

Mr. ALLEN. Yes, that will be fine. I thank the Senator from Idaho.

Mr. President, I have not often found myself in agreement with the distinguished Senator from Idaho on the issue before the Senate during the course of this debate. As a matter of fact, I have voted for every single amendment that has been offered on the Senate floor because I believed that they would improve the treaty and not because I felt that they would cause some difficulty in approval by Panama of the treaties.

I commend the distinguished Senator from New Mexico for his lofty and high-level approach to this problem and the altruism with which he has gone about his study of this question. But I seriously doubt if we want to move in the direction of international control of the body. I think it is enough that we are giving the canal to Panama, but we will have, certainly, a favored relationship with Panama. I hope that the distinguished Senator from New Mexico—having introduced this amendment, having had it printed in the RECORD, having had debate on the floor, and having predicted that this concept will come back, again and again—will be satisfied with the thought and the hope and the expectation that, at some time, this will be an idea whose time has come and that he will not insist at this time that the time for this idea has come.

I hope that he will. at the end of the debate period. withdraw the amendment from consideration before the Senate rather than have a vote on it.

I thank the distinguished Senator from Idaho for yielding me time.

Mr. SCHMITT. Mr. President, I greatly admire the Senator from Alabama. I appreciate his comments and his thoughts and his question. I feel, however, that I cannot do that, because I believe it is an idea whose time has come, not only with respect to the Panama Canal, but with respect to other debates we will have soon on this floor.

I remind the Senator from Alabama that if the treaties before us are ratified essentially as they stand, after a period of time, we will have no effective sovereignty in the Panama Canal, we will only have some pieces of paper. Unfortunately, very rapidly, we will begin to lose effective control over the operation, management, and defense of the canal. Under the Intersea concept, we will retain that effective sovereignty to the extent that we utilize the canal, as will every other nation in the hemisphere gain a certain amount of sovereignty. It is in that sharing of sovereignty that lies the strength of Intersea. That is the strength, for us as well as the hemisphere and for other users throughout the world, of this very, very important waterway.

Mr. President, if there is no further debate, I am happy to yield back the remainder of my time.

Mr. CHURCH. Mr. President, if, 14 years ago, when negotiations commenced with Panama for a new arrangement, the Senator's proposal had been laid before the nations of this hemisphere, perhaps we would have today, some kind of hemispheric treaty before us. However, it took us 14 years to get a treaty with one country. The Senator's proposal would require the agreement of 31 countries. Even 14 years might not have been enough for a hemispheric accord, but obviously, at this point in the discussion of the treaty before us, it is untimely to consider the substitute. I urge the Senate to reject it.

The PRESIDING OFFICER. All time has expired.

Mr. CHURCH. Mr. President, I move to lay the amendment on the table and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay Mr. SCHMITT's amendment on the table. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Montana (Mr. PAUL G. HATFIELD), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Maine (Mr. MUSKIE), and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

The result was announced—yeas 65, nays 30, as follows:

[Rollcall Vote No. 58 Ex.]

YEAS—65

Allen	Hart	Melcher
Anderson	Haskell	Metzenbaum
Bayh	Hatfield, Mark O.	Moynihan
Bentsen	Hathaway	Nelson
Biden	Hayakawa	Nunn
Bumpers	Heinz	Pearson
Burdick	Hodges	Pell
Byrd, Robert C.	Hollings	Percy
Cannon	Huddleston	Proxmire
Case	Humphrey	Randolph
Chafee	Inouye	Ribicoff
Chiles	Jackson	Riegle
Church	Javits	Sarbanes
Clark	Kennedy	Sasser
Cranston	Leahy	Sparkman
Culver	Long	Stafford
Danforth	Magnuson	Stevenson

Dole	Lugar	Wallop
Domenici	McClure	Young
Eastland	Morgan	
	Packwood	

NOT VOTING—5

Abourezk	Johnston
Hatfield, Paul G.	Muskie
	Stennis

So the motion to lay on the table was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. PEARSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, for some time now, we all have been studying the Panama Canal treaties. Having gone to Panama with two other Members of the Senate, I would like once again to speak as one who is opposed to the treaties as presented to the Senate, but one who also firmly believes that a new relationship is needed between Panama and the United States, to assure the security, proper operation, and maintenance of the canal.

I have developed a series of amendments to create a permanent partnership between the Republic of Panama and the United States of America in which, after the year 2000, Panama would be the active partner in the security, operation, and maintenance of the canal, and the United States would be a silent partner, acting to protect the security and assure proper maintenance and operation of the canal only when the Republic of Panama was unable or unwilling to do so.

I point out that, under the other treaty, approximately up to the year 2000 the United States would be a senior partner in the operation of the canal, under the documents before the Senate. I believe that a permanent partnership scenario in which Panama is the active partner and the United States the silent partner after the year 2000 is the proper mechanism for the Republic of Panama and the United States to meet their respective future needs.

The treaties as drafted are ambiguous and fraught with inconsistencies. These documents, however, could have been corrected by amendments.

My staff and I have developed a series of amendments which, if adopted, in my opinion, would protect the security and economic interests of the United States.

Mr. President, I ask unanimous consent that these amendments and the explanation of each be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ARTICLE I

(Explanation)

The amendment to Article I changes the Neutrality Treaty by adding clear language which makes the new relationship between Panama and the United States a partnership. Amendments to Articles IV, V, and VI and a technical conforming amendment to Article II establish Panama as the active partner; the United States as the silent partner acting only when Panama is unable or unwilling to properly defend, operate or maintain the Canal.

In Article II the added words "and the United States of America" conform the Article to the change in Article I.

In Article IV all of the new language is needed to set out the active partner/silent partner role between the Republic of Panama and the United States. It is a visual rendition of the rights of the United States.

The first half of the first sentence of new language to Article V and the second sentence of the new language to that Article, corrects an inconsistency between the partnership obligations of Article IV and the exclusiveness of Panama's right under existing Article V.

In the first line of Article I, after the word "Panama" insert the words "and the United States of America" and delete the word "declares" and insert in lieu thereof the word "declare". Immediately after the first sentence of Article I, add the sentence "Such regime establishes a new relationship which continues the partnership between the Republic of Panama and the United States of America with respect to the security and neutral operation and maintenance of the Canal, including its complementary works, equipment and installations."

ARTICLE I

(As amended)

The Republic of Panama and the United States of America declare that the Canal, as an international transit waterway, shall be permanently neutral in accordance with the regime established in this Treaty. Such regime establishes a new relationship which continues the partnership between the Republic of Panama and the United States of America with respect to the security and neutral operation and maintenance of the Canal, including its complementary works, equipment and installations. The same regime of neutrality shall apply to any other international waterway that may be built either partially or wholly in the territory of the Republic of Panama.

ARTICLE II

(Explanation)

The new words "and the United States of America" is a technical, conforming change to your Article I amendment. If we were not forced to work article by article, this language would properly be part of the Article I amendment.

In the first line of Article II, after the word "Panama", insert the words "and the United States of America" and delete the word "declares" and insert in lieu thereof the word "declare".

ARTICLE II

(As amended)

The Republic of Panama and the United States of America declare the neutrality of the Canal in order that both in time of peace and time of war, it shall remain secure and open to peaceful transit by vessels of all nations on terms of entire equality, so that there will be no discrimination against any nation, or its citizens or subjects, concerning the conditions or charges of transit, or for any other reason, and so that the Canal, and therefore the Isthmus of Panama, shall not be the target of reprisals in any armed conflict between the nations of the world. The foregoing shall be subject to the following requirements:

(a) Payment of tolls and other charges for transit ancillary services, provided they have been fixed in conformity with the provisions of Article III(c);

(b) Compliance with applicable rules and regulations, provided such rules and regulations are applied in conformity with the provisions of Article III;

(c) the requirement that transiting vessels commit no acts of hostility while in the Canal; and

(d) Such other conditions and restrictions as are established by this Treaty.

ARTICLE IV

(Explanation)

Sets out the rights of the United States as a partner in the permanent security and neutral operation of the Panama Canal. This new language is needed to establish the active partner/silent partner role between Panama and the United States. It is a visual rendition of the rights of the United States.

In Article IV, line 1, after the word "Panama" and before the word "agree" insert the words ", acting as partners with respect to the permanent security and neutral operation and maintenance of the Panama Canal,".

At the end of Article VI, add the following paragraph:

"2. The United States of America and the Republic of Panama, acting as partners in the maintenance of the regime of neutrality, shall have the right and the responsibility to unilaterally act in order to assure the security and neutral operation and maintenance of the Canal. The two contracting partners shall, inter alia, unilaterally have the right to:

(a) Act to preclude any military or paramilitary forces from interfering with the security or neutral operation and maintenance of the Canal;

(b) Act to preclude any attempt by a foreign nation to garrison military or paramilitary forces or maintain defense sites or other military installations in the Republic of Panama except as provided in the Panama Canal Treaty;

(c) Inspect the Canal, its complementary works, equipment and installations, and provide such technical assistance or other forms of participation as may be necessary and appropriate to maintain the efficient operation of the Canal;

(d) Take such steps as may be necessary and appropriate to uphold the regime of neutrality so as to assure the permanent security and neutral operation and maintenance of the Panama Canal, including its complementary works, equipment and installations."

Renumber the existing paragraph accordingly.

ARTICLE IV

(As amended)

1. The United States of America and the Republic of Panama, acting as partners with respect to the permanent security and neutral operation and maintenance of the Panama Canal, agree to maintain the regime of neutrality established in this Treaty, which shall be maintained in order that the Canal shall have the right and the responsibility standing as any other treaties entered into by the contracting parties.

2. The United States of America and the Republic of Panama, acting as partners in the maintenance of the regime of neutrality, shall have the right and the responsibility to unilaterally act in order to assure the security and neutral operation and maintenance of the Canal. The two contracting partners shall, inter alia, unilaterally have the right to:

(a) Act to preclude any military or paramilitary forces from interfering with the security or neutral operation and maintenance of the Canal;

(b) Act to preclude any attempt by a foreign nation to garrison military or paramilitary forces or maintain defense sites or any other military installations in the Republic of Panama except as provided in the Panama Canal Treaty;

(c) Inspect the Canal, its complementary works, equipment and installations, and provide such technical assistance or other forms of participation as may be necessary and appropriate to maintain the efficient operation of the Canal;

(d) Take such other steps as may be necessary and appropriate to uphold the regime of neutrality so as to assure the permanent security and neutral operation and maintenance of the Panama Canal, including its complementary works, equipment and installations.

ARTICLE V

(Explanation)

The first half of the first sentence of new language to Article V and the second sentence of the new language to that Article corrects an inconsistency between the partnership obligations of Article IV and the exclusiveness of Panama's rights under existing Article V.

The new language also affirms the right of the United States of America and Panama to negotiate a new treaty for American bases in the Republic of Panama.

The new paragraph 2 assures that Panama will properly use the tolls and other operating revenues for the operation and maintenance of the Canal. This avoids the problem of Panama channeling the tolls and operating revenues from the Canal to their national treasury, leaving the United States to bear the costs of maintenance and operation of the Canal.

At the end of Article V, after the word "territory.", add the following: "Nothing in this Article shall be construed as prohibiting the United States of America from conducting such operation and maintenance of the Canal or maintaining such military forces, defense sites and military installations as are necessary to fulfill its rights and responsibilities under Article IV, nor shall anything in this Treaty be construed as prohibiting the United States of America and the Republic of Panama from entering into any other treaty which provides for the garrisoning of military forces of the United States of America or the establishment of defense sites or installations of the United States of America within the Republic of Panama.

"2. All tolls and other operating revenues of the Canal shall be used to the extent necessary for the operation and maintenance of the Canal."

Renumber the existing paragraph accordingly.

ARTICLE V

(As amended)

1. After the termination of the Panama Canal Treaty, only the Republic of Panama shall operate the Canal and maintain military forces, defense sites and military installations within its national territory. Nothing in this Article shall be construed as prohibiting the United States of America from conducting such operation and maintenance of the Canal or maintaining such military forces, defense sites and military installations as are necessary to fulfill its rights and responsibilities under Article IV, nor shall anything in this Treaty be construed as prohibiting the United States of America and the Republic of Panama from entering into any other treaty which provides for the garrisoning of military forces of the United States of America or the establishment of defense sites or installations of the United States of America within the Republic of Panama.

2. All tolls and other operating revenues of the Canal shall be used to the extent necessary for the operation and maintenance of the Canal.

Mr. STEVENS. Some Members of the Senate object to all amendments to the Panama Canal treaties because they could potentially force a second plebiscite in Panama. Under the present treaties, after the year 2000 the United States would have no ability to protect its defense and economic interests in the Panama Canal except by the use of force. Mr. President, I believe it is imprudent for the U.S. Senate to grant its advice and consent to any arrangement which places us in such an untenable position. I see no reason why we should be put in the position where our only relationship after the year 2000 can be developed through the use of force, only through the use of force, in regard to the operation, maintenance, and security interests of this canal.

My amendments, by creating a partnership arrangement, place the United States in the position where it can peacefully and without the use of force maintain a presence in the Canal Zone to conduct inspections of the canal and when such inspections show that the Panamanians are unable or unwilling to properly maintain the canal, would allow the United States to enter and conduct routine maintenance as necessary. The American people have a right to demand that a continuing relationship be created between Panama and the United States which will allow the United States to asssure the proper maintenance and operation of the Canal without the use of military intervention.

A second plebiscite is less onerous than leaving to future generations problems caused by ambiguities and misinterpretations which, in their time, would only be solvable by use of force. My amendments are substantive—not dilatory. If these amendments are adopted and the problem of funding in the other treaty is resolved, I can support these treaties. I have waited to offer my amendments until after the Senate finished considering the articles of the Neutrality Treaty, but I feel they must be considered under the arrangement, as I understand the Senate is in now, while we are still in the Committee of Whole.

I offer this one amendment as a key amendment to article I. If it fails I shall not offer the remaining amendments which I have discussed with other Members of the Senate. Mr. President, I understand full well the time arrangement. Unfortunately, I was not here last evening when the time arrangement was made, and the time expires now, and we must go into the resolution of ratification at 4 p.m.

It would be my intention to ask, if there is to be a motion to table this amendment, that there just be a voice vote on it prior to that time.

Mr. PACKWOOD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. PACKWOOD. Mr. President, I have been, and continue to be, on record in support of the Panama Canal treaties, and I would like to think they could be considered without reference to any other external remarks or comments that are made.

But I have got to confess I am troubled and disgusted by the reports of the deals that are being made in exchange for votes on this treaty.

Several papers this morning carried stories that the President has traded a $250 million copper purchase for a vote; that he has traded support on a farm bill for a vote. I do not know whether these stories are true or not, but if they are then a new factor has been thrown into the consideration of this treaty.

The President has indicated that for the sake of support of the Presidency we must support these treaties. While I am not overly moved by that argument, I have no desire to embarrass the President in his efforts to negotiate overseas. But, on the other hand, if he is bartering away votes on other matters for the sake of votes for the canal, then he has thrown another element into the support for the Presidency, and that is that no occupant of the White House can stoop so low that he is willing to trade the integrity and honor of that office for votes on the canal treaties.

That in and of itself is not a sufficient end to justify voting for it no matter what else may come before that vote.

(Mr. GRAVEL assumed the chair.)

I would like to think that the occupant of the White House is still the President of the United States and not the master of ceremonies on "Let's Make a Deal." If the rumors of these trades are true, then I will have no alternative but to reconsider my previous support of this treaty and weigh very heavily the other factors that now seem to be coming into play.

UP AMENDMENT NO. 10

(Purpose: To make the Republic of Panama and the United States partners in the future security, operation and maintenance of the Canal.)

Mr. STEVENS. Mr. President, I would like to call up my amendment at this time.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS), for himself, Mr. BELLMON, and Mr. GARN, proposes an unprinted amendment numbered 10:

In the first line of Article I, after the word "Panama" insert the words "and the United States of America" and delete the word "declares" and insert in lieu thereof the word "declare". Immediately after the first sentence of Article I, add the sentence "Such regime establishes a new relationship which continues the partnership between the Republic of Panama and the United States of America with respect to the security and neutral operation and maintenance of the Canal, including its complementary works, equipment and installations".

Mr. STEVENS. I might say to the manager of the bill, the proponents of the treaty, that is, I realize the time situation, and I too have been caught. I do not wish to be unfair. I assume he will make a motion to table this amendment at 4 o'clock and, therefore, I yield the floor at this time.

Mr. CHURCH. Mr. President, the amendment offered by the able Senator

from Alaska is just one of a series of amendments which, if adopted, would rewrite both the Neutrality Treaty and the Panama Canal Treaty.

We cannot rewrite these two treaties at this late hour nor is there any assurance that the concept of partnership would ever be acceptable. Presumably, had such a concept been acceptable to Panama, it would have been considered in the negotiations over the past 14 years.

I do not know what the final vote will be when the Senate passes on the Neutrality Treaty and the Panama Canal Treaty. If the Senate rejects them, and we go back to the bargaining table I doubt very much that we will ever get another agreement as satisfactory to the United States as the treaties now before us.

In any event, the partnership concept would require negotiation ab initio and is, therefore, inappropriate for the Senate to consider at this time.

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. CHURCH. I am happy to yield to my good friend, Senator SARBANES.

Mr. SARBANES. I want to emphasize the point made by the very able Senator from Idaho (Mr. CHURCH) that these negotiations now have gone on since 1964 in an effort to arrive at documents which both parties felt protected their interests and upon which they could agree.

I have heard Members stand on the floor of the Senate and say, "Well, we can reject these treaties and we will just go back and negotiate a new set of treaties."

I would urge Members to stop for a moment and think about that. If these treaties are rejected, I submit to you the choice that is going to be before us is either to maintain the American position in Panama through force or eventually to reach a new set of agreements which I am prepared to predict will not be as accommodating or as favorable or as protective of America's needs as the treaties that are before us now.

These have been negotiated over a long period of time, under, in some instances, very difficult circumstances, and the assumption which some people seem to have that they can be rejected and we will go back and get the Panamanians to agree to a new set of arrangements more favorable to the United States. I think is without any foundation whatsoever.

To begin with, I think it is very questionable that you will get them to agree at all, and certainly if any agreement is ever reached it will be far less accommodating to American interests than the provisions of the treaties before us.

Mr. CHURCH. The Senator is correct. In my judgment, if the Senate rejects these treaties, we will rule the Canal Zone by the sword, and if we again have access to the pen, we will never get agreements as favorable to the United States as those now before us.

On that basis, Mr. President, I move to table the amendment offered by the Senator from Alaska.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Alaska. (Putting the question.)

The motion to lay on the table was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. SARBANES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MAGNUSON. Mr. President, as long as the Senator from Maryland and the Senator from Idaho are here, I would like to have them answer a question for me. Maybe they cannot do it formally——

RESOLUTION OF RATIFICATION

The PRESIDING OFFICER. The time for debate has expired. The hour of 4 o'clock having arrived, under the previous order, the clerk will state the resolution of ratification.

The legislative clerk read as follows:

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal, together with the Annexes and Protocol relating thereto, done at Washington on September 7, 1977 (Executive N, Ninety-fifth Congress, first session), subject to the following amendment:

(A) At the end of Article IV, insert the following:

"A correct and authoritative statement of certain rights and duties of the Parties under the foregoing is contained in the Statement of Understanding issued by the Government of the United States of America on October 14, 1977, and by the Government of the Republic of Panama on October 18, 1977, which is hereby incorporated as an integral part of this Treaty, as follows:

" 'Under the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal (the Neutrality Treaty), Panama and the United States have the responsibility to assure that the Panama Canal will remain open and secure to ships of all nations. The correct interpretation of this principle is that each of the two countries shall in accordance with their respective constitutional processes, defend the Canal against any threat to the regime of neutrality, and consequently shall have the right to act against any aggression or threat directed against the Canal or against the peaceful transit of vessels through the Canal.

" 'This does not mean, nor shall it be interpreted as, a right of intervention of the United States in the internal affairs of Panama. Any United States action will be directed at insuring that the Canal will remain open, secure, and accessible, and it shall never be directed against the territorial integrity or political independence of Panama.'."

(B) At the end of the first paragraph of Article VI, insert the following:

"In accordance with the Statement of Understanding mentioned in Article IV above: 'The Neutrality Treaty provides that the vessels of war and auxiliary vessels of the United States and Panama will be entitled to transit the Canal expeditiously. This is intended, and it shall so be interpreted, to assure the transit of such vessels through the Canal as quickly as possible, without any impediment, with expedited treatment, and in case of need or emergency, to go to the head of the lines of vessels in order to transit the Canal rapidly.' ".

The PRESIDING OFFICER. Under the previous order, the Senator from Virginia (Mr. SCOTT) is recognized for not to exceed 1 hour.

Mr. MAGNUSON. Mr. President, will the Senator yield to me?

Mr. SCOTT. I am glad to yield 2 minutes to the distinguished Senator from Washington.

Mr. MAGNUSON. I want to pose this question, if I may get the attention of the managers of the treaty.

We are now in the process of appropriating money for next year, for fiscal 1979. There is in the budget the usual appropriation for the maintenance of the Panama Canal. It has been about the same over the years; it is not up or down.

I have not yet heard from anyone in this debate—I have not been here every minute of the debate, but I have been here quite frequently. Will we be faced, with the ratification of this treaty as it is now written, with a supplemental appropriation for the Panama Canal to carry out the treaty, and, if so, how much money are we talking about?

I am very much concerned about that. Are we going to have to appropriate more money? There are a lot of people in this country who might be for this diplomatic and political arrangement, but when it comes to their tax dollars, they want to know what this means.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. MAGNUSON. I want to know what it means. I do not want to be faced, if and when we get through with this debate and say it is ratified with amendments, with a big supplemental coming up from downtown because of the fact that we have taken this so-called diplomatic action.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. MAGNUSON. I would like to know the figures. I have not been able to get them. I do not know where they are, and I must say, frankly, I might take another look at this thing if they are too high, because I have the responsibility of appropriating the money.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. MAGNUSON. If they are too high, or if they are not justified. But I would like to know before I vote on this matter what is this going to cost in dollars and cents? That is what I would like to know.

Mr. SARBANES. Will the Senator from Virginia yield additional time?

Mr. SCOTT. Mr. President, I am going to address myself to that question, and I have previously made some comments with regard to it.

Mr. MAGNUSON. I will just leave the question open. It may be difficult to get the figures, if they are there. You can put them in the RECORD, or I will come here and listen tomorrow.

Mr. SCOTT. Mr. President, I do have remarks to make, and have reserved the time.

The PRESIDING OFFICER. The Senator from Virginia has the floor.

Mr. SCOTT. Mr. President, I appreciate the opportunity to share some thoughts on the final action to be taken with regard to the Neutrality Treaty after we have finished the reading of the treaty for amendment and prior to final action on the resolution of ratification. Although numerous amendments have been proposed, only the leadership amendments have been adopted. But, in my judgment, the crucial issue is the final action taken on the Neutrality Treaty and its effect, if any, on the canal treaty.

As always, reasonable people can disagree on the desirability of ratification and I would hope that nothing I say would be interpreted to reflect upon the judgment or integrity of any colleague who may have an entirely different point of view. Nevertheless, it appears to me that these treaties were negotiated under pressure from Panama. The Panamanian dictator, General Torrijos, over a period of years has fostered a climate of hostility to the American presence in the Canal Zone and the White House and Senate leadership, time and again, have indicated their opposition to amendments that might cause another plebiscite to be taken by Panama, that Torrijos might not like that. Let me submit that General Torrijos is part of the problem. The agitation over the past decade to a large extent generated by General Torrijos is reminiscent of a spoiled child having a temper tantrum when he does not get his way.

We should call to mind that this is a man who used his position of leadership within the naticnal guard of his country to overthrow a legaily elected government and forcibly to establish himself as chief of state. Therefore, it does not seem reasonable that he can legitimately represent the aspirations of the people of Panama when he came into power through a coup, or military overthrow of the legitimate government of Panama.

In a broad sense, the treaties appear to be written in a way to meet the demands of Panama and to further the interest of Panama rather than the interest of the United States. Under the advise and consent clause of the Constitution, however, we are now charged with the responsibility to act in the best interests of the people of the United States. Our loyalty, our concern should be for the American people with only a collateral interest in fairness to Panama. At the present time, the United States has ownership, possession, and control of the Canal Zone and from the viewpoint of our own national interest, there does not appear to be any need to negotiate new treaties. Senators made this somewhat clear during the 94th Congress when more than one-third of the Members joined in cosponsoring a resolution calling upon the executive branch not to negotiate a treaty that would give away our rights in the Canal Zone.

Under the two treaties before the Senate we do not obtain any new benefits but we lose substantially all interests we now have within the Canal Zone. It would appear that our negotiators were willing to give Panama anything it wanted and Panama wanted everything it could get. This has resulted in one-sided treaties, no mutuality, treaties that, in my judgment, are not in the best interest of the people of the United States, or in the best interest of the people of the free world.

For example, article V of the 1903 treaty grants to the United States in perpetuity a monopoly for the construction of a canal anywhere within the country of Panama. Yet, article XII of the proposed Panama Canal Treaty provides that no interocean canal can be constructed within Panama for the duration of that treaty except in accordance with the terms of the treaty, or if the two parties may otherwise agree and the following paragraph states that for the duration of the treaty, the United States shall not even negotiate for the right to construct an interocean, or any other route in the Western Hemisphere except as the two parties may otherwise agree. Mr. President, this provision would not only prevent us from constructing a second canal within Panama without its consent but would prevent us from even negotiating with Colombia, or any of the Central American countries, or with Mexico for a possible alternative interocean canal. This portion of the treaty seems to be contrary to commonsense.

We obtained our interest in the Canal Zone primarily from four sources: The 1903 treaty with Panama, the purchase of all rights of the French company which attempted to construct a canal through the Isthmus, the purchase of private, proprietary rights of owners and squatters and what was tantamount to a quitclaim from Colombia. We provided a wonderful source of revenue for the country of Panama, rid the country of yellow fever, controlled malaria, provided sanitary water and sewage systems and over the years, have substantially aided Panama in obtaining the highest standard of living within Central America. Yet, under the proposed treaties, we would give up title and control to the Government of Panama. Over a period of years, both our civilian employees and our military forces would be phased out so that in less than 22 years we would have no military and few civilian employees within the Canal Zone. If any Americans remained within the zone after that time, they will be working for the Panamanian Government and living as foreigners within what is now the American Canal Zone.

Much discussion has been had about the neutrality of the canal after we turn over ownership, operation, and control to Panama. The leadership's amendments adopted by the Senate have included the statement of understanding between General Torrijos and President Carter in an effort to guarantee our rights to protect the security of the canal and its use by all of the countries of the world. Yet, we cannot ignore the last paragraph of amendment 20 being a part of this unsigned understanding which reads:

This does not mean, nor shall it be interpreted as, a right of intervention of the United States in the internal affairs of Panama. Any United States action will be directed at insuring that the canal will remain open, secure, and accessible, and it shall never be directed against the territorial integrity or political independence of Panama.

Attempts to add clarifying amendments of the second degree to the leadership amendments have been wholly unsuccessful but this memorandum of understanding, as are many of the treaty provisions, is vague and uncertain subject to interpretation in one manner by our Nation and another manner by the Panamanians. To say that under no circumstances can we interfere in the internal affairs of Panama could be to agree in advance that we would not interfere in any alliance that might be established between Torrijos and Castro, with any Communist invitees controlling the canal and, in fact, provides little protection of the canal in a world in which Cuban and Russian excursions often by the use of satellite Warsaw Pact nations are commonplace.

Under the Monroe Doctrine, for the past 165 years, we have considered America for the Americans, and all of us would hope that there will be no adverse change in this doctrine. But it does appear that under the treaties we could defend the canal if Panama wanted us to do so, but would have no unilateral right to return to the Canal Zone without its permission.

All of us are aware that the administration has been urging ratification and has stressed the long period of negotiation by four Presidents, with emphasis on the support of Latin American countries and the need to yield to world opinion to relinquish the Canal Zone. But in this country, sovereignty resides in the people, not in the President, not in Cabinet officers, and not in the leadership of the Senate. And it would seem that the will of the American people should be reflected in our decision. This is not to say that we should not exercise independent judgment on matters coming before the Senate, but when the overwhelming majority of the American people favor a course of action, if we have faith in the collective will of the majority, if we believe that in America the people do rule, then it would appear that we should reject these treaties.

There are reports that Senators who have not publicly stated whether or not they will vote for ratification or may not have made up their minds have been lobbied by the White House and have been promised special inducements if they vote for ratification. If these reports are true, it would appear that the White House is attempting to offer the carrot of special favors for Senators in order to obtain the necessary two-thirds vote for ratification. I would hope that Senators might react adversely to the President's efforts. Most, if not all, Senators appear to be above trading their votes for special favors. Nevertheless, if the reports of special offers are accurate, it reflects adversely upon the high office of the President of the United States. And I am sure that the American people disapprove of these attempts.

The only public plebiscite on the proposed treaties that we have had in this

country so far as I know was in Westminster, Calif. in which the question was posed: "Should the United States retain control of the Panama Canal?" And the response by the voters only a week ago was 4,867 yes, and 895 no. That is from between 5 and 6 to 1 in favor of the United States retaining control. This ratio is almost identical with the poll I took somewhat earlier of the citizens of Virginia. It showed that Virginians favored rejection by a margin of 87 percent to 13 percent. Each Senator, of course, talks with his own constituents and receives mail from them, but all of the Senators I have discussed this with have indicated that their mail was running strongly against ratification.

It would seem well to remember that we are here in a representative capacity as servants and not masters of the people, and I believe we need to pay more attention to the feelings of our constituents than to the White House or the Senate leadership of either party, because they, too, are servants of the people.

Mr. President, my staff put together a few quotations of early American leaders about reliance upon the views of the American people, and I would like to share some of these quotes with you: Jefferson indicated:

> Every government degenerates when trusted to the rulers of the people alone. The people themselves, therefore, are its only safe depositaries.

In a letter to John Adams, he added:

> No government can continue good, but under the control of the people.

John Marshall said:

> The government of the union is emphatically and truly a government of the people. In form and in substance it emanates from them. Its powers are granted by them and are to be exercised directly on them and for their benefit.

In No. 49 of the Federalist Papers it says:

> * * * people are the only legitimate fountain of power, and it is from them that the constitutional charter, under which the several branches of government hold their power, is derived.

Daniel Webster in a Senate speech said that—

> The people's government (is) made for the people, made by the people, and answerable to the people.

Abraham Lincoln, in his 1861 inaugural address, said:

> Why should there not be a patient confidence in the ultimate justice of the people? Is there any better or equal hope in the world?

But, Mr. President, while many Senators may be far more familiar with the history and the workings of our Government than the Senator from Virginia. It just seems contrary to our heritage to vote contrary to what I consider to be the desire of the overwhelming majority of the American people to retain the Canal Zone as American property, and to reject these treaties. It does not seem reasonable to give away Government property having a replacement value of $10 billion, to give away a canal zone into which our Government has poured so much money since 1903, through which we have operated a canal since 1914 for the benefit of all of the peoples of the world and at cost. At the present time, with complete ownership and control, with military bases and American personnel, the canal is safe. From a security point of view our present situation is far preferable to the vague and uncertain language of the so-called Neutrality Treaty and from the complete loss of ownership and control of the Canal Zone.

In the March 13 issue of Time magazine, 15 pages are devoted to socialism, its trials and errors, and it has a map covering two pages showing the parts of the world that are under the Marxist/Lenin economic system, those under the social/democratic, the third world socialists showing the growth that has been made of socialism and communism within the past generation.

Newsweek magazine of the same date shows the Cubans in Africa. It refers to Cubans being in 19 African and Arab countries and, again, has a map with a heading, "Have Guns, Will Travel." One interesting paragraph on page 40 reads as follows:

> During the 1962 Cuban missile crisis, the Russians lack of muscle obligated them to back away from the confrontation with the United States. Now with its wide-ranging navy and air force, its powerful army and its nuclear umbrella, Moscow can compete on equal terms anywhere in the world but most analysts discount the notion that Russia has launched a thorough challenge to the United States. In this view, the Kremlin has merely concluded that the post-Vietnam era is a good time to exploit local opportunities. The Soviets have concluded that the United States is in a very introspective, relatively impotent phase.

Elsewhere it reads:

> Some experts reason that the use of Cuban troops has enabled Moscow to operate with impunity in Africa.

Do not these quotations from rather liberal magazines, these national news magazines, indicate that Cuba might well operate with like impunity within the Canal Zone in the event all of the U.S. troops are removed and we give up our proprietary and sovereign rights to the Canal Zone, and it becomes completely under the control of the Panamanian Government? These and other news accounts are widely read and the American people are well informed. Can you imagine,

If circumstances were reversed, if the Soviet Union had ownership and control of the Canal Zone, that it would give away its rights to a small, unstable nation of 1.7 million people? The Canal Zone, it seems to me, is a passageway that has important commercial and military value to the United States, to all of North and South America; in fact, it is one of the points that we should not permit to come under the control of the Soviet Union, either directly or indirectly. This is one of the things that former Chairman of the Joint Chiefs of Staff, Admiral Moorer, said before both the Subcommittee on Separation of Powers of the Committee on the Judiciary and the Senate Armed Services Committee. It is a view I also heard from the chiefs of state of a number of South American countries, the fear that somehow the Soviet Union or the Communists would obtain control of the canal in the event that we left. My mail indicates that this represents a serious concern among Americans today.

As previously discussed in greater detail, this is the matter that the distinguished chairman of the Appropriations Committee, the Senator from Washington, was interested in a few minutes ago. These treaties will cost the American taxpayer a minimum of $758 million over the next 22 years for the privilege of giving up our $10 billion canal.

This $758 million figure includes $440 million in interest payments that will no longer accrue to the U.S. Treasury, $165 million in early retirement costs—and under present law, when any new rights are created for the civil service retirement trust fund, when any new obligations are incurred under which additional money must be paid out, there is an obligation for the Congress to appropriate additional funds to meet that need. That is something that will come before the Senate Appropriations Committee; $110 million in costs to the Department of Defense primarily for certain schooling costs—I would think that would be a matter that would come before the Appropriations Committee—and $43 million for certain military base relocations. I would also think that would come before the Appropriations Committee.

In addition to this tremendous $758 million direct burden to the taxpayer, Panama will also receive from tolls over $1.5 billion over the next 22 years, if sufficient income is produced from canal traffic.

Let me briefly quote from testimony of Comptroller General Staats, the head of our General Accounting Office, in his testimony before the Armed Services Committee:

> If the canal transits fall short of what is currently estimated, it is possible that toll revenues will be insufficient to cover the costs of the Commission, including the scheduled payments to Panama. In this eventuality, the U.S. Government is likely to be required to provide financial assistance either through the congressional appropriations or by allowing the Commission to borrow from the U.S. Treasury.

Looking at the possibilities of increased costs over the company's initial estimates, that is, the operating company under the treaties—Mr. Staats concluded:

> It seems to me there are some very real concerns as to whether we can adjust tolls upward, assuming you do all these things that I have just listed, and still make it possible to operate the canal without serious deficits.

While one can make different assumptions on factors affecting future canal revenues and arrive at different conclusions as to whether the canal operation will be financially sound, there is a substantial possibility that the canal will suffer operating deficits during the life of the treaty, and if so, the Comptroller General, our chief Government accountant, says it will be our taxpayers who will make up the deficits.

We should not lose sight of the fact that ratification of the canal treaty is giving away American property to satisfy the outcries in Panama and could cause other nations to believe that we are conceding that we have maintained a colonial position with regard to the canal over the years, that we are not ready to stand up for the welfare of our own country, and cause nations of the free world to further lose faith in the United States. We can only lose property, prestige, and influence within the world community by the ratification of these treaties.

Both proposed treaties recognize Panama as territorial sovereign and with this concession on behalf of the United States, Panama can interpret the treaties as it sees fit without recourse to the United States, unless we resort to the use of military force.

It is interesting also to note that in the protocol provisions, annex B of the Neutrality Treaty, all nations of the world will be invited to agree to the neutrality of the waterway. Some might conbe a departure from the Monroe Doctrine, to have countries like Red China and Russia and other nations in the Communist world agreeing to the neutrality of the waterway. Some might consider that as also guaranteeing the neutrality of the canal between the two American continents. It appears to be entirely contrary to the tradition of the United States that America is for Americans.

What I am suggesting, Mr. President, is that we look at the basics rather than a phrase or two in the treaties; that we consider the history, the fact the canal has been maintained and operated by the United States at cost for use by all the nations of the world, with a high degree of efficiency under U.S. ownership and management, and the fact that we have no assurance that such practice will continue under the Panamanian Government. There is even considerable doubt that Panamanians have the managerial skill or the technical knowledge to operate and maintain the canal. It is also questionable as to who they might get to assist them in its operation after the termination of the treaties. It is quite apparent that they want as much profit from the operation of the canal as they can get. However, the law of diminishing returns may set in but, in my judgment, Panama intends to milk the canal for everything that the traffic will bear.

Mr. President, when we vote on Thursday regarding ratification of the Neutrality Treaty, I believe we should give consideration to what effect, if any, that vote will have on the canal treaty. They are connected together and, certainly, we should not mislead the Panamanians by a favorable vote on one treaty to believe that the second treaty will also be ratified. Yet, I do not believe any Senator who votes for the Neutrality Treaty is necessarily obligated to vote for the canal treaty. It would give a lot of comfort to the American people and would enable the Senate to proceed to legislative proposals which have been held in abeyance if we could defeat the Neutrality Treaty on Thursday, because such action yould necessarily signal the defeat of the more comprehensive canal treaty.

Mr. DOLE. Mr. President, will the distinguished Senator from Virginia yield? Does he have any time to yield to me?

Mr. SCOTT. Yes; I am glad to yield to the distinguished Senator from Kansas.

The PRESIDING OFFICER (Mr. HODGES). The Senator from Kansas is recognized.

Mr. DOLE. First, Mr. President, let me say that I share the views expressed by my colleague. It seems to the Senator from Kansas that we have witnessed an operation stonewall now for some time. We have had 22 treaty amendments proposed. Only two amendments, the so-called leadership amendments, have been approved by a majority of the Senate with the blessing of the administration. All other amendments have been branded killer amendments and have been rejected at the behest of the leadership and the administration.

It seems to this Senator that the time is drawing near for the Senate to exercise its judgment.

The Senator from Virginia indicated that we have some responsibility, too, as Senators. Certainly, we want to support our President. Certainly, this is not, in any sense, a partisan matter before the Senate. The Senator from Kansas is convinced that they are not going to accept any amendments. We have already reached that point now that there will be no more amendments, the Senator from Kansas understands, considered to the treaty itself, the so-called Neutrality Treaty.

The Senator from Kansas became first opposed to the treaty amendments last September. I suggested that we analyze the treaties in an objective and responsible manner.

I think most every Senator did that. But that at every turn, as the Senator from Virginia knows, the leadership tabled or set aside each of those amendment proposals.

At one point, as many as 40 Members of this body opposed a tabling motion and that, certainly, suggests a genuine concern for the treaties themselves.

I might say, in the view of this Senator, there is a growing concern with reference to the treaties and their validity and whether or not it is best for us to follow in the Senate. The fact that 20 of the 22 treaty amendments proposed were rejected is not to say the administration will not have to yield to public pressure on certain points, because I recall last September the administration suggesting no amendments, no reservations, and maybe understandings and declarations.

I do not want to take any further time unless the Senator from Virginia has additional time.

Mr. SCOTT. Mr. President, in line with what the distinguished Senator from Kansas indicated, he will recall the item reported by the media on the plebiscite, the only one that I know that was taken, in Westminster, Calif.

The question was asked, "Should the United States retain control of the Panama Canal?"

This was only a week or so ago and the response was 4,867, yes, and 895, no. A better than 5-to-1 majority in favor of our retaining the Panama Canal.

I think that is in line with the reasoning of the distinguished Senator from Kansas.

Mr. DOLE. If the Senator will yield further I think there has been some concern expressed by the American people. Of course, there is a division on the treaties. Some Americans support the treaties, some oppose the treaties. But I suggest a great many more oppose than support.

I have been asked by people around the country in various States if we listen to our constituents. I suggest that we do and that sometimes we do not always agree with the constituents and we should make an independent judgment based on the facts.

But I do not see how we can square that with this approach of no amendments, no amendments because we might somehow require another plebiscite; no amendments unless they fit into the pattern of the so-called leadership amendments.

I understand the reason for that. The knowledge of the Carter-Torrijos memorandum was available when the plebiscite was held in Panama and, therefore, they, in effect, voted on this amendment.

But, on the other hand, what do we do, I might ask the distinguished Senator from Virginia, as Members of the U.S. Senate?

Why have we spent so many days on this treaty? It is obvious we are not having any impact insofar as amendments are concerned, but I think we are having an impact insofar as individual Senators are concerned. I see the momentum shifting in opposition to the treaties because of the genuine concern many Senators have, many undecided Senators have.

I would guess that when it gets down to another 24 hours, there may be other amendments. Maybe by that time the administration will want to back up and accept a few amendments. It may be that is the way to play it. Do not take more than we have to take, but take enough to get 67 votes.

If that is the strategy, maybe that is the right strategy.

But it seems to me that we have had a stonewall strategy. Those of us who have offered amendments have been somehow categorized as being flat-out opponents of the treaties. I think there have been efforts to paint some in the corners some right-wing radical group opposed to the treaties, and that is certainly not the case. If that is, there are a lot of right-wing Americans out there opposing the treaties.

But it would seem to me that in retrospect the better part of wisdom might be some strategy to work out responsible amendments, and maybe these treaties could have passed by a vote of 80 to 20, or maybe even a higher percentage.

But we were never given that opportunity. We were given an opportunity to

offer amendments and have them tabled. We could not even have an up-or-down vote.

We were told by the distinguished Senator from Idaho (Mr. CHURCH), the leader of the protreaty forces, that we could not add one word. If we offered the word "American" in this treaty, I bet it would be tabled. We could not offer the word "American" and get a majority vote in this Senate because it would be tabled by the proponents of the treaty.

I just wonder how far we extend that strategy. Where do we draw the line? What is reasonable and what is not reasonable?

I have always felt that people who voted for us exercised pretty good judgment. Those same people are wondering now what happens when we, 8 to 1, 9 to 1, whatever the survey may be in that area, say we think the treaties ought to be changed and the Senate ought to have a role to play. Why is it just a flat strategy of no amendments, not one word?

I do not believe that can ever be explained to the American people. Even those who support the treaty will not understand how we could not add the word "American" to the treaty if we wanted to.

Mr. LEAHY. Will the Senator yield?

Mr. DOLE. I do not have the floor.

Mr. SCOTT. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator has until 5:02.

Mr. LEAHY. Will the Senator from Virginia yield 3 minutes?

Mr. SCOTT. Mr. President, I promised to yield to my distinguished colleague from Virginia for 10 minutes. but I will be glad to yield to the Senator from Vermont if we can talk within the next 2 minutes.

Mr. LEAHY. Very well.

There are a number of points to be made, but on just one, I am concerned when we talk about polls taken and what goes on here.

I hope we do not feel that Winchester, Calif., or Middlesex, Vt., or any other town, might dictate what we do here.

If we went solely by polls, my vote would be very easy. The most recent poll taken in the State of Vermont shows the people in the State almost exactly evenly split on the question of the Panama Canal treaties with the so-called leadership amendments attached. So it is almost a 50–50 split. That was 2 or 3 weeks ago, and mail from Vermont since then has been running heavily in favor of the treaties.

But that is not the way I would make up my mind on it. I feel that I am here to work hard for the people of Vermont, to listen to them, but in the ultimate conclusion, exercise my own judgement and rely on my own judgement and conscience, and never vote against that judgment, never vote against that conscience, no matter what a poll might say, one way or the other.

I daresay the people on both sides of this issue will vote the way their judgment and the way their conscience tells them to and not because of a poll one way or the other.

That is probably the greatest red herring we could possibly have, that a poll taken of people not involved in the debate, not required to make the ultimate decision, not involved in all the consideration and study of this matter, that such a poll should determine this question.

Mr. SCOTT. Mr. President, I cannot yield further to the distinguished Senator.

Mr. LEAHY. We had 2 minutes. I have used my 2 minutes, and I yield back.

Mr. SCOTT. Mr. President, certainly, I believe that any Senator ought to use his own judgment. But, Mr. President, we do not have representative government when we completely ignore the will of the people who elected us to office.

If these two treaties are ratified, in my own judgment, we will be ignoring the vast majority of the American people.

I do pay attention to the views of the people of Virginia. During the campaigns for both the House and the Senate, the people knew before they voted that they were voting for a conservative Virginian.

I am glad to yield to my distinguished colleague from Virginia.

Mr. HARRY F. BYRD, JR. I thank my colleague from Virginia.

Mr. President, I wish to read to the Senate an Associated Press dispatch which has just come over the wire. The Associated Press dispatch to which I refer is datelined Washington, and it reads as follows:

> Panamanian officials said today the Senate vote on part of the new canal treaty is too close to predict but that they are "preparing for the worst—whatever that may be."
>
> The officials also said they expect Thursday's scheduled Senate vote to be postponed if treaty supporters conclude that they don't have the votes to win.
>
> The Carter administration now is weighing demands made by undecided Senators whose votes are needed to win Senate passage. Sen. Dennis DeConcini, for example, is pushing for an amendment that would enable the United States to take unilateral military action to open the canal if it were closed.

I might say parenthetically that I regard that as a very fine amendment.

I continue to read from the dispatch:

> One Panamanian source, who asked not to be identified, said his government would not object to some proposed treaty changes.
>
> "We are willing to take anything (attached to the treaty) that does not cross our line of indignity," the Panamanian source said. "That includes proposals made by DeConcini—if he does not cross that line, if he has not already," he added.
>
> Panamanian officials say they don't know which way the Senate will vote Thursday and they consider it a strong possibility that a treaty vote will be deferred until after this year's congressional elections if it appears the Senate would reject the proposed pacts now.
>
> "We really can't predict which way it's going to go," he said. "We're preparing for the worst, whatever that may be."
>
> If it appears that the treaties would fail, Senate leaders "could send them back to the Foreign Relations Committee, freeze the treaties there, and reintroduce them next fall," the source said.

That is a dispatch just off the Associated Press wire.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. HARRY F. BYRD, JR. I yield.

Mr. ALLEN. That would seem to be different from the approach taken by the leadership in the Senate, I understood the Senator to say that the Panamanians would accept DECONCINI's amendment. Yet, the leadership here is assuring us that no amendment will be accepted.

I just want to make that comment, and I will take no more of the Senator's time.

Mr. HARRY F. BYRD, JR. I thank the Senator.

I read again from the Associated Press dispatch. The Senator from Virginia has no way of knowing the accuracy of it, but the Associated Press dispatch quotes the unnamed Panamanian official as saying:

> We are willing to take anything that does not cross our line of indignity . . . That includes proposals made by DeConcini—if he does not cross that line, if he has not already.

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. HARRY F. BYRD, JR. I yield.

Mr. SARBANES. Is that an Associated Press dispatch out of Panama?

Mr. HARRY F. BYRD, JR. It is out of Washington.

Mr. SARBANES. I suggest that, in either event, it carries no authority. That is about the attention we should pay it.

Mr. HARRY F. BYRD, JR Each Senator can make his or her own decision.

Mr. SARBANES. Absolutely. But I thought I should underscore that fact. I know that the good and able Senator from Virginia never makes his own decisions or judgments from what he sees coming over the ticker or over the wire. I know him well enough to know that he is a much more prudent and responsible Senator than that.

Mr. HARRY F. BYRD, JR. The Senator is correct that the Senator from Virginia does not make decisions based on assertions in a wire story; but I did think it had some significance, as both the Associated Press and the United Press are news-gathering organizations which have a reputation for considerable credibility.

I thank my distinguished colleague from Virginia for yielding.

Mr. SCOTT. Mr. President, I yield the remainder of my time to the distinguished Senator from Illinois (Mr. PERCY).

The PRESIDING OFFICER. There are 2 minutes remaining.

Mr. PERCY. Mr. President, I listened with great interest to the senior and junior Senators from Virginia, because in a sense the comments tie together.

Senator HARRY F. BYRD, Jr. has pointed out the dangers of inflation, about which we are all deeply concerned. Senator SCOTT has pointed out some of the figures and concerns expressed by the Comptroller General of the United States, Elmer Staats.

I think we have a grave concern when we have costs of about $700 million which are associated with implementation of the Panama Canal Treaty.

There are three grave concerns that I have had: First, that we have the unilateral right to do what is necessary at any time bevond the year 2000 to protect the neutrality of the canal. We have assured that in an amendment to the treaty language.

Second, that U.S. warships have the right to go to the head of the line for rapid transit when it is in our national interest. We have now taken care of that through an amendment.

The third concern I have is the economic concern. I feel strongly that payment of taxpayer costs must come to the greatest extent possible from users of the canal, those ships that transit the canal, those 70 nations that use the canal, and we have a period of 22 years over which to find ways to do this.

We have always had toll levels at a point where, in a sense, we were subsidizing the cost of all countries, but now I think it is time we look at this as a business in the renegotiated treaties.

The PRESIDING OFFICER (Mr. BUMPERS). All time has expired.

Under the previous order, the Senator from Georgia (Mr. NUNN) is recognized to offer a reservation.

Mr. SARBANES. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. PERCY. Mr. President, will the distinguished colleague yield 2 minutes that I might finish my statement?

Mr. NUNN. I yield. The unanimous-consent request, perhaps, can be made first, and then I will yield the Senator 2 minutes.

Mr. SARBANES. Mr. President, I ask unanimous consent that Jan Kalitski, of Senator KENNEDY's staff, have the privileges of the floor during debate and votes on the Neutrality Treaty.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SARBANES. I thank the Senator for yielding.

The PRESIDING OFFICER. Without objection, the Senator from Illinois is recognized for 2 additional minutes.

Mr. NUNN. I yield to the Senator from Illinois without losing my right to the floor.

Mr. PERCY. I thank my distinguished colleague.

As the distinguished Senator from Virginia has pointed out, the interest income the United States is giving up is currently $20 million a year. An interest payment is now being deposited, and has been deposited since the 1950's, in the U.S. Treasury. I think the State Department is absolutely wrong to recommend that under the new treaty we not charge that any longer.

It is a lost source of income. It costs the taxpayers $20 million, and we have to say over 22 years that is $440 million we would have had that we will not have because we are renegotiating these treaties.

I think the toll revenue must be increased. The best study we have shows it can be increased 50 percent, and increasing revenue rather than reduce revenue. We should try to maximize that toll revenue to recover that interest cost, and to recover as much of the cost of the early retirement cost the distinguished Senator from Virginia has pointed out.

In good conscience I could not vote for the treaties unless I tried to find ways of recovering the maximum amount of costs.

Two of the concerns I have laid down have certainly been now met, I think, adequately by the amendments and the language of the treaties themselves. But I think we must see if we cannot figure out a way in the implementing legislation to maximize our revenues so that we can recover at least a substantial part of that $700 million. I think Panama and the countries using the canal will understand if we try to do that because that is a cost of keeping the canal open—I think they will understand that.

I thank my distinguished colleague very much indeed for yielding. I am most grateful to my distinguished colleague from Georgia.

The PRESIDING OFFICER. The Senator from Georgia.

UP RESERVATION NO. 11

(Subsequently numbered Reservation No. 8.)

Mr. NUNN. Mr. President, I have a reservation at the desk that I call up.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Georgia (Mr. NUNN) for himself, Mr. BELLMON, Mr. DECONCINI, Mr. BROOKE, Mr. TALMADGE, Mr HEINZ, Mr. RANDOLPH, Mr. CHILES, Mr. JACKSON, Mr. ZORINSKY, and Mr. BAYH proposes an unprinted reservation numbered 11:

Strike out the period at the end of the resolution of ratification and insert in lieu thereof a comma and the following:

"subject to the condition that the instruments of ratification of the Treaty shall be exchanged only upon the conclusion of a Protocol of Exchange, to be signed by authorized representatives of both Governments, which shall constitute an integral part of the Treaty documents and which shall include the following:

That nothing in this Treaty shall preclude Panama and the United States from making, in accordance with their respective constitutional processes, any agreement or arrangement to facilitate performance at any time after December 31, 1999, of their responsibilities to maintain the regime of neutrality established in the Treaty, including agreements or arrangements for the stationing of any United States military forces or maintenance of defense sites after that date in the Republic of Panama that Panama and the United States may deem necessary or appropriate."

Mr. NUNN. Mr. President, article V of the treaty now before this Chamber prohibits any foreign military presence in Panama after the year 1999. Thus the Neutrality Treaty itself would have to be changed if during the next 22 years the United States and Panama decided that an extension of the U.S. military presence in Panama beyond 1999 was necessary or desirable.

In my view, article V is unnecessarily rigid as it applies to the United States. It inhibits the flexibility of both the United States and Panama to change their minds with respect to continuing the U.S. military presence beyond the expiration date of the Panama Canal Treaty.

Accordingly, the reservation which I have submitted, and which has just been read by the clerk, is really in the form of an amendment to the Resolution of Ratification of the Neutrality Treaty, which would modify article V by stating that the parties may agree to arrangements for future U.S. military presence in Panama after 1999 should both countries agree to do so.

With this reservation, the Neutrality Treaty itself would not have to be modified later on if we and the Panamanians reach an agreement on another type of military arrangement, including a possible indefinite military presence in Panama.

Mr. President, most of our military leaders, including the Chief of Naval Operations James Holloway, the Marine Commandant Louis Wilson, and others, have stressed the advantages to the United States of a continued military presence in Panama beyond 1999. Such a presence would clearly make it easier for us to carry out our responsibilities under the Neutrality Treaty.

It would also serve, in my opinion, to deter military adventurism in Panama by potential adversaries.

I think the American people are clearly concerned over the total U.S. military pullout mandated by the Neutrality Treaty. I believe that the vast majority of Americans in this country who are aware of this treaty and have studied this treaty want changes which would grant both the United States and Panama greater flexibility on this issue; 1999 is a long way off, and there is no military or political analyst in the country today who can confidently predict what the situation is likely to be in Panama 22 years from now.

So to me, Mr. President, this is a very important improvement. While U.S. base rights will not be guaranteed after the year 1999, this change permits such rights to be negotiated by the parties. I happen to believe that a maturing relationship, based on a true partnership in operating and protecting the canal, will emerge over the next few years, and will change popular opinion in Panama prior to the year 2000. I also believe that the Panamanian people will see the great advantage of a small but meaningful U.S. military presence to assist them in protecting the canal.

The reservation which is before this body now will keep alive the possibility of such a military presence and such a military base arrangement, and, by retaining an attitude of cooperation on this issue, I think it would keep the door open to future negotiations with Panama on this important issue.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield at this point, without losing his right to the floor?

Mr. NUNN. I am glad to yield without losing my right to the floor.

Mr. ROBERT C. BYRD. Is the Senator willing to have a vote on this amendment to the Resolution of Ratification this evening?

Mr. NUNN. Yes, I am willing.

Mr. ROBERT C. BYRD. Could we agree on a time?

Mr. HANSEN. Mr. President, reserving the right to object, and I do not intend to object, did the distinguished majority leader ask the Senator from

Georgia if he would be willing to have a vote on his amendment?

Mr. ROBERT C. BYRD. On his amendment to the Resolution of Ratification, yes.

Mr. HANSEN. And this is an amendment to the Resolution of Ratification?

Mr. ROBERT C. BYRD. It is an amendment to the Resolution of Ratification.

Would the Senator from Alabama be willing to have a vote on this amendment this evening?

Mr. ALLEN. No, I do not believe so. I want to discuss the amendment somewhat. I would hesitate to agree on a vote tonight. So the answer is "no."

Mr. ROBERT C. BYRD. Would the distinguished Senator from Alabama rule out a vote on the Randolph amendment tonight, if we could get unanimous consent and if the Senator from Georgia would be willing to set aside his amendment temporarily? Would it be possible to ascertain whether we could get a vote on the Randolph amendment tonight?

Mr. ALLEN. I would say, in answer to the distinguished majority leader's question, that we have been discussing amendments to the treaty, and we are advised that amendments to the treaty would cause a new plebiscite. I have not made a full study of the effect of amendments to the Resolution of Ratification, and I would like to have an opportunity to study that and make sure we do not run the risk of requiring further negotiations or another plebiscite by the adoption of these amendments to the Resolution of Ratification.

I am sure there would be no desire to have that result. So at this time I am going to object, and will object for the rest of the evening.

Mr. ROBERT C. BYRD. Very well; the Senator from Alabama has answered my question. I thank the Senator from Georgia for his courtesy in yielding.

Mr. TALMADGE. Mr. President, will my distinguished colleague yield at this point?

Mr. NUNN. I am delighted to yield to my senior colleague from Georgia.

Mr. TALMADGE. I commend my colleague for his amendment to the resolution of ratification of this treaty between the Government of the United States and the Government of Panama, and I am glad to cosponsor this amendment with him, together with several other colleagues in the Senate.

Is it not a fact that, according to international law, this resolution of ratification has the same effect as the treaty itself?

Mr. NUNN. That is the understanding of the junior Senator from Georgia.

Mr. TALMADGE. That is my understanding also, and I have had some research done in this regard.

The purpose of this understanding and reservation, as I understand it, is that under the treaty as submitted, without the Senator's amendment, it would be absolutely impossible to station troops in the Panama Canal Zone after the year 2000 without another treaty that must be approved by the parliamentary processes of the Republic of Panama and the parliamentary processes of the United States; is that not correct?

Mr. NUNN. The Senator is correct. I think the leadership on the floor might be of help on this. As far as any base arrangement is concerned, that is my understanding. But, of course, the Senator from Georgia is aware of the rights reserved under the leadership amendments to intervene militarily if necessary to protect the neutrality of the canal.

Mr. TALMADGE. In time of emergency.

Mr. NUNN. That is right, in time of emergency.

Mr. TALMADGE. But if everything was going peacefully, and we wanted to have a military presence in the Panama Canal Zone for the purpose of protecting the canal or for any other purpose, it would require a further treaty on the part of the U.S. Government and the Government of the Republic of Panama?

Mr. NUNN. Without this reservation, the Senator is correct. With this reservation it would not require another treaty.

Mr. TALMADGE. And that means the Senate itself would have to formally adopt another treaty with Panama?

Mr. NUNN. The Senator is correct; and I would also assume, if another treaty were adopted, it would have to go through the same constitutional processes in Panama that this treaty has.

Mr. TALMADGE. Is there any other government on the face of the Earth with which we have a treaty, that prohibits us from stationing troops there except by amendment of that treaty and future treaties?

Mr. NUNN. As far as the junior Senator from Georgia knows, there is no such precedent.

Mr. TALMADGE. The Senator is a member of the Armed Services Committee. Does he have any idea of approximately in how many foreign countries we have American troops stationed at the present time?

Mr. NUNN. I cannot give you that figure off the top of my head, but there would be a considerable number of countries where we do have some troops.

Mr. TALMADGE. At least 25 or 30?

Mr. NUNN. I would say 25 as a minimum, but more than that, I would guess.

Mr. TALMADGE. And none of them are there by treaty?

Mr. NUNN. Well, there are some treaties that provide U.S. base rights. Normally it is done by executive agreement; it depends, I understand, on whether we have any kind of mutual obligation to come to each other's assistance in time of emergency.

So I would say there are some treaties that provide affirmatively for base rights with some countries, but I know of no treaty which provides there can be no troops without it.

Mr. TALMADGE. There is no other country in the world which says we cannot have troops there unless we negotiate a future treaty, is there?

Mr. NUNN. I know of no such precedent.

Mr. TALMADGE. We can have troops stationed in the Soviet Union by mutual consent of the U.S. Government and the Soviet Government, can we not?

Mr. NUNN. I think the Senator is correct, theoretically.

Mr. TALMADGE. We can have troops stationed in Red China by mutual consent of the U.S. Government and the Government of Red China, can we not?

Mr. NUNN. The Senator is theoretically correct.

Mr. TALMADGE. I think the Senator has made a great improvement in this treaty. I commend him for offering his amendment. I think it is a definite improvement over the Panama Canal Treaty, because I share with my colleague the view that before the year 2000, if the working relationship between the U.S. Government and the Panamanian Government is such as we hope and expect, they may desire to have a future military presence on the part of the U.S. Government in the Canal Zone, and in the event they do it would not require another formal treaty in order to do that, would it?

Mr. NUNN. The Senator is entirely correct. The junior Senator from Georgia feels and hopes we will have a maturing relationship with Panama, and that at some point in the future, it will be advantageous to have an American presence there that would be of mutual advantage to Panama, the United States, and all the other users of the canal.

Mr. TALMADGE. I thank my colleague, and commend him for offering this amendment.

Mr. DOLE. Mr. President, will the Senator from Georgia yield?

Mr. NUNN. For a question or a statement?

Mr. DOLE. For a question.

Mr. NUNN. I will be glad to yield to the Senator from Kansas.

Mr. DOLE. I appreciate the Senator's yielding.

I think the reservation is much like the amendment sponsored earlier by the Senator from Georgia and the Senator from Kansas. Is my understanding correct that if this reservation is not adopted, the Senator from Georgia would not vote for the Neutrality Treaty?

Mr. NUNN. I do not think the Senator from Kansas should assume that at this point. The Senator from Georgia understands that the leadership and the executive branch will support his reservation.

The Senator from Georgia has said that he thinks this reservation is a great improvement over the present situation. I have no hesitation on that subject, as to whether or not I will support the treaty based on this amendment.

I certainly think this amendment is in the best interests of the United States and in the best interests of the relationship between the United States and Panama, and it eliminates a part of my problem with the treaty.

Mr. DOLE. The Senator from Kansas has the same—not the same identical concern expressed by the Senator from Georgia, but it seemed to us earlier in the debate, or at least to this Senator, that an amendment to the resolution of ratification would not have the same

force and effect as an amendment to the treaty itself. Perhaps the Senator from Georgia has been satisfied in that regard, and if he has, it would be helpful to the rest of us if he can express that to us.

Mr. NUNN. Yes, I have satisfied myself. Of course, I do not profess to be an international law expert. We do not have much international law in the middle district of Georgia where I practice, but I do have opinions from various legal counsel, State Department legal counsel. Also, my own staff has done some research on the matter and I am satisfied that the legal effect of this reservation is the same in international law—as far as the United States and the Panamanian Governments are concerned—as an amendment would have been. I think it does have some degree of difference internally, but I would let the floor manager address that concern.

As the Senator from Kansas knows, I voted for the amendment with language which was not identical to this but was very similar, but I believe that, since that has failed, we would certainly be well served to put in a reservation which would accomplish the same result.

Mr. LAXALT. Will the Senator from Georgia yield for additional questions?

Mr. NUNN. I will be glad to yield to the Senator from Nevada.

Mr. ALLEN. Will the Senator yield momentarily then, in order that I might call for the yeas and nays?

Will the Senator yield for that purpose?

Mr. NUNN. What is that?

Mr. ALLEN. Will the Senator yield the floor so that I might call for the yeas and nays, inasmuch as we have another Senator here that supports such a question.

Mr. NUNN. What is the preference of the floor manager?

Mr. SARBANES. I am encouraged to hear that request from the Senator from Alabama. Does that carry with it the implication that we might be able to go to a vote this evening on the amendment to the articles of ratification, which the Senator from Georgia has laid before the body?

Mr. NUNN. The Senator from Georgia does not agree with the timing, but I would agree with the yeas and nay.

Mr. ALLEN. The Senator does not have the floor, so he has to use the Senate rules by responding.

The PRESIDING OFFICER. The Senator from Georgia has the floor.

Mr. NUNN. I will yield to the Senator from Alabama for the purpose of answering that question, retaining my right to the floor.

Mr. ALLEN. I asked if the Senator would yield for the purpose of allowing me to request the yeas and nays. That was my original request.

Mr. NUNN. Well, I have not yielded for that purpose. We are discussing at this point the time. I would like the floor manager to consider that request, with all of his parliamentary knowledge and all of the knowledge of the Senator from Alabama, and I would yield in this regard, and then after the Senator from Maryland has apprised the majority leader of this request we can certainly discuss it and I would consider yielding at a later point on this.

But I would just ask the Senator from Alabama whether he would be willing to have a vote on this reservation this afternoon.

Mr. ALLEN. I still do not have the floor. If I had the floor I would make the request for the yeas and nays, but I told the distinguished majority leader that before agreeing to any time limit on the reservation I wanted to make a study of the effect of the reservations.

The distinguished Senator from Georgia (Mr. NUNN), whom I admire very much stated, as I understood it, that the effect of this reservation would have the same effect as an amendment to the treaty. I want to study it and see if that is correct.

Mr. NUNN. That is my understanding.

Mr. ALLEN. I do not believe that is right, because if that was right I would have thought that the leadership would have accepted the amendment.

The Senator from Alabama and the Senator from Georgia (Mr. NUNN) offered what was practically the same identical language. So, obviously, there must be some difference between the two.

Mr. NUNN. I take it that the Senator from Alabama is not ready to agree on the time at this point.

Mr. LAXALT. Will the Senator from Georgia yield?

Mr. NUNN. I thank the Senator.

I thank the Senator from Alabama. I have been asked to yield to the Senator from Nevada. The Senator from Nevada wanted to ask a question.

Mr. LAXALT. The Senator from Georgia shares the concern that many of us have here on the floor in connection with the security of the canal and our military presence, and I gather that the reservation is directed to that concern.

Mr. NUNN. The Senator is correct.

Mr. LAXALT. And I can honestly say sitting here in the Chamber in past debates that I know of no one who handles the matters in relations, and security, and defense better than the Senator from Georgia. I say that with all sincerity.

Mr. NUNN. I thank my colleague.

Mr. LAXALT. I wondered, though, in what manner does this proposed reservation change the existing situation other than signifying the intention on the part of both parties that perhaps the door can be opened later for negotiations, if they mutually agree to do so.

Mr. NUNN. I have stated very particularly and carefully that this reservation, similar to the amendment that the Senator from Alabama offered, neither of these would guarantee the U.S. base rights in Panama after the year 2000. This amendment eliminates the provision in the treaty which precludes any hope of base rights without having a substantive treaty. So, this really eliminates that and leaves the possibility open for negotiations between Panama and the United States for military presence in Panama after the year 2000.

Mr. LAXALT. Well, is it not true that in the absence of this reservation to the amendment that was offered before, if we saw fit to do so, the Congress of the United States, the Government of the United States, and the Government of Panama would be free to negotiate this kind of agreement anyhow?

Mr. NUNN. With another treaty, which would have to, as I understand it, go through the constitutional processes of both countries. That is right.

Under the present situation we could negotiate a treaty with Panama. It would have to go through their constitutional processes and it would have to go through ours. I would think by the year 1995, 1997, it would be to the advantage of both countries not to have to go through that kind of formalized tedious process which, as we all have witnessed here, does not move very fast and very rapidly.

Mr. LAXALT. If that be the case, would you not agree it would make it more meaningful to build that type of understanding within the four corners of the treaty now?

Mr. NUNN. If the Senator from Nevada is asking the Senator from Georgia whether he will support an amendment or a reservation which would assure us and guarantee us military base presence in Panama after the year 2000 the answer is yes, I will, and I have. I think my record is clear on that. I prefer that. It is obvious that both documents do not exist on the floor to pass that kind of amendment and reservation, and therefore I sponsored this one in anticipation that it is certainly better than not having any at all. It does not go as far as the Senator from Georgia would prefer.

Mr. LAXALT. One additional point or two and then I will relinquish the floor to the Senator from Pennsylvania.

In that connection, you are indicating that you have not buried yourself in international law, but I doubt very much that many of our colleagues have as well, and I know that we have had a lot of conflicting opinions about the distinction between a reservation to the articles and an amendment to the treaty. But again will the Senator from Georgia indicate to me whether or not he perceives any single difference between a reservation in this form and the amendment which was previously voted down, in terms of the legal effects?

Mr. NUNN. Is the Senator from Nevada asking if the reservation has the same legal effect as the amendment to the main treaty would have had?

As far as the United States and international law is concerned, the Senator from Georgia understands it does have the same legal effect. The reservation is a normal way of changing or amending treaties to reservations to the——

Mr. LAXALT. Articles.

Mr. NUNN. Articles. That is the normal way.

I have a statement here from the State Department which says that it has been years and years since the treaty was amended. There have been a lot of reservations made by the Senate but very few amendments. It has been almost 50 years, according to the memorandum I have from the State Department.

Mr. LAXALT. It is my understanding,

and it is basically the same as the Senator from Georgia, that there are material changes which are effected by virtue of the reservation and it has the same legal effect as an amendment to the treaty.

Let us go to the next point.

If that be the case——

Mr. NUNN. Does the Senator from Nevada agree with that?

Mr. LAXALT. Basically, I agree with that.

If that be the case, and we are, by virtue of the structure and mechanism of a reservation effecting a change in the treaty, making it better, as you have indicated in your observations, does the Senator from Georgia have any indication based upon the research that he has conducted with his staff and the advice he has received as to whether this would require another plebiscite in Panama?

Mr. NUNN. In answer to my friend from Nevada, this Senator believes that is a question which has to be answered by the Panamanians. There are several amendments which did fail, and which would have precipitated a plebiscite in Panama. It is not my purpose here to avoid a plebiscite. I think that is a question which has to be resolved by the Panamanians. I could not give a legal opinion on that. They would have to determine that from their own constitution.

Mr. LAXALT. I thank the Senator from Georgia.

Mr. HEINZ. Will the Senator from Georgia yield?

Mr. NUNN. I will yield for a question.

Mr. HEINZ. I thank the Senator from Georgia. As I understand his reservation, it would be true, if this reservation were adopted, that nothing in article V of the treaty could be construed as precluding the United States from negotiating an agreement or concluding an agreement with the Republic of Panama on continuing a military presence of the United States in the Republic of Panama after the date of the termination of the Panama Canal Treaty?

Mr. NUNN. I am sorry, I have to apologize to my friend and colleague from Pennsylvania. I hate to ask him to repeat a question. I was carrying on a dialog with the Senator from Maryland. I will have to ask the Senator to repeat the question.

Mr. HEINZ. Would my understanding be correct that if the Senator's reservation were adopted, that by virtue of its adoption nothing in article V of the Neutrality Treaty—and I would say that it is article V that currently reads, "After the termination of the Panama Canal Treaty only the Republic of Panama shall operate the canal and maintain military forces, defense sites, and military installations within its national territory"—that that language in article V would not be construed as precluding the United States from either negotiating an agreement or concluding an agreement with the Republic of Panama on a continuing military presence of the United States in the Republic of Panama after the date of the termination of the Panama Canal Treaty, that is to say, December 31, 1999? Is my understanding correct?

Mr. NUNN. The Senator from Pennsylvania is correct. Article V of this reservation would not preclude such negotiations.

Mr. HEINZ. I thank the Senator. I appreciate his comments which accord with my own judgment. The language I just read the Senator comes from my own reservation I had intended to propose. I think the Senator's reservation accomplishes precisely the same goal and, as the Senator well knows, I support his reservation. I ask that I might be included as a cosponsor of his reservation. I thank the Senator for yielding.

Mr. NUNN. I thank my colleague from Pennsylvania. His reservation, as proposed, would accomplish virtually the same purpose as this reservation. He and I have both indicated this. I do appreciate the fact that he is cosponsoring this reservation with me.

I might also add, Mr. President, I do not know whether the names of the cosponsors have been read. They are: Senator BELLMON, Senator DECONCINI, Senator BROOKE, Senator TALMADGE, Senator HEINZ, Senator RANDOLPH, Senator CHILES, Senator JACKSON, and Senator ZORINSKY.

Mr. THURMOND. Will the Senator yield?

Mr. NUNN. I yield for a question.

Mr. THURMOND. Mr. President, I have a very high regard for the able Senator from Georgia. However, I do not construe this reservation he has offered as protecting the United States after the year 2000 by having a presence there, by having troops there, but it only allows agreements to be entered into if the two countries see fit to do so. Is that correct?

Mr. NUNN. The Senator is correct. I have not in any way led anyone to believe that this reservation would guarantee that the United States would have a military presence in Panama after 1999. What this does is leave it up to the parties, the Panamanian Government and the U.S. Government, to make an agreement on that.

As has been said, I believe with the maturing relationship between the two countries, both countries would continue, by the time we get to that point, to have a military presence. I hate to see 22 years from now we would not guarantee U.S. military bases in Panama.

Mr. THURMOND. I am just wondering if the Senator would be in favor if he worded the resolution along the line if the President certified it was necessary for the defense of the canal that we maintained a military presence there.

Mr. NUNN. I had stated on the floor that I voted for several amendments earlier that would have guaranteed or assured the American military presence in Panama. I would have preferred that those amendments to have been adopted. They were not adopted. I do not believe there are enough votes on the floor to pass any such amendments. Therefore, even though I would agree with the sentiment of the Senator from South Carolina, as expressed, I would not agree that the passage would be accomplished, as has been demonstrated.

Mr. THURMOND. Of course, after the year 1999, if Panama had become a Communist country or under the domination of a foreign power, then a reservation of this kind would not matter.

Mr. NUNN. Well, of course, I assume that in the Senator's question he is assuming there had been no breach of the neutrality provisions and the treaties had already been ratified with the leadership amendments. Of course, if the Panamanian Government decides that they are adamantly opposed to the U.S. military bases, then it is clear that there would have to be an agreement by the parties, and we would not have any guaranteed right.

Mr. THURMOND. Considering how close Mr. Torrijos is to Mr. Castro, I wonder if the Senator feels this amendment would mean very much.

Mr. NUNN. Of course, I do not know how long General Torrijos is going to be the leader of Panama. I do not suppose anyone knows that. I do not know how long they will have the type of government they have now. I think in the years ahead a lot of changes will occur. But I do believe it is in the best interests of both countries to leave open the possibility from the very beginning, with both governments understanding that we do have the right to negotiate an agreement with Panama, if both parties agree.

Mr. THURMOND. I thank the Senator for his answer. I am just wondering if he feels we need more than this reservation to protect the American people and to protect our interests in that part of the world, from a strategic standpoint.

Mr. NUNN. If the Senator is asking the Senator from Georgia whether he would prefer to have a guaranteed military presence in Panama, the answer is in the affirmative. I would prefer that.

I will not repeat a speech I made on the floor this morning. I spent about 45 minutes on the floor this morning talking about some of the problems I see in the treaties. I think there is a possibility of some headaches if the treaties are ratified, the alternative being a sort of migraine if the treaties are rejected. But I do not think it is a question of the Senator from Georgia being satisfied with each and every provision in the treaties. I probably never would have signed the treaties if I had been the President of the United States, and I probably would never have negotiated them. But I do not think that is the question facing the Senate now.

I think we have to decide what is in the best interest of the country: Is the country better served by ratification of the treaties or by rejection?

Mr. THURMOND. Would not the Senator feel, in view of all these important amendments turned down by the Senate and the dubious situation in which we will find ourselves after the year 2000, that it might be better if we did turn down this treaty and let them negotiate another treaty that will better protect our country and our people?

Mr. NUNN. If the junior Senator from Georgia felt that, by turning down this treaty, we would come back with another treaty that is better than this one between the Panamanian Government and the United States Government, the jun-

ior Senator from Georgia would conclude exactly as the Senator from South Carolina has. But the junior Senator from Georgia does not feel that would be the result of the rejection of these treaties.

I have thought about that question long and hard, and I feel that the rejection of these treaties by the U.S. Senate will have an adverse effect. I do not think the climate exists for the kind of negotiations the Senator from South Carolina desires.

Mr. THURMOND. One last question: Would not the Senator from Georgia feel that, if this treaty is not what the distinguished Senator from Georgia feels it ought to be, what many of us feel it ought to be, and what many of the American people feel it ought to be, would it not be better if we turned it down whether we got a new treaty or not?

Mr. NUNN. Of course, that is a matter of judgment. I believe there would be very adverse circumstances that would develop very rapidly if the Senate of the United States does not ratify these treaties. I would like to see them improved. I voted for a great number of amendments which would do that. But we are now at the stage, or drawing close to the stage, where we are going to have to decide to ratify or not ratify. I would say every Senator will have to make that decision with his own conscience. I think this is a decision that will affect the people of our country for a long time and affect the Panamanians for a long time. I think every Senator has to make that decision.

I believe there can be adverse circumstances whether we reject or whether we ratify, but I foresee that the circumstances will be much worse if we reject.

Mr. THURMOND. I thank the able Senator.

I do not want to take more of the Senator's time, but I should like to read a letter that I received from Charles S. Stough.

Mr. NUNN. I think the Senator from Alabama has arranged it so that I have plenty of time tonight.

Mr. THURMOND. If the Senator gives up the floor, I shall be glad to get the floor and read this letter into the RECORD at this point, if I could.

Mr. NUNN. I reserve my right to the floor. Reserving my right to reclaim the floor, I yield to the Senator for the purpose of reading that letter, if that is permissible.

Mr. THURMOND. It is a three-page letter, but I think——

Mr. NUNN. Will the Chair assure me that I shall have the right to the floor if I yield?

The PRESIDING OFFICER. The Chair assures the Senator from Georgia that he may yield for that purpose and retain his right to the floor.

Mr. NUNN. I thank the Chair.

I yield to the Senator from South Carolina.

Mr. THURMOND. Mr. President, Mr. Charles S. Stough, chairman of the Panama Canal Zone Regional Democratic Party, sent to me a three-page letter outlining the position of his group relative to the Panama Canal Treaties. This is a most interesting document in that his letter presents a local viewpoint not properly considered by the State Department and the Senate.

Mr. Stough not only offers some good advice to the Senate, he advises that the Democratic Party there is opposed to these treaties.

Mr. President, it is a most interesting letter. I think it is probably one of the best-prepared letters on this subject that has come to my attention from either side. It reads this way:

DEAR SENATOR: As the time draws near for a vote on the Panama Canal Treaty and the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal, The Canal Zone Regional Democratic Party would like to present our positions on various aspects of these two treaties.

During the past several months we have witnessed a parade of Senators, aides, counsels and others to Panama for the express purpose of seeing the situation on the ground and to have the opportunity to speak with those best qualified to provide answers concerning the treaties. Unfortunately, the preparation of itineraries was left up to United States Ambassador's staff and the visiting Senators were subjected to a carefully orchestrated snow job. The persons selected to talk to the various delegations were invariably the same and not too surprisingly supporters of the treaties. Those opponents of the treaties that were allowed to meet with the delegations were those whose objections were sure to be petty and self serving. In other words, the visiting senatorial delegations received a pro treaties indoctrination from persons guaranteed to say the right thing as predetermined by the State Department.

The Canal Zone Regional Democratic Party was not afforded an opportunity to visit with any of the delegations. By leaving a phone number at the hotel desk one of our representatives was able to speak briefly with one or two Senators who took the time to call back. For this we are grateful to those Senators but we cannot help but feel that these brief telephonic encounters were less than satisfactory from our point of view.

The Canal Zone Regional Democratic Party membership reflects the complete spectrum of opinion concerning United States relationships with Panama and the treaties. Some of us are residents and workers in the Canal Zone. Others of us are residents of Panama and have nothing to do with the operation of the Canal or its government. All of us are United States citizens and Democrats though and we have hammered out some basic positions which we believe represent a more objective viewpoint than is available from the sometimes shrill opposite poles of opinion or from the singularly one sided State Department attitude.

The Canal Zone Regional Democratic Party approximates consensus on the following points:

Item. The 1903 treaty with Panama needs modernization.

Item. The interests of the United States and the free world are best served by the continued United States presence in the Canal Zone.

Item. The Canal Zone employee should not have to bear the brunt of the effects of any new accommodation with Panama. Job placement, early retirement without loss of annuity and/or severance pay are minimum requirements.

Item. There is a difference between sovereignty and property rights. No justification exists for the transfer of ownership without payment by Panama of the United States owned land, buildings, houses, facilities, machinery and equipment. This United States owned property/controlled by the Panama Canal Company/Government or the Department of Defense has an estimated value of $7 to $10 billion. In the past week, as a result of a conference between representatives of Panama and the Panama Canal Board of Directors, Chaired by the Secretary of the Army, it was decided that employees living in the Canal Zone would hold priority in the purchase of the United States owned homes they occupy from the Republic of Panama!

Item. The proposed treaties and the under-the-table grants, loans, credits, etc., perpetuatates a dictatorial regime in which human rights are denied. Referring to the hiatus in persecution of dissidents as an "Indian Summer" Panamanians warn that once the treaties are ratified that once again the suppressive decrees will be reinstituted. When dealing with Torrijos it must be remembered that he violated the human rights of a whole nation when he threw out the constitutionally elected government of Panama and assumed power. The fact that representatives of Panamanian political parties felt it necessary to meet in Florida recently to discuss their common opposition to Torrijos should tell us something.

Item. The removal of United States courts leaves a judicial vacuum since Panama has no maritime law or maritime court.

Item. The removal of United States police, courts and the protection of the United States Constitution places United States citizens who remain to operate and defend the Panama Canal until the year 2000 under the jurisdiction of the Panamanian government with none of the rights and protections afforded all other Americans by the Bill of Rights. It is one thing to deplore the denial of human rights to Panamanians by Panamanian dictators but to place United States citizens under these circumstances is not only unwise . . . it is immoral.

Item. Requirements for the defense of the Canal have been grossly overestimated. In the seventy five years of United States presence in the Canal Zone the only threats to the Canal Zone have been from the Panamanians. These threats were never directed towards the canal itself but rather toward the concept of a United States presence Panamanian incursions into the Canal Zone were sparked by a minority concerned with flying the flag or some similar pursuit of little moment. Even the most extreme "crazies" have no desire to destroy Panama's major source of income . . . the Panama Canal. Panama has about five battalions of troops, many of whom are committed to the defense of governmental institutions from the populace. The estimate given by the Joint Chiefs of Staff that 100,000 United States troops (five divisions) would be required to protect the Panama Canal from five battalions of Panamanians and an essentially disarmed populace is patently ridiculous. To assemble the weapons, explosives and people necessary to launch an effective attack by guerrilla means against the locks or dams is beyond the capability of those in Panama that might be tempted to try it. The statements abroad to the effect that a hand grenade in the locks would put them out of commission is sheer stupidity.

Item. The theory advanced by some proponents of the treaties that favorable action by the Senate will insure an improvement in United States relationships with the rest of Latin America is fallacious and betrays a complete lack of understanding of the latin psyche. Most Latin Americans, and for that matter most Panamanians, don't give a doodeldy damn about the Panama Canal. It does not affect their lives or well being in any manner. If the United States wants to give away a $10 billion asset they will graciously accept, but, Panamanians know that a sizable chunk of that gift will find its way

into the pockets of the individuals in control of the government. How else, they say, could an impecunious officer in the Guardia National own a castle in Spain, a hotel in Costa Rica, a factory in Belize and vast holdings in Panama on his salary . . . In the rest of Latin America charity and concern for ones neighbor is foreign to them as nations and as individuals. They view a concession as weakness and in their "macho" world it is certainly nothing to be admired. The Latin understands and respects firmness. The soft line give-em-everything militates against a more favorable attitude towards the United States. An uniformly fair and firm policy towards Latin America is what we need . . . not largess.

Item. The concept of joint responsibility for police and defense matters during the transitional period is a sure recipe for conflict. Transfer of responsibility and command at a specified time and date is the only responsible and reasonable approach. This principle is taught to junior officers at all of our service schools . . . why it has escaped the collective minds of the Joint Chiefs of Staff gives one pause to wonder.

I hope that you have gathered from the above that we believe that the proposed treaties are bad treaties, poorly drafted, ambiguous, and not in the best interests of the United States. We believe that it is possible to accomodate Panama's interest in sovereignty without turning over control and operation of the canal, without paying out vast sums from the Treasury or by giving away United States owned property, equipment and housing. In other nations around the world our presence in bases does not impinge on the sovereignty of the host nations, nor do they assume ownership of United States property and equipment or control of our forces housed therein.

We believe that the Senate should reject the treaties and advise the Chief Executive to immediately commence negotiations on a treaty that takes cognizance of the will of the people of the United States, the advice of the Senate and the best interests of the United States. Such a treaty should transfer to the Republic of Panama all lands, housing, equipment and machinery when no longer necessary for the operation and defense of the canal AND on receipt of payment at a fair market value by the Republic of Panama. That portion of the present Canal Zone necessary for the operation and defense of the canal should be designated Fort Necessity and all employees transferred to the Department of the Army as civilian employees. A status of forces agreement should then be negotiated to cover the rights and responsibilities of the United States and the US citizens living and working within the compound.

Thank you for your consideration of these points.

Very truly yours,

CHARLES S. STOUGH,
Chairman.

As I said, he is chairman of the Panama Canal Zone Regional Democratic Party.

Mr. President, this is one of the best statements I have seen on this subject by anyone who has spoken on this question. It is very practical. It is by U.S. citizens who live in the Canal Zone or in Panama and they have come up with a position here that they feel is so important that the U.S. Senate should get the benefit of their views.

They have also recommended that if we wish to transfer the property, there is a way to do it, but not in accordance with the treaties we have here before us.

They feel the treaties we have before us are poor treaties. They are bad from the standpoint of the United States. They are bad from the standpoint of the people of Panama and not in the best interests of the people of this country.

I thank the distinguished Senator from Georgia for yielding to me.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. NUNN. I thank my colleague from South Carolina.

I yield to the Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I ask the distinguished Senator from Georgia (Mr. NUNN) the following question:

Article V of the Neutrality reads as follows:

After the termination of the Panama Canal Treaty, only the Republic of Panama shall operate the canal and maintain military forces, defense sites and military installations within its national territory.

That article would mean, of course, that the United States could not enter into any agreement with the Republic of Panama after the date of December 31, 1999, would it not, that would provide for the stationing of any U.S. military forces in the Republic of Panama?

Mr. NUNN. The Senator is correct. So far as the Senator from Georgia is concerned, I think that would be the correct reading of that.

Mr. ROBERT C. BYRD. So that without the Senator's amendment to the Resolution of Ratification which he has called up, or some other amendment to the Resolution of Ratification which would provide, in a sense, the same, the United States would not be able to enter into a status of forces agreement with the Republic of Panama after December 31, 1999, without a repeal—without a repeal—of the neutrality treaty, or without a new treaty at some point between this date and that date, am I correct?

Mr. NUNN. The Senator from Georgia has that exact understanding. Without a change in the treaty, without a new treaty, or without an amendment to this treaty, if it passes, we would not be able to have any kind of permanent basing agreement with Panama.

Mr. ROBERT C. BYRD. Now, may I say parenthetically that article V, as it is presently written, precludes the Republic of Panama from entering into any agreement with some other country than the United States which would allow that other country to establish a military base or to garrison military forces in Panama after the date of December 31, 1999, and, of course, there is no legal basis on which we could complain if the Republic of Panama were to do that at this time, as long as the stationing of such forces or the location of such a base were outside the Panama Canal Zone.

So to that extent I think that article V is a good article, because it precludes the Republic of Panama from allowing any foreign country to station military forces in Panama or to establish a military base there after December 31, 1999; but it also prevents the United States from entering into such an agreement, and that is what the Senator's amendment would correct.

That is the flaw in article V that needs to be corrected; else, the United States would be shut out. It would not have the same prerogative, the same privilege, that it now has with Spain, Turkey, Greece, and other countries. It would be precluded, by the verbiage of article V, from entering into such an agreement with the Republic of Panama, unless the Neutrality Treaty is repealed or amended or a new treaty is entered into in the meantime. Am I correct?

Mr. NUNN. The Senator from West Virginia is correct.

I might say that article V, as it pertains to other nations, nations other than the United States, would not in any way be changed or affected by this reservation.

Mr. ROBERT C. BYRD. From the standpoint of its effect on other nations, I think it is a good article. But the Senator from Georgia and the other cosponsors of his amendment have detected this flaw and are seeking to remedy this flaw insofar as it pertains to the United States. His amendment would subject the ratification of the treaty—and certainly subjects the approval of the Senate—to a condition, does it not?

Mr. NUNN. The Senator is correct.

Mr. ROBERT C. BYRD. That condition being that the protocol of exchange to be signed by the authorized representatives of both governments will constitute an integral part of the treaty documents and will include language which makes clear that the United States and Panama may, in accordance with their respective constitutional processes, enter into agreements for the stationing of U.S. military forces or the maintenance of defense sites after December 31, 1999, in the Republic of Panama, if both Panama and the United States deem such stationing to be necessary or appropriate. Am I correct in that interpretation?

Mr. NUNN. The Senator from West Virginia is correct.

Mr. ROBERT C. BYRD. I thank the distinguished Senator. I think he has rendered a service in offering this amendment.

Will the Senator now yield to me so that I may propound a unanimous-consent request?

Mr. NUNN. I am glad to yield to the Senator from West Virginia for that purpose.

Mr. President, before I do that, I should like to inquire as to whether or not the distinguished Senator from Alabama would be willing for a vote to occur today on the amendment offered by Senator NUNN and other Senators.

Mr. ALLEN. I will state, in answer to that, that, following the custom as to amendments that have been offered to the treaty, I would be willing to have a vote on a motion to table the amendment. I would be willing to have that vote tonight.

Mr. ROBERT C. BYRD. Would the Senator be willing to follow that vote

immediately with a vote on the amendment, up or down?

Mr. ALLEN. No, sir, I would not. I stated that I have not had an opportunity to speak on the reservation. I did speak on the amendment that uses the same language as this. I am trying to ascertain just what the effect of a reservation might be, as to whether that might cause a plebiscite in Panama. I know that the leadership does not want another plebiscite, so I want to be sure that that is not required.

In answer to the Senator's question, I would agree to a vote tonight on a motion to table, because that seems to be the custom in the Senate when amendments are offered.

Mr. ROBERT C. BYRD. Would the Senator inform the Members of the Senate as to how he intends to go about ascertaining whether or not the adoption of the amendment offered by the distinguished Senator from Georgia and other Senators would result in a plebiscite?

Mr. ALLEN. I am making a detailed study of that question and hope to come up with an answer before long.

Mr. ROBERT C. BYRD. Would the Senator enter into a time agreement that would allow a vote to occur on the amendment of the Senator from Georgia at a given time on tomorrow?

Mr. ALLEN. We just have to wait and see, I suggest to the distinguished majority leader. I really wonder why he is singling out the Senator from Alabama on this matter. I would think it would be something to address to the entire Senate, not just the Senator from Alabama.

Mr. ROBERT C. BYRD. I think the reason is obvious. I sought earlier today to ascertain the answer to that question, and the Senator from Alabama said he would object, at which time I asked if there would be an objection to setting aside the amendment that has been offered by the distinguished Senator from Georgia, so as to permit Senator RANDOLPH to proceed with his amendment to the resolution of ratification; and the distinguished Senator from Alabama, if my ears did not deceive me, indicated at that time that the answer was "No," we would not have any votes on these amendments this afternoon. That is why I am addressing my question to the Senator.

Mr. ALLEN. I would be willing to agree to the customary motion to table.

Mr. ROBERT C. BYRD. The customary motion is fine with me. I would be very glad to enter into an agreement on that point, provided we also agree that if that motion to table fails—and it is also customary around here, I think, if a motion to table fails—a vote then occur up or down on the amendment; because the motion to table cannot be repeated within the time we have left on the resolution of ratification.

I do not believe that the Chair would allow another motion to table to be entered within the course of 48 hours. I believe the precedent speaks of a reasonable time. A reasonable time, I believe, has been determined to be something like 3 days.

Mr. ALLEN. I have not completed my research on the question. I hope the Senator will allow me to study this question for an appropriate time, before making any agreements.

I am just wondering whether we should tamper with this resolution of ratification, whether it might not be best just to send a clean treaty back to the Panamanians.

I do not set any store by these reservations. I do not believe that a bale of them has any weight at all. So I want to see if I am correct in that assumption before making any decisions.

Mr. ROBERT C. BYRD. Mr. President, will the Senator from Georgia yield to me further?

Mr. NUNN. I am glad to yield to the Senator.

Mr. ROBERT C. BYRD. I have a very high regard for the opinion of the distinguished Senator from Alabama; but, in my judgment, reservations are recognized in the field of international law—depending upon their substance, of course—as having in some instances the same effect as an amendment to the treaty. They certainly require the assent of the other parties—in this instance, it would be the other party—and this is a condition, and everybody knows what a condition is. If the other party does not accede to that condition, then all bets are off.

However, be that as it may, I simply want to remind the Senate—and I do not think I have to do this—that at no later than 4 p.m. the day after tomorrow, the Senate will proceed to vote on the resolution of ratification.

Of course, if the amendment of the Senator from Georgia is still pending at that time, the Senate will vote on it; and if the motion to table is made, that will be voted on. If the motion to table fails, then the vote will occur on the amendment. At that time, if other Senators have amendments to the resolution of ratification, they will be entitled to call them up. They will not be entitled to debate them; but if the Senator from Alabama will not allow a vote to occur on the amendment of the Senator from Georgia in time for other Senators to have a little time on their amendments, then he will have to explain his position to them.

Does the Senator from Georgia yield to me so that I may respond to the Senator from Alabama?

Mr. NUNN. I yield first to the Senator from Arizona.

Mr. DECONCINI. I ask this of the majority leader: It is my understanding that all amendments at the desk regarding the resolution of ratification will have an opportunity to be voted on prior to 4 p.m. on Thursday. Is that correct?

Mr. ROBERT C. BYRD. Yes. When the hour of 4 p.m. arrives on Thursday, just as in the case of a unanimous-consent agreement on a bill—when that hour arrives——

Mr. DECONCINI. The majority leader is saying that if we do not get an opportunity to debate or discuss these amendments because of continued debate and discussion regarding the pending amendment of the Senator from Georgia, we will just vote on them one at a time?

Mr. ROBERT C. BYRD. Yes.

Mr. DECONCINI. And they will all receive an opportunity to vote on them?

Mr. ROBERT C. BYRD. Senators will be entitled to call up their amendments at that time but will not be able to debate them, so I hope we will reach an agreement which will allow the Senate to vote on the reservation which has been called up by the Senator from Georgia and his colleague, the equally distinguished senior Senator from Georgia, sometime tomorrow, so the Senate could turn its attention to the amendments of other Senators.

I know Mr. RANDOLPH, my senior colleague, has an amendment that is very important, and I am sure it has the support of veterans organizations of this country. It is the amendment that deals with the veterans cemetery or with the cemeteries, one at Mount Hope, and the other one on the Pacific coast of Panama.

There may be other amendments, and with time fleeting I would hope we can have some understanding as to when the Senate might be able to vote on the reservation by the Senator from Georgia.

Mr. President, I ask unanimous consent, if the Senator from Georgia will allow me to make a request—but first, I will yield to the Senator.

Mr. ALLEN. If I am not misstating what the rule is, and I would like at this time to make a parliamentary inquiry, under the unanimous-consent agreement we are scheduled to vote on the Resolution of Ratification no later than 4 o'clock. Now, that does not admit of the vote on other amendments, and I would like to make a parliamentary inquiry of the Chair if the Senator from Alabama is not correct.

The PRESIDING OFFICER (Mr. MELCHER). Does the Senator from Georgia yield for that purpose?

Mr. NUNN. I yield to the Senator from Alabama for that purpose.

The PRESIDING OFFICER. The Senator from Alabama will restate his parliamentary inquiry.

Mr. ALLEN. I asked the Chair if under the wording of the unanimous-consent agreement, which says, and I quote:

> that the vote on the Resolution of Ratification occur no later than 4 o'clock p.m. on Thursday, March 16, 1978

Does that wording permit a vote on amendments to the Resolution of Ratification subsequent to 4 o'clock or must we at 4 o'clock proceed to a vote on the Resolution of Ratification as it then stands?

The PRESIDING OFFICER. The unanimous-consent agreement permits votes on reservations, understandings and amendments, et cetera.

Mr. ALLEN. But they have to be acted on before 4 o'clock, is that not correct?

The PRESIDING OFFICER. They would not have to be acted upon before 4 o'clock. When the hour of 4 o'clock comes, debate is shut off, but any pending reservation, et cetera, will be voted upon

at that time. Also at that time others could be offered but not debated.

Mr. ALLEN. I thank the Chair. I will state to the Chair that the Parliamentarian informed me just yesterday just the opposite opinion.

Mr. ROBERT C. BYRD. Mr. President, if the distinguished Senator will yield to me——

Mr. NUNN. I yield to the distinguished Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, it is rather elementary around here, I think, and I must say I expressed the greatest surprise—the distinguished Senator from Alabama who, in my judgment, is the best parliamentarian in this body—when he comes around with this idea that under a unanimous-consent agreement when the time for a final vote arrives it shuts off other Senators who have amendments. It does not preclude them from calling up amendments, that is elementary. In our unanimous-consent agreements we always follow that policy that when the time for a final vote arrives Senators who have been shut out can call up their amendments, not debate them, but have a vote on them, and the same thing is true here.

I am glad the Senator asked that question because that is precisely the point I was bearing down on prior to his questioning of the Chair so as to point out that delay, after a vote on the reservation by the Senator from Georgia, is coming out of the time of Senators who have further amendments to the resolution of ratification.

Mr. President, will the Senator yield to me for a unanimous-consent request?

Mr. NUNN. I yield to the Senator.

ORDER FOR RECESS UNTIL TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 12 o'clock noon tomorrow.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? Is there objection?

Mr. FORD. Reserving the right to object, Mr. Leader——

Mr. ROBERT C. BYRD. Yes.

Mr. FORD. What will be the procedure for time for statements?

The PRESIDING OFFICER. Does the Senator from Georgia yield?

Mr. NUNN. I yield to the Senator from Kentucky.

Mr. FORD. I merely want to ask the leader a question. Will there be time tomorrow for statements?

Mr. ROBERT C. BYRD. Yes, indeed, and I was going to include that in my requests.

Mr. FORD. The statements then will be sometime after 12 noon tomorrow?

Mr. ROBERT C. BYRD. When the Senator would like to speak I would propound a request.

Mr. FORD. I would like to ask the leader if I could have 15 minutes sometime shortly after the opening of the session.

Mr. ROBERT C. BYRD. Mr. President, I withdraw my request.

ORDER FOR RECESS UNTIL 11 A.M. TOMORROW; RESUMING CONSIDERATION OF THE RESOLUTION OF RATIFICATION; AND RECOGNITION OF SENATORS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 11 a.m. tomorrow; and that immediately after the prayer, the Senate resume its consideration of the resolution of ratification; and after a 15-minute order for Mr. LEAHY, that Mr. FORD be recognized for not to exceed 15 minutes; that Mr. RIEGLE then be recognized for not to exceed 15 minutes.

Mr. DECONCINI. Reserving the right to object, I would like to ask a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state the parliamentary inquiry.

Mr. DECONCINI. How many amendments are there at the desk regarding the resolution of ratification?

Mr. ROBERT C. BYRD. Six amendments, five reservations, and eight understandings.

Mr. DECONCINI. A further parliamentary inquiry for a further clarification. My understanding is the Chair ruled if those amendments are brought up prior to 4 p.m. Thursday there would be a vote on them?

The PRESIDING OFFICER. The Chair has already stated that even if the reservations, amendments, et cetera, are brought up at 4 o'clock or after they will not be debated, but they will be voted on if offered before the resolution of ratification is acted on.

Mr. DECONCINI. A further clarification. The Chair is saying they will be voted on prior to the vote under the unanimous-consent agreement at 4 p.m.

The PRESIDING OFFICER. The Senator from Arizona has stated it correctly.

Mr. DECONCINI. I thank the Chair.

The PRESIDING OFFICER. The Senate precedents are clear on this type of unanimous-consent agreement, which did not preclude additional amendments, reservations, et cetera.

Mr. CURTIS. Mr. President, parliamentary inquiry.

Mr. ROBERT C. BYRD. Mr. President, could I have my request either objected to or acted upon?

The PRESIDING OFFICER. Is there objection to the unanimous-consent request?

Mr. CURTIS. Reserving the right to object, and I shall not object, I would like to know if amendments to the resolutions of ratification can be called up after the expiration of time, and amendments to the Neutrality Treaty can be called up.

The PRESIDING OFFICER. No. The Chair has ruled that amendments to the resolution of ratification will be considered at any time but not debated after 4 o'clock, but amendments to the treaty will not be in order.

Mr. CURTIS. I thank the Chair.

The PRESIDING OFFICER. As a matter of fact, additional amendments to the articles of the treaty are no longer in order at this time——

Mr. GRIFFIN. Mr. President, reserving the right to object——

The PRESIDING OFFICER (continuing). Because the resolution of ratification has already been presented and it is under debate before the Senate at this time.

The Senator from Michigan reserves the right to object.

Mr. GRIFFIN. For the purpose of clarifying one matter, the Chair has indicated that reservations, understandings, or amendments to the resolution of ratification could be called up after the hour of 4 o'clock on Thursday; but it goes without saying, I take it, that those must be at the desk before 4 o'clock to be eligible?

The PRESIDING OFFICER. No; that is not the case. They do not have to be at the desk. The Senate is not operating under the cloture rule.

Mr. GRIFFIN. So any time after 4 o'clock somebody can come up with another amendment?

The PRESIDING OFFICER. If the Senate has not yet voted on the resolution of ratification, that is the case.

Mr. ROBERT C. BYRD. But they cannot be debated.

The PRESIDING OFFICER. I repeat, they cannot be debated.

Mr. ROBERT C. BYRD. Mr. President, have the reservations of objection to my request been disposed of?

The PRESIDING OFFICER. The Senator is correct.

Mr. HANSEN. Mr. President, reserving the right to object, I do not intend to object, but I want to have clarified this point raised by the Senator from Michigan.

Do I correctly understand that despite the fact that amendments do not have to be at the desk, as I understood the Presiding Officer to state, an amendment could be offered and it would be considered despite the fact that the hour of 4 o'clock may have arrived?

The PRESIDING OFFICER. Any Senator may have his amendments, et cetera, to the resolution of ratification at the desk prior to the vote, and on that basis they will be in order to be considered and will be considered.

Mr. HANSEN. They would not necessarily need to be at the desk?

The PRESIDING OFFICER. Be at the desk.

Mr. HANSEN. What?

The PRESIDING OFFICER. It does not have to be at the desk. It must be at the desk or called up by the individual Senator on the floor.

Mr. HANSEN. Would I be correct, then, in assuming that if a Senator proposed to offer an amendment, all that would be necessary in order for that amendment to be considered and voted upon would be first to stand and attempt to receive recognition, despite the fact that the hour of 4 o'clock may have arrived?

Mr. ROBERT C. BYRD. The Senator is correct.

The PRESIDING OFFICER. The Senator is correct. And let the Chair restate that even the Senator having an amendment, et cetera, at the desk must seek recognition to offer that amendment, et cetera.

Mr. HANSEN. And he will be recognized?

The PRESIDING OFFICER. The Senator is correct; under the rules he will be recognized.

Mr. ROBERT C. BYRD. Mr. President, I ask for the regular order.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia? Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator from Georgia yield further?

Mr. NUNN. I yield to the Senator from West Virginia for an observation, question, or whatever he would like.

ORDER FOR RECOGNITION OF SENATORS LONG, GARN, AND HATCH TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that following the recognition of Mr. RIEGLE tomorrow for 15 minutes, the Senator from Louisiana (Mr. LONG) may be recognized for not to exceed 30 minutes, and that following Mr. LONG, Mr. GARN, and Mr. HATCH may be recognized for not to exceed 45 minutes between them.

The PRESIDING OFFICER. Before the Chair inquires whether there is objection, are all of these orders to precede the resumption of the consideration of the resolution of ratification?

Mr. ROBERT C. BYRD. Oh, no. I am glad the Chair asked that question. The only order that, under my request, would precede the resumption of the consideration of the resolution of ratification would be the order for the recognition of Mr. LEAHY.

The PRESIDING OFFICER. As in legislative session?

Mr. ROBERT C. BYRD. As in legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Now, Mr. President, I wonder if we could get a time limitation on Mr. NUNN's amendment. His amendment will be pending before the Senate at such time as the orders which have been entered have been consummated. The question then will be on the adoption of the amendment offered by Mr. NUNN.

I wonder if we could get a time limitation agreement now, which would allow for time for debate on that amendment at that time, which would not preclude a motion to lay on the table if a Senator wished to move to table.

I ask unanimous consent that there be a 1-hour time limitation on that amendment, the time to be equally divided between Mr. ALLEN and Mr. NUNN.

The PRESIDING OFFICER. Is there objection?

Mr. ALLEN. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ROBERT C. BYRD. With Senators' rights to move to table reserved.

The PRESIDING OFFICER. Is there objection?

Mr. ALLEN. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ROBERT C. BYRD. Mr. President, does the Senator from Georgia continue to yield?

Mr. NUNN. I yield to the majority leader.

Mr. ROBERT C. BYRD. I ask unanimous consent that there be a 2-hour limitation on the amendment by Mr. NUNN, that 2 hours to begin running at the conclusion of the orders that have been entered, and, of course, reserving the rights of Senators to move to table.

The PRESIDING OFFICER. Is there objection?

Mr. ALLEN. Reserving the right to object, I have stated there can be no agreement tonight on the subject; I do not know why the majority leader keeps propounding these requests. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ROBERT C. BYRD. Very well; I will not persist.

Mr. ALLEN. I thank the majority leader.

Mr. CURTIS. Mr. President, will the Senator from Georgia yield for a question?

Mr. NUNN. Not at this moment.

Mr. President, I send a modification of my amendment to the reservation of ratification to the desk. It would merely add four words between the word "arrangement" and the word "to." The full words would be "between the two countries." I send that modification to the desk.

The PRESIDING OFFICER. The reservation will be so modified.

The amendment, as modified, is as follows:

Strike out the period at the end of the resolution of ratification and insert in lieu thereof a comma and the following:

"subject to the condition that the instruments of ratification of the Treaty shall be exchanged only upon the conclusion of a Protocol of Exchange, to be signed by authorized representatives of both Governments, which shall constitute an integral part of the Treaty documents and which shall include the following:

that nothing in this Treaty shall preclude Panama and the United States from making, in accordance with their respective constitutional processes, any agreement or arrangement between the two countries to facilitate performance at any time after December 31, 1999, of their responsibilities to maintain the regime of neutrality established in the Treaty, including agreements or arrangements for the stationing of any United States military forces or maintenance of defense sites after that date in the Republic of Panama that Panama and the United States may deem necessary or appropriate."

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. NUNN. The Senator from Nebraska had asked me to yield for a question.

Mr. CURTIS. I will defer to the distinguished majority leader.

Mr. ROBERT C. BYRD. I thank the distinguished Senator from Nebraska. I was merely going to ask unanimous consent that when the Senator from Georgia yields the floor, the Senate consider some routine morning business, and at the end of that period it go out.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. I ask unanimous consent, Mr. President, that when the Senator from Georgia yields the floor, there be a period for the transaction of routine morning business, as in legislative session, the period not to extend beyond 15 minutes, with statements therein limited to 3 minutes each.

The PRESIDING OFFICER. Is there objection?

Mr. HANSEN. Mr. President, reserving the right to object, and I do not reserve the right to try to prolong the session this evening, I do have some questions, and I was wondering if, under the unanimous-consent request as I understand it, that upon the conclusion of the remarks made by the distinguished Senator from Georgia we would move directly to morning business, following the conclusion of which we would stand in adjournment or recess——

Mr. ROBERT C. BYRD. It would be my intention, at the conclusion of the period for the transaction of routine morning business, to recess over until tomorrow and go out.

Mr. HANSEN. If I understand further, there would be no opportunity, then, to ask any further questions on the amendment of the Senator from Georgia regarding his amendment this evening?

Mr. ROBERT C. BYRD. No, this would not preclude further questions. The Senator from Georgia would hold the floor as long as Senators wished to address questions to him; but, upon his yielding the floor, the period for routine morning business would begin.

Mr. HANSEN. Well, then, all that could be said, if I understand the request of the distinguished majority leader, would be to permit such questions as might be acceptable to the distinguished Senator from Georgia, and would afford no Senator here an opportunity to take any action on his own; am I right about that, excepting with the consent of the Senator from Georgia?

The Senator is correct, but I have no desire to shut out other Senators from the floor this evening. I was merely attempting to——

Mr. NUNN. Nor does the Senator from Georgia.

Mr. ALLEN. Will the Senator yield?

Mr. ROBERT C. BYRD. The Senator from Georgia.

Mr. ALLEN. Will the Senator yield?

Mr. NUNN. I yield to the Senator from Alabama for that purpose, reserving my right to the floor.

Mr. ALLEN. I want to help the distinguished majority leader expedite the Senate's business and I will make this proposal in the form of a unanimous-consent request that all amendments or reservations to the Resolution of Ratifi-

cation to not to exceed 1 hour and a half but that at the hour of 4 o'clock, irrespective of the amendments being in the hands of Senators, on the desk or in their minds, or wherever, we vote on the Resolution of Ratification at 4 o'clock.

Mr. ROBERT C. BYRD. Well, Mr. President, there are 19 amendments to the Resolution of Ratification and I am in no position to say that——

Mr. ALLEN. Well, let us make it 1 hour then.

Mr. ROBERT C. BYRD. I am in no position to answer for any Senator who may not be on the floor at this time, as to whether or not he is willing to have an objection of 1 hour on his particular amendment to the Resolution of Ratification. Perhaps this could be worked out overnight and such an arrangement could be reached, but I think——

Mr. ALLEN. The important issue, as I see it, is that we establish a time to vote. Both sides would have the opportunity of abusing the 4 o'clock hour as now interpreted by the Parliamentarian through the Chair. If we could nail down 4 o'clock, I will not object to any time limit on any of the amendments.

Mr. ROBERT C. BYRD. Well, the only problem with that is that any poor Senator who does not get recognized prior to the hour of 4 p.m. on Thursday next would be completely shut out from having the Senate consider his amendment, vote up or down on it, and it may be that we will have three or four Senators who will be seeking recognition and they will be recognized, as the Chair hears them seek recognition, and if we have a time limitation on each amendment there will be 19 Senators, perhaps, or 15, or whatever it might be, who will be fortunate enough to have been recognized and to have run the time on their amendments, and there might be two or three Senators who will be completely shut out and this does not accord with our normal practice of letting Senators at least call up their amendments.

Mr. ALLEN. I appreciate the distinguished majority leader's concern for the Senators. I know that is his duty and responsibility and one that he takes very seriously, but I am wondering if in some way we can protect the 4 o'clock voting time. That would be what the Senator from Alabama is concerned about.

Mr. ROBERT C. BYRD. I understand that, but that is always the case. We set a time for final vote on a matter. It is always with the understanding that it does not shut out Senators from offering their amendments at this point and at least getting a vote on it.

And I would not want to take the responsibility of shutting them out in this instance. I will be glad to attempt to ascertain overnight if this would meet with the approval of other Senators.

Mr. ALLEN. Yes. I would hate to visualize a concept possibly of there being a filibuster by amendment starting at 4 o'clock Thursday afternoon.

Mr. ROBERT C. BYRD. A filibuster would not a occur on the part of the proponents of the treaty.

Mr. ALLEN. Is that an assurance to the Senator?

Mr. ROBERT C. BYRD. It is an assurance, so far as I can give it personally.

Mr. ALLEN. I thank the Senator.

The PRESIDING OFFICER. The unanimous-consent request does not have objection.

Mr. ALLEN. What is the unanimous-consent request at this time?

The PRESIDING OFFICER. The unanimous-consent request is that at the time that the Senate majority leader yields the floor there will be a period for routine morning business and, as in legislative session, not to exceed 15 minutes.

Mr. NUNN. Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank the Senator.

I think now an assurance can be given to the Senators that there will be no further rollcall votes today.

Mr. NUNN. Mr. President, just to probe further inquiry, my modification, as suggested, has been accepted as a modification in that part of the original amendment; is that correct?

The PRESIDING OFFICER. The Senator's reservation has been so modified.

Mr. NUNN. I thank the Chair.

May I ask the Senator from West Virginia. The Senator from Georgia is prepared to yield the floor, if that is what the Senator from West Virginia would desire.

Mr. ROBERT C. BYRD. It would be perfectly all right with me. I thank the Senator for his patience in yielding to the Senators as he has done.

Mr. NUNN. I thank you very much.

I yield the floor, Mr. President.

Mr. HANSEN. Mr. President.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. HANSEN. I ask for the yeas and nays on the amendment by the distinguished Senator from Georgia.

Mr. ROBERT C. BYRD. Mr. President, I have no objection to ordering the yeas and nays. Automatically, we would go into a period for morning business on the order but I would suggest we give the Senator his yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Now, Mr. President, we are in morning business.

The PRESIDING OFFICER. Is there morning business?

Mr. ROBERT C. BYRD. Yes, Mr. President.

The PRESIDING OFFICER. The Senator from West Virginia.

UNANIMOUS CONSENT CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I would inquire of the distinguished minority leader if there is any objection on his side to proceeding to the consideration of the following calendar orders numbered 617 through 639.

Mr. BAKER. Mr. President, I would say to the majority leader that on our calendar we show calendar orders numbered 616 through 637 cleared for passage and No. 639 cleared for passage.

The PRESIDING OFFICER. Without objection, it is so ordered.

DR. NAZEEH A. L. ABDUL-HADI

The bill (S. 222) for the relief of Dr. Nazeeh A. L. Abdul-Hadi, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Doctor Nazeeh A. L. Abdul-Hadi shall be held and considered to have complied with the provisions of section 316 of that Act as they relate to residence and physical presence.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–675), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to enable the beneficiary to file a petition for naturalization.

BRIGITTE MARIE HARWOOD

The bill (S. 391) for the relief of Brigitte Marie Harwood, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding the provisions of paragraphs (9) and (23) of section 212(a) of the Immigration and Nationality Act, Brigitte Marie Harwood may be admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of such Act. This Act applies solely to the grounds for exclusion under such paragraphs known to the Secretary of State or the Attorney General prior to the date of enactment of this Act.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–676), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to waive the excluding provisions of existing law relating to one who has been convicted of a crime involving moral turpitude and a violation of a law governing the taxing of a narcotic in behalf of the spouse of a U.S. citizen.

DENNO CHUNG-SANG LI, NICHOLAS LIT-YUNG LAM, AND AUGUSTINE KA-CHEUNG WU

The bill (S. 513) for the relief of Denno Chung-Sang Li, Nicholas Lit-Yung Lam, and Augustine Ka-Cheung Wu, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 513

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Denno Chung-Sang Li, Nicholas Lit-Yung Lam, and Augustine Ka-Cheung Wu shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by the required numbers, during the current fiscal year or the fiscal year next following, the total number of immigrant visas and conditional entries which are made available to natives of the country of the aliens' birth under paragraphs (1) through (8) of section 203(a) of the Immigration and Nationality Act.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–677), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to grant the status of permanent residence in the United States to Denno Chung-Sang Li, Nicholas Lit-Yung Lam, and Augustine Ka-Cheung Wu. The bill provides for payment of the required visa fees and for appropriate visa number deductions.

RUSSELL WARREN HOWE

The bill (S. 1079) for the relief of Russell Warren Howe was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, the periods of time Russell Warren Howe, an alien lawfully admitted for permanent residence to the United States, has resided in the United States shall be held and considered to meet the residence and physical presence requirements of section 316 of such Act. Russell Warren Howe may file a petition for naturalization with any court having naturalization jurisdiction under section 310 of such Act.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–678), explaining the purposes of the measure.

There being no objection, the excerpt was orderd to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of this bill is to enable the beneficiary to file a petition for naturalization.

YOUNG-SOON CHOI

The bill (S. 1135) for the relief of Young-soon Choi, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Young-soon Choi may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by Mr. and Mrs. Douglas L. R. Neeley, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–679), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to facilitate the entry into the United States as an immediate relative of the alien child adopted by citizens of the United States.

KWAN DO SUN

The bill (S. 1399) for the relief of Kwan Do Sun, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provisions of section 212(a)(19) of the Immigration and Nationality Act, Kwan Do Sun may be issued a visa and be admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that Act: *Provided,* That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this Act.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–680), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to waive the excluding provision of existing law relating to one who sought to procure a visa by fraud or willful misrepresentation of a material fact in behalf of the brother of a U.S. citizen.

MRS. DESOLINA SCIULLI

The bill (H.R. 1432) for the relief of Mrs. Desolina Sciulli, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–681), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to waive the excluding provision of existing law relating to one who has been convicted of a crime involving moral turpitude.

MEDA ABILAY FLORIN

The bill (H.R. 1939) for the relief of Meda Abilay Florin, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–682), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to facilitate the adjustment of status as an immediate relative of the adopted child of lawful permanent resident aliens of the United States.

SU-HWAN CHOE

The bill (H.R. 2761) for the relief of Su-Hwan Choe, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–683), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to enable the adopted son of citizens of the United States to qualify for first preference status as the unmarried son of citizens, thus facilitating his adjustment of status to that of permanent residence.

MRS. CHONG SUN YI RAUCH

The bill (H.R. 3081) for the relief of Mrs. Chong Sun Yi Rauch, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–684), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to waive the excluding provision of existing law relating to one who has been convicted of a violation relating to the illicit possession of a narcotic in behalf of the spouse of a U.S. citizen.

KWI SOK BUCKINGHAM (NEE KIM)

The bill (H.R. 4401) for the relief of Kwi Sok Buckingham (nee Kim), was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–685), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to waive the excluding provision of existing law relating to one who nas been convicted of a narcotics violation in behalf of the spouse of a U.S. citizen.

SUN DAY

The joint resolution (H.J. Res. 715) proclaiming May 3, 1978, "Sun Day," was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

● Mr. PERCY. Mr. President, May 3, 1978, is going to be a very important day. It is going to be Sun Day, a day of celebration for solar energy. If the public's reaction to it is anywhere near as enthusiastic as the Congress, Sun Day will be a very popular event indeed.

We are today considering Senate Joint Resolution 110 (H.J. Res. 715), which establishes May 3 as Sun Day and asks the President to issue an official proclamation. The resolution is cosponsored by 57 Senators. The identical resolution is cosponsored by a majority of Representatives, and has already passed the House by a vote of 348 to 7. I congratulate the House of Representatives on its rapid action, and on its overwhelming support of Sun Day. I am grateful to the Senate Judiciary Committee for its support of the Sun Day resolution and for its approving the resolution at the earliest possible time.

There is good cause for all this support. Sun Day is not anti-anything. It is simply and solely prosolar energy. For one day energy problems will take a back seat to an energy solution. While no single solar technology is going to solve our energy problems, the combination of all solar technologies can handle many of our needs. And Sun Day can make people aware of the scope and potential of solar energy.

To some people, the term "solar energy" conjures up images of glass covered solar collectors and greenhouses. Others think of photovoltaic cells. But direct sunlight is not the only harnessable form of solar energy. Wind power is actually solar energy in disguise, and so is falling water. Biomass—the green plants that photosynthesize and store solar energy chemically—can also provide usable energy for human needs. All these forms of solar energy are plentiful, clean, safe, and inexhaustible. Yet not that many people are aware of them, and fewer still have actually seen them in operation.

The events and activities on and around Sun Day can increase the awareness of the American people of the reality of solar energy. It can change the public attitude toward solar energy from one of curiosity to one of commitment. Indeed, I very much hope to see Sun Day strengthen this country's commitment to solar energy. The very fact that the Sun Day resolution can be so noncontroversial and supported by such a broad coalition of Senators and Representatives speaks clearly to the attractiveness of solar energy. And yet our present commitment to solar energy is inadequate.

The Congress is beginning to act. In 1976, I organized an Illinois Solar Energy Conference, which was immensely successful. I know many of my colleagues have held similarly successful conferences in their States. The solar coalition is becoming a strong legislative force. Of the nine bills it sponsored last year, seven have either passed or been integrated into the National Energy Act now in conference. This year's solar coalition package is being introduced today. Like last years' it is a many-pronged effort to increase the Federal Government's support of the development and implementation of solar technologies. Sun Day and the solar coalition's package can help each other very much.

Mr. President, Sun Day is a project that is deserving of our support, and will benefit by it. But we, too, will benefit from a successful Sun Day. Sooner or later, this country will turn to solar energy to satisfy a major portion of its energy needs. Sun Day can help us do it sooner and easier.●

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–686), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the legislation is to authorize and request the President to proclaim May 3, 1978 as "Sun Day."

STATEMENT

By designating May 3, 1978 as "Sun Day" industry, labor and the general public will become better informed about solar technology and the potential of the sun in meeting the Nation's energy needs.

Senator Percy stated the pupose of the joint resolution when he introduced the companion joint resolution to the Senate:

Wednesday, May 3, 1978, is no longer just Wednesday. It is also Sun Day. Sun Day will be a nationwide celebration of solar energy. Citizens all across the country are organizing solar fairs, demonstrations of solar technologies, conferences, educational programs and the like to take place on and around May 3. These programs will demonstrate solar energy in all its forms: Wind, crop-drying, and fast-growing plants as well as direct solar heating and cooling, and electricity generation. Sun Day will be a widely celebrated, and very important, event.

Though Sun Day has been designed as a grassroots effort, it needs and deserves all the support we in Congress can give it. As a first step, Mr. President, I am today introducing a resolution which does three things: It proclaims May 3, Sun Day; it authorizes and requests the President to urge the general public, industry and labor to celebrate the day; and it further urges the President to direct all appropriate Federal agencies to participate. It gives me great pleasure, Mr. President, to be joined by 53 of my colleagues in submitting this resolution. Already a majority of the Senate endorses the efforts of Sun Day to focus national attention on solar energy's potential ability to meet substantial portions of our energy needs.

The committee believes it appropriate to call upon the President to proclaim May 3, 1978 as "Sun Day." Accordingly, the committee recommends favorable consideration of House Joint Resolution 715 without amendment.

COST

The enactment of this legislation involves no direct additional expenditure to the Government.

SAMY ENNABE

The Senate proceeded to consider the bill (S. 219) for the relief of Samy Ennabe, which had been reported from the Committee on the Judiciary with an amendment to strike all after the enacting clause and insert the following:

That, for the purposes of sections 203(a)(1) and 204 of the Immigration and Nationality Act, Samy Ennabe shall be held and considered to be the natural-born alien son of Thomas Ennabe, a citizen of the United States: *Provided*, That the brothers and sisters and the natural mother of the beneficiary shall not, by virtue of such relationship or parentage, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–687), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill, as amended, is to enable the beneficiary to qualify for first preference status as the unmarried son of a citizen of the United States. The bill has been amended in accordance with established precedents.

TIN FOO CHAN

The Senate proceeded to consider the bill (S. 511) for the relief of Tin Foo Chan (also known as Michael Chan), which had been reported from the Committee on the Judiciary with an amendment to strike all after the enacting clause and insert the following:

That, for the purposes of the Immigration and Nationality Act, Tin Foo Chan (also known as Michael Chan) shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by one number, during the current fiscal year or the fiscal year next following, the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under paragraphs (1) through (8) of section 203(a) of the Immigration and Nationality Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-688), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill, as amended, is to grant tne statuts of permanent residence in the United States to Tin Foo Chan (also known as Michael Chan). The bill provides for tne payment of the required visa fee and for an appropriate visa number deduction. The bill has been amended in accordance with established precedents.

ERNESTO GARCIA, JR.

The Senate proceeded to consider the bill (S. 958) for the relief of Ernesto Garcia, Jr., which had been reported from the Committee on the Judiciary with an amendment to strike all after the enacting clause and insert the following:

That, in the administration of the Immigration and Nationality Act, Ernesto Garcia, Junior may be classified as a child within the meaning of section 101(b)(1)(C) of such Act upon approval of a petition pursuant to section 204 of such Act filed in his behalf by Ernesto Juan Garcia, a citizen of the United States: *Provided*, That the brothers and sisters and the natural mother of the beneficiary shall not, by virtue of such relationship or parentage, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-689), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill, as amended, is to confer immediate relative status upon the son of a U.S. citizen. The purpose of the amendment is to conform the language of the bill to established precedents.

SHENN-SONG THERESA LEE

The Senate proceeded to consider the bill (S. 1639) for the relief of Shenn-Song Theresa Lee, which had been reported from the Committee on the Judiciary with an amendment on page 1, beginning with line 11, strike through and including page 2, line 2, and insert the following in lieu thereof:

year or the fiscal year next following, the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under paragraphs (1) through (8) of section 203(a) of the Immigration and Nationality Act.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Shenn-Song Theresa Lee shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by one number, during the current fiscal year or the fiscal year next following, the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under paragraphs (1) through (8) of section 203(a) of the Immigration and Nationality Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-690), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill, as amended, is to grant the status of permanent residence in the United States to Shenn-Song Theresa Lee. The bill provides for the payment of the required visa fee and for an appropriate visa number deduction. The bill has been amended in accordance with established precedents.

ANWAR

The Senate proceeded to consider the bill (S. 1933) for the relief of Anwar, which had been reported from the Committee on the Judiciary with an amendment on page 1, line 5, strike "102" and insert "101", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Anwar may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in his behalf by Mr. and Mrs. Kenneth Pekarek, citizens of the United States, pursuant to section 204 of the Act: *Provided*, That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act. Section 204(c) of the Immigration and Nationality Act, relating to the number of petitions which may be approved, shall be inapplicable in this case.

The amendments was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-691), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill, as amended, is to facilitate the adjustment of status as an immediate relative of the prospective adopted child of U.S. citizens. The bill has been amended to correct a typographical error.

OH SOON YI

The Senate proceeded to consider the bill (H.R. 1552) for the relief of Oh Soon Yi, which had been reported from the Committee on the Judiciary with an amendment on page 1, line 7, strike "Maria Farrow" and insert "Maria Farrow Previn", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Oh Soon Yi may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by André Prévin, and Maria Farrow Prévin, citizens of the United States, pursuant to section 204 of the Act: *Provided*, That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-692), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill, as amended, is to facilitate the admission into the United States of the prospective adoptive child of citizens of the United States, notwithstanding the fact that the prospective adoptive parents have had the maximum number of petitions approved. The bill has been amended for purposes of clarification.

SHIN MYONG NYO SIN PURDOM

The Senate proceeded to consider the bill (S. 1335) for the relief of Shin Myong Nyo Sin Purdom, which had been reported from the Committee on the Judiciary with an amendment on page 1, line 4, strike "Myong Nyo Sin Purdom" and insert "Shin Myong Yo Purdom," so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provisions of section 212(a)(23) of the Immigration and Nationality Act, Shin Myong Yo Purdom, also known as Myong Yo Sin may be issued a visa and be admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of that Act: *Provided*, That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read:

A bill for the relief of Shin Myong Yo Purdom, also known as Myong Yo Sin.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-693), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill, as amended, is to waive the excluding provision of existing law relating to one who has been convicted of a violation relating to the illicit possession of a narcotic in behalf of the spouse of a U.S. citizen. The bill has been amended to refer to the beneficiary by her full and correct name.

MR. AND MRS. BLAINE JOHNSON

The Senate proceeded to consider the bill (S. 1418) for the relief of Mr. and Mrs. Blaine Johnson, of Salt Lake City, Utah, which had been reported from the Committee on the Judiciary with an amendment to strike all after the enacting clause and insert the following:

That, in the administration of the Immigration and Nationality Act, Sang Soo Lee shall be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in his behalf by Mr. and Mrs. Blaine Johnson, citizens of the United States, pursuant to section 204 of the Act: *Provided*, That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act. Section 204(c) of the Immigration and Nationality Act, relating to the number of petitions which may be approved, shall be inapplicable in this case.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read:

A bill for the relief of Sang Soo Lee.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–694), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill, as amended, is to facilitate the admission into the United States as an immediate relative of the prospective adoptive child of U.S. citizens, notwithstanding the fact that the prospective adoptive parents have previously had the maximum number of petitions approved. The bill has been amended in accordance with established precedents.

MIRIAMA JONES

The Senate proceeded to consider the bill (S. 337) for the relief of Miriama Jones, which had been reported from the Committee on the Judiciary with amendments as follows:

On page 1, line 4, strike "a child" and insert "an orphan".

On page 5, line 5, strike out the following, "the meaning of section 101(b)(1)(F) of such Act upon approval of a petition filed in their behalf of Mr. and Mrs. David Lyman, citizens of the United States, pursuant to section 204 of such Act the natural brothers and sisters of the said Miriama Jones shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act." and insert in lieu thereof the following, "the definition of section 101(b)(1)(F) of such Act and a petition filed in her behalf by Mr. and Mrs. David Lyman, citizens of the United States, pursuant to section 204 of such Act, shall be approved upon compliance with the remaining requirements of said section 101(b)(1)(F). The natural parents, brothers, and sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.".

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Miriama Jones may be classified as orphan within the definition of section 101(b)(1)(F) of such Act and a petition filed in her behalf by Mr. and Mrs. David Lyman, citizens of the United States, pursuant to section 204 of such Act, shall be approved upon compliance with the remaining requirements of said section 101(b)(1)(F). The natural parents, brothers, and sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–695), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill, as amended, is to facilitate the admission into the United States of the prospective adopted alien child of U.S. citizens.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to move en bloc to reconsider the votes by which the measures were passed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I make that motion.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, may I ask the distinguished minority leader if he has been able to clarify the status of Calendar Orders Nos. 638 and 639.

Mr. BAKER. Mr. President, I will advise the majority leader that 638 may have been cleared, although it is not so marked on my calendar. Calendar Order No. 639 has been cleared. We have no objection to proceeding to its consideration at this time. I will continue to see if we can clear Calendar Order No. 638.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 639.

The PRESIDING OFFICER. Without objection, it is so ordered.

INCREASE IN NUMBER OF ADMINISTRATIVE LAW JUDGE POSITIONS

The bill (H.R. 6975) to amend title 5, United States Code, to provide that hearing examiners shall be known as administrative law judges, and to increase the number of such positions which the Civil Service Commission may establish and place at GS–16 of the General Schedule, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–697), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

H.R. 6975 proposes to increase the number of hearing examiners in supergrade ranks by 100 and to change by statute the title hearing examiner to administrative law judge.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NORTH DAKOTA'S GARRISON DIVERSION IRRIGATION PROJECT

Mr. YOUNG. Mr. President, North Dakota's Garrison diversion irrigation project is a reclamation project which Secretary of the Interior Andrus has placed on his hit list. This is a project which was first authorized in 1944 and reauthorized in 1965.

Secretary Andrus has, I believe, disregarded the directives of Congress in this case. Last year, being fully aware of a stipulation between the National Audubon Society and the Department of the Interior approved by U.S. Judge Richey, Congress appropriated the Bureau of Reclamation's full capability of $18.6 million for this project. In addition, the Senate Appropriations Committee wrote strong report language directing the Secretary to spend these funds as authorized by Congress.

This language was subsequently specifically confirmed by the House conferees. Notwithstanding this, Secretary Andrus has refused to expend any of these funds.

This is a project on which the Federal Government has already spent over $170 million. The Department of the Interior, in behalf of the Federal Government, has entered into contracts with the Garrison Diversion Conservancy District. It has also entered into a separate contract with the city of Minot to provide it with a sorely needed source of municipal water. Secretary Andrus has not only broken these contracts but, equally important, he has disregarded the strong directives of the U.S. Congress.

One of the reasons Secretary Andrus has given for not proceeding with this project is that he is awaiting completion of the national water policy review. The State of North Dakota filed an action in Federal district court for North Dakota, requesting that Secretary Andrus and the Carter administration be enjoined from submitting their recommendations pursuant to this national water policy review until the requirements of the National Environmental Policy Act had

been met. We had all assumed that the law applied as well to the Federal Government and that it, too, had to complete environmental impact statements.

This suit was resisted by the Department of the Interior. Apparently, Secretary Andrus feels that NEPA is a handy tool to use when he wants to stop a project but that he can ignore it when it best suits his interests. The Federal district court in North Dakota ruled in favor of the State of North Dakota and has enjoined the administration from proceeding further, until an environmental impact statement is filed.

Secretary Andrus was so incensed with the decision of the Federal district court in North Dakota that he severely criticized the court. This is a court which has a longstanding reputation for honesty and fairness.

I would like to quote from a statement defending U.S. Judge Van Sickle by North Dakota's Democratic Governor, Arthur A. Link, as carried in an Associated Press story dated March 11:

The comments by Secretary Andrus were a direct attack upon the integrity of the people of North Dakota and can only lead to a further deterioration of relations between the states and the federal government.

I would also like to quote from the same story the following statement by our Republican Attorney General Allen I. Olson:

I am outraged by the scurrilous references made by Andrus and directed at a respected federal judge and every citizen of North Dakota. The secretary has resorted to mudslinging.

I ask unanimous consent that all of the AP story referred to be printed in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. YOUNG. Mr. President, I share completely the feelings of outrage of North Dakota's Governor and attorney general. Secretary Andrus has embarked upon a vicious, ill-advised campaign not only to stop all future reclamation projects but to gut some projects which are partially completed. This is the major reason why people all over the West, and especially Democrats, are infuriated with this administration.

EXHIBIT 1

LINK, OLSON RESPOND SHARPLY TO ANDRUS' REMARKS ON SUIT

Two top North Dakota politicians have lashed out at Interior Secretary Cecil Andrus for linking a federal court decision slowing his department's water policy review and the troubled Garrison Diversion project.

Andrus said in Seattle Wednesday there was an obvious connection between the decision of U.S. District Court Judge Bruce Van Sickle and the irrigation project, which is popular among the state's politicians but under fire from environmentalists.

Andrus has proposed slashing the proposed 250,000-acre project by about 60 percent.

Gov. Arthur A. Link, a Democrat, said he was "amazed and extremely disappointed" by the remarks.

"The comments by Secretary Andrus were a direct attack upon the integrity of the people of North Dakota and can only lead to a further deterioration of relations between the states and the federal government," Link said.

Republican Attorney General Allen Olson, who brought the suit, said Andrus should apologize.

"I am outraged by the scurrilous references made by Andrus and directed at a respected federal judge and every citizen of North Dakota," Olson said. "The Secretary has resorted to mudslinging."

What got Link and Olson upset was Andrus' response to Van Sickle's order barring the Interior Department, the Office of Management and Budget and the Council on Environmental Quality from sending water policy recommendations to President Carter until an environmental impact statement is prepared.

"The people who brought it (the injunction request) were heavy supporters of Garrison and a North Dakota judge heard it, so how do you think it was connected? Very definitely," Andrus said.

Andrus said the federal government would appeal.

The water policy review was begun last May at Carter's direction. Governors of dry western states have objected to its pace and said they are wary that the federal government might encroach on western states' rights to allocate water.

The irrigation project, which would cost more than $600 million if built as Congress authorized it in 1965, has been in trouble for more than a year.

Carter put it on his water projects "hit list" last year, although the Congress eventually overrode his recommendation.

However, construction has been virtually halted by an agreement between the National Audubon Society and the Interior Department. The agreement called for a review that led to the Andrus proposal to slash Garrison to 96,300 acres.

The Canadian and U.S. governments also are scheduled to enter negotiations on the project. The Canadians have said the project would harm their waters, and a two-nation panel has called for a halt to construction that would affect Canadian fisheries.

THE VOICE OF AMERICA

Mr. PERCY. Mr. President, there is an excellent article about the Voice of America in the New York Times of March 12, 1978, by the distinguished Times writer James Reston. In his article, Mr. Reston reports very favorably about the quality and candor of news reporting carried on the Voice of America. I must say that this is very pleasing to those of us who have fought over the years for accurate, objective, and comprehensive news on the Voice.

Mr. Reston's evaluation might be considered a tribute to Peter Straus, present director of the Voice of America, to Alan Heil, chief of the VOA news and current affairs division, and to Bernard Kamenske, chief of the VOA news division. It also reflects credit on the immediate past director of the Voice, Kenneth Giddens, who supported professionalism and honesty in broadcasting at the Voice against bureaucratic intervention for several years.

It is a tribute as well to all those who contribute to the good work of the Voice of America, among them the VOA correspondents whose reports add so much to the spontaneity and credibility of Voice broadcasts.

I ask unanimous consent that the Reston article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE VOICE OF AMERICA

(By James Reston)

DAMASCUS, SYRIA, March 11.—In the struggle over the Middle East, Washington's official overseas radio service, the Voice of America, is in the center of a ceaseless propaganda battle. And since its work is now under review and even attack by some members of Congress, a report from the field may be in order.

In the last three months, I have listened carefully to its English language broadcasts in such diverse places as Japan, Australia, Tahiti, West Germany, Yugoslavia, Italy, Egypt, Jordan, and here in Syria. This may seem an extreme statement, but for detailed accounts of the world's news, I believe there is nothing on the commercial networks of the United States that equals its performance.

The Voice may not be quite as effective in the Middle East as the BBC, which produces a clearer signal from the island of Cyprus than the Voice does from its relay transmitter on the island of Rhodes off the coast of Turkey, but it has more reporters in more places than the BBC, and like the BBC, it has learned over the years that the best propaganda is an honest account of the facts.

Two technical improvements have increased its authority: New, modern transmitters, carefully placed in strategic places around the world, have extended its reach, and new shortwave radio receiving sets, comparatively inexpensive and no bigger or heavier than an average paperback book, are now coming on the market from Japan and reducing those hideous squeaks and howls that discouraged shortwave reception in the past.

Moscow Radio has held its own and more in the technical broadcast race. It comes over every shortwave channel loud and clear, from more transmitters and with more programs, but it has two problems. This propaganda battle is not directed primarily at the general public, but at the educated elites, and one of the most important facts of international life today is that English has established itself as the language of the modern intellectual and commercial world. Even here in Syria, which was dominated by France for many years, English is clearly the second language of the people who influence public opinion.

The Soviet broadcasters have another problem. They don't broadcast news to the elites who listen and think, but beam outrageous propaganda at the boobs, who don't listen. Soviet Ambassador Anatoly Dobrynin, who is so genial in his arguments for détente and a reduction of tensions between Washington and Moscow, should listen sometime to this intellectual garbage coming out of Moscow. The way they muck-rake America, night and day, is an international scandal, and fortunately, the more they spread it, the less it is likely to be believed.

Maybe when they talk to Africa in the dialects—and they are talking to Africa these days as if it were the dominant center of world politics—they are believable, but when they are talking to opinion-makers in English, they claim to have the answer to all the problems of countries whose names they can't even pronounce.

The Voice of America is quite different. It is very cool. It says here is the news, and even Walter Cronkite wouldn't be ashamed to read it. The coal strike in the United States is reported in detail, including the threat of the miners to defy President Carter and the Taft-Hartley Act. The decline of the dollar on the money markets of the world, and the latest rise in food prices are reported, along with the new technical and scientific inventions in the United States.

Anybody who has been listening here to the Voice of America in Damascus in the last

few days knows all about the forthcoming meeting of President Carter and Prime Minister Begin of Israel at the White House, and the debate in America about what the President should say to him.

The press is censored here, but people know by radio about the latest news out of Paris on the French elections, the efforts to reach a compromise in the war between Ethiopia and Somalia, and what Ian Smith said about going to a conference to reach a final settlement in Rhodesia. And they hear the latest song hits out of Broadway and Hollywood, not only from the Voice of America, but from Radio Moscow, which has learned that most people are more interested in American music than news from anywhere.

The Voice of America performs another service. In the last generation, with the development of large multinational corporations, tens of thousands of young American executives have gone abroad with their educated wives and children, not only in commerce but in the official foreign service. The Voice is a link to home for these people, particularly the wives, who are having trouble finding independent jobs and live abroad.

It is a costly service, which is what worries the Congress. It is an honest service, reporting our national failures as well as our virtues, which also troubles those who want it to produce nothing but propaganda. But heard over here, a long way from home, it seems worth the money and even makes you proud.

PROSECUTIVE DISCRETION: IS IT TOO BROAD?

Mr. PERCY. Mr. President, in passing S. 1437, the Criminal Code Reform Act, the Senate acted on its belief that judicial discretion in sentencing was overly broad, and often arbitrary and unfair. That discretion was limited in S. 1437 and made subject to the guidelines of a Sentencing Commission. These guidelines will help to insure that those who violate our laws receive fair and equitable treatment, and will do away with the serious disparities in sentencing that violators of Federal crimes have suffered.

While S. 1437 reduced discretion in sentencing, it is well understood that a certain amount of discretion must exist in the criminal justice system. U.S. prosecutors must be allowed considerable latitude in determining their prosecutive priorities. Prosecutive discretion is essential to the fair and effective operation of the criminal justice system, and we necessarily must place a great deal of faith in the wisdom and integrity of our Attorney General and his assistants. Congress, the executive, and the courts have all recognized the need for this discretion.

Nevertheless, an unwarranted degree of discretion exists in the hands of the Nation's prosecutors. A General Accounting Office report which was released on February 27, 1978, revealed that, of 1.2 million criminal complaints available for prosecution to U.S. attorneys during fiscal years 1970–76, 731,000 or 62 percent of those complaints were not prosecuted by the United States.

Many of these complaints are without prosecutive merit. They lack sufficient evidence or involve minor infractions that do not warrant the cost of prosecution. Some are turned over to Federal administrative agencies or to State and local authorities for action. But U.S. attorneys admit that between 22 and 50 percent of those cases declined were prosecutable in Federal court.

This significant degree of discretion over which cases to try led GAO to conclude that:

Suspected violations of certain criminal statutes are generally not being prosecuted;

Suspected violations of other criminal statutes are being prosecuted in one U.S. attorney's district but not in another; and

Several law enforcement and regulatory agencies are sometimes receiving inadequate prosecutive support.

Mr. President, our Federal laws cannot enforce themselves. We must create efficient administrative structures and supply them with adequate resources to assure that justice is served.

Crime, especially white-collar crime, is occurring at an alarming rate in our country today. Moreover, the public demand for just and responsible government has encouraged more extensive investigative efforts on the part of our administrative and law enforcement agencies, leading to an increase in the percentage of crimes reported. The demands placed on our criminal justice system have become critical, as illustrated by the GAO report:

In fiscal year 1976 there were an estimated 54,000 federal enforcement and investigative personnel who referred about 172,000 criminal complaints to about 1,500 assistant U.S. attorneys who, in turn, had to determine whether to prosecute the cases before about 400 federal district judges. This did not include thousands of other criminal complaints that were not referred for prosecution by law enforcement officials and 56,000 civil matters received by the U.S. attorneys.

The problem we face is whether our laws can be applied fairly, impartially, and consistently throughout our Nation in the face of burgeoning demands on our administrative and law enforcement structures. The solution, as GAO recognizes, cannot be simply to pour more money and personnel into our Federal agencies. New demands require new insights to protect our democratic ideals.

GAO suggests several adjustments in our laws that will help to assure citizens the equal justice they are guaranteed under our Constitution. Expanding the authority of Federal magistrates, granting civil fine authority to other Federal agencies, and setting up pretrial diversion programs can all help to relieve the demands presently placed on our U.S. attorneys.

Congress must keep a watchful eye on the efficiency, the fairness, and the priorities of the national bureaucracy. We must tap the expertise and wisdom of Federal prosecutors without allowing them to make overly broad and arbitrary decisions. To protect the rights and privileges of U.S. citizens, Federal law enforcement officials must be given clear guidelines at the national level.

The GAO report is a constructive critique of the U.S. prosecutive system, and I ask unanimous consent that the introduction, the recommendations, and selected portions of the report be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. ATTORNEYS DO NOT PROSECUTE MANY SUSPECTED VIOLATORS OF FEDERAL LAWS

CHAPTER 1.—INTRODUCTION

One goal of the criminal justice system is to protect individual rights. The prosecutor occupies a critical position in this system. It is the prosecutor who must focus the power of the Government on those who defy its laws. In this regard, in the Federal judicial districts throughout the United States, U.S. attorneys are the chief law enforcement representatives of the Attorney General.

Although States and local jurisdictions carry the greatest share of the burden of fighting violent street crime and administering criminal justice, U.S. attorneys handle a wide variety of litigation for the Government, ranging from prosecution of Federal criminal violations, such as fraud, bank robbery, and interstate crime, to representing the United States in environmental suits and other litigation. In addition to conducting litigation for the United States, U.S. attorneys develop and investigate cases before grand juries and provide advice and assistance to enforcement and regulatory agencies.

Evidence for criminal prosecution is generally developed by various law enforcement and regulatory agencies and is referred directly to the U.S. attorneys' offices. The decision to institute a criminal proceeding is primarily the responsibility of the U.S. attorneys. Usually, this decision is made soon after the referring agency brings the matter to their attention. Often the referring agency will simply call the U.S. attorney, or other attorneys under him who are authorized to accept or decline cases, and explain the facts of the matter.

The U.S. attorney will often make a decision to prosecute or decline the matter based upon this initial discussion of the facts. If a decision has been made to prosecute an individual and the case has been filed with the court, the U.S. attorney can still decide not to pursue the case. For instance, if the U.S. attorney became aware of new evidence that would vindicate the accused, he would apply to the court for a dismissal.

The manner in which U.S. attorneys exercise their prosecutive discretion affects the entire Federal criminal justice system. For example, the U.S. attorney's prosecutive priorities can affect the type of violations to which investigative agencies will commit their resources.

His decisions to prosecute affect the rate of flow of cases into the courts, and, subsequently, have an impact on prison populations and on probation and parole officers' workloads.

The Attorney General exercises general supervision of U.S. attorneys through the Executive Office for U.S. Attorneys. This office maintains liaison between U.S. attorneys and other Department of Justice divisions, bureaus, and offices, as well as with other Federal agencies.

U.S. attorneys are appointed for a 4-year term by the President with the advice and consent of the Senate. When the 4-year term expires, a U.S. attorney continues to perform the duties of his office until a successor is appointed and is found to have the qualifications for the office. Each U.S. attorney is subject to removal by the President. Assistant U.S. attorneys are appointed by the Attorney General and are subject to removal by him.

There are 94 U.S. attorneys, 1 for each Federal judicial district and 1 for each U.S. territory. Their approved budget for fiscal year

1976 was about $90 million, and they were supported by 1,517 assistant U.S. attorneys and 1,755 non-attorney personnel. The average number of assistant U.S. attorneys assigned to each district, the number of criminal and civil filings, and the number of grand jury proceedings vary considerably among the districts. The following table shows the differences in the number of attorneys for the eight districts we reviewed and the total criminal and civil filings and grand jury proceeding for all districts.

Judicial district	Fiscal year 1976			
	Average number of assistant U.S. attorneys	Criminal filings	Civil filings	Grand jury proceedings
Reviewed in detail:				
California Central	85	2,191	1,562	1,482

Average for the 94 districts	16.1	470	526	252
Range for the 94 districts	1–157	29–2,191	3–1,971	0–1,482

Prosecution capability could be increased but alternatives must be considered

Many suspects who are considered prosecutable are released without being prosecuted, thereby avoiding possible punishment if they were tried and found guilty. Increasing the number of assistant U.S. attorneys would be one way to alleviate this problem. However, because of the workload of the Federal courts, even an increase in staff may not result in a significantly increased number of prosecutions. Although the number of investigators and the size of U.S. attorney staffs have greatly increased between 1970 and 1976, the number of authorized Federal district judges has remained almost constant. In addition, some violations were considered so minor they did not even warrant the cost of prosecution.

We believe that if the size of U.S. attorneys' staffs are significantly increased, the number of Federal district judges and supporting judicial personnel would also have to be increased to handle the number of prosecutable cases that are now being declined. In addition, the effect of an increased number of prosecutions on Federal prison and correctional institutions would also need to be taken into consideration.

One way to increase the number of prosecutions without increasing the number of judgeships would be to expand the authority of Federal magistrates [1] and/or increase their use.

In a previous report [2] we recommended, in part, that district judges make greater use of magistrates under existing legislation and that the Congress further define the authority of magistrates. Also, we said the Congress should consider modifying the Federal Magistrates Act to expand the magistrates' trial jurisdiction to include most misdemeanors. (See app. I.) By increasing the magistrates' criminal jurisdiction to include all misdemeanors, the district judges' workload could be reduced and, therefore, allow them to spend more time on felony and civil matters.

The Department of Justice has also endorsed the expansion of the magistrates' authority and trial jurisdiction. The Attorney General in two addresses given on May 4, 1977, stated:

"We are developing a proposal to expand duties of U.S. Magistrates. The magistrates would assume a heavier criminal jurisdiction, as well as a broader civil role. At present, in the main, magistrates have criminal jurisdiction over only petty offenses and civil authority over only motions. We are proposing that magistrates be able to decide misdemeanors and impose a sentence of up to 1 year and fines of any allowable amount. In addition, they would be given some jurisdiction to decide civil cases, with the right to appeal to the District Judge and then by certiorari only to the Courts of Appeals."

A bill (S. 1613), based on the Department's proposal, recently passed the Senate and is currently being considered by the House of Representatives.

We also recognize that many suspected violators who are not prosecuted are charged with crimes that may not warrant the expense of prosecution. Examples of such crimes include a suspected violator accused of forging a $25 Government check, or a bank fraud and embezzlement case involving only $40. Although the magnitude of these cases may not justify prosecution, alternative actions are needed to deal with such conduct. Therefore, we believe that alternatives to traditional prosecution may in some cases be in the Government's best interest since they (1) could be less costly, (2) have a deterrent effect on misconduct, or (3) may be more suitable for the misconduct involved.

Also, under current Federal law, some agencies have no alternative to criminal prosecution—a suspect is either prosecuted or avoids legal action. Since limited resources prevent U.S. attorneys from prosecuting many suspected violators, alternatives are needed. Several alternatives, including civil fine authority and pretrial diversion, have been suggested.

Civil Fine Authority

Officials of several agencies said that civil fines would be a useful enforcement tool and would be a deterrent to suspected violators who cannot be prosecuted. The Administrative Conference of the United States [3] has a similar view. In 1972 the Conference recommended that Federal agencies consider requesting the Congress to give them authority to use civil fines or other substitute sanctions.

The Conference did not propose eliminating criminal penalties; but, rather, it suggested alternatives to criminal penalties. It stated that civil fines are an important and useful enforcement tool for agencies with a large number of cases to be processed; and more severe penalties should be pursued for use when appropriate civil fines could contribute to agencies' obtaining quicker corrective action for civil violations.

The Conference stated that the use of civil fines would not reduce or eliminate the due process protection now being provided under criminal penalty situations. Civil fines would be assessed in accordance with the Administrative Procedure Act (5 U.S.C. 554), and if appealed, reviewed by a Federal court in accordance with that act (5 U.S.C. 702). The Conference also suggested that agencies be allowed to compromise or mitigate any civil fine either before or after assessment.

Most U.S. attorneys and Department of Justice officials we interviewed agreed that civil fines would be a plausible alternative to criminal prosecution of certain misconduct.

Pretrial Diversion

Pretrial diversion is a voluntary program which removes charged suspects from the traditional criminal justice process before trial and places them in a program of supervision, generally by the Federal Probation System, for a specified period of time. Successful participants have their charges dismissed, while unsuccessful participants are returned for prosecution.

The major objectives of pretrial diversion are:

1. To prevent future criminal activity among certain defendants against whom prosecutable cases exist by diverting them from traditional processing into community supervision and services.

2. To save prosecutive and judicial resources for concentration on major cases.

Although U.S. attorneys are using the pretrial diversion alternative to some extent, the majority of prosecutable suspects who are not prosecuted are simply released. Declining to prosecute suspected offenders may reduce U.S. attorneys' workloads; however, it has little, if any, deterrent effect on crime.

Prospective discretion needs guidance and control

The courts have recognized that U.S. attorneys have considerable latitude in determining their prosecutive priorities through the exercise of prosecutive discretion. We also recognize that prosecutive discretion is essential to the efficient and effective application of the U.S. attorney's responsibilities. The U.S. attorney must have the latitude to decide which violations deserve the commitment of his limited resources, although we also believe that his decisions should be in consonance with definitive priorities and guidelines established by the Department of Justice. Such departmental priorities and guidelines are needed to give national direction and control to Federal enforcement efforts.

What has not been recognized, however, is the impact prosecutive discretion has on the criminal justice system. The Department of Justice does not exercise control over this discretion, and there is no mechanism to monitor prosecutive discretion to insure that the discretionary mechanism operates fairly. The Department of Justice has not provided prosecutors with policy or guidelines to be used as a framework to mold prosecutive discretion. Thus, current prosecution philosophy, priorities, and guidelines reflect individual district think-

[1] Since 1969, the year the magistrate system began, several bills concerning the authority of magistrates have been introduced in the Congress. Public Law 94–577, 90 Stat. 2729, was enacted in October 1976. It defined the pretrial jurisdiction of magistrates but did not increase their trial jurisdiction. The 95th Congress is currently considering a bill (S. 1613), which would enlarge the civil and criminal jurisdiction of U.S. magistrates.

[2] "The U.S. Magistrates: How Their Services Have Assisted Administration of Several District Courts; More Improvements Needed," B–133322, September 19, 1974.

[3] The Conference was established to study and make recommendations concerning the efficiency, adequacy, and fairness of Federal agencies' administrative procedures.

ing rather than a nationwide policy. Consequently, differing applications of justice occur.

U.S. Attorneys Establish Their Own Priorities and Guidelines

Staff constraints and the large number of criminal suspects have forced U.S. attorneys to be increasingly selective in the criminal complaints they prosecute. Prosecutive priorities and guidelines are established by individual U.S. attorneys and are based, in part, on their opinions of which violations are the most significant, as well as on workloads, Department of Justice input, local conditions and needs, discussion with enforcement agencies, and suggestions from district judges.

There is no set form for priorities or guidelines. They may be written or verbal, general or specific, for the U.S. attorney's use only, or provided to referring agencies.

Some guidelines which U.S. attorneys have issued to enforcement agencies automatically decline (blanket declinations) certain types of complaints, thus screening these complaints out of the criminal justice system at the investigative level. For example, the U.S. attorney in one district, due to the large number of immigration violations, issued guidelines to the Immigration and Naturalization Service detailing the types of immigration cases that would be considered for prosecution. It is not known to what extent guidelines have screened out complaints because U.S. attorneys may or may not require enforcement agencies to report the number of complaints they decline under blanket declinations.

The certainty of conviction is another aspect that some U.S. attorneys consider when determining whether or not to prosecute. Heavy workloads and crowded court dockets prevent the prosecution of some complaints with a lower certainty of conviction unless there are compelling reasons to prosecute, such as lengthy criminal record, extreme violence of the crime, or other aggravating circumstances.

Uniformity in Prosecution Lacking Among U.S. Attorneys' Offices

In addition to substantially limiting the enforcement of certain statutes, prosecutive priorities established independently by each U.S. attorney have resulted in violations of the same type being prosecuted by one U.S. attorney while not being prosecuted by others. Thus, whether or not a suspect is federally prosecuted may depend more on the district handling the complaint than on the quality of the case. The extent of the problem is unknown because the prosecutive priorities, guidelines, and practices of the various U.S. attorneys are not fully reported to, nor compiled by, the Department of Justice.

The following schedule shows how the magnitude of the offense affects the probability of prosecution in some districts.

AMOUNT NECESSARY FOR PROSECUTION

District	Marihuana	Heroin	Bank embezzlement	Theft from interstate shipment	Obscene matter
1	2.2 lb	No guidelines.	No guidelines.	No guidelines.	Large commercial venture.
2	25 lb	½ oz	do	$500	Do.
3	Must be distributor.	1 g	$5,000	$1,500	No prosecution.
4	100 lb	No guidelines.	$1,000	$5,000	Large commercial venture.
5	100 lb	2 oz	$500	No guidelines.	Do.
6	50 lb	No guidelines.	$1,000	$1,000	No guidelines.

Most U.S. attorney's office officials interviewed agreed that uniformity of prosecution is desirable from a legal standpoint. One U.S. attorney said that Federal statutes are the same in all districts and should be enforced equally. However, the same officials generally viewed complete uniformity of prosecution as impracticable.

The following problems and differences between districts were among those mentioned as creating obstacles to complete uniformity:

Workload variances in some instances permit prosecution in one district and prevent it in another.

The types of cases judges are willing to accept vary among districts.

Individual district court decisions create differences in legal and evidential requirements among districts.

State sovereignty questions arise when State statutes provide penalties different from the corresponding Federal statutes.

Values and mores of individual communities differ.

Department of Justice officials pointed out that districts have different crime problems which require variant prosecutive guidelines. They noted, for example, that drug smuggling and illegal entry of foreign nationals were large problems in several districts along the U.S. southwest border. Because of the size of the problem, they believed that prosecutive guidelines far different than those in other districts of the country were needed and justified.

Although it may not be practicable to achieve complete uniformity of prosecution, we believe that the Department of Justice should strive for the maximum practicable uniformity of prosecution among districts. Each citizen has the right to expect that Federal law will be applied equally to all. A former U.S. attorney expressed a similar opinion, stating that the lack of direction and coordination in some areas points up the great need for national enforcement priorities.

Recommendations

We recommend that the Attorney General review the prosecutive priorities and guidelines of the U.S. attorneys to see that the maximum practicable uniformity in prosecution among Federal jurisdictions is achieved.

As an important adjunct to this review, we recommend that the Attorney General develop for consideration by the Congress a comprehensive proposal for dealing with the overflow of prosecutable complaints received by U.S. attorneys. This proposal should present the results of the Department of Justice's consideration of all the following alternatives as well as any others the Department may identify.

Giving agencies civil fine authority.

Deferring criminal prosecution for suspects who qualify for a pretrial diversion program.

CHAPTER 3.—AGENCY COMMENTS AND OUR EVALUATION

The Department of Justice generally believes that the findings presented in this report are accurate. It agrees that it should (1) attempt to eliminate unwarranted disparities in the enforcement of Federal criminal laws and (2) develop alternatives to criminal prosecution for dealing with the overflow of prosecutable complaints received by U.S. attorneys. (See app. II.) The Department said that in the area of unwarranted disparities in the enforcement of Federal criminal law, the Office for Improvements in the Administration of Justice is currently engaged in two major projects: the development of prosecutive discretion "guidelines," and an empirical study of the prosecutive policies and practices of the U.S. attorneys' offices.

The prosecutive discretion guidelines project was begun by a Department task force in 1975. Based on the work of the task force, the Office drafted proposed guidelines relating to several areas of prosecutive discretion, including decisions to prosecute or decline prosecution. These guidelines were distributed informally to U.S. attorneys. The Attorney General has recently requested that the Office examine the possibility of developing additional guidelines for areas of prosecutive discretion other than those covered earlier and reexamine the desirability of formal distribution of the proposed guidelines already developed.

As a corollary to developing prosecutive discretion guidelines, the Office has formulated a research project designed to study the prosecutive policies and practices of a selected sample of U.S. attorneys' offices. This study is scheduled to commence in early 1978 and to be completed within 12 to 18 months. It is aimed at establishing empirically the extent of disparities in the exercise of prosecutive discretion in the Federal criminal justice system and developing a means for achieving uniformity and consistency in the discretionary decisions of Federal prosecutors.

The Department also said that, with respect to the development of alternatives to criminal prosecution, the Office has been actively engaged in the analysis and evaluation of an experimental pretrial diversion program begun by the Department in 1974. Pursuant to that program, U.S. attorneys have been authorized to use pretrial diversion as an alternative to prosecution except in certain types of cases. More than 30 districts have participated in the program, and in five demonstration districts the program has been conducted under controlled conditions for study purposes. Early in 1977 a survey of all U.S. attorneys' offices was conducted by the Office to gather data concerning the operation of the program. Analysis of the data is now under way, and an evaluation of the program is expected to be completed this fall.

In addition to these major projects, the Office is considering ways to develop an information system that would enable the Department to monitor prosecutions in all U.S. attorneys' offices. Such a retrieval system would make possible the rapid identification of the types of cases presented to and prosecuted by the U.S. attorneys and would facilitate efforts by the Department to ensure the maximum practicable uniformity in prosecution between Federal districts.

The Department has recently developed a statutory proposal which would make more effective use of judicial resources. The criminal jurisdiction of Federal magistrates would be increased by permitting them to try all misdemeanor cases. It said that a bill based on this proposal recently passed the Senate (S. 1613) and is expected to receive favorable consideration by the House of Representatives.

LABOR-MANAGEMENT COMMITTEES

Mr. PERCY. Mr. President, the January–February 1978 issue of the Harvard Business Review contains a most interesting article on labor-management committees. Written by

William L. Batt, Jr., and Edgar Weinberg, the article traces the growing development of joint labor-management committees, a trend that I have long advocated. As the authors note, the objective of the process is to obtain benefits for both labor and management, not to bargain over the division of gains.

The article describes a number of committees in operation today and the types of issues they deal with. Although the authors state that the prospects for rapid widespread adoption of the cooperative approach are not favorable given the traditional mistrust between labor and management, nevertheless, there is likely to be a continuing but gradual increase in the number of cases of cooperation.

Because of the importance of this topic and the potential it holds for increased labor-management cooperation, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LABOR-MANAGEMENT COOPERATION TODAY

(By William L. Batt, Jr., and Edgar Weinberg)

Much has been written about the indifference, even hostility, of U.S. labor leaders as well as employers to the type of developments in codetermination and industrial democracy that are taking place in Western Europe.

Through legislation, trade unions in West Germany and Scandinavia have achieved representation on boards of directors. U.S. labor, however, is opposed to being involved with policy decisions outside the employment area, which have usually been left up to stockholders, directors, and managers.

The concept of industrial democracy in the United States still means collective bargaining with a concentration on job-related issues. Thomas Donahue, executive assistant to the president of the AFL–CIO, states U.S. labor's position emphatically:

"We do not seek to be a partner in management—to be, most likely, the junior partner in success and the senior partner in failure. . . . [Codetermination] offers little to American unions in the performance of their job unionism role . . . and it could only hurt U.S. unions as they pursue their social unionism function. . . . We don't want to blur in any way the distinction between the respective roles of management and labor in the plant."

According to Irving Bluestone, vice president of the United Auto Workers (UAW), "the concept of codetermination as it is understood in Europe has not made marked inroads on our shores."

While both unions and management on this side of the Atlantic firmly rule out codetermination, interest in grass roots cooperation and acceptance of various types of it are more widespread today than at any time since World War II. This cooperation often takes the form of joint labor-management committees, plant production committees, Scanlon Plans, quality-of-work-life committees, and similar consultative bodies at the plant level. Experiments in autonomous work groups—shop-floor democracy along the lines tried in Scandinavia—are also being undertaken. In the railroad and retail food industries and the construction industry, too, union-management committees have been formed to consider industry-wide issues.

The distinctive feature of these arrangements is the agreement to extend collective bargaining beyond its traditional limits—that is, to deal jointly with issues of mutual interest without impairing either party's bargaining strength. The committees take up such issues as energy conservation, work methods, employee morale, waste reduction, and similar workplace problems. The objective of the process is to obtain benefits for both parties, not to bargain over the division of gains.

Will the spread of plant-level cooperation be the American version of the European movement to increase worker participation? It is far too early to judge. So far, there are still relatively few cases of this type of cooperation, but current economic and social trends certainly favor such efforts.

These trends include the pressures to improve productivity, which has been lagging, and to counteract the squeeze on profits coming from rapidly rising energy and material costs and slow growth of demand. Further, with capital per worker rising, measures to maintain industrial peace and reduce absenteeism become vital to profitability. Also, the high costs of arbitration, training, and hiring put a premium on measures to reduce grievances and turnover. For a generation of managers educated in the doctrines of McGregor, Likert, and Drucker, improving communication and participation through union-management cooperation may no longer seem heretical.

Although only a few national leaders have committed themselves to specific action on the issue, the general concept of labor-management committees is widely endorsed. Among union leaders, I. W. Abel, former president of the United Steelworkers, and Bluestone of the UAW have been leading sponsors of action within their industries. Arthur Burns, chairman of the Federal Reserve Board, sees much merit in voluntary grass roots joint efforts for productivity improvement that could reinforce anti-inflationary measures taken at the national level.

In Washington, D.C., Senators Jacob Javits, Charles Percy, and Sam Nunn sponsored the creation in 1975 of the National Center for Productivity and Quality of Working Life. One of the National Center's primary functions is to encourage the formation of labor-management committees following the model widely used during World War II. Congress is also now considering the Human Resources Development Act of 1977, a bill introduced by Representative Stanley Lundine and Senator Javits, both of New York, to provide funding for over 200 demonstration projects in joint work restructuring, gains sharing, and community and state labor-management programs.

MUTUAL CONCERNS

The idea of labor-management cooperation is not new. It goes back over 50 years.

In the 1920s, the Baltimore and Ohio Plan attracted wide attention The B&O Railroad and the Machinists formed joint committees in the repair shops to screen workers' suggestions about matters outside the scope of the usual collective bargaining, such as ways to increase efficiency, reduce waste, improve working conditions, and expand business.

The most extensive experience with labor-management production committees took place during World War II, when industry was trying to increase military output in the face of shortages of labor, materials, and energy. Over 5,000 joint committees were formed, about 1,000 of which concentrated on production problems. In the opinion of many employers and union leaders, these committees improved productivity and morale and enhanced mutual understanding of the broad problems of the common enterprise. When the war ended, most of the committees were discontinued.

As the scope of collective bargaining has expanded, some unions and employers have established committees on health and safety, education and training, pensions, drug addiction, alcoholism, and preretirement counseling. Bluestone has pointed out that "in the [joint safety and health committee] programs thus far undertaken in the auto industry, literally thousands of corrective actions have resulted from the joint efforts of union-management teams at the national and the local level." Successful joint efforts in these areas have led to joint experiments on the quality of work life.

Most of the 180 active committees that we have studied were formed as a result of union and management taking the initiative at various plants.[1] To get started, a few have drawn on the services of impartial third parties from the Federal Mediation and Conciliation Service (FMCS), from productivity and quality of working life centers, or from state institutes of labor and industrial relations.

Automotive industry committees have formed at General Motors, Chrysler, Bendix, Dana, Rockwell, Kelly-Springfield, TRW, and the Harman International plant at Bolivar, Tennessee. Among the food companies with joint committees are A&P, General Foods, Giant, Heinz, Kroger, Oscar Mayer, and Safeway. Steel companies making the effort include U.S. Steel, Armco, Bethlehem, Kaiser, and Crucible. All told, 113 in-plant committees are listed in 89 companies.

Unions represented include the Machinists, the Autoworkers, the Steelworkers, the Teamsters, the Meatcutters, and the Paperworkers. They include 147 locals in these and other internationals.

Also listed are 49 committees active in agencies in the public sector at federal, state, and local levels. Most of these are the result of pressures from citizens against increased taxes but for increased services. The unions most involved are the State, County, and Municipal Employees and the American Federation of Government Employees.

UNTESTED WATERS

What issues do labor-management committees deal with? What do they offer that collective bargaining does not provide? Bruce Thrasher, a Steelworkers representative, reminds us that "such committees are not a substitute for or an alternative to free collective bargaining. Successful committees require a mutuality of interest and serve to complement the collective bargaining process."

In recent years, worker participation through joint labor-management committees has been gradually expanding into new and previously untested waters. These include bidding on new work and bringing in work previously subcontracted outside, organizing the layout of machinery and equipment in a new plant and reorganizing it in an old one, helping to select key supervisory personnel, and planning and overseeing quality-of-work-life programs.

BRINGING IN NEW BUSINESS

At the American Sterilizer Corporation's Amsco Equipment Company, which manufactures hospital equipment in Jamestown, New York, a labor-management committee has been active since 1972 by agreement with the International Association of Machinists. James Laughner, Amsco's plant manager, was recently seeking new products to promote company growth and job security for its 200 workers when the opportunity came up to bid on a new product, one that the company had previously bought outside.

Industrial engineering had been used before in a similar situation but without success. This time, the labor-management committee suggested using production workers to develop a bid. A team of four workers and an engineer was formed and instructed in the bidding process. By conferring with the

[1] *Directory of Labor-Management Committees*, first edition (Washington, D.C.: National Center for Productivity and the Quality of Working Life, 1976).

workers most concerned, the team developed realistic estimates of the time required to make and assemble the components. The team came in with a bid significantly lower than the purchase price of the existing product or the previous industrial engineering estimate, and plant management was able to obtain approval from corporate headquarters for the capital investment required to produce the product. This meant a 15 percent annual increase in the plant's volume and 40 more jobs.

DESIGNING PLANT LAYOUTS

At the Rockwell Standard Division of Rockwell International at a new plant in Battle Creek, Michigan, the Rockwell-UAW joint labor-management committee helped design the plant's original layout. The people with the responsibility for running the machinery collaborated with the engineers in finding a location and designing the flow of production.

In a similar case, the Carborundum Company's 37-year-old Falconer, New York plant, which makes castings for the glass industry, faced an acute need for streamlining plant layout to improve productivity. In addition to retaining an engineering consulting firm, the plant manager decided to involve the plant's labor-management committee, a 12-member group that meets every two months and deals with issues of production improvement, quality control, and safety. The six union members are from the Fireman and Oilers and the Machinists unions.

Rather than mastermind ideas for redesign themselves, the committee members surveyed the employees with questions on plant layout and product flow. Ideas were solicited through small group meetings in each department and shift. The groups met on released time, and the foremen and shop stewards participated. As a result, the committee collected a total of 167 statements of problems and recommendations to solve them. In August 1977, Carborundum announced a $5.1 million expansion at the facility and based the design in large part on these recommendations.

PICKING SUPERVISORS

Increased worker participation in the selection of key supervisory people is another novel use for labor-management committees.

In 1971, the executive editor of the Minneapolis Star and Tribune was about to appoint two new assistant city editors for the Tribune. The local newspaper guild asked for veto power because of the critical effect this job has on reporters' morale. While this request was denied, management did agree to pick the new editors from the people suggested by the labor-management committee. It proposed two nominees, and management appointed them both. Since then, committees have been formally organized under the contract at both newspapers, and they meet monthly to consider common problems, including promotions to 15 supervisory positions below the city editor level. This cooperative arrangement has worked so well that within the past few months the publisher of the Star has sought the cooperation of the labor members of the labor-management committee in recruiting a new editor for that paper.

Under their contracts, they have agreed to discuss "any matter affecting the relationship between the employer and the employee . . . not covered by the normal bargaining and grievance machinery." These have included the quality of the newspaper, their morale, communication, and staff size, and recently the problems caused by incoming technology.

John Carmichael, executive Secretary of the Newspaper Guild of the Twin Cities, was a prime mover in these committees. As Carmichael put it, "The idea of being asked, 'What do you think about your work?' is so strange and so seldom occurs that simply posing the question to a worker does all kinds of things in terms of raising his image of what he thinks you think about him and what he thinks about himself. In all too many cases, the attitude is, 'Get over there and do the job. We don't care what you think. It's not your job to think but to do what we tell you to.' That's a common attitude. If you reverse it, it's a shock."

The Star and Tribune and the guild are currently exploring the desirability of extending their committee with its six years of experience into a more sophisticated quality-of-work-life project. This would include other crafts as well.

IMPROVING WORK LIFE

Planning and overseeing just such quality-of-work-life programs is the primary function of the labor-management committee in unionized plants where both management and union usually cosponsor such projects.

In the General Motors Corporation, a company-wide committee cochaired by George B. Morris, Jr., GM's vice president for personnel, and UAW's Bluestone oversees all joint projects. Programs are under development in most divisions of the corporation, almost all involving the UAW.

At the Fisher Body No. 2 Plant in Grand Rapids, the labor-management committee began a program in 1973. A key element was to get employees to think as a "business team"—that is, to think in terms of cross-functional lines instead of vertical lines from the standard organizational chart. The objective was to lower the level of decision making and to develop an atmosphere of mutual trust. The pilot project was in the cutting room, where cloth and vinyl are cut for body interiors. From this beginning, the business team concept has spread through the entire plant.

At a recent conference sponsored by the National Center for Productivity and Quality of Working Life, Richard Norton, a GM manufacturing superintendent, explained that "the business team concept actually created a smaller business which set its own goals and whose members are responsible to each other for the success of the business."

In Phillipsburg, Pennsylvania, the Rushton Coal Mines has been experimenting for four years with autonomous work groups. A steering committee consists of Warren H. Hinks, Jr., Rushton's president, the mine foreman and other management executives, officers of the Mineworkers union, and several members of both the mine and the safety committees.

This committee, assisted by a research team from Pennsylvania State University and the University of Pennsylvania, planned the project and now oversees its implementation. The Department of Commerce has provided research and training funds. Autonomous work groups were first tried in a section of the mine and involved 27 volunteers, 9 for each of 3 shifts. All 27 have been trained in all jobs to permit full job rotation. They have been given special training in both federal and state mine safety laws and paid the top rate. Crew foremen are primarily responsible for safety and planning; the crew itself is responsible for production. This test group was successful, particularly in improving safety, so the experiment has now been extended to the entire mine.

Mark Naylor, a member of the trial group, reported that "suddenly we felt we mattered to somebody. Somebody trusted us. . . . When a machine busts down nowadays, most of the time we don't bother to call a maintenance man. We just fix it ourselves because, like I said, we feel it's as much ours as our own car at home."

According to Hinks, "We feel that the men are coming up with better attitudes; they are finding the work more interesting. Emphasis on safety has greatly increased. Formerly the idea was that you either had to go for coal output or for doing all of the safety things that complied with the law, but not for both. When the mine inspector wasn't around, the emphasis by the foreman would be on productivity, and a lot of the safety regulations would not be carried out. But now the autonomous teams do all of the work needed to be done to comply with safety regulations."

FAMILIAR TERRITORY

The more customary uses to which committees are put include improving productivity, increasing job security, and promoting the general success of the enterprise. Another frequent use of the committees is stabilizing labor-management relations. This stabilization has often come about because of an awareness on both sides after a protracted strike that there must be a better way.

JOINING IN THE COMMON CAUSE

Committees in the steel industry are of the job security and productivity improvement sort. They grew out of the crisis caused by competition from Japanese and German imports, which gained impetus from the shortages of domestic steel during the long 1959 strike.

Although the steel industry agreement specifically excludes matters pertaining to the collective bargaining agreement, the areas that joint committees in that industry focus on are fairly broad. They include such matters as business conditions facing the company and the industry; foreign competition; excessive absenteeism; workers' morale, safety. and health; quality of work; equipment maintenance and downtime; reduction of rejects, waste, rework, and scrap; and saving of materials and energy—in short, things that improve productivity and thus job security.

In Pascagoula, Mississippi, the Litton Industries shipyard is second in size only to the yards at Newport News and builds half the U.S. Navy's ships. It is the largest industrial employer in the Southeast. With 23,500 employees, 14 unions, and up to 500 union stewards in the plant on any given day, communication is a major problem

Its labor-management committee, which meets monthly and consists of 50 members, discusses problems that affect the greatest number of employees, reviews policy changes before implementation, explores productivity improvement, and provides an opportunity for dialogue on pressing production problems. This committee grew out of a month-long strike in 1965. It was formed with the assistance of the Federal Mediation and Conciliation Service.

The need for improved communications is also felt in smaller plants like the American Velvet Company in Stonington, Connecticut, which has 375 workers. For over 30 years, the company has held morning meetings in which managers share information and ideas with each other. In recent years, the Textile Workers local union president and a union member have joined those meetings. Members read incoming mail together and talk with the sales manager in New York on conference calls. These informal daily meetings are in response to the volatility of that industry, which experiences daily shifts in demand.

Communications are also aided by the quarterly meeting of a profit-sharing committee in which all employees can offer and discuss suggestions. When demand for velvet decreased in 1975, the committee decided to operate and shut down on alternate weeks in preference to the traditional layoffs. This was done for four months until demand picked up.

Improving labor relations is the primary function of many labor-management committees, not just a by-product. Usually these committees grow out of strikes and a determination of the parties to achieve lasting industrial peace. They deal with issues that

give rise to grievances and other problems before contract negotiation time.

Layoff and recall, safety and security, equal employment opportunity, overtime distribution, and fringe benefits are typical agenda items. FMCS mediators often act as third parties, usually conducting what they call a relationship-by-objectives program and then helping to organize and provide ongoing technical assistance to the committees. This concern about grievances and other contract-related matters contrasts with joint committees in industries like steel, which ordinarily rule these matters out of consideration.

SCANLON PLANS

Labor-management committees are also used to plan and administer gains-sharing programs like the Scanlon Plan. Although they have been around since the late 1930s, these plans are of special interest because they have been widely adopted in the past few years as the pressures on management for increasing productivity and widening worker participation have intensified.

Scanlon Plans take their name from Joe Scanlon, an innovative accountant turned open hearth worker and local union president during the Depression. Faced with the failing fortunes of his employer, a marginal steel company in eastern Ohio in 1937, he and a labor-management group went for counsel to Clinton Golden, then the Steelworkers vice president at the Pittsburgh headquarters. What emerged from their collaboration was a three-point program.

Point one was to agree on a philosophy of cooperation, participation, and frank and open consultation among plant management, workers, and the union at both shop-floor and plant-wide levels for all kinds of production problems. Point two was to establish shop-floor production committees of three members each—the foreman plus two elected workers—and a plant-wide review committee including the plant manager and the union president. Their function: to generate and pass on workers' suggestions for improvements in methods for doing the plant's work. Point three was to base a group-bonus, or gains-sharing, plan on each month's performance and to pay it monthly.

Although arrangements vary, the bonus scheme agreed on between the Edgerton, Wisconsin plant of the Dana Corporation and the Autoworkers is typical. At Dana Edgerton, a network of 21 committees generated 535 suggestions in 1976, an average of one for every two employees. Resultant bonuses averaged 14 percent of payroll in 1974, 22 percent in 1975, and 20 percent in 1976. For the average worker, these amounted to $1,221 in 1974, $2,176 in 1975, and $2,153 in 1976.

Ron Sanderson, UAW local president, reported that "our people learn to be cost conscious, aware of the fact that we have to produce quantity and quality to remain competitive in the actual market, thus providing us with job security."

Scanlon Plans appear to produce readily measurable results more quickly for more employees and to last longer than many other reforms in work organization for a number of reasons.

First, Scanlon Plans do not depend heavily for survival on the continuance on the job of a single supportive manager, management, or union official, who is subject to change. Everyone has a visible, measurable stake in its continuation, the monthly bonus check. And there are regular opportunities for everybody to contribute suggestions and for elected shop committees to take part in discussion and decision making every month.

Second, Scanlon Plans are agreed on voluntarily by both union and management outside the contract and must be accepted by a substantial majority of all employees. Acceptance is determined by two secret ballot votes, one for a year's trial period and another for final adoption based on that experience.

Third, as soon as they are adopted, Scanlon Plans reach everyone from plant managers to sweepers. Many other quality-of-work-life experiments are far more ambitious but may take years of experimentation and evaluation with a small segment of employees before the benefits spread to everyone. Philips Lamp, for example, discovered in 1973—after ten years of innovative work restructuring—that only 3.5 percent of the 100,000 employees in its 39 Dutch plants were affected. "We forgot to let people participate," a company official said. Today more employees are involved.

Finally, Scanlon Plans give a continuing incentive for communications to improve in all directions—top down, bottom up, and laterally. The monthly bonus figure signals immediately how the company is doing. Lateral communications improve too because everyone soon realizes that the success of each person and group depends on the success of the entire enterprise.

SIGNIFICANT FACTORS

Whatever these joint committees do, and their activities vary widely as we have seen, they all have several points in common. They provide workers a regular, periodic opportunity to participate in decision making, especially on the shop floor, where their work is most directly affected. They help management at all levels to identify and solve problems facing the organization. They provide a learning experience for all concerned on the workings of the enterprise and the way in which each person relates to it.

While the factors that are significant in the successful operation of labor-management committees differ from case to case, practitioners highlight a few crucial points:

One of the first lessons is that joint efforts require modification of deep-seated attitudes, and these changes do not come readily. Only a relatively few managers and union officials have been willing to recast themselves as cooperative problem solvers.

Managers often report a fear of losing prerogatives in decision making, doubts that workers can make worthwhile contributions, and concern that giving workers a voice will strengthen the union's position. Managers with labor-management committees have a receptive, experimental, and open attitude. At Rushton, Hinks said, "The average worker wants to make an intelligent and creative contribution. I know it may be difficult for some of you to believe, but miners like their work. They want to be involved in decision making that involves them."

For their part, unions and employees often equate productivity with loss of jobs and workers' effort or fear that cooperation may weaken their ability to bargain for their primary goals. Thus cooperation requires a common understanding of the link between the establishment's competitiveness and job security. Where competition is intense this connection is readily perceived. For example, the joint production committees in the steel industry were renamed Employment Security and Productivity Committees to underscore the relationship. The president of one steel local noted that "once membership realizes that productivity is job-supporting not job-eliminating they begin to respond."

More fundamental in lessening employees' fears are specific measures for protecting job security and for sharing the gains. Companies with a "no layoff" or attrition policy in cases of technological change are likely to be able to reduce antagonism and achieve cooperation for improving productivity readily. Under the Scanlon Plans, participation through joint production committees is reinforced by a mechanism for measuring productivity gains and sharing them according to a preestablished formula.

For both sides, one inhibitor to action is the fear of failure. And some plans do fail. Many of these, like other human relationships dependent on mutual trust and good faith, are very fragile. The failures are hard to discover because it is not in the nature of most people to publicize their failures. Sometimes, labor-management committees suspend their activities when collective bargaining and internal political issues in management or the union become more pressing. This has taken place in the Amsco case cited earlier.

The second lesson underscores the importance of free communication and sharing of ideas as the basis of a successful joint committee. Productive committee discussion requires, according to Clyde Caldwell, special representative of the International Brotherhood of Boilermakers at the Tennessee Valley Authority (TVA), a willingness on the part of management "to leave its authoritative hat at the door and talk eyeball to eyeball and gut to gut across the table and hear what those people really feel. Let them lay it out to you without feeling hostile, without having elements of reprisal.

"On the union side, are you willing to go in there and make suggestions to improve the quality of work and reduce the inefficiency of that plant that you and your people walking around in that plant see every day? Are you willing to take the initiative in this crisis situation that this American economy finds itself in?"

Furthermore, rank-and-file employees and supervisors must be kept fully informed about committee activities and involved wherever possible. Otherwise, rank-and-file members may charge union committee members with "selling out," and line supervisors may feel that the union representatives are going over their heads.

Feedback from management regarding employees' questions about operations and suggestions for improvement is indispensable if their interest is to be maintained. Management's willingness to discuss the logic of what it is doing is the heart of the process. If employees get such information, observes William Black, Jr., administrator of TVA's labor-management relations, "You can count on their being more excited about their work, much more involved in it, and much more productive. Feeding the committee maintains the interest of the participants in the process."

A third lesson to observe is that a sense of commitment, mutual trust, and mutual respect is essential for the smooth functioning of a joint committee. Top plant management and union officers not only sanction cooperative efforts but also usually participate in committee meetings. Above all, trust is forthcoming as long as each party refrains from using the committee to undermine the collective bargaining process.

Finally, experienced consultants can play a useful role as catalysts to bring about cooperation. In some situations, trusted outside experts help adversaries accept a problem-solving approach by exploring differences and areas of common interest. Establishes a Scanlon Plan requires the services of accountants and other specialists. Quality-of-work-life experiments often involve behavioral scientists acting in the role of educators, facilitators, or researchers. Experience suggests that the decision to employ consultants and the choice and payment of experts can be best left to the labor-management committee.

FAVORABLE INFLUENCES

Given the traditional mistrust between labor and management, however, the prospects for rapid widespread adoption of the cooperative approach are not favorable.

Nevertheless, there is likely to be a continuing but gradual increase in the number of cases of cooperation, particularly in the Midwest and the Northeast, where most of the committees are now operating. These are

the old, established industrial areas with generally older, unionized plants facing competition from newer, nonunion plants in the South and abroad.

Another factor is the efforts of communities like Jamestown and Buffalo, New York; and Muskegon, Michigan; and of states like Maryland, Massachusetts, New York, and Ohio, which encourage the formation of cooperative in-plant programs in an effort to improve their economies, save jobs, and combat unemployment.

Still other favorable influences nationwide are the long-term trends in our society to increase recognition of the individual (evident in the civil rights and the women's movements) and to use collective bargaining.

Foreign visitors over several generations have consistently found American workers to be skillful and hardworking. Cooperation through joint committees at the plant and the shop-floor level may be one of the most effective ways for management to tap the creativity and ingenuity of this resourceful labor force to improve productivity and the quality of work life.

OPPOSITION TO THE PROPOSED NAZI MARCH IN SKOKIE

Mr. PERCY. Mr. President, the village of Skokie, Ill., is currently undergoing an agonizing and tragic episode which has brought to the forefront of public attention the question of what is protected free speech under the first amendment of the Constitution. For many months, the town has sought to enforce three local ordinances that would prohibit a planned march by the American Nazi Party through Skokie.

Such a march would be repugnant to any American community. But it is particularly abhorrent to the townspeople of Skokie, who include many survivors of the concentration camps of World War II.

The sight of person in full Nazi regalia goosestepping down the street is a disgusting spectacle to anyone. These people espouse bigotry and hatred. They show complete scorn for democratic institutions. The fact that they would want to march on April 20, the anniversary of Adolf Hitler's birth, gives us a clear picture of their mentality.

However, it is difficult for those of us who did not undergo the experience of the holocaust to fathom the nightmare such a sight would be to those who saw their loved ones dragged away and murdered by Nazi stormtroopers. To them, it is an incitement that goes far beyond simply an opposing point of view.

This proposed march has had one salutary effect. It has forced all of us who strongly believe in the protections of the first amendment to reexamine our deeply held principles and beliefs and determine what are the proper limits on speech and expression. The public debate it has engendered is itself a demonstration of the value of our right to free speech. We can debate the issue fully and completely in the public forum. All Americans can freely express their opinions on the meaning of our constitutional rights and how they ought to be applied. We must never forget that the first amendment rights of freedom of speech and assembly are the basic underpinnings of our democratic society.

I firmly oppose the proposed march through Skokie, and I have urged the townspeople to pursue to the fullest extent possible their legal remedies to prohibit this offensive display. I have also joined with others in Illinois who have called for a massive counterrally by all religious and ethnic groups to express abhorrence of Nazi beliefs and to affirm our faith in the democratic system.

DEFICITS, DEBT, AND INFLATION

Mr. HARRY F. BYRD, JR. Mr. President, as chairman of the Subcommittee on Taxation and Debt Management, I presided over hearings today to hear the Secretary of the Treasury, Mr. Blumenthal, and the Director of the Office of Management and Budget, Mr. McIntyre, as to how much the Government's debt limit should be increased to accommodate the huge deficit projected by the Carter administration's new budget.

First, some facts and figures to put the matter in perspective.

The Carter budget calls for an increase of more than 8 percent in the cost of Government for fiscal year 1979. Under this spending program, the administration estimates that the gross Federal debt will reach $874 billion by October of next year.

This means that the national debt will have doubled since 1972—a period of 7 years.

During this period of time, the interest costs on the national debt will have more than doubled, from $23 billion to $56 billion in President Carter's new budget.

We need to keep in mind that our Government has two different budgets—a unified budget and a Federal funds budget.

The unified budget includes revenues for trust funds. These trust funds can, by law, be used only for specific purposes, such as social security. The trust funds, as a whole, are running a surplus.

The Federal funds budget is for the general operation of the Government, and the revenues to finance it come from general taxation. It is the Federal funds deficit that determines the size of the Federal debt.

The Carter administration projects a Federal funds deficit of $72 billion for the current fiscal year and more than $74 billion for the upcoming fiscal year. Thus, the 2-year deficit of $146 billion is greater than the entire cost of Government in 1968.

Yes, the 2-year deficit—just the deficit—will be greater than the entire cost of Government 11 years ago.

It is because of these huge and accelerated deficits that the administration witnesses appeared before this committee today, projecting an unprecedented increase in the statutory debt ceiling of $89 billion for fiscal year 1979.

It is the accelerated and accumulated deficit spending by the Federal Government that is a major cause, if not the major cause, of the Nation's inflation.

Albert E. Sindlinger, the economic pollster, told this committee last month that his daily survey of consumers throughout the Nation finds that the big Government deficits have become a matter of major concern to American consumers, and have reduced their confidence in the future growth of our economy.

Until the deficit is reduced or eliminated, there can be no lasting cure for either inflation or economic stagnation.

The Gallup poll reported on February 16 that by a 9-to-1 margin the public agrees that controlling inflation is more important than achieving a tax cut. This is highly significant as most Americans, I believe, would like a tax cut.

Government planners would be wise to put a greater value on the instincts and the collective judgment of the American people.

While not pretending to be experts on Government finance, the American people instinctively know that there is something "rotten in Denmark," when the Federal Government is now going deeper into the hole by more than $1 billion per week on the average.

Secretary Blumenthal testified that the Federal Government will need to borrow from the public, for 1979, the sum of $75 billion in new borrowing and an additional $175 billion to finance Government debt coming due in fiscal 1979. Thus, the Government will be in the money market for at least $250 billion. Interest rates, almost certainly, are headed upward.

I conclude by emphasizing again that the 2-year deficit, this year and next, will be greater than the entire cost of Government in 1968.

Mr. President, I ask unanimous consent to have printed in the RECORD a table showing the deficits in Federal funds and interest on the national debt, 1959 through 1979, and a second table showing the national debt in the 20th century.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

DEFICITS IN FEDERAL FUNDS AND INTEREST ON THE NATIONAL DEBT FOR FISCAL YEARS 1959-79, INCLUSIVE

[In billions of dollars]

[Prepared by Senator Harry F. Byrd, Jr., of Virginia]

Year	Receipts	Outlays	Surplus (+) or deficit	Debt interest

ORDER FOR RECOGNITION OF SENATOR BARTLETT ON TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that following the recognition of Mr. GARN and Mr. HATCH tomorrow, Mr. BARTLETT be recognized for not to exceed 30 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

NAZI MARCH IN SKOKIE PROVES NEED FOR GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, the American Nazi Party has chosen to march in Skokie, Ill. Their choice of Skokie was both deliberate and provocative. Much of Skokie's citizenry is Jewish, and many are survivors of the Nazi concentration camps. They cannot flee their terrible memories; the scar which genocide has left on them will never heal.

On March 9, 1978, an article appeared in the Washington Post entitled "Holocaust Survivors: A Uniquely Vulnerable Group." The article was written by Rabbi Stephen Fuchs. Rabbi Fuchs refers to Justice Brandeis' opinion in Whitney against California, in which Justice Brandeis stated the three grounds on which there is justification for suppressing speech which would otherwise be constitutionally protected. As Justice Brandeis said:

. . . There must be reasonable ground (1) to fear that serious evil will result if free speech is practiced . . . (2) to believe that the danger apprehended is imminent, and (3) to believe that the evil to be prevented is a serious one.

Rabbi Fuchs concludes that:

On all three grounds, there is reason to justify suppression of the present Nazi activity, especially in places like Skokie, where many Holocaust survivors live.

I could not be more sympathetic to Rabbi Fuchs' concern. But I cannot agree with Rabbi Fuchs that we should suppress the right which the members of any group has to express their views, however deplorable they may be.

Oliver Wendell Holmes was one of the most vigorous protectors of first amendment rights this country has ever known. Rabbi Fuchs quotes one of Justice Holmes' most famous statements, and it is a statement which I feel is as applicable in this case as it will ever be. Justice Holmes said:

If there is any principle of the Constitution that more imperatively calls for attachment than any other it is the principle of free thought—not free thought for those who agree with us, but freedom for the thought that we hate.

But however the courts may act in cases involving the Nazi march through Skokie, we can act to insure that the inhuman practices of the Nazis during World War II will never be visited upon this Earth again.

I can think of no better way for the Senate to take such action than through ratification of the Genocide Convention. What better way could there be to show our support for the principles of human rights? What better way could there be to show how utterly we detest the events which occurred in Nazi Germany, events which the American Nazi Party would seem to applaud today, some 30 years later?

For nearly 30 years, since 1949, the Genocide Convention has been before the Senate. The purpose of the Genocide Convention is to make the commission of genocide an international crime, and over 80 nations have seen fit to ratify its provisions. Has not the time finally come, even as the American Nazi Party is planning its march, for the Senate to act affirmatively on the Genocide Convention? Must we wait until the lessons of history are taught to us again? I hope not. I sincerely hope not. I urge the Senate to ratify the Genocide Convention as soon as possible.

I also ask unanimous consent that the article by Rabbi Fuchs be printed in the RECORD in full immediately following my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HOLOCAUST SURVIVORS: A UNIQUELY VULNERABLE GROUP

(By Stephen Fuchs)

Jewish law and legend accord the victims of great suffering—the widowed and the orphaned—an extraordinary degree of compassion and protection. The Torah reflects their special status: "You shall not mistreat a widow or a fatherless child. If you afflict them in any way, I shall surely heed them when they cry out to me." (Exodus 22: 21–22)

Abraham Ibn Ezra commented that even if only one individual added to the suffering of widows and orphans, the entire community incurred divine wrath if it did not rise up as one body to protect and defend the victims.

When the Hebrew Bible and later Jewish tradition speak of the widow and the orphan, they speak broadly of particularly vulnerable individuals whose prior suffering demands that protection lest their wounds be reopened.

Many people who experienced the Holocaust are still alive. They have lost their families; many have lost their mobility, their sexuality and their ability to hope that life can be a good and positive thing because of the horror they lived through in Europe a generation ago.

Those survivors are a unique group of people whose immeasurable suffering must entwine itself inextricably into any discussion of free speech as it applies to the rights of Nazis to march in full regalia and thereby evoke memories of Hitler's policies and practices.

It is true, as The Post noted in a recent editorial, that the Supreme Court has followed a zigzag path in applying the First Amendment's guarantee of freedom of speech. It is not true, as the editorial contended, that such a zigzag path is unfortunate.

Freedoms are rarely absolute. Often one conflicts with another. When such clashes occur, courts must decide which freedom should take precedence.

As Felix Frankfurter wrote in his opinion in *Dennis v. United States* in 1951: "Not every type of speech occupies the same position on the scale of values. There is no substantial public interest in permitting certain kinds of utterances . . . those which by their very utterance inflict injury or tend to incite an immediate breach of the peace."

In arguing for the primacy of free speech, the Post editorial quoted Oliver Wendell

Holmes's famous statement: "If there is any principle of the Constitution that more imperatively calls for attachment than any other it is the principle of free thought—not free thought for those who agree with us but freedom for the thought that we hate."

The argument there is not with hateful thoughts but with the immediate consequences wrought by the public expression of certain hateful thoughts. An equally famous quote from Justice Holmes's 1919 opinion in *Schenk v. United States* speaks to that vital issue. He wrote: "The most stringent protection of free speech would not protect a man in falsely shouting fire in a theater and causing a panic. It does not even protect a man from an injunction against uttering words that may have all the effect of force."

The justices differ over the magnitude a potential disaster must possess to permit that disaster to restrict free speech. However, the Nazi issue pits basic values of the American system against one another and forces us to confront our priorities and abridge for a few and for a time the right to free expression.

Last April the American Nazi party opened the Rudolph Hess Bookstore on Taravel Street in San Francisco directly across from Congregation B'nai Emunah. A huge swastika stared defiantly at a synagogue attended largely by refugees of Hitler's Holocaust. Sixty percent of B'nai Emunah's members are concentration-camp survivors.

The question is: Which takes precedence—the Nazis right of free speech or the emotional sensibilities and, yes, the physical well-being of this unique group of Americans?

The story of Tauba Weiss, which appeared in the last April 3 issue of the San Francisco Examiner, is unfortunately not an uncommon one among Holocaust refugees. She sobbed: " 'I lost four brothers and two sisters. I saw them take my mother away.'

"She knelt and put her hands to her neck and described how as a boy her husband watched the Nazis 'chop his father' to death.

" 'So,' she said through high-pitched cries, 'If you see a swastika you get all hysterical.' "

Tauba Weiss's fears are hardly unique. Similar reactions are stirred in thousands of European Americans by the sight of a Nazi uniform or the sound of exhortations similar to those that preceded the destruction of one-third of the world's Jews a generation ago.

The reflex of many of these people—whether in San Francisco or in Skokie—is instant and unavoidable. Public Nazi demonstrations involve a clear and present danger to the physical and emotional health of these citizens.

The fact that we have, as Aryeh Neier of the American Civil Liberties Union wrote in a recent Post article, "the freedom to express with all due vehemence our detestation for the Nazis" does nothing to help the already scarred Holocaust victim. If the Nazis were only "enemies of freedom" with evil intent, there would be insufficient reason to stifle them. Unlike any of Neier's other examples, though, a Nazi march and rally would bring severe and immediate suffering on a significant group of Americans.

No, the survival of the country is not imminently threatened by allowing Nazis to parade and demonstrate, but the health and welfare of certain Americans clearly are. Far more is involved than the mere freedom to be vile, as The Post suggested.

In his 1917 opinion in *Whitney v. California*, Louis Brandeis wrote about three grounds on which suppression of free speech can be justified: ". . . There must be reasonable ground 1) to fear that serious evil will result if free speech is practiced, . . . 2) to believe that the danger apprehended is imminent, and 3) to believe that the evil to be prevented is a serious one."

On all three counts there is reason to justify suppression of the present Nazi activity, especially in places like Skokie, where many Holocaust survivors live.

In *Whitney*, though, Justice Brandeis also wrote: "To courageous, self-reliant men with confidence in the power of free and fearless reasoning applied through the processes of popular government, no danger flowing from speech can be deemed clear and present unless the incidence of the evil apprehended is so imminent that it may befall before there is opportunity for full discussion. If there be time to expose through discussion the falsehood and fallacies, to avert the evil by the processes of education, the remedy to be applied is more speech, not enforced silence. Only an emergency can justify repression."

Those words of the Justice also ring true. As long as direct sufferers of the Holocaust survive, the state of emergency justifying the repression of public Nazi demonstrations continues to exist.

The time will come soon, though, when those of us without numbers tatooed on our arms must prepare to defeat in full and open discussion any Nazi menace that rears its head. We must be ready to confront—with truth, reason and calm—swastikas, goose steps and outlandish lies.

For now, though, too many of our people have lived through too much to be able to act with such equanimity. Allowing free expression to Nazi zealots would jeopardize the health and well-being of many Holocaust survivors as surely as any physical assault.

The courageous "widows and orphans" of humanity's greatest tragedy deserve a special measure of protection. Lest our society merit the divine wrath of which Ibn Ezra spoke, we must rise up as one body to prevent their further suffering.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMUNICATIONS

The PRESIDING OFFICER laid before the Senate the following communications, together with accompanying reports, documents, and papers, which were referred as indicated:

EC–3078. A communication from the Comptroller General of the United States, reporting, pursuant to law, on two new deferrals and two supplementary reports to previously proposed deferrals, to the Committee on Appropriations, the Committee on the Budget, the Committee on Commerce, Science, and Transportation, the Committee on Energy and Natural Resources, and the Committee on Finance, jointly, pursuant to order of January 30, 1975.

EC–3079. A communication from the Acting Chairman, U.S. Railway Association, transmitting, pursuant to law, an Affirmative Finding made by the Finance Committee, a unanimous consent resolution of the Board, and further comments and recommendations of the Board; to the Committee on Commerce, Science, and Transportation.

EC–3080. A communication from the Secretary of the Interior, transmitting, pursuant to law a report on the Teton Dam Claims Program, for the period ending December 31, 1977; to the Committee on Energy and Natural Resources.

EC–3081. A communication from the Administrator, General Services Administration, transmitting, pursuant to law, a prospectus which proposes a succeeding lease for space presently occupied at 1201 E Street NW., Washington, D.C.; to the Committee on Environment and Public Works.

EC–3082. A communication from the Comptroller General of the United States, reporting, pursuant to law, on the conceptual design for a financial management system for the government of the District of Columbia; to the Committee on Governmental Affairs.

EC–3083. A communication from the Director, National Science Foundation, reporting, pursuant to law, a planned addition to the NSF system of records for review; to the Committee on Governmental Affairs.

EC–3084. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Customs Penalty Assessment and Mitigation Procedures—Changes Would Help Both the Government and Importers," March 13, 1978; to the Committee on Governmental Affairs.

EC–3085. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Further Improvements Needed in Investigations of Medicaid Fraud and Abuse in Illinois," March 10, 1978; to the Committee on Governmental Affairs.

EC–3086. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report for calendar year 1977 concerning positions in the United States Accounting Office in grades GS–16, 17, and 18 and their incumbents; to the Committee on Governmental Affairs.

EC–3087. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "The 20-Year Military Retirement System Needs Reform," March 13, 1978; to the Committee on Governmental Affairs.

EC–3088. A communication from the Assistant Secretary of Defense, transmitting, pursuant to law, a report on disposal of foreign excess personal property located in areas outside of the United States, Puerto Rico, American Samoa, Guam, the Trust Territory of the Pacific Islands, and the Virgin Islands; to the Committee on Governmental Affairs.

EC–3089. A communication from the Executive Secretary, National Mediation Board, transmitting, pursuant to law, the Forty-Second Annual Report of the National Mediation Board, including the report of the National Railroad Adjustment Board; to the Committee on Human Resources.

EC–3090. A communication from the Commissioner, Immigration and Nationalization Service, Department of Justice, requesting that the case of Mary Mut-Lai Lieu, A12–507–677, involving suspension of deportation under the provisions of Section 244(a)(1) of the Immigration and Nationality Act of 1952, as amended, be withdrawn from Congress and returned to the jurisdiction of the Service in accordance with order of the Immigration Judge dated February 2, 1978; to the Committee on the Judiciary.

EC–3091. A communication from the Executive Secretary, Administrative Conference of the United States, transmitting, pursuant to law, a report regarding agency experience in dealing with Freedom of Information Act requests in calendar year 1977; to the Committee on the Judiciary.

EC–3092. A communication from the Administrator, U.S. Small Business Administration, transmitting, pursuant to law, a report regarding agency experience in dealing with Freedom of Information Act requests in calendar year 1977; to the Committee on the Judiciary.

EC–3093. A communication from the Freedom of Information Officer, Pennsylvania Avenue Development Corporation, transmitting, pursuant to law, a report regarding experience in dealing with Freedom of Information Act requests in calendar year 1977; to the Committee on the Judiciary.

EC–3094. A communication from the Secretary, Railroad Retirement Board, transmitting, pursuant to law, a report regarding experience in dealing with Freedom of Information Act requests in calendar year 1977; to the Committee on the Judiciary.

EC–3095. A communication from the Under Secretary of Defense, Research and Engineering, transmitting, pursuant to law, a report of Department of Defense Procurement from Small and Other Business Firms for October 1976 through September 1977; to the Select Committee on Small Business.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions, which were referred as indicated:

POM–523. A joint resolution adopted by the Legislature of the State of Virginia; to the Committee on Agriculture, Nutrition, and Forestry:

"SENATE JOINT RESOLUTION No. 11

"Whereas, since agriculture is the largest industry in Virginia and has a significant effect upon the overall economy of the Commonwealth, it is essential that the problems facing farmers be fully examined and alleviated; and

"Whereas, these problems include, but are not limited to, increased production costs, low commodity prices, and inadequate exportation of farm products abroad; and

"Whereas, the drought in Virginia during nineteen hundred seventy-seven caused a decline in crop cash receipts of one hundred million dollars to one hundred twenty-five million dollars, a significant decline in livestock cash receipts, a ten per centum decline in total farm income, and will continue to produce adverse effects in nineteen hundred seventy-eight; and

"Whereas, the average net income of Virginia farmers in nineteen hundred seventy-seven fell to two thousand dollars, a decline of more than fifty per centum since nineteen hundred seventy-three; and

"Whereas, the problems of Virginia farmers are the same as those problems shared by farmers throughout the nation; now, therefore, be it

"Resolved by the Senate of Virginia, the House of Delegates concurring, That Congress is hereby memorialized to create and implement policies directed toward alleviating the economic problems of farmers in the United States; and, be it

"Resolved further, That the Clerk of the Senate is directed to send copies of this resolution to the Speaker of the United States House of Representatives, the President of the United States Senate, the Secretary of the United States Department of Agriculture and to the members of the delegation to the Congress of the United States of this Commonwealth in order that they may be apprised of the sense of this body."

POM–524. A joint resolution adopted by the Legislature of the State of Virginia; to the Committee on Agriculture, Nutrition, and Forestry.

"SENATE JOINT RESOLUTION No. 38

"Whereas, the Farm Production Protection Act of 1977 was enacted into law by the United States Congress; and

"Whereas, the Farm Production Protection Act of 1977 established a federal crop insurance program for tobacco and peanuts in disaster and other emergency situations which the farmer has no control over; and

"Whereas, participation by farmers in the highly successful Federal crop insurance program is entirely voluntary and very inexpensive and is self-sustaining through the individual payment of premiums; and

"Whereas, Federal crop insurance has limited availability for crops besides peanuts and tobacco; and

"Whereas, the drought which occurred during the summer of nineteen hundred seventy-seven caused a two hundred and sixty two million dollar ($262 million) loss in grain production, hay and other crops grown by Virginia's farmers; and

"Whereas, one hundred seventeen Virginia localities were declared eligible for Federal drought aid and assistance; and

"Whereas, the after-effects of that drought will be felt for a long time in this Commonwealth; and

"Whereas, the widespread availability of crop insurance for all crops and livestock losses during the nineteen hundred seventy-seven drought would have been extremely beneficial to farmers and would have saved all levels of government millions of dollars in loan and assistance programs; now, therefore, be it

"Resolved by the Senate, the House of Delegates concurring, That the Congress of the United States and the Secretary of the Department of Agriculture are hereby memorialized to investigate the potential for expanding the coverage afforded by Federal crop insurance as set forth in the Farm Production Protection Act of 1977 to livestock and to crops other than tobacco and peanuts, and to seek ways to interest more farmers in obtaining such insurance; and, be it

"Resolved further, That the Clerk of the Senate is directed to send copies of this Resolution to the Speaker of the United States House of Representatives, the President of the United States Senate, the Secretary of the United States Department of Agriculture and the members of the Virginia delegation to the Congress of the United States in order that they may be apprised of the sense of this Body."

POM–525. A joint resolution adopted by the Legislature of Micronesia:

"HOUSE JOINT RESOLUTION No. 7–127

"Whereas, Public Law No. 95–134 (91 Stat. 1159) provides, in Section 101, authorization for an appropriation for the Trust Territory Government in the amount of $122.7 million for Fiscal Year 1979; and

"Whereas, the Office of Management and Budget has forwarded to the United States Congress a budget for the Trust Territory for Fiscal Year 1979 in the amount of $106.9 million, composed of $49 million for Trust Territory Government operations, $51.7 million for the Capital Improvement Program and $6 million for the rehabilitation and resettlement of Bikini Atoll; and

"Whereas, the figure of $49 million for governmental operations, which represents a reduction of approximately $3 million from the operational budget for Fiscal Year 1978, was achieved, in part, by reducing the operational budgets of the administrative districts by 5.8 percent; and

"Whereas, this action results in a loss of $1.94 million in the economies of the districts, aggravating a continuing decline in the per capita income of the districts at a time when the Trust Territory desperately needs economic development; and

"Whereas, the Congress of Micronesia has sought a reduction in the operational costs of the Headquarters of the Trust Territory, which is located outside the geographical boundaries of the Trust Territory, with the savings in Headquarters operations to be reallocated to the districts so as to stimulate economic development within the districts: and

"Whereas, the figure of $51.7 million for the Capital Improvement Program for Fiscal Year 1979 represents a reduction of $18.6 million from the optimal level of $70.3 million which has been programmed by the Office in Charge of Construction, United States Navy, Marianas, into a series of logically sequenced construction packages which were designed for maximum efficiency in putting the most infrastructure in place for the dollars spent; and

"Whereas, the net effect of the reduction in the funding level for the Capital Improvement Program for Fiscal Year 1979 is to further delay the implacement of vitally needed infrastructure which is directly related to economic development despite repeated promises and assurances from various United States officials that the necessary infrastructure would be in place prior to the termination of the Trusteeship Agreement; now, therefore,

"Be it resolved by the House of Representatives of the Seventh Congress of Micronesia, Second Regular Session, 1978, the Senate concurring, that the Congress of Micronesia hereby requests the United States Congress to appropriate, in addition to the amount submitted by the Department of the Interior, $1.94 million to be allotted to the administrative districts of the Trust Territory and to fund the Capital Improvement Program for Fiscal Year 1979 in the amount of $70.3 million, so that the program of the Office in Charge of Construction, United States Navy, Marianas, may be carried out at the optimal level; and

"Be it further resolved that certified copies of this House Joint Resolution be transmitted to the United States Congress, the President of the Senate, the Speaker of the House of Representatives, Senator Robert C. Byrd, Senator Henry M. Jackson, Senator Ted Stevens, Representative Phillip Burton, Representative Sidney R. Yates; the Secretary of the Interior; the Director, Office of Territorial Affairs; and the High Commissioner."

POM–526. A resolution adopted by the Legislature of the State of California; to the Committee on Commerce, Science, and Transportation:

"HOUSE RESOLUTION No. 51

"Whereas, As a result of the California Public Utilities Commission's regulation of the rates of intrastate air travel, air fares for flights within California are approximately one-half that for comparable flights outside California; and

"Whereas, Congress is now considering several measures dealing with aviation regulatory reform which, with the exception of certain provisions which adversely affect the State of California, the Assembly of the State of California heartily endorses; and

"Whereas, Each measure would preempt the authority of the California Public Utilities Commission to regulate the rates of interstate carriers on intrastate trips, and the rates and routes of intrastate carriers, when at least 25 percent of the revenue comes from interstate travel; and

"Whereas, The objective of all of these measures is to provide greater competition between airlines, allow greater flexibility in the setting of rates, and provide for a reduction in air fares nationally; and

"Whereas, In their present form, these measures would result in an increase in air fares in California and in the loss of California's ability to maintain lower air fares; and

"Whereas, The California Public Utilities Commission has computed the cost to California consumers to be between sixteen million dollars ($16,000,000) and forty-two million dollars ($42,000,000) during the first year and a potential longer term cost in excess of two hundred million dollars ($200,000,000) per year; and

"Whereas, The objective of these measures can be achieved without the preemption of California's existing authority to set intrastate air fares; now, therefore, be it

"Resolved by the Assembly of the State of California, That the Members memorialize the Congress of the United States to amend the measures pending before it on aviation regulatory reform so as to preserve the right of the State of California to regulate fares for intrastate air travel so as to maintain low intrastate air fares in the state, and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Secretary of Transportation, to the Speaker of the House of Representatives, to each member of the Senate Committee on Commerce, Science, and Transportation, to each member of the House Committee on Public Works, to Congressmen Glenn M. Anderson and Harold T. Johnson, to each Senator and other Representatives from California in the Congress of the United States, to the Governor, and to the Public Utilities Commission."

POM-527. A concurrent resolution adopted by the Legislature of the State of Michigan; to the Committee on Commerce, Science, and Transportation:

"SENATE CONCURRENT RESOLUTION No. 343

"Whereas, The increased use of new substances has lead to much concern about health. In addition, greatly improved medical and scientific skills have facilitated the detection of substances that are injurious to our health, property, and environment; and

"Whereas, There have been numerous accidents involving toxic substances that have caused grievous harm to many individuals. Many of these individual citizens suffer untold economic and personal hardships through absolutely no fault of their own; and

"Whereas, According to the figures of the Federal Farmers Home Administration, in Michigan there are forty-three cases in which people have been delinquent on their accounts due to the economic injuries caused by toxic substances (PBB). Of this forty-three, twelve cases are involved in liquidation processes to the amount of $1,314,636, while many are experiencing varying degrees of financial difficulty; and

"Whereas, To provide just and adequate compensation for people whose health or property are afflicted by toxic substances is a financial burden far beyond any which can be borne by the individual states. Clearly the only recourse to alleviate some of the anguish caused by mishaps involving toxic substances must come from the federal government; and

"Whereas, In addition, federal control is the sole means of providing uniform compensation for toxic substance victims. Consideration for the needs of those affected makes it imperative that swift action be taken such as the enactment of legislation including or similar to S-1531, 1330, 899, H.R. 7174, and H.R. 9616; now, therefore, be it

"Resolved by the Senate (the House of Representatives concurring), That the Michigan Legislature hereby memorialize the Congress of the United States to enact legislation concerning toxic substance victim compensation; and be it further

"Resolved, That copies of this resolution be transmitted to the President of the United States Senate and the Speaker of the United States House of Representatives and to each member of the Michigan Delegation to the Congress of the United States.

"Pursuant to rule 32, the concurrent resolution was referred to the Committee on Senate Business."

POM-528. A concurrent resolution adopted by the Legislature of tht State of South Dakota; to the Committee on Environment and Public Works:

"SENATE CONCURRENT RESOLUTION No. 15

"Whereas, the Pick-Sloan Missouri Basin Flood Control Act of 1944 authorized the conservation, control, and beneficial use of the flood waters of the Missouri River; and

"Whereas, that plan provided for the construction of dams on the Missouri River in South Dakota; and

"Whereas, the water impounded by said dams inundated 509,000 acres of South Dakota agricultural land; and

"Whereas, persons outside the state's borders receive a majority of the flood control and electrical power benefits resulting from said dam construction and South Dakota land loss; and

"Whereas, the Pick-Sloan Missouri Basin Flood Control Act of 1944 also provided for construction of a multi-purpose water development project in South Dakota known as the Oahe Unit, which was authorized by Congress in 1968 and was designed to serve irrigation water needs in the Dakota Lake Plain, municipal and industrial water needs in the development area, fish and wildlife conservation and development, and expanded recreational opportunities; and

"Whereas, the authorizing legislation allocated a portion of the power revenues from electrical power sales to defray the costs of water development in South Dakota as partial compensation for the sacrifice of land in South Dakota to the said dams and reservoirs; and

"Whereas, the Oahe Conservancy Sub-District, acting through its Board of Directors, holding a contract with the United States for construction of Oahe Unit, has conducted hearings within the project area and has concluded that the authorized Oahe Unit is unacceptable to the Sub-District; and

"Whereas, the Oahe Conservancy Sub-District Board of Directors has adopted a resolution requesting the Congress to deauthorize Oahe Unit feeling such action was necessary to clear the way for acceptable water development, to request no further funding for the project and to request funding and support for (1) development of riverside irrigation in counties bordering the Missouri River served by closed pipeline systems, (2) development of pipeline delivery systems to meet municipal and rural domestic water needs and (3) development of a voluntary watershed program on the James River Basin; and

"Whereas, resolution of the issue is necessary for South Dakota to develop a program of flexible and desirable water resource use; and

"Whereas, the Lower James Conservancy Sub-District has requested a modification of Oahe Unit; and

"Whereas, the federal government is considering, as an option for replacement of direct water development projects, block grants to states; and

"Whereas, the South Dakota Oahe task force has been created to continuously monitor and examine the Oahe Unit as outlined in the construction schedule of the Bureau of Reclamation, to report annually to the Legislature on the progress of the project, and where appropriate, pursue or assist in pursuing modification and improvement in the project in the areas of: canalside irrigation; soil preservation; channelization; public access to project data; municipal, rural and industrial water supply; beneficial economic and environmental purposes and wildlife mitigation and enhancement; and

"Whereas, the South Dakota Oahe Unit task force has gone on record requesting the Bureau of Reclamation and the Fish and Wildlife Service to eliminate the list of landowners for wildlife mitigation in the Revised Wildlife Plan and to notify the individuals involved; and

"Whereas, the South Dakota Oahe Unit task force has recommended to the South Dakota Legislature that, before any further construction of Oahe Unit and before deauthorization of Oahe Unit, the Bureau of Reclamation with the cooperation of the South Dakota department of natural resources development study the feasibility of canalside irrigation in Hughes County and Sully County, and study the feasibility of irrigation pumping directly from Lake Oahe as compared with the feasibility of supplying water to Missouri riverside irrigation areas through the Pierre Canal and Blunt Reservoir, and that the Bureau of Reclamation conduct an appraisal study of the Lower James Conservancy Sub-District proposal for modification of Oahe Unit, including alternate sites for the pumping station and water delivery system; and the Oahe Unit task force further recommended that Legislature direct the task force to begin negotiations with the Federal government for a block grant or share of power generation revenues to offset the loss of 509,000 acres inundated in South Dakota by the Missouri River impoundments:

"Now, therefore, be it resolved, by the Senate of the Fifty-third Legislature of the state of South Dakota, the House of Representatives concurring therein, that the Legislature of the state of South Dakota does hereby memorialize and urge the Congress of the United States and the United States Department of the Interior to assist in development of water resources in South Dakota by allocating resources to cooperate with the South Dakota department of natural resources development, in consultation with the Department of Agriculture, Department of Environmental Protection State Planning Agency, and the Department of Game, Fish and Parks, in study of alternate water development projects in South Dakota, including but not limited to those requested by the recommendations for modifications and alternatives made by the Oahe Conservancy Sub-District Board of Directors; by the Lower James Conservancy Sub-District proposal for modification of Oahe Unit; by the WEB Water Development Association proposal; and by the Oahe Unit task force; and

"Be it further resolved, that the Legislature requests the United States Department of the Interior to immediately commence such study work in cooperation with the South Dakota department of natural resources development, the conservancy sub-districts involved, and the Oahe Unit task force, in consultation with the Department of Agriculture, Department of Environmental Protection, State Planning Agency, and the Department of Game Fish and Parks, using unobligated fiscal year 1977 carryover construction funds where appropriate: and

"Be it further resolved, that the Oahe Unit task force further assist in evaluation of other alternate water development project proposals as such proposals are offered to the extent of its fiscal and time constraints; and

"Be it further resolved, that the Legislature requests the United States Department of the Interior to eliminate the list of identified potential wildlife mitigation lands contained in the proposed Oahe Unit Revised Wildlife Plan and to notify the landowners involved of the elimination of such list; and

"Be it further resolved, that the Legislature of South Dakota asks Congress to refrain from any action to deauthorize Oahe Unit until analysis of such alternate water development projects is completed, or an acceptable cash settlement in the form of a block grant or a percentage of the annual power generated revenues from the facilities operating within the state on the Missouri River, has been negotiated by a team consisting of the Oahe task force and the South Dakota congressional delegation, pro-

vided that the authorized Oahe plan to develop irrigation in Brown and Spink Counties is not completed nor endorsed for completion; and

"Be it further resolved, that the Secretary of the Senate is hereby directed to forward copies of this resolution to the presiding officers of the United States Senate and House of Representatives, the members of the South Dakota Congressional Delegation the Secretary of the United States Department of the Interior, the Governor of South Dakota, the Oahe Unit task force, and the President of the United States."

POM–529. A resolution adopted by the Legislature of the State of Massachusetts; to the Committee on Foreign Relations:

"RESOLUTION—THE COMMONWEALTH OF MASSACHUSETTS

"Whereas, In recent years the government of the Republic of Uganda has engaged in a consistent pattern of gross violations of internationally recognized human rights; and

"Whereas, Nearly four years ago the United States of America terminated its foreign aid program and closed the United States embassy in Kampala; and

"Whereas, Members of the Ugandan diplomatic mission to the United States and members of the Ugandan delegation to the United Nations have been involved in harassing Ugandan exiles in the United States, especially those exiles who are political opponents of Idi Amin, and have engaged in intelligence gathering on these individuals; and

"Whereas, Continuing repressive measures taken by the government of the Republic of Uganda have outraged the international community and have been condemned by the United States on several occasions; now therefore, be it

"Resolved, That the United States should, consistent with its obligations as the host for the headquarters of the United Nations, limit travel within the United States by members of delegations to the United Nations and has done so in the past to prevent improper activities within the United States; and be it further

"Resolved, That the Massachusetts Senate urges the Congress and the President to forthrightly enact legislation pending in the United States Congress to prohibit the importation of Ugandan coffee into the United States and furthermore to take all steps necessary to totally disassociate our nation from the government of Idi Amin in Uganda; and be it further

"Resolved, That copies of these resolutions be transmitted forthwith by the Clerk of the Senate to the President of the United States, the Secretary of State, to the presiding officer of each branch of the Congress, and to each member thereof from the Commonwealth."

POM–530. A resolution adopted by the Legislature of the State of Massachusetts; to the Committee on Foreign Relations:

"RESOLUTION—THE COMMONWEALTH OF MASSACHUSETTS

"Whereas, The three major branches of Christianity are Eastern Orthodoxy, Roman Catholicism and Protestantism; and

"Whereas, The Chief Bishop of the Eastern Orthodox Church is located in Constantinople, Turkey, and has been there for over one thousand five hundred years; and

"Whereas, Constantinople was one of the five main sees of the ancient church along with Rome, Alexandria, Antioch and Jerusalem; and

"Whereas, Since the capture of Constantinople in nineteen hundred and forty-three by Turkish invaders, the Patriarchate has been subject to persecution from time to time; and

"Whereas, In nineteen hundred and fifty-five, this persecution resumed and has included the deportation of thirty thousand persons and two bishops, the closing of the Patriarchate's newspaper, the refusal to permit certain bishops to be considered for election as Patriarch in nineteen hundred and seventy-two, the closing of the Patriarchal Seminary, which was an international theological institution, and the denial of passports from time to time to bishops of the Patriarchate for foreign travel; and

"Whereas, The government of Turkey in the Treaty of Lausane in nineteen hundred and twenty-three agreed to respect the rights of the Patriarchate and Christians and Jews living in Turkey; and

"Whereas, The Eastern Orthodox Church has two hundred million members and over three million in the United States, including a significant membership in the Commonwealth of Massachusetts; now therefore be it

"Resolved, That the Massachusetts Senate hereby urgently requests the President and the Congress of the United States to strongly protest to the government of Turkey the renewed persecution of the Ecumenical Patriarchate and of the Christians living in Turkey; and be it further

"*Resolved,* That it is the sense of the Massachusetts Senate that the United States should take steps to ensure religious freedom of the Christians and Jews in Turkey and respect for the status of the Ecumenical Patriarchate, and that the President and Secretary of State should take personal steps to ensure the religious freedom of the Ecumenical Patriarchate; and be it further

"Resolved, That copies of these resolutions be transmitted forthwith by the Clerk of the Senate to the President of the United States, to the presiding officers of each branch of the Congress, to the chairmen of the foreign relations committees of each branch of the Congress, to the United States Secretary of State and to His Eminence Archbishop Iakovos of New York City."

POM–531. A resolution adopted by the legislature of the State of Minnesota; to the Committee on Foreign Relations:

"H.F. No. 1732

"Whereas, the construction of an electrical generating facility located at Atikokan, Ontario, Canada has raised considerable concern regarding its environmental impact on the Province of Ontario, the State of Minnesota, and neighboring states; and

"Whereas, the regulatory power of the State of Minnesota does not extend to the proposed facility; and

"Whereas, there has been a long history of friendly relations and the resolution of problems between Canada and the United States to the mutual satifaction of each; and

"Whereas, it is recognized that there are legitimate energy needs related to the proposed facility; and

"Whereas, the United States government is the proper authority to deal with transborder concerns of this nature; now, therefore,

"Be it resolved, that the Legislature of the State of Minnesota urge the federal government, through the President and Congress, to take appropriate action to assure that adequate environmental safeguards are utilized in connection with the proposed Atikokan facility while, at the same time, the legitimate energy needs of the area are taken into account; and

"Be it further resolved that the Secretary of State of the State of Minnesota be directed to forward copies of this resolution to the President of the United States, the Secretary of State of the United States, and to each member of the Minnesota Congressional delegation."

POM–532. A concurrent resolution adopted by the Legislature of the State of South Dakota; to the Select Committee on Indian Affairs:

"SENATE CONCURRENT RESOLUTION No. 5

"Whereas, the present system of funding federal programs on Indian reservations is not effective; and

"Whereas, state agencies have responsibility for programs, but little authority over Indian reservations; and

"Whereas, the federal government does not encourage tribal governments to develop their own human services delivery systems and administrative expertise; and

"Whereas, inequities exist in program benefit levels on Indian reservations which extend beyond the boundaries of South Dakota:

"Now, therefore, be it resolved, by the Senate of the Fifty-third Legislature of the state of South Dakota, the House of Representatives concurring therein, that the Fifty-third Legislative Assembly of the state of South Dakota respectfully urges Congress and the federal government to:

"(1) Directly fund human resources programs on Indian reservations; and

"(2) Work with tribal governments to develop administrative capability to deliver human services; and

"(3) Deliver uniform benefits to all reservations; and

"Be it further resolved, that copies of this Concurrent Resolution be transmitted by the Secretary of the Senate to the President of the United States, to the secretary of the United States department of health, education and welfare, to each member of the South Dakota Congressional Delegation, and to the presiding officers of the United States Senate and House of Representatives."

POM–533. A joint resolution adopted by the Legislature of the State of California; to the Committee on Veterans' Affairs:

"ASSEMBLY JOINT RESOLUTION No. 68

"Whereas, Legislation has been introduced in Congress to provide a pension to veterans of World War I or their surviving spouses; and

"Whereas, The persons who would receive benefits under such a bill are certainly deserving and in need of such benefits; and

"Whereas, Such persons are generally not eligible for the wider range of benefits available to veterans of later wars and it is most fitting and proper for veterans of World War I to receive additional benefits under the provisions of the legislation; now, therefore, be it

"*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California respectfully memorializes the President and Congress of the United States to enact legislation which provides increased service pension benefits for veterans of World War I and for certain survivors of such veterans; and be it further

"*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM–534. A joint resolution adopted by the Legislature of the State of California; to the Committee on Human Resources:

"ASSEMBLY JOINT RESOLUTION No. 55

"Whereas, It has come to the attention of the California Legislature that many residents of United States possessions are unable to participate in educational opportunities available to United States residents; and

"Whereas, United States possessions and trust territories frequently have no accredited institution of higher learning in which students of those areas may pursue professional or career studies; and

"Whereas, In order to pursue their educational goals, those students must attend colleges and universities on the mainland and pay the additional tuition charges which

such institutions generally impose on out-of-state residents; and

"Whereas, It is in the best interests of the United States that residents of United States possessions and trust territories receive educational opportunities equal to those available to students residing on the mainland; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of of California respectfully memorializes Congress to give consideration to the enactment of legislation whereby the United States would alleviate the hardships of residents of United States possessions and trust territories by making available tuition grants for the payment of out-of-state tuition imposed upon such persons when attending an accredited college or university in the United States; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and the Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-535. A resolution adopted by the Minot Chamber of Commerce, Minot, N. Dak., opposing ratification of the Panama Canal Treaty; laid on the table.

POM-536. A resolution adopted by the Legislature of the State of Pennsylvania; to the Committee on Commerce, Science, and Transportation and the Committee on Environment and Public Works, jointly, by unanimous consent:

"HOUSE RESOLUTION No. 118

"Whereas, The Congress of the United States has before it Senate Bill 790 which, if enacted in its present form, would mandate an inland waterways user fee in addition to providing for the replacement of a certain dam and locks; and

"Whereas, Such user fee is in reality a tax upon the use of inland waterways, the imposition of which would raise the cost of water transportation: and

"Whereas, Inland waterways provide the most energy efficient means of transportation: and

"Whereas, The United States Department of Transportation reports that in terms of ton miles carried per gallon of fuel oil or gasoline consumed, a gallon will move 300 ton-miles by water, but only 180 ton-miles by and rail 50 ton-miles by truck; and

"Whereas, Every ton taken off the river will end up in either a train or a truck thus increasing the Nation's energy consumption; and

"Whereas, Inland waterway transportation causes less air and noise pollution as well as having the best safety record; and

"Whereas, The iron, steel and other industries in the Pittsburgh and western Pennsylvania area are dependent to a great extent on efficient water transportation; and

"Whereas, The increased cost of the transportation of fuels. raw materials and finished products resulting from the imposition of this tax would have a deleterious effect upon the industry of western Pennsylvania; and

"Whereas, The joining of legislation dealing with a specific project authorization, with an issue involving a major policy consideration with substantial economic impact is ill advised, the two issues should be separated and each decided strictly on its own merits; therefore be it

"Resolved. (the Senate concurring), That the General Assembly of the Commonwealth of Pennsylvania memorialize the Congress of the United States to divide the specific project authorization from the waterways user fee proposal currently joined in Senate Bill 790, and to let each issue be divided separately as its own merits; and be it further

"Resolved (the Senate concurring). That the General Assembly of the Commonwealth of Pennsylvania memorialize the President and Congress of the United States that the members of this General Assembly oppose the inland waterways user fee as proposed in Senate Bill No. 790; and be it further

"Resolved. That copies of this resolution be transmitted to the President of the United States, to the presiding officers of each house of the Congress of the United States and to each senator and representative from Pennsylvania in the Congress of the United States."

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a resolution transmitted by the House of Representatives of the Commonwealth of Pennsylvania, relative to inland waterways user fees, be referred jointly to the Committee on Commerce, Science, and Transportation and the Committee on Environment and Public Works.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MATHIAS, from the Committee on the Judiciary, with an amendment, an amendment to the preamble, and an amendment to the title:

S.J. Res. 101. A joint resolution to authorize the President to issue a proclamation designating the Sunday following Fire Service Recognition Day as Memorial Sunday for firefighters who have been disabled or killed in the line of duty during the preceding year (Rept. No. 95-700).

By Mr. BAYH from the Select Committee on Intelligence, with amendments:

S. 1566. A bill to amend title 18, United States Code, to authorize applications for a court order approving the use of electronic surveillance to obtain foreign intelligence information (with additional views) (Rept. No. 95-701).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. CULVER, from the Committee on Environment and Public Works:

Stephen John Gage, of Maryland, to be an Assistant Admininstrator of the Environmental Protection Agency.

(The nomination from the Committee on Environment and Public Works was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. PROXMIRE, from the Committee on Banking, Housing, and Urban Affairs:

Evelyn T. Davidson, of Colorado, to be Superintendent of the Mint of the United States at Denver.

Manuel A. Sanchez, Jr., of New York, to be Superintendent of the U.S. Assay Office at New York, New York.

Shallie M. Bey, Jr., of New Jersey, to be Superintendent of the Mint of the United States at Philadelphia.

(The nominations from the Committee on Banking, Housing, and Urban Affairs were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

● Mr. GOLDWATER. Mr. President, from the Committee on Armed Services, I report favorably the nominations of Vice Adm. Howard E. Greer, U.S. Navy, (age 56) for appointment to the grade of vice admiral on the retired list; and Rear Adm. Kinnaird R. McKee, U.S. Navy, to be vice admiral; and there are 8 in the Navy for temporary promotion to the grade of rear admiral (list beginning with Melvin Museles). Also, Gen. Samuel Jaskilka, U.S. Marine Corps (age 58) for appointment to the grade of general on the retired list; and Lt. Gen. Joseph C. Fegan, U.S. Marine Corps (age 57) for appointment to the grade of lieutenant general on the retired list; and Brig. Gen. Jack M. Frisbie, Marine Corps Reserve, for permanent appointment to the grade of major general. Also, Maj. Gen. Thomas P. Stafford, U.S. Air Force, to be lieutenant general; and William C. Groeniger III and Joseph L. Tiago, Jr., U.S. Marine Corps Reserve, for permanent appointment to the grade of brigadier general; and there are 18 in the Air Force Reserve for appointment to the grade of brigadier general and major general (list beginning with Thomas Diab). I ask that these nominations be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOLDWATER. In addition, Mr. President, there are 306 in the Reserve of the Air Force for promotion to the grade of colonel (list beginning with Bryan Alkesich); and there are 557 in the Army for promotion to the grade of colonel (list beginning with Albert A. Ackerman; and there are 57 in the Army for appointment and reappointment to the grade of colonel and below (list beginning with Charles S. Horn). Also, there are 44 in the Navy for temporary and permanent appointment and reappointment to the grade of lieutenant commander and below (list beginning with Mark A. Battle); and there are 158 graduates for permanent appointment to the grade of second lieutenant in the Marine Corps (list beginning with Gregory E. Andrews). Since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's Desk for the information of any Senator.●

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to be placed on the Secretary's desk were printed in the RECORD of February 20 and February 28, 1978, at the end of the Senate proceedings.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. CHAFEE (for himself, Mr. MOYNIHAN, Mr. STAFFORD, Mr. RANDOLPH, Mr. ANDERSON, Mr. BROOKE, Mr. BURDICK, Mr. GRAVEL, Mr. HASKELL, Mr. MCCLURE, Mr. MORGAN, Mr. PELL, and Mr. WALLOP):

S. 2739. A bill to enhance the utility and ambience of Federal buildings by circulating throughout the United States exhibits of art and history among public buildings managed by the General Services Administration, and for other purposes; to the Committee on Environment and Public Works.

By Mr. JAVITS:

S. 2740. A bill to establish an Urban Service Corps; to the Committee on Human Resources.

By Mr. DOMENICI:

S. 2741. A bill to amend the Internal Revenue Code of 1954 to allow a refundable credit against income tax liability for increases in social security taxes resulting from increases in social security tax rates effective after December 31, 1977; to the Committee on Finance.

By Mr. NELSON (for himself, Mr. ANDERSON, Mr. FORD, Mr. HUDDLESTON, Mrs. HUMPHREY, Mr. MCINTYRE, and Mr. SPARKMAN):

S. 2742. A bill to amend the Internal Revenue Code of 1954 to provide simplification, reform, and relief for small business; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CHAFEE (for himself, Mr. MOYNIHAN, Mr. STAFFORD, Mr. RANDOLPH, Mr. ANDERSON, Mr. BROOKE, Mr. BURDICK, Mr. GRAVEL, Mr. HASKELL, Mr. MCCLURE, Mr. MORGAN, Mr. PELL, and Mr. WALLOP):

S. 2739. A bill to enhance the utility and ambience of Federal buildings by circulating throughout the United States exhibits of art and history among public buildings managed by the General Services Administration, and for other purposes; to the Committee on Environment and Public Works.

(The remarks of Mr. CHAFEE when he introduced the bill appear earlier in today's proceedings.)

By Mr. JAVITS:

S. 2740. A bill to establish an Urban Service Corps; to the Committee on Human Resources.

URBAN SERVICE CORPS

● Mr. JAVITS. Mr. President, today I am introducing a bill to establish in the Action Agency an Urban Service Corps. This legislation would establish programs in which residents of urban areas are encouraged to volunteer their services on a full- or part-time basis to help relieve the serious crisis in our central cities and other urban areas which has been caused by chronic financial distress and severe national recession.

This is a particularly propitious time for introduction and consideration of this legislation because a recent Gallup poll shows that 89 percent of city residents would be willing to contribute their time, efforts, or money to help resolve urban problems.

This is the essence of my proposal for an Urban Service Corps, to wit: To tap the potential volunteer spirit that is latent in our cities.

The purpose of the Urban Service Corps is to mobilize the people of such cities and areas by enlisting voluntary associations, business, labor organizations, and trade associations and similar agencies and individuals in volunteer activities designed to halt and reverse the decline of municipal services and the deterioration of neighborhoods.

The Gallup poll confirms my belief that citizens are ready to come forward and help in solving the problems of their cities. They need only the opportunity to become involved in meaningful projects that can make use of their energies and dedication.

In my own city of New York, Mr. President, we have some of the most indefatigable and public-spirited persons in our country. They do not wish to stand by while their city slips so materially, as it has so far. They stand ready, willing and able to enlist in this Urban Service Corps and contribute their time and talent to the amelioration of our economic and social ills.

Another very important function of the Urban Service Corps would be to provide meaningful employment opportunities to unemployed people, particularly youth ages 18 to 24, who are residents of the most deprived sectors of cities and urban areas; and older people. Part-time opportunities for service would also be afforded those who currently hold full-time jobs but wish to volunteer their time and effort for this cause.

Thus, for youth and older people, participation in the Urban Service Corps would have a two-fold benefit: improved services for the recipients and work experience and some income for the volunteers. For other volunteers, there would be the chance to express civic patriotism through community service.

Mr. President, last year I was joined by Senator CRANSTON in introducing an amendment to increase the appropriations for the Action Agency by $4.4 million; $3 million of that was to be earmarked for the development of three model programs in title I, part C of the Domestic Volunteer Service Act of 1973 as amended, to wit: The Urban Service Corps; the fixed income counseling program; and the displaced homemakers program. The remaining $1.4 million was to have been for an increase in the Vista stipend.

The chairman of the Labor-HEW Appropriations Subcommittee (Mr. MAGNUSON) and the ranking minority member (Mr. BROOKE) requested that we withdraw the amendment pending further study of these various programs and possible inclusion in a supplemental budget request. I have concluded that new authority for an Urban Service Corps is necessary if this program is to have an opportunity for the kind of broad scale test I believe it merits.

In my judgment, the Urban Service Corps has great potential to help alleviate the serious distress in our Nation's cities. In cities like New York, where municipal financial problems have resulted in the layoff of thousands of civil servants, some of our necessary public services have been almost eviscerated. And this phenomenon is by no means restricted to New York City. Indeed it has happened and will continue to occur throughout the United States.

To help deal with this problem in New York beginning in 1975, and in cooperation with the mayor and Governor of New York, my then Senate colleague Jim Buckley, and the ranking members of the New York congressional delegation, Representatives DELANEY and WYDLER, I caused to be created the Citizens Committee for New York City which, under the leadership of Oz Elliot and Dennis Allee and now Sandra Silverman as executive director inspired thousands of New Yorkers to volunteer their time and effort to help maintain these desperately needed services.

Mr. President, I believe our experience can be a model of what can be achieved through our country by the establishment, under the ACTION Agency, of an urban service corps.

I was assured by ACTION Director Sam Brown, and Deputy Director, Mary B. King during their confirmation hearings last year, that they were for this idea. Quite recently, ACTION has concluded an agreement with DOL to fund a demonstration project for youth in Syracuse, N.Y. This $8 million effort is financed by a transfer of DOL funds made available under authority of the Youth Employment and Demonstration Projects Act of 1977, a bill with which I have been closely identified. I was delighted that Syracuse was chosen as the testing ground for this pilot program, which will have 1,650 participants, ages 16 to 21, who will be involved in full time community service projects. Participants will serve in both public agencies and private nonprofit organizations, for which they will receive a stipend of $78 a week, full medical coverage, and a $400 entitlement for education and training.

Mr. President, the Urban Service Corps provides an opportunity for our Nation's youth and others to take part in a positive work-service experience. With proper safeguards to protect existing employees, volunteers can work in their own urban neighborhoods, and can be utilized for such services as block security, child care, park beautification, and home improvement projects. Such qualitative and one-on-one services in the cities have been materially diminished and the reason for this is to be found in a lack of adequate funds. Personal and esthetic services are always the first to go. The creation of an Urban Service Corps can greatly help to improve these services and help restore the morale of our urban citizens.

Mr. President, I would like now to explain briefly the major provisions of my bill.

Specifically, full- or part-time volunteer services programs would be established for unemployed youth aged 16 to 19. This would create a two-way benefit, to wit: To the unemployed youths themselves and to the communities which are in desperate need of their services. In addition, full- or part-time volunteer opportunities would be made available for older persons and all other persons who wanted to take part in the program.

These would concentrate on social services, such as emergency shelters, service to the elderly or disabled, and child care; and community services, such as block security, housing, housing renovation, park beautification, and sanitation. Technical assistance will also be provided to individuals and organizations seeking to establish or continue businesss in deteriorating urban neighborhoods.

Cities with populations of 100,000 or more persons, and afflicted by substantial unemployment and financial distress, would be eligible for this program. The Director would establish, by regulation, criteria for determining eligibility for assistance.

Allowances, stipends, and other support would be permitted to the volunteers in amounts not in excess of those authorized under part A of title I.

Urban Service Corps programs are to coordinate with other Federal, State, and local government programs, with private nonprofit organizaticns and with businesses and labor organizations to provide the maximum possible outreach and utilization of volunteers within areas served by the Urban Service Corps.

Mr. President, I hope this bill will be given every possible consideration by our committee and, in particular, by the members of the Subcommittee on Child and Human Development. I know the subcommittee chairman, Senator CRANSTON, has great interest in exploring the potentials of such a program and we hope to have his continued support.

Let us give our citizens the opportunity to volunteer; let us give them a chance to direct their spirit, their talent, and their passion for our cities' survival in constructive ways that can best help resolve these severe problems.

Mr. President, I ask unanimous consent to have the bill printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2740

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Urban Service Corps Act".

SEC. 2. The Domestic Volunteer Service Act of 1973 (hereinafter referred to as the "Act") is amended by adding, at the end of Title I thereof, the following new part:

"PART D—URBAN SERVICE CORPS

"STATEMENT OF PURPOSE

"SEC. 131. This part provides for programs in which residents of urban areas are encouraged to volunteer their services on a full or part-time basis to help relieve the serious crisis in our cities and urban areas caused by financial distress and severe national depression. Its purpose is to mobilize the existing human resources of such cities and areas by involving voluntary associations, business, labor organizations, public agencies, and individuals in volunteer activities designed to halt and reverse the decline of municipal services and the deterioration of neighborhoods. A further purpose of this part is to provide meaningful service opportunities to unemployed young people, aged 18 to 24, who are residents of the most deprived sectors of cities and urban areas.

"AUTHORITY TO ESTABLISH AND OPERATE PROGRAMS

"SEC. 132 (a). The Director is authorized to develop and conduct, and to make grants and contracts to public agencies and private nonprofit organizations for the development and conduct of a broad range of full and part-time volunteer programs in urban areas to assist in the solution of problems afflicting such urban areas, particularly problems related to poverty and unemployment in the most seriously deteriorated parts of our urban areas. Such programs may include, but are not limited to:

(1) Programs of full or part-time volunteer service for unemployed youth, aged 18 to 24 which provide meaningful opportunities for service to their communities, which may include, as part of such service, such training or education components as the Director deems appropriate;

(2) Programs of full or part-time volunteer service which provide, or supplement, needed community services such as block security, housing renovation, park beautification, and sanitation;

(3) Programs of full or part-time volunteer service which provide or augment needed social services such as emergency shelters, service to the elderly or disabled, and child care;

(4) Programs of full- or part-time volunteer service in which persons with business or professional experience provide technical assistance to individuals and organizations seeking to establish or continue businesses in deteriorating urban neighborhoods.

(b) For the purposes of this part, "urban area" means a unit of general local government which has a population of 100,000 or more persons.

(c) Assistance under this part shall be limited to urban areas which are afflicted by substantial unemployment and financial distress. The Director shall establish, by regulation, criteria for determining eligibility for assistance.

"VOLUNTEER SUPPORT

"SEC. 133. (a). Assignment of volunteers under this part shall be on such terms and conditions as the Director shall determine.

"(b) The Director may provide to persons serving as volunteers in programs under this part such allowances, stipends and other support, in amounts not in excess of those authorized to be provided to volunteers under part A of this title, as he determines are necessary to permit them to carry out the purposes of this part.

"TECHNICAL AND FINANCIAL ASSISTANCE TO VOLUNTEER PROGRAMS

"SEC. 134. The Director may provide such technical and financial assistance to public agencies and private nonprofit organizations which utilize or desire to utilize volunteers for purposes designed to carry out the purposes of this part as he deems necessary.

"COORDINATION OF PROGRAMS

"SEC. 135. The Director shall insure that Urban Service Corps programs are coordinated with other Federal, State, and local government programs, with private nonprofit organizations which utilize volunteers for purposes similar to the purposes of this part, and with businesses and labor organizations to provide the maximum possible recruitment and utilization of volunteers within areas served by the Urban Service Corps.

"LIMITATION ON ASSISTANCE

"SEC. 136. Financial assistance extended to an organization or agency pursuant to this part shall not exceed 90 per centum of the approved cost of the assisted project or activity. The Director may, however, approve assistance in excess of 90 per centum if he determines, in accordance with regulations establishing objective crieria, that such action is required in furtherance of the purposes of this part." ●

By Mr. DOMENICI:

S. 2741. A bill to amend the Internal Revenue Code of 1954 to allow a refundable credit against income tax liability for increases in social security taxes resulting from increases in social security tax rates effective after December 31, 1977; to the Committee on Finance.

● Mr. DOMENICI. Mr. President, I am sending to the desk a bill which would establish a refundable income tax credit to compensate taxpayers for increases in the social security tax rates which become effective after December 31, 1977. This bill is designed to provide direct dollar-for-dollar relief to most individual taxpayers, the self-employed and employers from the rising burden of financing our social security program.

The social security system is a vital income maintenance program which provides much-needed support for over 33 million aged and disabled Americans. The total social security program is a vital component in our overall economic health. This year, social security will pay out benefits totaling $103 billion and this will enable millions of Americans to actively participate in our economic system as consumers. The failure to adequately fund the social security system would have a very adverse impact on our Nation's economy.

On the other hand, Mr. President, we must be very careful not to stifle our economy under an increasingly heavy burden of social security taxes. Thus we are caught in a cruel dilemma. Social security benefits help millions of Americans live in dignity and independence, but, at the same time, social security taxes reduce the income and buying power of over 100 million taxpayers each year. The effect of the social security tax increase on employers also has serious negative economic consequences in that it is inflationary, will lead to reductions of the number of jobs available, thus fueling unemployment, and diminishes capital formation which is needed to keep the economic recovery on track.

The President has proposed a $25 billion tax package that is designed to compensate, in part, for the various tax increases he is seeking. But, upon further analysis, we find that his proposals will do little to ease the rapid rise in taxes on individual Americans.

Mr. President, when we study the administration's tax cut package, we find most Americans will still pay higher taxes in 1979 than they did last year—even with the proposed cuts. The National Journal has reported that only single taxpayers with incomes between $3,300 to $4,500 per year, and families of four with incomes ranging from $8,000 to $17,000 will be better off under the President's approach.

Mr. President, I ask unanimous consent that the article entitled "Even Under Carter Tax Plan, Most People Lose," which appeared in the February 4, 1978, edition of the National Journal,

be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. DOMENICI. Mr. President, my approach is simple, direct, and easy to administer. It is not an economic "shell game" which seeks to redistribute income. It does not require a new or enlarged bureaucracy to administer and it will give direct relief to the people who pay the increased tax burden. Individuals who earn less than $17,700 (the wage base for social security in 1977) will receive a dollar-for-dollar credit for all increases in the social security tax rate above 5.85 percent. Thus a credit of 0.20 percent would be allowed in tax year 1978, 0.28 percent in 1980, 1.20 percent in 1985, and 1.80 percent in 1990 for individual employees and employers. Self-employed individuals would receive relief as their tax rises above 7.90 percent. Individuals whose earnings exceed the social security wage base will receive relief from increases in the tax rate but it will fall somewhat short of dollar-for-dollar relief because of the rise in the wage base. Although the relief for individuals in this category will be somewhat less than total—it will still be much more complete than the administration's approach.

My proposal will benefit the economy and individual taxpayers in three important ways. First, it is a refundable credit, thus it will offer relief to persons with little or no tax liability. Second, it provides relief for the hard pressed self-employed. Third, it provides relief for employers who might otherwise reduce the number of their employees in an effort to cut personnel costs. The tax burden on all businesses, and small businesses in particular, have reacted to a point where employment levels and the future health of an important sector of our economy is being threatened.

Mr. President, we all accept the fact that social security taxes will continue to rise over the coming years. We all acknowledge the absolute importance of having a strong and viable social security system. But we must fund social security without further taxing the poor, impoverishing the middle class, destroying private pension plans, and crippling capital formation. The Social Security Financing Amendments of 1977 have been called the largest peacetime tax increase in our history. My approach will help to minimize the adverse impact of that tax package without jeopardizing the funding mechanism for social security.

Mr. President, I believe that we should move promptly to enact legislation that would provide meaningful relief from the increased social security tax burden we have so recently imposed upon our citizens. My approach is direct, fair, and easily administered. According to Dr. Arthur Okum of the Brookings Institute:

> This tax credit will reduce the regressive tax on employees and the inflationary impact on employers due to the recent social security tax increase, thus making a better tax system.

I urge the Senate Finance Committee to give its prompt and favorable attention to S. 2741.

Mr. President, I ask unanimous consent that a table relating to a tax cut associated with social security tax credit be printed in the RECORD, together with the text of the bill.

There being no objection, the table and bill were ordered to be printed in the RECORD, as follows:

Tax cut associated with social security tax credit proposed by Senator Pete V. Domenici

[In billions of dollars]

Fiscal year	(1)	(2)	(3)	(4)
1979	2.4	.1	2.4	4.9

S. 2741

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ALLOWANCE OF CREDIT.

(a) General.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting before section 45 the following new section:

"SEC. 44C. INCREASES IN SOCIAL SECURITY TAX LIABILITY.

"(a) General Rule.—

"(1) Employees and self-employed individuals.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the excess social security tax liability of the individual for the taxable year.

"(2) Employers.—In the case of a taxpayer which is an employer, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the excess social security employer tax liability of the taxpayer for the taxable year.

"(b) Definitions, Special Rules.—

"(1) Excess social security tax liability.—For purposes of this section, the term 'excess social security tax liability' means the amount by which—

"(A) the liability of the individual for taxes imposed under sections 1401 and 3101 for the taxable year, exceeds

"(B) the amount of such liability which would be determined for the taxable year if—

"(i) the rates of tax imposed under section 1401 totaled 7.9 percent, and

"(ii) the rates of tax imposed under section 3101 totaled 5.85 percent.

"(2) Special rule for State and local government employees.—For purposes of this section, any tax imposed on an employee of any State or political subdivision thereof—

"(A) which is paid by the State to the Federal Government under an agreement under section 218 of the Social Security Act, and

"(B) which, under such agreement, is equivalent to the tax imposed by section 3101, shall be treated as a tax imposed by section 3101.

"(3) Excess social security employer tax liability.—The term 'excess social security employer tax liability' means the amount by which—

"(A) the liability of the taxpayer under subchapter B of chapter 21 for the taxable year exceeds

"(B) the amount of such liability which would be determined for the taxable year if the rates of tax imposed under section 3111 totaled 5.85 percent.".

(b) Refund of Excess Credit.—

(1) Subsection (b) of section 6401 of such Code (relating to excessive credits) is amended—

(A) by striking out "and 43 (relating to earned income credit)," and inserting in lieu thereof "43 (relating to earned income credit), and 44C (relating to credit for increases in social security tax liability),", and

(B) by striking out "39 and 43" and inserting in lieu thereof "39, 43, and 44C".

(2) Paragraph (4) of section 6201(a) of such Code (relating to erroneous credit under section 39 or 43) is amended—

(A) by striking out "39 or 43" in the caption and inserting in lieu thereof "39, 43, or 44C", and

(B) by striking out "or section 43 (relating to earned income)," and inserting in lieu thereof "section 43 (relating to earned income), or section 44C (relating to credit for increases in social security tax liability),".

(c) Clerical Amendment.—The table of sections for such subpart A is amended by inserting immediately before the item relating to section 45 the following:

"Sec. 44C. Increase in social security tax liability.".

SEC. 2. EFFECTIVE DATE.

The amendments made by section 1 shall apply with respect to taxable years ending after September 30, 1978.

EXHIBIT 1

EVEN UNDER CARTER TAX PLAN, MOST PEOPLE LOSE

(By Joel Havemann and Robert J. Samuelson)

Even if President Carter's proposed $25 billion tax cut is enacted, most individuals and families of four will pay a greater percentage of their income in federal taxes in 1979 than in 1977—assuming that their salaries rise with the cost of living.

The effect of the new tax system would not be so much progressive as perverse. Taxpayers at both the bottom and the top of the tax scale would pay more; only those in the middle would gain.

A National Journal analysis of the proposed tax changes shows that the only single taxpayers who would benefit are those whose 1977 incomes fell in the narrow range of $3,300 to $4,500. Probably only about 10 per cent of all single taxpayers fall in this range. The very poor, and the many single taxpayers whose incomes exceeded $4,500, would pay more.

The only families of four who would be better off are those with 1977 incomes between about $8,000 and $17,000. Those whose incomes ranged up to $22,000 would come out about the same. But for poor families whose incomes fall below $8,000, as well as families whose incomes exceeded $22,000, the tax bite would be worse in 1979 than 1977. Such families probably represent at least 45 per cent of all families of four.

Of course, most people who pay income taxes would be better off with the Carter tax proposals than without them. The perverse effects of the Carter proposals are the result of two factors that offset the tax cuts: social security tax increases legislated in 1977 and the effect of inflation as it pushes taxpayers into higher income tax brackets.

Taking these factors into account, Na-

tional Journal compared the 1977 and 1979 tax bites of individuals and families of four with incomes up to $30,000 in 1977. The results are shown in the graph above.

Single taxpayers would have to pay as much as an additional 1.7 per cent of their income in federal income and social security taxes. In dollar terms, they would have to pay as much as $1,400 in additional federal taxes.

Families would get hit hard at both the low end and the high end of the income scale. Families with 1977 incomes of $6,000 would see their tax bite increase from 2.5 per cent of their income in 1977 to 4.5 per cent in 1979, while $30,000-a-year families would experience an increase from 18.4 per cent to 20.1 per cent. At the upper end of the income scale, that percentage difference means $1,400.

Because of the earned income credit, very poor families would continue to pay a negative income tax—that is, they would collect more money from the tax system than they would pay. But they would benefit less than before, because of the increase in the social security tax rate.

In its calculations, National Journal assumed that 1977 incomes would be inflated by 14.5 per cent in 1979. This increase, of about 7 per cent a year, is equal to the increase that Congress, anticipating inflation, originally assumed in setting maximum wages subject to the social security tax.

Income taxes were computed according to actual 1977 tax tables and Carter's proposed 1979 tax tables. The standard deduction ($2,200 for individuals, $3,300 for families) was used for taxpayers in the lower brackets, but the average itemized deduction was used in higher brackets.

The social security tax is scheduled to rise from 5.85 per cent in 1977 to 6.13 per cent in 1979, and the maximum wages subject to the tax will rise from $16,500 to $22,900. Families of four were assumed to have two wage earners contributing social security taxes, with the lower-paid worker earning one-third of the social security wage base.●

By Mr. NELSON (for himself, Mr. ANDERSON, Mr. FORD, Mr. HUDDLESTON, Mrs. HUMPHREY, Mr. MCINTYRE, and Mr. SPARKMAN):

S. 2742. A bill to amend the Internal Revenue Code of 1954 to provide simplification, reform, and relief for small business; to the Committee on Finance.

SMALL BUSINESS SIMPLIFICATION REFORM ACT OF 1978

● Mr. NELSON. Mr. President, in behalf of myself, Mr. ANDERSON, Mr. FORD, Mr. HUDDLESTON, Mrs. HUMPHREY, Mr. MCINTYRE, and Mr. SPARKMAN, I am introducing today a bill to reform the depreciation system for small business.

WHAT THIS BILL WOULD DO

This bill would permit any business to recover more rapidly the capital which it has invested in machinery and equipment by allowing depreciation deductions to be taken over a 3-year period for purchases of up to $100,000 of such property each year. This provision would be optional, and those firms which elected it would apply only straight-line depreciation, so that this system would make available a massive simplification of depreciation for the 97 percent of the 14 million U.S. businesses which are defined as small business.

BACKGROUND

Depreciation is one of the most complicated areas of the tax law.

In a memorandum which we presented to the President and Vice President in October 1977, and placed before the Senate earlier this year, we summarized the reasons why small business has problems with the existing 100 pages of rules and regulations, as follows:

Complexity results from the interaction of rules contained in the statute, regulation, and accounting convention, such as bonus depreciation investment credit; rapid depreciation methods including: First, double declining balance (or 150 percent) for machinery; second, 150 percent or 125 percent for real estate; and third, sum of the digits method; and also 5-year amortization in certain special areas; ADR; recapture, salvage value; and half-year and half-month conventions.

Because of these complications, expert and therefore expensive accounting and legal services are required for a small business to understand and comply with the law. Naturally, this puts the greatest strain upon the newest and smallest enterprises.

The Internal Revenue Service's monitoring programs have consistently shown that the two greatest sources of difficulty for small business are depreciation and inventory accounting. Accordingly, we believe that the Service would be favorable to simplification in this area, which would enable and encourage greater numbers of new and smaller firms to meet their obligations.

STUDIES SHOW SMALL BUSINESS NEEDS SIMPLEST FORM OF DEPRECIATION

A series of studies by several institutions in 1954, 1959, 1963, and 1971, as cataloged by the Congressional Research Service, show conclusively that the smaller businesses which possess depreciable assets have always lagged far behind in utilizing any specialized capital recovery provisions in the law. Our own research shows that the asset depreciation range (ADP system of depreciation) is utilizied by less than 1 percent of the 1 million firms with less than $500,000 in assets, 0.9 percent, while 63.1 percent of the firms with $1 billion or more in assets use this provision.

Similarly with the investment tax credit. The Congressional Joint Tax Committee estimates that 76.1 percent of the credit is taken by firms with over $100 million in assets, while those firms with up to $100,000 in assets collectively account for less than 1 percent, 0.8 percent.

These statistics, as well as the nature of smaller business, confirm that these enterprises need the simplest possible tax and accounting systems. At present, the tables setting forth the useful lives of different types of property covers 20 pages in one of the commercial tax services. Our proposal would make all types of machinery and equipment subject to a uniform 3-year life for most smaller businesses up to the $100,000 yearly limit.

IMPACT OF INFLATION

Under present law, the aggregate useful life of business property is about 10½ years. This makes capital recovery highly vulnerable to inflation. It squeezes business two ways: The dollars which they get back are worth less every year; and the new equipment they must buy to modernize, let alone expand, usually costs much more. For the past few years, inflation has been running at the rate of over 5 percent a year. The longer the business must wait to recover its capital, of course, the worse off it is.

The present depreciation system is therefore forcing businesses to use up their capital instead of "recovering," renewing, or expanding it. The adequacy of capital is directly related to the ability to produce needed goods and services, to provide jobs, and to exert downward pressure on prices through competition.

INTERNATIONAL COMPETITION

Because of these inflationary pressures, most of the industrialized countries which compete with the United States have accelerated their depreciation system in one form or another. This proposal would be a start toward keeping pace here. Our proposal does depart from the strict "useful life" theory which has existed in our law for many years. However, it recognizes realistically that the purposes of the depreciation system in the United States cannot be adequately fulfilled for smaller business in the present inflationary environment. It would also appear that if accelerated depreciation is not adopted in our law, it will increase pressures for some other anti-inflation system, such as, indexing historical cost, or replacement cost accounting. The latter is already the subject of experiment by the Securities and Exchange Commission for the largest firms, and is therefore receiving consideration by various professional groups. It is apparent that indexing or replacement cost accounting is many times more technical and complex and thereby even more adverse to new, small, and independent businesses than the present system.

HISTORY OF COMMITTEE CONCERN

Because of these factors, the Senate Small Business Committee began several years ago to call for simplified depreciation. After 6 days of hearings on small business tax reform in that year, my statement of July 30, 1975, urged the Ways and Means Committee to adopt simplified depreciation as a "tax reform" measure in the following terms:

3. Capital recovery

These provisions of the Code should be greatly simplified so they will be more equally accessible to business of smaller size and resources. Complexity is as much a problem as inflation for new and smaller firms seeking to recover their capital for renewal of existing plant and equipment. Our Committee hopes to delve more deeply into comparisons between the Canadian and American capital recovery systems, and the proposals for accelerated capital recovery costs versus inflation-indexed accounting. (Testimony reprinted Congressional Record, August 1, 1975, at page 15057.)

In 1977 the Council on Small and Independent Business Association (COSIBA) developed a proposal for depreciation over a 2- and 3-year period for certain types of equipment and 10 years for real estate. During 1977, the committee consulted with many small business organizations and presented a proposal for 3-year simplified depreciation which evolved into the bill we are introducing today.

In October 1977, we presented our

proposal as part of an extensive memorandum to the White House in behalf of a consensus of 27 small business organizations representing 750,000 members. It advocated a simplified 3-year depreciation for $100,000 or $200,000 worth of annual equipment purchases. The administration produced a proposal of its own for more rapid depreciation for certain limited amounts of assets which is yet to be fully spelled out. These alternatives were evaluated in an extensive committee study which we have just published.

The sponsors of this measure feel that the advantages of the Small Business Committee approach entitle it to serious consideration as part of the 1978 tax package.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2742

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Small Business Simplification Reform Act of 1978".

SEC. 2. DEPRECIATION REFORM.

Section 167 of the Internal Revenue Code of 1954 (relating to depreciation) is amended by adding at the end thereof the following new subsection:

"(q) Three-year Useful Life, Straight-Line Depreciation.—

"(1) General rule.—In the case of a taxpayer who has made an election under this subsection for the taxable year, the term 'reasonable allowance' as used in subsection (a) means (with respect to property which has a useful life of 36 months or more) an allowance based on a useful life of 36 months computed under the straight-line method (within the meaning of subsection (b)(1)).

"(2) $100,000 Basis Limitation.—For purposes of this subsection, the basis (as determined under subsection (g)) of property placed in service during the taxable year shall, to the extent that such basis exceeds $100,000 for the taxable year, not be taken into account.

"(3) Election.—An election under this subsection for any taxable year shall be made at such time, in such manner, and subject to such conditions as may be prescribed by the Secretary by regulations.".

SEC. 3. EFFECTIVE DATE.

The amendment made by section 2 of this Act shall apply in the case of property acquired after the date of enactment of this Act and placed in service in taxable years ending after the date of enactment of this Act.●

ADDITIONAL COSPONSORS

S. 506

At the request of Mrs. HUMPHREY, her name was added as a cosponsor of S. 506, the Wage Supplements for Handicapped Individuals Act.

S. 1964

At the request of Mr. HATHAWAY, the Senator from Connecticut (Mr. RIBICOFF) was added as a cosponsor of S. 1964. a bill to amend the Emergency School Aid Act to extend to Franco-Americans the same benefits afforded other minority groups under the act, and to incorporate cultural heritage preservation activities into the purposes of the act.

S. 2384

At the request of Mr. CRANSTON, the Senator from Alabama (Mr. SPARKMAN) was added as a cosponsor of S. 2384, the Veterans' and Survivors' Income Security Act.

S. 2388

At the request of Mr. JAVITS, the Senator from Michigan (Mr. GRIFFIN), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Hawaii (Mr. INOUYE), the Senator from Rhode Island (Mr. PELL), and the Senator from Texas (Mr. TOWER) were added as cosponsors of S. 2388, the Employee Education Assistance Act.

S. 2398

At the request of Mr. CRANSTON, the Senator from Tennessee (Mr. SASSER) was added as a cosponsor of S. 2398, a bill to extend the period of eligibility for a Vietnam-era veterans' readjustment appointment within the Federal Government.

S. 2481

At the request of Mr. DOLE, the Senator from Colorado (Mr. HART) was added as a cosponsor of S. 2481, a bill to provide wheat, feed grain, and cotton producers the opportunity to receive parity prices for the 1978 crops.

S. 2487

At the request of Mr. CLARK, the Senator from Pennsylvania (Mr. HEINZ) and the Senator from Indiana (Mr. BAYH) were added as cosponsors of S. 2487, a bill to amend the Public Health Service Act to provide for greater emphasis on rural health care needs in health planning.

S. 2501

At the request of Mr. HATHAWAY, the Senator from Colorado (Mr. HASKELL) was removed as a cosponsor of S. 2501, the Social Security Financing Act of 1978.

S. 2550

At the request of Mr. KENNEDY, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 2550, the Women in Science and Technology Equal Opportunity Act.

S. 2626

At the request of Mr. HODGES, the Senator from Indiana (Mr. BAYH) was added as a cosponsor of S. 2626, the Consumer and Agricultural Protection Act of 1978.

S. 2627

At the request of Mr. GRAVEL, the Senator from Wyoming (Mr. HANSEN), the Senator from Florida (Mr. STONE), the Senator from North Dakota (Mr. YOUNG), and the Senator from Maryland (Mr. SARBANES) were added as cosponsors of S. 2627, a bill to amend the Internal Revenue Code of 1954 to defer from income certain amounts deferred pursuant to State or local public employee deferred compensation plans.

S. 2723

At the request of Mr. DOMENICI, the Senator from New Mexico (Mr. SCHMITT) was added as a cosponsor of S. 2723, a bill to amend and clarify the Emergency School Aid Act.

SENATE RESOLUTION 416—SUBMISSION OF A RESOLUTION RELATING TO DISAPPROVAL OF PROPOSED SOCIAL SECURITY STANDARDS

Mr. GRIFFIN submitted the following resolution, which was referred to the Committee on Finance:

S. RES. 416

Resolved, That the Senate does not approve the standards (as authorized under section 402(a)(26)(B) of the Social Security Act) transmitted to the Congress on January 23, 1978.

AMENDMENTS SUBMITTED FOR PRINTING

RECLAMATION LANDS FAMILY FARM ACT—S. 1812

AMENDMENT NO. 1728

(Ordered to be printed and referred to the Committee on Energy and Natural Resources.)

Mr. NELSON submitted an amendment intended to be proposed by him to the bill (S. 1812) to supplement and clarify the Federal reclamation laws, to promote the settlement of family farmers in Federal irrigation projects, to provide for acreage equivalency between class 1 lands and lands of lesser productive capability, and for other purposes.

REVISIONS TO THE RECLAMATION LANDS FAMILY FARM ACT

● Mr. NELSON. Mr. President, last June I introduced S. 1812, the Reclamation Lands Family Farm Act along with Senators HASKELL, ABOUREZK, and the late Senator Metcalf. In the following months, the issue of acreage limitation in reclamation projects has become a very controversial issue. Soon, I will submit a report of the Senate Small Business Committee on the subject. Today, I would like to submit an amendment in the nature of a substitute for S. 1812. The amendment makes a number of changes in the bill, which are as follows:

The proposed changes reflect suggestions that have been made by a number of people on the original version of S. 1812. They do the following:

First, the original version of the bill limited the amount of land that could be owned to 160 acres of class 1 land or its equivalent for any one owner. An owner was entitled to purchase no more than an additional 160 acres for a dependent or dependents. The new version simply places the farm size limitation to 320 acres of class 1 land or its equivalent in lands of lesser productivity. The effect of this change is to allow a single person to farm a larger acreage.

Second, the original version of the bill did not allow lands to be leased. The new version allows an individual to purchase up to 160 acres of class 1 land, or its equivalent, provided that none of his dependents have already purchased land. This land can be leased to a family farmer, but, as indicated above, farm size still cannot exceed 320 acres of class 1 land or its equivalent in lands of lesser productivity. The individual leasing the land to the farmer would have to reside within 25 miles of the land.

Third, the original version was ambiguous on the point of cooperative or joint

farming ventures. The new version clarifies the sponsors' intentions that each farm family is entitled to the full limitation. In other words, two brothers, a father and his grown son, two partners, et cetera, could farm a 640-acre farm, provided that both actually farm the land, and provided that this arrangement does not apply to a husband and wife or to a parent and minor children.

Fourth, the original bill limited the equivalency formula to no more than 480 acres per farm; this version removes the limit and instead directs the Secretary to assure that the formula provides for adequate revenues for farm operation, debt retirement and personal income and also insures the broadest possible distribution of reclamation benefits.

Fifth, the original version only allowed lineal descendants inheriting land 3 years to come into compliance with the act; this version gives them 10 years.

These proposed changes do not reflect a change in the basic philosophy of S. 1812, but rather conform the bill to genuine concerns of family farmers. The availability of land for leasing, for instance, is needed for many farmers to get started. A strict residency requirement will at least assure that those people purchasing land as an investment will be local investors, not distant nonfarmers interested in taking advantage of reclamation law. The provision for joint or cooperative farms larger than the basic limitation was always the intention of the sponsors, but was not clear in the original language. The lifting of a ceiling on the equivalency formula is a response to data recently acquired from the Department of the Interior that provided a clearer picture of the acreage needs of farmers in the high plains States and some other areas with poor land. Allowing lineal descendants more time to come into compliance recognizes the concern of many farmers that land they pass on to their children can be held by those children while they decide whether or not to return to farming.

I think that recent events have given further confirmation to the need for a bill along the lines proposed here. The Department of Agriculture reported that its extensive study for reclamation projects showed that on a 320 acre farm, net income would be $14,000 to $53,000 annually. They also showed that in one California district, the annual subsidy from the reclamation program would be $76,000 for a 640 acre farm. Interior figures show that this would be a typical subsidy level for other projects. USDA census figures show that the vast majority of farms that irrigate land in the West irrigate 200 acres or less; over 90 percent are less than 500 acres. The same figures hold for reclamation projects, according to Bureau of Reclamation sample surveys. Clearly, a limitation of 320 acres of the most productive land or its equivalent in lands of lesser productivity would net a farm family a good living, and given the enormous subsidy of the reclamation program, the limitation should not be any longer than that needed to provide such a living. The benefits of the program, in other words, should be spread as broadly as possible.

There have been other proposals to limit farm size to 1,280 acres, plus equivalency. I know the proponents of these proposals share my concern with promoting the family farm, but I fear that a limitation this size is really no limitation at all. There are very, very few farms this size, and they would be in the top few percent of total farm income. A farm this size would be receiving a present value subsidy, according to the Interior Department, of $1.3 to $2.6 million, or an annual subsidy of $75,000 to $200,000 per year, depending on the project and various assumptions used. The total subsidy for the reclamation program is many times the amount we spend on soil conservation programs, yet we are losing vastly more land to erosion than we are reclaiming through Federal irrigation. The amount is almost equal to the total annual budget for agricultural research and extension. At the very least, the subsidy should be provided only to true family farmers, and it should go to as many of them as possible.

I believe that this bill accomplishes that purpose, while at the same time setting up a fair and modern acreage limitation that takes into account variations and climate and growing seasons. I urge my colleagues to consider it.●

CIVIL SERVICE REFORM ACT OF 1978—S. 2640

AMENDMENT NO. 1729

(Ordered to be printed and referred to the Committee on Governmental Affairs.)

Mr. McINTYRE (for himself and Mr. DURKIN) submitted an amendment intended to be proposed by them, jointly, to the bill (S. 2640) to reform the civil service laws.

Mr. McINTYRE. Mr. President, today I am submitting an amendment to S. 2640, the Civil Service Reform Act of 1978, that would delete all proposed changes in veterans' preference in the Federal civil service.

I believe that the reform of the civil service is long overdue and necessary. The administration has presented to the Congress a good and comprehensive reform measure that, if amended, I will fully support. The bill as it now stands would reduce the preference for disabled veterans and end the preference for nondisabled veterans. My amendment would delete these changes.

The proposed change in the veterans' preference would be a serious blow in our attempts to lower unemployment among Vietnam veterans. Veterans of World War I and II and the Korean conflict have, in most cases, either used their preference or found employment in the private sector. However, Vietnam veterans are still plagued with high unemployment. I ask unanimous consent that a Bureau of Labor Statistics table detailing the employment status of male Vietnam-era veterans and nonveterans 20 to 34 years of age be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 6.—EMPLOYMENT STATUS OF MALE VIETNAM ERA VETERANS AND NONVETERANS 20 TO 34 YR OF AGE QUARTERLY AVERAGES

[Numbers in thousands]

Employment status	Not seasonally adjusted		Seasonally adjusted

Mr. McINTYRE. As one can see, Mr. President, the unemployment rates for young Vietnam-era veterans are higher than the rate for comparable nonveterans.

The cost of this high unemployment in terms of lost productivity is great and the cost of States for unemployment compensation costs is staggering. I ask unanimous consent that a table detailing unemployment insurance costs for the latest year available, 1975, be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

UNEMPLOYMENT INSURANCE

NO. 494. UNEMPLOYMENT INSURANCE—ALL PROGRAMS AND FEDERAL PROGRAMS, SUMMARY, 1955 TO 1975, AND BY STATES AND OTHER AREAS, 1975

Mr. McINTYRE. The Vietnam-era veteran faces special problems in finding employment, Mr. President. I do not think that either the Congress or the administration has done enough to increase employment opportunities for Vietnam veterans. We should intensify our efforts in this area and the last thing we should do is mak it harder for veterans to find employ nent. By curtailing veterans' preference we are doing exactly that.

Veterans have proved to be, in most cases, excellent Government employees. Veterans are experienced in handling responsibility and they are men and women who have shown their dedication to their country by serving America when they were needed.

Mr. President, I sincerely hope that the Senate Governmental Affairs Committee will give this matter careful attention and amend this bill in committee to insure that veterans' preference in the Federal civil service remains intact.

Mr. President, I ask unanimous consent that the following documents be printed in the RECORD:

First. A letter from Mr. William B. Gardiner, national director of legislation for the Disabled American Veterans;

Second. Material from the Veterans of Foreign Wars in support of the retention of veterans' preference;

Third. Letter and enclosures from Mylio S. Kraja, director of the National Legislative Commission of the American Legion;

Fourth. Civil Service Commission statistics for the past 2 fiscal years showing the number of new hires who claimed veterans' preference by governmental agency; and

Fifth. A Congressional Research Service report of December 6, 1974, detailing the history of veterans' preference.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DISABLED AMERICAN VETERANS,
Washington, D.C., March 10, 1978.

Hon. THOMAS J. McINTYRE,
U.S. Senate, Russell Office Building, Washington, D.C.

DEAR SENATOR McINTYRE: On behalf of the 550,000 members of the Disabled American Veterans, I wish to commend you for your efforts to preserve veterans preference in federal employment and to express our strong support for your amendment to eliminate the ill-conceived revisions proposed by S. 2640, the Civil Service Reform Act of 1978.

If approved by the Congress and enacted into law, the impact of the Civil Service Reform Act on the five-point preference currently given to non-disabled veterans seeking federal employment would be drastic. For those not retired from military service, the period during which they could use their preference would be reduced to ten years following discharge. For veterans retiring at ranks below Major, the preference period would be cut to three years, while veterans retiring at the rank of Major and above would lose all preference rights. These veterans would also be stripped of almost all the protection they currently receive during reductions-in-force after three years of civil service employment.

Contrary to the Administration's claims that the reform bill would inflict no harm on the ten-point preference accorded to veterans with service-connected disabilities, our examination of S. 2640 reveals several subtle—but real—erosions of the preference rights of disabled veterans.

For instance, under the current system, personnel managers must choose from the top three candidates for a job in the Federal Government. The civil service reform bill proposes to expand the number of eligible candidates to seven, making it easy to avoid hiring service-connected disabled veterans and choose from whatever group is clamoring the loudest at any given time.

In the name of providing managers with "greater flexibility," the bill also proposes to allow them to pick and choose among a number of other means of selecting new federal employees. When translated into plain English, it is our opinion that the phrase "greater flexibility" means nothing less than additional ways to avoid the application of veterans preference in civil service employment.

The Civil Service Reform Act would also repeal a section of the Veterans Preference Act of 1944 that grants compensably disabled veterans preference for re-employment in federal jobs. Again, this would erode statutory rights now accorded disabled veterans and leave these matters up to the judgment of individual federal managers and the new Office of Personnel Management which would replace the current Civil Service Commission.

Additionally, the long-term intentions of the Administration are revealed in the report of the President's reorganization project which states "further consideration should be given to limiting the time period in which disabled veterans and certain wives and widows retain preference in reductions-in-force," after some experience has been gained in the operation of similar reductions for non-disabled veterans.

The DAV is therefore unilaterally opposed to any weakening or circumvention of the Veterans Preference Act of 1944, and we vigorously support your amendment to strike any revisions in veterans preference from the Civil Service Reform Act of 1978.

Sincerely,

WILLIAM B. GARDINER,
National Director of Legislation.

VETERANS OF FOREIGN WARS,
OF THE UNITED STATES,
Washington, D.C. January 11, 1978.

Letter to all members of both the House and Senate Veterans Affairs Committees, the House Post Office and Civil Service Committee, the Subcommittee on Civil Service and General Services of the Senate Governmental Affairs Committee, and the leadership of the House and the Senate:

Perhaps unbeknownst to you, the Civil Service Commission under date of December 20, 1977 published an unsigned paper entitled the "Minute" which would effec-

tively emasculate veterans preference in federal employment and destroy the merit system, the keystone of Federal Civil Service. You will find enclosed a copy of my letter dated January 10, 1978 to the Chairman of the Civil Service Commission, the Honorable Alan K. Campbell, with respect to his Commission's "Minute".

Veterans preference has been under heavy attack and during the first session of the 95th Congress the Subcommittee on Civil Service of the House Post Office and Civil Service Committee held oversight hearings with respect to veterans preference on October 4 and 5, 1977. The tenor of questioning during these hearings was not sympathetic to retaining the Veterans Preference Act of 1944, as amended, in its present form. Any erosion of veterans preference would most seriously hurt our younger Vietnam veterans and minorities, who already suffer an inordinately high rate of unemployment.

It would now appear that during this election year the administration which is desirous of restricting veterans preference if not eliminating it in its entirety, is receding from a frontal attack thereon. The strategy now appears to be to circumvent the law of land by administrative fiat. That such should originate or be encouraged within the very Commission sworn to uphold current law is unbelievable.

As a Member of Congress, we of the Veterans of Foreign Wars of the United States look to you to resoundingly quash this blatant attempt to usurp your prerogatives and to enjoin the Civil Service Commission to comply with both the letter and spirit of current law.

With best wishes and kind regards, I am

Sincerely,

JOHN WASYLIK,
National Commander-in-Chief.

VETERANS OF FOREIGN WARS
OF THE UNITED STATES,
January 10, 1978.

HON. ALAN K. CAMPBELL,
Chairman, U.S. Civil Service Commission, Washington, D.C.

DEAR MR. CHAIRMAN: This organization has had an opportunity to review the Special Emphasis Employment Program as it is set forth in an unsigned paper entitled the "Minute," and dated December 20, 1977.

At the outset, I must state that it is unbelievable to me that the Civil Service Commission would favorably endorse a hiring program that is in reality a return to the "spoils system" for a substantial portion of federal job openings. It is unbelievable to the extent that a copy of the unsigned paper referred to is enclosed herewith with the request that you first advise me as to whether it is an authentic expression of the position of the Commission in this matter.

I will assume, for the purpose of the remainder of this letter, that the attached "Minute" is authentic.

Volumes have been written about the detestable and heinous spoils system that began with our first President, and continued as a matter of national policy until the Congress passed the Civil Service Act of 1883, sometimes referred to as the "revolution of 1883." Your predecessor, Robert E. Hampton, once wrote:

"As to the critical significance of the 'revolution of 1883,' some scholars have gone so far as to suggest that the Civil Service Act may have saved the Republic. They have said that the Government probably could not have survived the continuing onslaught of hungry officeseekers—one of whom vented his disappointment in the assassination of President Garfield."

One of the better written summaries of the history of federal civil service (1883–1973), and of the ninety-six years of spoils system preceding the year 1883, was originated in the Commission itself, in a publication entitled "Biography of An Ideal"—the ideal of merit principles as the foundation for staffing of the public service. That publication recites the gradual blanketing in of federal jobs to merit system jurisdiction by successive Administrations beginning with President Cleveland in 1884, and also reports concurrent spoils system activity as to those excepted positions.

At page 99 of "Biography of An Ideal," in commentary concerning the Intergovernmental Personnel Act of 1970, it is stated:

"For the first time in law, Congress declared the merit approach the best route to improve the quality of public service at all levels, and expounded a simple but brilliant set of merit principles. This articulation of merit principles came at a time when a focus on public understanding of merit principles was urgent. Growing in number were the spokesmen favoring quotas over qualifications, and asking preferential hiring in the name of recompense for past injustice. Growing, too, was the concern of government of all levels for the quality of public service and for opportunities consonant with fairness to all citizens.

Quality and fairness are inherent in the merit principles set out in the Intergovernmental Personnel Act."

Merit principles, Mr. Chairman, merit principles. They must be retained. They must be made stronger, not weaker.

Where are the merit principles in making federal job appointments by lottery? (par. 6(a) of "Minute")

Where are the merit principles in reopening an examination and limiting application to—"those individuals who have expressed interest in employment by the selecting authority?" (par. 6(d) of "Minute")

Where are the merit principles in constructing a list of "individuals who have expressed interest in employment, but fail to meet a portion of requirements for the position, which requirements might be satisfied by serving a period as trainee?" (par. 6(f) of "Minute")

Where are the merit principles in authorizing the use of the methods outlined in par. 6 of "Minute," to "supplement" internal promotion programs?

I will not attempt to comment on all of the listed methods set forth in par. 6 of "Minute," for it appears that agencies are given unlimited discretion to recommend other methods by par. 6(g).

The Special Emphasis Employment Program is a cavalier attempt to circumvent the Veterans Preference Laws, but it is far more than that. It is an abuse of the authority to make excepted appointments. It is not considered to be lawful. It is an insult to the intelligence of the American people who have a right to expect merit staffing and promotions in federal jobs. It is an affront to today's career civil servants and to the accomplishments and loyalty of the pioneers of the civil service system.

Your comments together with answers to my questions will be appreciated.

Very truly yours,

JOHN WASYLIK,
Commander-in-Chief.

Enclosure.

MINUTE

Whereas Title VII of the Civil Rights Act vests in the Civil Service Commission a duty to carry out affirmative action programs; and

Whereas the President of the United States has directed all Departments and Agencies to pursue affirmative action efforts; and

Whereas the Civil Service Commissioners believe that there is evidence of adverse impact in many Federal occupations; and

Whereas the October 18, 1977 draft of Federal Executive Agency Guidelines approved by the Commissioners suggests the use of alternative selection procedures as a method of overcoming adverse impact; and

Whereas the Commissioners have received legal opinions from a variety of sources including the Deputy Assistant Attorney General, Office of Legal Counsel; Assistant Attorney General, Civil Rights Division; General Counsel H. Patrick Swygert; and, Acting Deputy General Counsel Joyce Evans, all of which conclude that a properly designed and operated special emphasis employment program may be constitutionally valid.

Therefore, the Civil Service Commission does determine as a matter of policy that there shall be a Special Emphasis Employment Program and directs the staff to take actions enumerated below.

A. The staff will prepare a detailed implementation program authorizing excepted appointments and conversion after two years to competitive status. We will use excepted appointments when the Commission desires to experiment with new and unproven selection procedures.

B. The Executive Director is requested to submit to the Commission regulations and policy guidance based on the following principles:

1. The Special Emphasis Program shall be an experimental program for a period of five years.

2. The program shall cover all those classes of employees protected by Title VII of the Civil Rights Act as amended, as well as those protected against discrimination on the basis of handicapping condition. The Commission recognizes that there may be classes of employees other than those usually recognized, and will consider such evidence as may be presented demonstrating that such groups are adversely impacted.

3. The program shall embrace determinations at two levels:

(a) A management determination shall be made at the national level that there is evidence of adverse impact on a national basis and therefore, that the use of excepted hiring authority and special selection procedures is justified for that particular occupation.

(b) A decision on the application of those authorities to a particular selecting officer shall be made by the Regional Directors and the Director of the Washington Area Office.

4. Determinations at the national level shall be made on the best available data. At this time the Commission has determined that participation in the labor force (national data) is the best available data for the clerical, technical, administrative and other categories of occupations. For professional occupations the Commission has determined that data on college enrollees during the periods 1966–1976 is the best available data. The Commission believes that evidence of adverse impact sufficient for a national management decision exists when the employed population in a class (based on latest available data) is less than 80% of what might be expected on the basis of the criteria above. A finding that two or more protected classes are experiencing adverse impact in an occupation shall trigger the determination authorized in Paragraph 3(a).

5. Regional Directors may authorize a selecting authority to make a maximum of 20% of appointments in an occupation on an excepted basis. The determination of the proportion shall take into account the goals and timetables of that agency, the availability of applicants from the protected classes, and the feasibility of additional recruiting from among the protected classes. The Regional Directors shall also determine which special selection procedures a seelcting authority may be authorized to use. CSC staff shall assist the agencies in developing Special selection lists for these occupations and may authorize direct hire authority using such lists.

6. A Special selection list may be developed using a variety of special methods. Each of these methods must provide for competition on the basis of education, experience, performance, and/or record of accomplishment. Each must be open to all applicants without discrimination on the basis of age, sex, race, national origin, or political affiliation. These methods may include, but are not limited to:

(a) Rearranging an existing civil service register on a lottery basis.

(b) Constructing a list of applicants who are superior students and who have indicated their availability for employment by the selecting authority.

(c) Selecting from a register using selective qualification requirements which have a prima facie relationship to the jobs being filled by the selecting authority.

(d) Reopening examinations and limiting application to those individuals who have expressed interest in employment by the selecting authority.

(e) Developing an appropriate selection procedure and limiting applicants to individuals who have demonstrated an ability to overcome economic adversity or handicapping condition through successful participation in a government or privately sponsored program for economically disadvantaged or handicapped people.

(f) Constructing a list of individuals who have expressed interest in employment, but fail to meet a portion of requirements for the position, which requirements might be satisfied by serving a period as a trainee.

(g) Such other methods as agencies may recommend that have a prima facie validity.

7. Agencies should be authorized to use any of the methods outlined in paragraph six (6) to supplement their internal promotion programs.

8. Individuals appointed under this program may be granted competitive status after two years of successful service, provided that their performance has been evaluated as successful in accordance with a plan approved by the Commission.

C. The Executive Director is requested to submit a plan for consolidating the leadership of CSC regional and national affirmative action activities.

D. The Executive Director is requested to submit a proposed regulation requiring agencies to include goals and timetable in their affirmative action plans.

E. The Executive Director is requested to submit a plan for training of CSC and agency personnel in the policies called for by this Minute.

F. The Executive Director is requested to submit a regulation, as well as such proposed legislation as may be necessary to consolidate planning and reporting requirements for affirmative action programs.

G. The Executive Director is requested to submit a plan for evaluating the validity of selection procedures used in this program.

[Veterans of Foreign Wars of the United States, National Legislative Service]

STATEMENT OF DONALD H. SCHWAB, DIRECTOR, NATIONAL LEGISLATIVE SERVICE, VETERANS OF FOREIGN WARS OF THE UNITED STATES

Mr. Chairman and Members of the Subcommittee:

Thank you for the privilege of appearing before this distinguished Subcommittee to present the views of the Veterans of Foreign Wars of the United States with respect to veterans preference in federal employment.

My name is Donald H. Schwab and my title is Director, National Legislative Service, Veterans of Foreign Wars of the United States.

Let me state at the onset, Mr. Chairman, we are appalled that these hearings are even being held; that the Honorable Alan K. Campbell, Chairman of the Civil Service Commission, pledged to uphold the Veterans Preference Act of 1944, as amended, has attacked veterans preference and, further, that the President's Federal Personnel Management Project has circulated a number of options with respect to veterans preference for comment, and yet—not one of these options calls for upholding current law with respect to veterans preference. As a matter of fact, we were unable to find even one favorable comment with respect to veterans organizations had no representation in this project. To cite just one instance of how veterans preference has been blatantly and erroneously depicted, it is only necessary to cite one statement appearing on page 3 of Option Paper No. 3, September 14, 1977, which reads as follows: "Veterans preference is perhaps the most extreme inhibitor of diversity within the federal work force." Mr. Chairman, no statement could be more erroneous or purposely inflammatory. Veterans are male and female. They are white, they are red, they are yellow, they are brown and they are black. They reside in every county and parish in the United States.

It has been stated that veterans preference, as it exists today, has hurt the promotion system and the quality of the Civil Service, and discriminates against women and minorities. This is fallacious reasoning—if not outright deceptive, for the following reasons: (1) Veterans preference has nothing whatsoever to do with promotion under the Federal Civil Service merit system. (2) There are enough women with veterans preference, 881.5 thousand, to fill nearly all of the Federal Civil Service jobs now held by women, 893.5 thousand. Broken down, there are 557,000 women entitled to veterans preference in their own right, based upon service in our Armed Forces; 222.4 thousand widows, whose husbands were killed on active duty or died as a result of disabilities incurred therein; and approximately 82,000 wives of veterans who are 100% permanently and totally disabled. Although only 53,000 such women have chosen to exercise their right under veterans preference, there are more than 25 million male veterans who also have not used their veterans preference in federal employment. (3) It is well documented that minorities carried more than their fair share of the Vietnam Conflict and any dilution of veterans preference will hurt this needy group most.

There are presently 2.7 million federal employees, of whom, 1.2 million are male veterans, slightly over ½ million male nonveterans, and 893.5 thousand women, including the more than 53,000 who, as previously stated, are enjoying veterans preference. Thus, male veterans in federal employment constitute approximately 5 percent of the total veteran working force.

Although male veterans constitute approximately 50 percent of the Federal Civil Service work force, this has been so for nearly a quarter of a century, since that figure was reached in 1953. However, the new hiring of veterans fell to approximately 32 percent in 1976, which is comparable to the 1932–33 hiring percentage of veterans.

Anti-veteran spokesmen argue that veterans preference is inconsistent with a merit system, is therefore undesirable, and should be eliminated. In the next breath, these same spokesmen offer, as a means to achieve equal employment opportunity goals, a plan that would give 5 and 10-point preference to women and minorities. This lesson in logical reasoning is indeed remarkable.

It has also been alleged that the higher paying Civil Service entry level positions go to veterans to the detriment of women. This simply is not the case. Of selectees from the Professional and Administrative Career Examination (PACE) in the last fiscal year, 29 percent were veterans, while slightly over 30 percent were women.

Women's activists groups have stated women were discriminated against during periods of armed conflict and unable to earn an equal share of veterans preference because of quotas imposed on their service. Let us examine the facts. During World War II, the Korean Conflict, and Vietnam, the number of women authorized to serve on active duty was restricted to 2 percent of the authorized strength of our armed forces. During World War II, women who chose to serve totaled 1.5 percent of authorized strength; during Korea, 1.2 percent, and during Vietnam, 1 percent. In other words, during the last three conflicts, women could have constituted 6 percent of the total armed forces, but, in fact, only 3.7 percent chose to serve, thus missing their quota by 2.3 percent.

Granted, the bulk of veterans occupying higher positions within the Civil Service system are presently World War II male veterans. However, had there not been a World War II, it is quite likely these same men would have risen to the positions they now hold as nonveterans, and the composition of the work force which now includes more and more women, in all likelihood, would not have changed so radically. Those old enough to recall know that prior to World War II, women who worked, for the most part, were high-school graduates working only until they married, or widows, who had to work to hold the family together.

According to information furnished by the Civil Service Commission 65 percent of federal positions in grades GS–13 through GS–18 are filled by male veterans. This is not surprising since veterans, as a class, have proved themselves in ability to take orders, exercise leadership, work as a team, and in their loyalty to the United States Government.

The foregoing is borne out in recent testimony of Dr. Campbell before the Subcommittee on Investigations of the House Post Office and Civil Service Committee. Much to Dr. Campbell's credit and for which we commend him, he cited the following advantages of hiring veterans and military retirees:

(1) A prudent employer hires on the basis of skills possessed by the applicant. Many persons leaving the military are highly skilled.

(2) A thoughtful employer seeks trained workers. Military people are often among the best trained.

(3) Supervisors appreciate versatility on the job, and this is a trait often acquired in abundance through military experience.

Additionally, Dr. Campbell stated "Military retirees and veterans often rise to the top in open competition."

It has been stated that veterans preference is discriminatory, and discriminatory it is intended to be, but against neither women nor minorities. Veterans preference does discriminate against the draft dodgers who fled our nation in its time of need to seek a haven in foreign countries. Veterans preference does discriminate against those who, for a variety of other reasons, did not serve their country in uniform. Yes, these people are discriminated against and it is intended they should be. They have already gotten their preference—the draft dodgers by being alive, not maimed, and safe from harm's way. The others who remained civilians have gotten their preference by attaining an early education and establishing themselves in the job market while their contemporaries answered their country's call and shouldered arms.

We all constantly make reference to the Veterans Preference Act of 1944, as amended, since this is the current law reflecting the gratitude of our nation through the wisdom of Congress. However, the first law granting veterans preference was section 1754 of the Revised Statutes, which was passed March 3, 1865 and is identified as 13 Stat. 571. This law provided that "Persons honorably discharged

from the military or naval service by reason of disability resulting from wounds or sickness incurred in the line of duty, shall be preferred for appointment to civil offices, provided they be found to possess the business capacity necessary for the proper discharge of the duties of such offices."

The first law granting preference to veterans in reduction in force in the Federal Civil Service was the Act of August 15, 1876, identified as 19 Stat. 169, provided: "That in making any reduction in force in any of the executive departments the head of such department shall retain those persons who may be equally qualified who have been honorably discharged from the military or naval service of the United States and the widows and orphans of deceased soldiers and sailors."

Even predating the foregoing law, in 1754, during the French and Indian War, Colonel George Washington communicated from the field with the Virginia House of Burgesses, to urge that that body provide simple assurance that the service-connected disabled veterans would not be "discharged and turned upon an uncharitable world to beg, steal or starve." Colonel Washington further stated, "There are few men who would choose to have their lives exposed, without some view or hope of a reward, to the insults of a merciless enemy."

Veterans Preference in federal employment, as we know it today, is provided by the Veterans' Preference Act of 1944. Basically, the law provides:

1. Five point preference—the veteran must attain the minimum passing score (70), and the five points is added to the examination score to determine the position of the veteran on the register.

2. Ten-point preference for disabled veterans. When a 10-point compensatory veteran qualified for a register, the veteran goes to the top of the list, regardless of the raw test score.

3. Preference for job retention over those in same competitive area and competitive level, in the event of a reduction of force.

4. Reemployment rights in the event that job is interrupted for military service.

5. Preference in meeting medical/physical requirements of civil service positions.

6. Preference in filing an application for a job after a competitive examination has been closed, under certain conditions.

7. Certain preferences in appeal rights.

8. Absolute preference for certain jobs (guards, messengers, etc.).

9. Miscellaneous other benefits/preferences.

When a Civil Service vacancy exists, the agency concerned can fill same by (1) promotion, (2) reassignment from another agency, (3) reinstatement of a former employee, or (4) selection from a register. If selection is made from a register, the "rule-of-three" must be followed, that is, one of the top three names must be chosen if the individual is available and qualified. If a veteran or preference eligible is passed over and a non-veteran selected, the reasons therefore must be justified by the agency in writing and approved by the Civil Service Commission. (The term preference eligible is used to distinguish those spouses, widows, etc. who are eligible for veterans' preference benefits.)

Let me point out at this juncture that veterans preference for job retention is not as absolute as opponents thereof would like you to believe. During the fiscal year 1976, some 1800 veterans failed to survive reduction in force (RIF) and were separated, as were approximately 2,000 nonveterans. With respect to reductions in grade during the same period, of some 8,000 so adversely affected, approximately half were veterans.

The Chairman of the Civil Service Commission, the Honorable Alan K. Campbell, has proposed to restrict veterans preference as follows:

(1) Limit 5-point veterans preference or limit length of use or change the "rule-of-three."

(2) Limit 10-point preference to one-time use and eliminate top-of-the-list of advantage.

(3) Eliminate retention advantage in reduction in force.

(4) Eliminate preference for veterans who are in retired military status.

Apparently, Dr. Campbell does not agree with the statement of one of his Career Executives, who, before this very Subcommittee, this past March, stated, in part, "First, veterans preference is a longstanding legitimate expression of public policy that has been folded into the over-all merit system framework. We feel the present laws are achieving their intended effect of giving an advantage to veterans while preserving the essential elements of competition on which our system is founded."

Dr. Campbell would eliminate veterans preference for Armed Forces retirees, both male and female. It is inconceivable to me that we should grant veterans preference to those who served in one war and deny like consideration to those who fought in as many as three conflicts. Military retirees constitute a mere five percent of the Federal Civil Service and 80 percent of those are retired enlisted personnel, whose average retired pay is a little over $4,000 per annum. To deny veterans preference to this group would establish a very dangerous precedent for all retirees, even Civil Service retirees, and have a most deleterious effect upon those war veterans still in service because of the further erosion of the benefits which attracted them to serve in our Armed Forces, in the first place.

Dr. Campbell further stated ". . . What is not permissible from the standpoint of merit and affirmative actions is a dilution of the competency of the work force through preferential treatment of less qualified workers." The Honorable Ray Roberts, Chairman of the Committee on Veterans' Affairs, United States House of Representatives, responded most succinctly in a news release September 16, 1977, wherein he stated, in part, "In reference to Mr. Campbell's statement on not diluting the competency of the work force through preferential treatment of less qualified workers, Mr. Roberts pointed out the inconsistency in this philosophy with the basic philosophy behind a Civil Service Commission Program—the Worker-Trainee Program. Roberts stated that, according to the Civil Service Commission, the purpose of the Worker-Trainee Program is to emphasize motivation and interest in doing low-level work where previously employees who had been chosen for these positions on the basis of the merit system showed undesirable turnover rates. Therefore, he said, a "reverse register" is created by the Worker-Trainee Program whereby the least educated, experienced, and qualified workers are moved up on the register and hired for Worker-Trainee Programs over applicants with higher educations and proven ability and desire to work. On this issue, Roberts stated: "I fail to see how you can discriminate against veterans and other more highly qualified applicants by use of the Worker-Trainee register on the one hand and then say that veterans' preference is discriminatory and is a 'dilution of the competency of the work force' on the other hand."

The deep concern of the membership of the Veterans of Foreign Wars of the United States with respect to veterans preference is reflected in the following resolutions passed by the voting delegates to our 78th National Convention, held in Minneapolis, Minnesota last August, representing our more than 1.8 million members, which are here listed and copies thereof appended to my testimony.

Resolution No. 601 entitled, "Perserve and Extend Veterans Preference."

Resolution No. 611 entitled, "Veterans Employment—CETA"

Resoltuion No. 612 entitled, "Federal Personal Service Contract"

Resolution No. 627 entitled, "Employment of Veterans"

Resolution No. 629 entitled, "Defense of Veterans Earned Rights and Benefits"

Resolution No. 643 entitled, "Insure Veterans Preference—Federal Funding State and Local Government Contracts"

Resolution No. 672 entitled, "Restore Confidence in the United States Civil Service System.

In addition to the foregoing, seven of the priority legislative goals of our Commander-in-Chief, Dr. John Wasylik, address veterans preference in federal employment.

It is inconceivable that when two of the three branches of our Government, the Legislative and Judicial, believe that veterans are entitled to preference in federal employment, the third branch of government should constantly attempt to dilute the provisions thereof.

This year, veterans' benefits have come under heavy attack nearly across the board by anti-veteran forces and social welfare planners, both within and without the government. The one redeeming factor is that any change in veterans' rights and benefits must be made by changes in the law of the land and, as usual, we must look to the Congress of the United States for the protection of these benefits. Not only our membership, but all veterans and their families, who constitute nearly half the population of this great nation, will be following Congress' response to these attacks very closely.

The Veterans of Foreign Wars of the United States is unalterably opposed to any dilution of the Veterans Preference Act of 1944, as amended, and our Commander-in-Chief so advised Mr. Dwight Ink, the Executive Director of the President's Reorganization Project in a letter dated September 22, 1977, which is appended to my testimony, just as we are making our position a matter of record in this hearing.

Thank you.

VETERANS OF FOREIGN WARS
OF THE UNITED STATES,
Washington, D.C., September 22, 1977.

Mr. DWIGHT INK,
Executive Director, President's Reorganization Project, Federal Personnel Management Project, c/o U.S. Civil Service Commission, Washington, D.C.

DEAR MR. INK: This will transmit the thoughts of the 1.8 million members of the Veterans of Foreign Wars of the U.S. and the 565,000 members of the Ladies Auxiliary to the V.F.W. concerning proposed changes to the laws granting veterans preference in the Federal government.

We are unalterably opposed to and will fight with determination any and all changes which would weaken present laws. We find that the Civil Service Commission now circumvents current laws through administrative procedures and recommend that your discussions with the President center around the enforcement of present laws.

The concept of veterans preference began with the founding of our great nation and has been public policy for over one hundred years. The philosophy behind this entitlement for those who specially served their nation while others established themselves through educational and business pursuits recognized that there should be discrimination when the veteran returned and desired federal employment. No apology need be made for this.

Our first President while commanding the armies, urged by letter that discrimination

be made in favor of those who suffered in the service of their soon-to-be country.

Preference in government employment was enacted by the legislative branch of government. It has been upheld as constitutional by the Supreme Court of the United States, the judicial branch.

When two out of three branches of government feel that veterans are entitled to preference in federal employment, the third branch of the government should not attempt constantly to dilute its provisions.

We firmly believe that there are no options open to the President to weaken veterans preference. Should he attempt such through legislation, we will point out to the American people that his actions continue to indicate an anti-veteran posture and let the voters of this land determine if veterans' service is honorable or something of which to be ashamed. We would hope that never again would a President have to ask our youth to bear arms in the defense of the things we hold so dear. But, should that occasion arise, the veteran must be assured that his country will be grateful for that service.

Sincerely,

JOHN WASYLIK.
Commander-in-Chief.

STATEMENT OF JOHN WASYLIK, NATIONAL COMMANDER IN CHIEF, VETERANS OF FOREIGN WARS OF THE UNITED STATES

Mr. Chairman and Members of the Committee:

It is indeed, both an honor and a privilege for me to appear before this most distinguished Committee representing the more than 2.4 million members of the Veterans of Foreign Wars of the United States and its Ladies Auxiliary, to present our Priority Legislative Program for this Second Session of the 95th Congress. Appended to my testimony is a copy of our pamphlet entitled, V.F.W. Priority Goals—Legislative and Security—For 1978. Without objection, it is requested this pamphlet be made a part of the transcript of this hearing.

On behalf of our entire membership and all veterans, I wish to thank you, Mr. Chairman, and your colleagues on this Committee for having introduced and shepherded through Congress the First Session the many bills which became Public Laws improving veterans benefits. I would be remiss, also, in not commending members of your entire staff for working in such close harmony with the Executive Director of our Washington Office, Cooper T. Holt, our National Legislative Director, Donald H. Schwab, and their staffs, and in particular, Jonathan Steinberg, Chief General Counsel, Edward Scott, General Counsel, former Congressman Garner Shriver, Minority Counsel, and Gary Crawford, Associate Minority Counsel.

Accompanying me today are those who comprise the leadership of our great organization, our Past Commanders-in-Chief, national and state officers, and national committee members. Through their dedication and hard work the V.F.W. is enjoying its 26th consecutive year of increased membership, including more than 500,000 Vietnam veterans, all of whom served overseas in combat areas.

Mr. Chairman, as we are all well aware, veterans benefits have come under the heaviest attack ever by anti-veteran forces and social welfare planners this past year. You will recall following appointment, the Secretary of Health, Education and Welfare, the Honorable Joseph A. Califano, Jr., included the Veterans Administration's compensation and pension programs in his nationwide welfare reform study. The Chairman of the Civil Service Commission, the Honorable Alan K. Campbell, attacked the Veterans Preference Act of 1944, as amended, the very day he was sworn into office. The National Academy of Sciences submitted a report to Congress which cost the American taxpayer some $7.2 million, including support furnished by the Veterans Administration, which recommended in essence that the Veterans Administration's hospital and medical care system be integrated into some future national health insurance program, and that the seven replacement and one new VA hospitals approved by two Presidents not be built. Finally, there are those who would turn the VA Home Loan Program over to the Department of Housing and Urban Development, and the VA Educational Programs over to the Department of Health, Education and Welfare or to a new Department of Education. The foregoing are all undeniable signs of the heavy hand of anti-veteran forces and social welfare planners, the great levelers, within our government. To such people no one is special and everyone equal, regardless of contributions to our nation or the total absence thereof. Our veterans and their survivors are very special, for because of them, and only because of them, we have a free nation where we, you and I may live with dignity and honor in freedom and progress in accordance with our individual abilities and motivation. Today, as in the past, we look to this Committee and its counterpart in the United States House of Representatives to uphold the speciality, dignity and honor of our veterans.

Mr. Chairman, the starting point each year in providing the benefits and services to which our veterans, their dependents and survivors are entitled by law, by virtue of honorable service in the armed forces of the United States during periods of war and hostility, is the Veterans Administration budget contained within the HUD-Independent Agencies Appropriation.

The Administration's proposed Fiscal Year 1979 budget of $500.2 billion in outlays, over half a trillion dollars for the first time in the history of our great nation, has been variously described in editorials and news items as "lean and tight", "cautious", "restrained" and "bare-bones". Mr. Chairman, I am unaware of any appropriation or budget to which "bare-bones" more aptly applies than that of the Veterans Administration at $19.2 billion in outlays. For the first time in a decade the VA budget has fallen to 3.8 percent of the National Budget. In 1955, the VA budget was 6.9 percent of the National Budget and in the intervening twenty-three years, the veteran population has increased nearly 40 percent.

Mr. Chairman, according to economists, including the Director of the Government's Council on Wage and Price Stability, Mr. Barry Bosworth, inflation will increase at a rate between six and seven percent the next fiscal year. At least one economist, Mr. Lacy H. Hunt, Vice President and Economist of the Fidelity Bank in Philadelphia, Pennsylvania, estimates 7.2 percent. Predicated thereon, and at the close of the first Session of the 95th Congress, I recommended to you, Mr. Chairman, an increase in the VA budget of $2.3 billion in outlays or, based upon current estimates, $21.5 billion in outlays for the next fiscal year. This amount would permit at least a 6.5 percent increase in all the benefits programs amounting to $600 million, new legislative initiatives, to include restructuring of the pension program at a cost of $1 billion, staffing increases within the Veterans Administration and a needed increase in research funding totaling $400 million and money for major and minor construction in the amount of $300 million.

Mr. Chairman, the very heart and keystone of veterans benefits is the Compensation and Dependency and Indemnity Compensation Program, which in part, and only in part, remunerates our veterans for disabling injuries or diseases contracted in or aggravated by active duty in our armed forces, and the survivors of those veterans who expired due to service connected disabilities. As previously stated, my recommendation at this time is for at least a 6.5 percent cost-of-living increase in these programs, as opposed to the Administration's inadequate 5.8 percent. In addition, and as a new legislative initiative, the passage of legislation to authorize Dependency and Indemnity Compensation to the widows and orphans of 100 percent service connected disabled veterans regardless of the cause of death, and to insure that such DIC is not subjected to a needs test.

Mr. Chairman, the non-service connected and death pension programs have been a constant source of consternation to all concerned over the years due to inequities and the reduction or termination of pension six months following increases in Social Security benefits. In addition, one of the prime objectives of the President's Office of Management and Budget has been to greatly restrict the pension program long before whatever portion of the now living 13 million World War II veterans reach age 65. In our opinion, the vast majority of World War II veterans will never be able to qualify for such pension even under current law due to increases in Social Security benefits and both private and federal retirement programs. However, pension reform legislation presently under consideration by both this Committee and its counterpart in the House, will greatly curtail the pension program for future applicants and their dependents. Granted, in the overall scheme of things, this may be necessary, but, believe me, we of the V.F.W. will never stand idly by and see any veteran or his survivors receive less benefits than those granted to aliens or welfare recipients. We have no doubt, you, as the veteran's champion in Congress, are with us one hundred percent in this respect. In addition, another of our priority goals is to support a separate pension for our World War I comrades and their widows. Some have claimed such would remove the pension program from one based up need to an outright bonus. Perhaps. Perhaps these people are right. Let us just say such would be recompense for that which our government never did for these veterans.

Much to the credit of this Committee and the Congress of the United States, the current GI Bill has certainly proven its worth and success in that to date 64.3 percent of Vietnam era veterans have received education or training thereunder, compared to 43.4 percent participation under the Korean GI Bill, and 50.5 percent under the World War II GI Bill. The Congress in its wisdom last session passed legislation which became Public Law 95-202, the "GI Bill Improvement Act of 1977," which not only granted a 6.6 percent cost-of-living increase to those undergoing education and training but further expanded benefits by increasing the maximum loan from $1,500 to $2,500 per school year, and included a "forgiveness of loan provision." The GI Bill, in its present form, is by far the most liberal of all GI Bills. Notwithstanding the foregoing, I was shocked that the Administration's budget, for the second consecutive year, contains not one cent for a cost-of-living increase for those taking advantage of education and training benefits under the GI Bill. Therefore, and in accordance with another of our priority goals, I am recommending at this time at least a 6.5 percent cost-of-living increase for those Vietnam veterans and dependents availing themselves of benefits under Chapters 31, 34 and 35, Title 38 of the United States Code.

While speaking of the Veterans Administration's education programs, it has come to my attention a number of bills have been introduced in both houses of Congress to establish a Department of Education, with considerable backing by the Administration.

Although these bills do not specifically state the VA educational programs would be absorbed therein, should some of these bills become law, they contain authority for the President merely by Executive Order to include any federally funded educational program in a new Department of Education. We have, in writing, asked to testify when the Governmental Affairs Committee holds hearings thereon, at which time we will request a specific exclusion of the Veterans Administration's educational programs and I would urge you, Mr. Chairman, and all the Members of this Committee to do likewise.

The VA Loan Guaranty Program is, without question, the most used benefit by veterans. To date more than ten million loans have been approved under this program and nearly six million such loans have been paid in full, with only some 423,000 defaults since inception of the program. An enviable record, indeed. However, our younger Vietnam veterans, because of the high cost of real estate, which has outstripped every other form in inflation, find exceedingly great difficulty in securing loans for permanent housing. To alleviate this situation we now, as in the past, recommend that legislation be introduced and passed authorizing the Veterans Administration to subsidize interest rates in excess of six percent under the loan guaranty programs. In addition, and in view of the foregoing, it would appear the time is at hand to increase the amount of guaranty entitlement available to veterans from $17,500 to $25,000, which has already been accomplished by law for those in need of specially adapted housing.

Veterans preference in federal employment in one form or another has been the law of the land for more than 113 years, when Congress passed the first law granting such in appointment to civil offices. The current Administration, through the Chairman of the Civil Service Commission, is bringing all possible pressure to bear to drastically curtail this benefit, if not entirely eliminate veterans preference using the wholly fallacious reasoning that such has discriminated against women and minorities. Last October the Subcommittee on Civil Service of the House Post Office and Civil Service Committee held oversight hearings with respect to veterans preference. It is my understanding that the tenor of questioning during these hearings was not at all sympathetic, if not hostile, to retaining veterans preference in its present form. Subsequently, on December 20, 1977, a document announced in a title alien to American usage, known as the "Minute" was published by the Civil Service Commission which laid out a plan to effectively emasculate veterans preference and destroy the merit system, the very keystone of federal civil service.

In January, I brought this paper to the attention not only of every member of this Committee, but the House Veterans Affairs Committee, the House Post Office and Civil Service Committee, the appropriate Subcommittee of the Senate Governmental Affairs Committee, and the leadership of both the Senate and the House of Representatives. This plan would circumvent Public Law passed by the Congress of the United States by administrative fiat and not only make a shambles of federal employment but be completely demoralizing to all career employees, veterans or not. If there is to be any modification in the Veterans Preference Act of 1944, as amended, we look to you and all members of Congress, our elected representatives, to stand up and be counted this election year with respect to your position thereon. We do not, and I am sure you do not, intend to sit idly by and acquiesce to the Executive Branch of our government usurping your prerogatives in carrying out the law of the land.

Another action by the Civil Service Commission is working an extreme hardship on those Civil Service employees who are also military retirees and the dependents of active duty armed forces personnel in Alaska, Hawaii, Puerto Rico, the Virgin Islands and Guam. By that which we believe to be a misinterpretation of Executive Order 10000, dated September 16, 1948, as amplified by Executive Order 11938, dated September 29, 1976, the Commission has directed a lesser cost-of-living allowance or eventual abolishment thereof in non-foreign areas for military retirees, their spouses and the spouses of active duty armed forces personnel. These people have earned their right to military or federal housing, commissary and post exchange facilities. We believe the restrictive language in the Executive Orders was intended to reduce the cost-of-living allowances for those Civil Service employees who, as part of their hire, were granted housing, commissary and post exchange privileges to which they had no inherent entitlement. Since both the Civil Service Commission and the Office of Management and Budget have remained adamant in their anti-veteran position, class action suits have been initiated in the federal courts in both Alaska and Hawaii by those adversely affected. Last October the Subcommittee on Compensation and Employee Benefits of the House Post Office and Civil Service Committee, chaired by the Honorable Gladys Noon Spellman, held oversight hearings with respect to payment of cost-of-living allowances to federal employees. S. 716 cosponsored by the Vice Chairman of your Subcommittee on Compensation and Pension, the Honorable Spark M. Matsunaga, is pending before the Governmental Affairs Committee and would resolve the cited injustice. I urge this Committee, in its oversight function, to encourage timely consideration and passage of this remedial legislation.

At this juncture, Mr. Chairman, I would like to register the continuing and deepening disenchantment of the Veterans of Foreign Wars with respect to the administration of veterans employment by the Department of Labor. Following the confirmation hearing by this Committee to appoint the Deputy Assistant Secretary for Veterans Employment last year, the present incumbent stated quite emphatically that the position of Director of the Veterans Employment Service would be retained under his stewardship. Such is not the case since this position has been abolished. The track record of the Department of Labor with respect to employment of Vietnam veterans is deplorable, illustrating most graphically what happens to a veterans program when not under the umbrella of the Veterans Administration. We believe the position of Director of Veterans Employment Services is essential if there is to be real, positive and dynamic leadership in this area.

Mr. Chairman, I am quite certain no one would attempt to dispute the fact that our Veterans Administration hospital and medical care system is one of our nation's greatest assets. However, the budget cuts in this area most glaringly reflect the Office of Management and Budget's unbelievable insensitivity to the needs of the veterans of this nation. To say that we were shocked to learn $98 million for the construction of the 480 bed general hospital in Camden, New Jersey was deleted from the budget is an understatement, indeed. President Carter had reaffirmed his previous decision initiated by his predecessor, former President Gerald R. Ford, to build this badly needed hospital and the Veterans Administration fully supported and again justified its need in response to the National Academy of Sciences' study recommending that it not be built.

Substituting an outpatient clinic in Camden, New Jersey and constructing a 120-bed nursing home care facility in Philadelphia, Pennsylvania will certainly not fill the void created by not constructing a 480 bed hospital. A nursing care bed resembles a hospital bed "only as the mist resembles rain." We are also no less concerned with the budget cut of $32 million by eliminating over 3,100 hospital beds for veterans. Average daily census reports furnished by the Veterans Administration indicate a rejection rate throughout the hospital system of 18 percent. However, and this reflects a most disturbing trend, there are twenty hospitals with rejection rates in excess of 31 percent, and five with much higher rates, for example: Buffalo, New York 51.7%; Shreveport, Louisiana 45.7%; Bronx, New York 44.3%; Durham, North Carolina 42.5%; Cleveland, Ohio 45.1%. We have stated for years that many veterans needing and seeking hospitalization are turned away by the Veterans Administration, who are subsequently hospitalized in community hospitals.

Another jolt in the VA budget for 1979 is the reduction of $7.6 million in the domiciliary construction program precluding planned new starts. This, again, in spite of the General Accounting Office's documented need for the expansion and replacement of antiquated facilities.

Although research funding has been increased by $264 thousand, we are advised monies allocated for this purpose are to be siphoned off and diverted to other projects. Research funding, as I am sure you are aware, has been "straight-lined" for years resulting in a progressively regressive budget. Research is to be reduced or terminated in fifty-three hospitals with the concurrent reduction of some thirty-four positions. Under the theory that you always exploit a success, one would think that even the most callous administration would beef up a program in which two of their physicians won Nobel prizes this past year, but such is not the case. Along with other deficiencies, professional shortages continue in the areas of American trained physicians, nurses and paramedical personnel. Still another shortfall in the VA budget is the fact that there is no money whatsoever included for cost-of-living increases for VA employees, which will have to be absorbed in the overall budget. Another subterfuge is the projected savings in the budget predicated on the passage of legislation terminating benefits never seriously considered by Congress. For example: authorization for private insurers and other third parties to reimburse the VA for medical treatment of non-service connected illnesses; elimination of flight and correspondence school training; and elimination of reimbursement for travel expenses required by veterans being treated on an outpatient basis for a non-service connected illness.

Another of our priority goals is that "States without an open national cemetery will be given top priority after the completion of the seven cemeteries already authorized by Congress, until all states have a national cemetery." In view thereof, we are pleased indeed, the budget contains necessary funding for the maintenance and operation of the existing 141 cemeteries, and that the cemetery at Riverside, California will open for interments in November, 1978, and in September of this year, those at Bourne, Massachusetts and Calverton, New York. In addition, development of acreage at Quantico, Virginia and Indiantown Gap, Pennsylvania will continue, as will site selection planning for two new cemeteries in regions IV and V. The V.F.W. has contended for years, Mr. Chairman, that there should be an open national cemetery in every state so that our veterans may be interred in close proximity to their survivors. While speaking of cemeteries, the V.F.W. is deeply concerned about the graves of those American veterans in the Panama Canal Zone, should the treaties be ratified.

As you are aware, there are some 1,332 Americans, of whom 175 are veterans, interred in the Mount Hope Cemetery on the

Atlantic side of the canal, and 741 veterans interred in the Corozal Cemetery on the Pacific side of the canal. Inasmuch as the Mount Hope Cemetery would pass immediately to Panamanian control if the treaties are ratified, and the Corozal Cemetery would remain under U.S. control until the canal is completely turned over to the government of Panama, an early decision with respect to these honored dead should be made. It has been recommended that an agreement be negotiated, wherein the government of Panama would agree to continue to maintain these cemeteries, that the American Battle Monuments Commission assume responsibility of maintaining the graves of Americans interred therein, or that legislation be enacted to provide for the disinterment and reinterment of our veterans in national cemeteries within the United States at government expense.

Last week the Subcommittee on Cemeteries and Burial Benefits of the House Veterans Affairs Committee held hearings with respect to this most pressing problem. Our recommendation to the Subcommittee was that all the Americans, veterans or not, interred in the Mount Hope Cemetery, be disinterred and reinterred in the Corozal Cemetery. In addition, that provision be made in the treaties, or by supplemental amendment after the treaties become effective, for the American Battle Monuments Commission to have jurisdiction over the American Sector of the Corozal Cemetery in perpetuity without payment or taxation and the the right be granted by the Panamanian Government to fly the Flag of the United States over the American Sector of the Corozal Cemetery. Further, that, if so requested by the next of kin, the remains of veterans in either of the cemeteries be disinterred and reinterred in a national cemetery within the United States at government expense. I urge you, Mr. Chairman, to see that this Committee and, you, personally, as the Majority Whip of the Senate, take timely action to assure the continued sanctity of the remains of our veterans and other Americans intered in Panama.

Mr. Chairman, there is another area of growing concern within our organization. That is the continuing failure of government agencies, and in particular, the Veterans Administration, to timely submit reports to Congress mandated by Public Law. The cavalier attitude with which reports are submitted months late, ostensibly due to dilatory tactics by the Office of Management and Budget, works undue hardship on both this Committee and those who must testify with respect to pending legislation. It is hoped, Mr. Chairman, action will be taken to rectify this situation.

Mr. Chairman and Members of the Committee, I trust each of you will be with us tonight on the occasion of our annual Congressional Banquet at the Sheraton-Park Hotel. We will be honoring the Honorable John J. Rhodes of Arizona, the Minority Leader of the House of Representatives, with our 15th Annual V.F.W. Congressional Award. The reception will begin at 6:00 p.m., with dinner promptly at 7:00 p.m. I assure all of you, our program will conclude at approximately 9:15 p.m.

Thank you, Mr. Chairman and Members of the Committee.

THE AMERICAN LEGION,
Washington, D.C., March 13, 1978.

Hon. THOMAS J. MCINTYRE,
U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR SENATOR MCINTYRE: In response to your inquiry of March 10, 1978 we have enclosed:

1. Excerpts from a statement delivered by Mr. Al Keller, Jr., Chairman of the National Economic Commission of The American Legion before the Subcommittee on Civil Service of the House Committee on Post Office and Civil Service on October 5, 1977, which reiterate The American Legion's position on veterans' preference in Federal employment.

2. Copies of Resolution No. 28 (Oppose any Expansion in the Present "Rule of Three") and No. 220 (Oppose any Weakening of the Veterans' Preference Act of 1944, as Amended), adopted at the 59th Annual Convention of The American Legion at Denver, Colorado in August, 1977.

3. A statement by Mr. Samuel Borzilleri, Legal Consultant of The American Legion, on the contractual nature of the 1944 Veterans' Preference Act.

The American Legion is grateful to you for introducing an amendment to S. 2640 which, we understand, would exempt veterans' preference from the proposed civil service reform. We, however, will reserve official endorsement of your amendment until we have had the opportunity to review its text.

Sincerely,

MYLIO S. KRAJA,
Director,
National Legislative Commission.

Enclosures.

EXCERPTS OF MR. AL KELLER'S STATEMENT

The American Legion's position on veterans' preference is that it should be restricted to those who serve in wartime, in peacetime campaigns, or in expeditions for which campaign badges or service badges have been authorized. This mandate justified the Legion's support for the elimination of veterans' preference for those entering the armed forces after 14 October 1976. The American Legion has in an oversight capacity opposed abuse of veterans' preference benefits by veterans themselves. As an example, in 1928 The American Legion was represented on a panel headed by the President of the U.S. Civil Service Commission which recommended that 10-point preference be granted only when officially established by records of the armed services.

The very concept of special preference for veterans has come under attack from certain organizations. The Civil Service Commission's attitude is that ". . . Veterans' preference in the Federal Government unduly restricts management's flexibility to choose from among the best qualified candidates in filling jobs; introduces nonjob-related factors into the employment and retention process; has an adverse impact on certain groups, especially women; and impedes good personnel management practices." It also claims that "veterans preference is perhaps the most extreme inhibitor of diversity within the Federal work force."

The American Legion takes exception to those conclusions.

First of all, we believe that it is necessary to bring certain aspects of the problem into perspective. A statistic often quoted by the Chairman of the Civil Service Commission is that "veterans comprise over 50 percent of the Federal service but only 22 percent of the total work force." That is simply not true. There are nearly 30 million veterans in this country, about 26 million of whom are employed, and at least 24 million of them full-time. The "total work force" includes members of the armed forces, both the employed and the unemployed, and full-time, part-time, and seasonal employees. The employed civilian work force amounts to about 85 million—51 million men and 34 million women. However, only about 70 percent of the men—about 36 million, are employed full-time the year around, and only 42 percent of the women—a little more than 14 million—fall in that category. Thus in terms of fulltime employment, the only meaningful comparison to Federal employment, veterans account for nearly half of the national work force, which is approximately equal to the ratio of veterans in Federal service.

Another matter that should be put into perspective is how veterans are distributed within the Federal Government, for to say that "veterans comprise over 50 percent of the Federal service" may give the impression that that ratio holds true "across the board." In fact, more than 75 percent of the veterans employed in the Government are employed by three agencies: the Department of Defense (DOD), the United States Postal Service, and the Veterans Administration. DOD, which employs 560,000 veterans—40 percent of the total—includes many military-oriented positions for which those with specialized military training and experience have a clear competitive edge over non-veteran job applicants, and employs more than 70 percent of the Government's 500,000 "blue collar" workers, almost all of whom are male and in many instances happen to be veterans. Although the Civil Service Commission claims that "veterans' preference . . . is not a job-related criterion," in the case of the DOD it clearly is.

The Postal Service employs 420,000 veterans, 30 percent of the total. Because of the nature of postal work, the Postal Service has not appealed to women as a career, so it is 85 percent male. Thus it is not surprising that 60 percent of its 680,000 employees are veterans. Finally, the VA employs about 88,000 veterans, about 40 percent of its 220,000 employees and 6 percent of all veterans employed in the Federal Service. Although the VA is hardly looked upon as a private preserve of veterans, as in the case of DOD, prior military service is often a "job related criterion."

Veterans thus account for only 37 percent of the Federal jobs outside those three organizations. That is a significant figure, but it is considerably lower than the ratio of veterans in the full-time national work force.

We should also mention a few salient facts about the employment of women and minorities in the Federal Government. Minorities, who account for about 15 percent of the nation's population, hold about 20 percent of all Federal jobs. Women hold nearly 35 percent of all Government jobs and more than 40 percent of the General Schedule jobs. That is lower than the ratio of women in the total population, but is significantly above the 20 percent of the full-time, year-round jobs they hold in the civilian work force, which includes Federal employment. In 1975, minorities held 28 percent of the Federal jobs at the GS 1–4 level; 22 percent of the jobs at the GS 5–8 level; and nearly 12 percent of the jobs at the GS 9–11 level. Women accounted for more than 65 percent of the GS 1–7 "white collar" jobs and 25.5 percent of GS 7–12 "white collar" jobs.

In terms of total employment and the lower and lower-middle grade levels, minorities and women are reasonably well represented and, as the Civil Service Commission acknowledges, in some respects, overrepresented. It is the upper-middle and upper grade levels, GS–12 and above, that are of most concern to the Civil Service Commission. It points out the fact that "veterans account for over 60 percent of those Federal employees in grades 15 and above" and that "The percentage of 5-point veterans grows rapidly as one goes up the grade and pay scale, reaching almost 65 percent of the GS–18's."

Once again we believe that everything should be put in perspective. First, the great majority of people in the upper grade levels have more than 10 years of seniority on the job. Due to various socio-economic factors, there has traditionally been a higher turnover rate among female Federal employees than among males. Only 21 percent of the Federal employees with 10 years or more than 20 years of service are female.

Most of the veterans in those positions are World War II and Korean War veterans who have many years of continuous service. Second, more than 60 percent of the Federal employees at the GS–15 level and above hold advanced degrees. Despite progress made by women in recent years, there is still a great disparity between males and females with regard to graduate education; the male-female ratio among those with more than four years of college is 2.5 to 1. That ratio is even higher in such Government-related fields as law, physical and life sciences, business administration and management, economics, and engineering. As recently as 1974 women earned only 6 percent of the 34,000 advanced degrees awarded in the business and management fields. In 1955 women earned only 3.5 percent of the law degrees conferred, and that ratio had increased to only 8 percent by 1973. The educational disparity between the majority and the minorities is even greater. Third, it should be pointed out that veterans preference does not apply to promotions.

In fact, the dominance of male and thus veterans at the higher levels of the Government is reflected in our society as a whole. Some 65 percent of our Senators are veterans, as are 80 percent of the members of the House of Representatives. Two-thirds of the members of President Carters' Cabinet are veterans. In all probability, an analysis of the higher levels of most professional groups would show a predonderance of males and veterans. To say this is not to express approval or disapproval of domination by males and veterans in our society and Government, but to point out that it would be inaccurate to blame that situation on veterans' preference.

The General Accounting Office has pointed out that scarcity of women and minorities in some occupations and competition from private industry make it difficult to attract women and minorities.

The General Accounting Office report, of September 29, 1977, on the effect of veterans' preference on the hiring of women, concludes that veterans' preference does diminish the employment of women since they selodm have veterans status. The main difficulty is because veterans are scoring too high on the examinations, and the addition of the five points puts them over other qualified persons. Some agencies reported all-, or nearly all-veteran registers. If the goal is hiring qualified persons, the present method of veterans' preference is successful. It is possible that some agencies are using veterans' preference as a scapegoat for not hiring more women. Cetrainly, the questionable procedures given as a way to bypass veterans on the registers in order to hire women are the same methods agencies have been using for years, although not for the purpose of hiring women. When asked why their hiring of veterans was low, most of the Federal agencies responded that most of their jobs were predominantly female oriented or too technical and professional for veterans.

Veterans are accused of being selected for jobs in the middle-level area out of proportion to qualified women. However, upon analyzing the statistics provided, it is obvious that the real disparity is between nonveterans and veterans; nonveterans, both male and female, received 71 percent of the jobs, leaving 29 percent to the veterans. Some of these veterans' preference eligibles, of course, were women.

The American Legion would not only like to express its opposition to any alteration of veterans' preference benefits, except for limiting them to wartime veterans, but would also like to take advantage of this opportunity to point out the fact that veterans' preference laws already on the books are being increasingly ignored or circumvented. Over the past three years there has been a 4 percent decrease in veteran employment of women. During the last half of 1975, 43 percent of the new hires were women and veterans' preference appointments—including the women who used it—amounted to only 25 percent, with only 21 percent of the appointments going to disabled veterans.

The Veterans Preference Act provides that selection for job vacancies shall be made from the three highest names on a certificate of eligibles. It is being recommended that this requirement be changed to achieve greater "flexibility." Such enlargement of the pool of eligibles would nullify the concept of selection on the basis of job-related qualifications; selections could be made of persons far down on the scale on the basis of whatever preference was currently fashionable. The American Legion has a specific resolution opposing any change in this "rule of three," which I am attaching to this statement.

Another instance of evasion of the Veterans Preference Act is the situation in the United States Postal Service in which the Civil Service Commission has not exercised the enforcement authority of the Act to stop the Postal Service from using a so-called "realignment" procedure which the Civil Service Commission itself had earlier recognized as a reorganization to which reduction-in-force procedures should apply. Another is the widespread use of contracting out of custodial and protective services which by law are to be restricted to veterans' preference eligibles as long as such applicants are available.

Still another is the Civil Service Commission extension—its third—to the Department of Defense of a waiver from veterans' preference in overseas hiring. I believe the Subcommittee is aware, also, of the widespread circumvention of veterans' preference in both hiring and retention rights in various Federal agencies.

It has been traditional philosophy in this country, and in The American Legion, that, "those who were preferred to serve their Nation in the armed forces in time of war should be preferred to serve their Nation in a civilian capacity when qualified." Removal of this preference is a matter that goes beyond any question of "flexibility," greater employment of other groups, or like concerns. It is really a question of whether this is a country that feels free, in time of national emergency, to call upon its very best to serve in its armed forces and face death, injury, disruption of normal life, and all the other conditions of that service, and then for the country to discard them as veterans, to announce they must compete "as equals" against all nonveterans, except for such nonveterans as may be given preference in recruiting, examination and selection. Right now we have no need for an emergency armed service, but if the need arises, the response will be forth coming. However, the law should be there, needing only a slight amendment on qualifying dates of service, to acknowledge that the Nation that calls for sacrifice will also hire its veterans when qualified.

[From the National Executive Committee of the American Legion, Indianapolis, Ind., May 4–5–1977]

RESOLUTION NO. 28—OPPOSE ANY EXPANSION IN THE PRESENT "RULE OF THREE" IN FEDERAL CIVIL SERVICE

Whereas, The Veterans' Preference Act, now codified under Title 5, United States Code, and the Civil Service Rules and regulations relating thereto, provided that when an appointing officer is to fill a vacancy by appointment of persons who have qualified through Civil Service examination, he shall ask for, and the Civil Service Commission shall certify from the top of the appropriate register of eligibles, a number of names sufficient to permit the nominating or appointing officer to consider at least three names in connection with each vacancy; and

Whereas, The nominating or appointing officer shall make selection for each vacancy from not more than the three highest names available for appointment on such certificate of eligibles, a method known as the "rule of three;" and

Whereas, There have been in the past, and continue to be from time to time, efforts to expand this "rule of three" into a system which would require a greater number of names, with suggestions ranging from four to as many as fifteen, to be provided from the appropriate register of eligibles; and

Whereas, The "rule of three" provides a selecting official with a discretionary choice among the top-rated applicants; and

Whereas, Expansion of the number of applicants to be considered would create untenable administrative burdens, such as increasing the number of applicants to be interviewed and evaluated and thereby increasing the length of time necessary to fill vacancies; and

Whereas, An increase in the number of applicants to be submitted to appointing officers would also nullify the concept of selection from those applicants most qualified, and would increase the possibility of selection on the basis of factors irrelevant to merit; and

Whereas, It has been traditional American Legion philosophy that "those who were preferred to serve their Nation in the armed forces in time of war should be preferred to serve their Nation in a civilian capacity when qualified;" and

Whereas, In line with that philosophy, The American Legion supports the system of veterans' preference, as set forth in Title 5, United States Code, as an integral part of the Federal merit system, with the result that an action that damages the merit system also weakens and might destroy the present system of veterans' preference; now therefore be it

Resolved, by the National Executive Committee of The American Legion in regular meeting assembled in Indianapolis, Indiana, on May 4–5, 1977, that The American Legion strenuously oppose any expansion in the present "rule of three" system as stipulated in the Veterans' Preference Act of 1944, as amended and codified under Title 5, United States Code, and rules and regulations of the Civil Service Commission, which require the nominating or appointing officer to make selection for each vacancy from not more than the highest three names available for appointment on a certificate of eligibles.

[From the 59th Annual National Convention of the American Legion, Denver, Colo., August 23–25, 1977]

RESOLUTION NO. 220—OPPOSE ANY WEAKENING OF THE VETERANS PREFERENCE ACT OF 1944, AS AMENDED

Whereas, A grateful nation, through the Congress of the United States, has continued the long history of employing the returning veterans by passing the Veterans Preference Act of 1944, now codified in Title 5, United States Code; and

Whereas, The term "veteran" includes every category of society, sex, region, ethnic groups, colors, races, creeds, and national origin; and

Whereas, The Veterans Preference Act seeks to overcome the burden placed on the war veteran by his absence from the job market and which gives his peers a head start in work, and also provides an opportunity for the veterans to stay on the job when reductions in force are necessary; and

Whereas, There is an extremely high rate of unemployment among veterans, especially for the young minority and the disabled, and the President has urged special efforts to employ these veterans on the part of both the private sector and the Federal government; and

Whereas, Veterans preference has been an integral part of the Federal merit system,

with many of its initial features extended to all other Federal employees, and is not extended to those serving in the present volunteer armed services; and

Whereas, The Chairman of the Civil Service Commission has been quoted as regarding the Veterans Preference Act as a hindrance to efficient personnel practice and a handicap to the promotion of certain non-veterans, and has announced the intention of recommending that Congress amend the Veterans Preference Act of 1944 to eliminate or lessen those remaining aspects of that Act that are helpful to veterans preference eligibles in obtaining and retaining Federal employment; now therefore be it

Resolved, by the American Legion in National Convention assembled in Denver, Colorado, August 23, 24, 25, 1977, that the American Legion reaffirms its traditional support of the preference in Federal employment extended by a grateful Nation, and pledges to strenuously oppose any and all attempts to weaken or reduce veterans rights and benefits in Federal employment as provided and set forth in Title 5, United States Code.

VEV=Vietnam era-Veterans.

VETERANS' PREFERENCE IN THE FEDERAL CIVIL SERVICE

INTRODUCTION

Three times during this century, prior to the Vietnam era, millions of U.S. servicemen came home to begin a transition back to civilian life. Over 7 million veterans have been separated from military service during the Vietnam era, startng on August 4, 1964. These most recent veterans have been subject to the same aspirations, anxieties, and needs as veterans from other periods, though many also have had particular problem resulting from their recent military service and their reentry into civilian life.

One critical problem for many Vietnam era veterans is unemployment. The decline in the Vietnam military force commitment and accompanying reduction in the size of the armed forces coincided with a period of serious economic dislocation. Thus, at a time when the Vietnam era veterans returned to society in greatest numbers, the nation has witnessed its highest unemployment rates in more than a decade.

Because many veterans are new entrants into the labor market, high unemployment rates are not an unexpected problem. However, a great deal of interest has been expressed in providing employment assistance to recently discharged veterans and help is now available from many public and private sources to assist the veteran in obtaining employment.

Within both the public and private sector of the economy, the veteran has certain reemployment rights. Men and women who leave permanent jobs may claim reemployment in their old jobs. Employers are required to retain a veteran for at least one year unless he is discharged or laid off for proper cause. Veterans must generally apply for reemployment within 90 days after their discharge, although special extensions are available for the disabled.

This report discusses the veterans' preference system within the Federal government. The term "veterans' preference" as used here means those benefits to which men and women who served honorably in the armed forces of the United States are entitled in connection with employment in the Federal government, including the government of the District of Columbia. The term is also used to refer to such benefits when they are extended to the widows or widowers, spouses, or mothers of veterans.

I. History of veterans' preference in the United States Government

United States' veterans have been accorded some degree of preference in appointments to government or public positions since early colonial times. However, no statutory provision was made until immediately after the Civil War.

The rapid disbanding of the Union Army threw so many veterans into the labor market that those with disabilities found great difficulty in securing employment. The act of March 3, 1865 (13 Stat. 571) was designed to meet this situation. It provided:

That persons honorably discharged from the military or naval service by reason of disability resulting from wounds or sickness incurred in the line of duty, should be preferred for appointments to civil offices, provided they shall be found to possess the business capacity necessary for the proper discharge of the duties of such offices.

The same law also recommended that businessmen give returning veterans preference for employment. The effect of the law, however, was only such as each appointing officer was willing to give it; there was no enforcement agency.[1]

The first Civil Service Commission, established in 1871, recognized the principle of veterans' preference, although no mention was made of the privilege in the legislation establishing the Commission. In its report to the President in 1874, the Civil Service Commission reported that widows of deceased veterans, or wives of disabled Union soldiers or of other public servants were required to pass an examination in penmanship, copying, grammar, and arithmetic and then might be appointed to Federal positions "irrespective of relative qualifications as tested by competition."[2]

The first mention of veterans' preference in connection with reduction in force (RIF) procedures appeared in an act of August 15, 1876 (19 Stat. 169) which stated:

That in making any reduction in force in any of the Executive departments the head of such department shall retain those persons who may be equally qualified, who have been honorably discharged from the military or naval service of the United States and the widows and orphans of deceased soldiers and sailors.

The Civil Service Act of 1883, (Pendleton Act, Stat. 403) retained the provisions of the 1865 Act:

But nothing herein shall be construed to take from those honorably discharged from the military or naval service any preference conferred by the seventeen hundred and fifty-fourth section of the Revised Statutes.

According to the 1874 Annual Report of the Civil Service Commission, preference was afforded veterans in the form of waiving age limits, physical and State apportionment requirements, giving priority in certification for appointment, allowing disabled veterans to "pass" on a rating of 65 instead of 70, and in making reinstatements.[3]

For many years the situation regarding veterans' preference remained relatively unchanged, that is, granting disabled veterans preference. In 1912 another provision was added to the law relative to preference in connection with reductions in force.

The act of August 23 (37 Stat. 413) provided:

That in the event of reductions being made in the force in any of the executive departments no honorably discharged soldier or sailor whose record in said department is rated good shall be discharged or dropped or reduced in rank or salary.

During this period, the Civil Service rules provided that persons preferred under the 1865 law, (i.e. disabled veterans) who received a rating of 65 or more should be placed above all others on the proper register.[4]

The next major item in the development of veterans' preference came in 1919, after

Footnotes at end of article.

the end of World War I. An act passed on March 3, 1919, (41 Stat. 37) and amended on July 11 of the same year, provided that in making appointments to clerical and other positions in the executive departments and agencies preference should be given to honorably discharged soldiers, sailors, and marines and widows of such "if they are qualified to hold such positions"—thus including *non-disabled* veterans.

In the years that followed, prior to World War II, there was a continuing struggle between purists who believed that nothing, including veterans' preference, should be allowed to interfere with the principle of merit as the basis of appointment to public office and those who considered public employment a proper reward for veterans' service.[5]

President Harding on March 3, 1923 issued Executive Order 3810 which provided:

Waiver of physical standards in favor of disabled veterans;

10 points preference for disabled veterans on examination ratings and 5 points for other veterans;

Entrance on registers according to the augmented rating;

Crediting of military service as experience;

Requirement of giving reasons for passing over a veteran for appointment;

Certification without reference to the apportionment among the States;

Retention of veterans in reductions in force if their record was good.

Five years later, Congress passed a bill giving veterans absolute preference in appointments but President Coolidge vetoed it and created a special committee to ascertain ways to make government positions available for disabled veterans.

One of Coolidge's last acts as President was the issuance of Executive Order 5068 on March 2, 1929 which placed disabled veterans on registers ahead of all others, regardless of ratings, gave 10 point preference to widows of veterans and wives of disabled veterans and certified them ahead of other veterans and nonveterans, and provided more liberal retention privileges for preference eligibles in reduction-in-force actions. Other preferences allowed at this time included release from age, height, and weight limitations except in a few cases, and the opening of closed examinations under certain conditions.[6]

In 1930 Congress passed a law, rescinded in 1933, which gave World War I veterans the ten-point disability preference for veterans with disabilities incurred in non-service status. The National Civil Service Reform League raised vigorous objections and President Hoover appointed a committee to study the problem. Executive Order 5610, issued April 24, 1931 provided:

10 point disability preference for service-connected disabilities which existed at the time of application for the examination;

Reasons for passing over a veteran were to be filed with the Civil Service Commission but need not be furnished to the veteran or anyone else;

Military personnel retired for other than disability were required to establish disability preference claims in the same way as all others;

Civil Service Commission was authorized to hold quarterly examinations open only to 10-point disability eligibles who would then go to the head of existing registers.

The Civil Service rules were amended in 1932 to grant disability preference, not necessarily service-connected, to honorably discharged veterans over 55 years of age who were entitled to disability pension, compensation, or allowance under existing laws. This provision was also applicable to wives work.[7]

In June of 1944, two major pieces of veterans legislation were enacted: the Veterans' Readjustment Act of 1944 (58 Stat. 284–301) and the Veterans' Preference Act of 1944 (58 Stat. 387).

The objective of the Veterans' Readjustment Act, with reference to the employment of veterans, was to safeguard their preference in employment, both private and public. It was the intent and purpose of Congress that an effective job-counseling and employment placement service be established.

The Administrator of Veterans' Affairs was authorized to appoint an honorably discharged veteran in each state whose duty it was to cooperate with existing employment facilities and on their own initiative, with government encouragement, discharge the following responsibilities:

Supervise the registration of veterans for employment;

Maintain current information files listing all available employment possibilities;

Disseminate information which will tend to encourage private employers to employ qualified veterans;

Make contact with employers and veterans' organizations with the objective of increasing veteran employment;

Insure that laws pertaining to veterans' preference are duly observed, and, to the fullest extent practicable, persuade employers to give preference to veterans over nonveterans where the personal qualifications are similar.

All Federal job-placement activities were intended to apply to veterans of all wars.

Although the United States Employment Service was vested with the actual function of providing jobs for veterans and guarding their employment preference, the Administrator of Veterans' Affairs was delegated the responsibility for veterans' employment.

The next and undoubtedly most significant action came when the 78th Congress passed the Veterans' Preference Act of 1944 which, except for relatively minor amendments, is in full force today. This Act incorporated into law many provisions which had previously existed in Executive Orders or in the rules promulgated by the Civil Service Commission by the direction of the President.

An unusual feature of the bill was its provision, the first ever granted by Congress, for women members of the Armed Forces. They were now to be entitled to employment preference, along with the husbands or widowers of the ex-service women.

Section 3 established by law the Civil Service rules which granted an additional 10 points for disabled veterans and 5 points for others. Among exclusive provision was in reference to certain classes of positions, such as guards, elevator operators, messengers, and custodians. So long as qualified veterans were available for these positions, they were to have exclusive rights for appointment. In fact, the act went even further—to authorize the President during World War II, and for 5 years following, to set aside for the exclusive appointment of veterans certain types of classes of government positions.

Section 6 of the bill waived the requirement for apportionment according to State population, as established by the Civil Service Act of 1883, for those positions for which veterans were qualified for appointment. Also set aside was the provision of the Civil Service Act which required that only one member of a family might have such an appointment.

Another strengthening of veterans' preference was the requirement that any appointing agency which happened to decline the appointment of a veteran had to state in writing the specific reasons for having passed over a veteran. The statement had to be made to the Civil Service Commission and the latter had to institute an investigation.

Reductions in force and the transferring or consolidations of functions of any government agencies had to be made with due regard for veterans' preference.

It is interesting to observe that the legislation was adopted with no adverse comment having been offered by any Member of Congress.

The Major subsequent amendments to Public Law 78–359 are summarized as follows:

61 Stat. 723 (1947). Granted preference eligibles the right to make personal appearances in presenting evidence in their behalf.

62 Stat. 3 (1948). Added provisions extending veterans' preference to widowed mothers of ex-service personnel provided that they have not remarried and were widows at the time of the death or disability of said ex-service personnel.

62 Stat. 575 (1948). Added provision compelling compliance by other agencies of finding of Civil Service Commission on appeal.

62 Stat. 1233 (1948). Clarified the fact that to receive a mothers' preference the widowed mother need not be the mother of an only ex-serviceman son or daughter, and that the mother need not be a divorcee or be "legally" separated but that she may be a divorcee or legally separated, but she must not have married.

63 Stat. 666 (1949). Permitted mothers and widows who acquire veterans' preference eligibility, and then lose such preference by reason of remarriage, to regain the preference after divorce or legal separation following such remarriage.

64 Stat. 1117 (1950). Extended veterans' preference for appointment to mothers of deceased or totally disabled veterans when the father is totally and permanently disabled or when the mother is widowed, divorced, or separated and her present husband is totally and permanently disabled.

66 Stat. 626, 627 (1952). Extended veterans' preference benefits to persons serving in the Armed Forces of the United States after April 28, 1952 (the date of the signing of the treaty terminating the state war between the United States and the government of Japan) and prior to July 2, 1955 (the date on which inductions under the Universal Military Training and Service Act were terminated).

67 Stat. 581 (1953). Provided that additional credits for preference can be given only to those obtaining a passing grade in the examination and to limit competition to veterans on certain job fields as determined by the President.

Permitted placing at the top of the register preference eligibles who have compensable service-connected disabilities of 10 percent or more except for professional or scientific positions in grade GS–9 or higher.

Required an appointing officer who passed over an eligible veteran and selects a nonveteran to comply with the Commission's findings as to the sufficiency or insufficiency of the reasons for his action.

II. Application of veterans' preference

This section summarizes the current state of veterans preference laws.

Examinations.—In all examinations to determine qualifications of applicants for Federal positions, 10 points are added to the ratings of those eligible for disability preference and five points to the ratings of other veteran preference eligibles. Thus, to pass an examination: a nonveteran would require a rating of 70; a nondisabled veteran a rating of 65 plus his 5 points perference; and a disabled veteran a rating of 60 plus his 10 points preference. In other words, earned rating plus preference must amount to at least 70. Examinations for positions of guards, elevator operators, messengers, and custodians are restricted to persons entitled to preference under the 1944 act. The President was authorized by that law to restrict other positions to veterans and for a period of five years after the end of the war, the President designated the following positions as restricted: Veterans' Relations Advisor; contact officer, assistant contact officer, senior contact representative, and contact repre-

Footnotes at end of article.

sentative in the Veterans Administration; correctional officer, Bureau of Prisons; and substitute postal transportation clerk, Post Office Department. These positions reverted to open status in 1952. Two other positions have been restricted to veterans by other laws: Superintendents of National Cemeteries and Veterans' Employment Representatives in the United States Employment Service. Civil Service rules require that before a non-veteran can be appointed to a position restricted to veterans, positive efforts must be made to recruit qualified veterans.[8]

Crediting of experience.—Time spent in the military service is credited as experience where actual employment in a similar vocation was interrupted by military service. Time spent in the service is also credited in seniority, leave, retirement, and related accounts.

Waiver of requirements.—Physical requirements for a position must be waived if, after due consideration has been given to the recommendation of an accredited physician, the veteran appears to be physically able to discharge the duties efficiently and without hazard to himself or others. Age, height, and weight requirements are those most frequently found. In certain cases where physical requirements are essential, a specific agreement may be made between the employing agency and Civil Service Commission to maintain those requirements. No minimum educational requirement may be established for any examination except for technical, scientific, or professional positions where such requirement is essential. Reasons for a decision by the Civil Service Commission requiring minimum educational qualifications must be made a part of the public record. The members-of-family requirement, whereby no more than two members of the same family may be employed in the Federal service, is waived for veteran preference eligibles. The apportionment of appointments among the several states is also waived relative to veterans, but residence must be indicated for statistical purposes.[9]

Entry on registers.—The names of applicants who have qualified in examinations for the competitive service are entered on the registers in the following order:

(1) For scientific and professional positions in GS–9 or higher, in the order of their ratings, points added for preference eligibles; and

(2) For all other positions—

(a) Disabled veterans, in order of their ratings, including 10 points added for preference; and

(b) Remaining applicants, in order of their ratings, including 5 points added for preference.

The names of preference eligibles are entered ahead of others having the same rating.[10]

Certification.—An interesting feature of the Veterans Preference Act of 1944 is that it incorporated into law for the first time the so-called "rule of three" for certification of names from Civil Service registers to the appointing officer. From the three names supplied him as available for appointment to a position, the appointing officer must select one, unless objection is made and sustained by the Civil Service Commission. If, in selecting the person to be appointed, the appointing officer passes over a veteran, he must submit his reasons in writing for so doing. These reasons are made available to the veteran or his representative upon request. Objections to a veteran may be based upon the same factors as for other eligibles—age, inability to obtain bond, physical fitness, lack of education, insufficient proof of preference. Showing that a non-veteran is superior or has served in a temporary capacity in the position is not sufficient reason for passing over a qualified veteran. If the Civil Service Commission finds the appointing officer's reasons insufficient, it requires him to submit more detailed information. Findings of the Commission as to sufficiency or insufficiency of reasons are sent to the appointing officer and to the veteran upon request. When a veteran has been passed over three times for reasons found sufficient by the Commission, certification of his name may be dropped, prior notice being sent to the veteran.[11]

Reopening examinations.—Persons entitled to a 10-point preference may submit an application for examination at any time for positions filed within the preceding 3 years. The examination shall be held during the quarter following application.[12]

Reduction in force.—Section 12 of the Veterans' Preference Act of 1944 provides:

In any reduction in personnel in any civilian service of any Federal agency, competing employees shall be released in accordance with Civil Service Commission regulations which shall give due effect to tenure of employment, military preference, length of service, and efficiency ratings: *Provided,* That the length of time spent in active service in the armed forces of the United States of each such employee shall be credited in computing length of total service: *Provided further,* That preference employees whose efficiency ratings are below "good" shall be retained in preference to competing nonpreference employees who have equal or lower efficiency ratings.

In accordance with this provision, the Civil Service Commission has established regulations setting up retention groups of Career, Career Conditional, and Indefinite employees. Within each of these groups, veterans have preference. Thus a veteran serving under a permanent appointment would be in the top part of the top group, his exact ranking there depending upon his length of service and his efficiency rating in competition with other preference eligibles, who would be followed by nonveterans with permanent appointments. Reduction in force procedures may be appealed on the basis of violation of veterans' preference rights. (See the section on appeals below.)

Appeals.—An agency may take adverse action against a preference eligible employee, or bar him from future appointment only for such cause as will promote the efficiency of the service and reasons given in writing at least 30 days in advance. The veteran is entitled to a reasonable time for answering the notice personally and in writing and for furnishing affidavits in support of his answer. The veteran also must be notified of his right to appeal adverse decisions of administrative officers to the appropriate office of the Civil Service Commission. He has a right to a hearing and to appear personally or through or accompanied by a designated representative. He has the right to produce witnesses, cross-examine, and to have a copy of the transcript. The decision on the appeal is made by the Chief Law Officer or by a regional director of the Commission and recommendations are made to the employing agency for corrective action. A copy of the decision is supplied to the appellant with notification of his right of further appeal to the Commissioners of the Civil Service Commission. It is mandatory for the administrative officers of the employing agency to take such corrective action as the Commission finally recommends.[13]

Restoration and re-employment.—Veterans have substantial restoration and reemployment rights which will not be discussed in full here. Restorations may be made on a permanent basis (usually restorations are temporary) in cases resulting from appeal to the Civil Service Commission under Section 14 of the Veterans' Preference Act. Displaced career employees with 10 point preference are certified ahead of all other eligibles on those registers which place 10 point eligibles at the top. Appellants from dismissal or furlough without pay who cannot be reemployed in their own agencies may be entered on current open competitive registers. Veterans who have resigned may be entered on current open competitive registers. Veterans who lost eligibility due to military service may be restored to registers.

Vietnam era veterans.—There are other phases of veterans preference carried out under public laws dealing with readjustment benefits, as in training programs. In addition, Executive Order 11521, March 26, 1970, established noncompetitive appointments of Vietnam veterans to established positions in the competitive service in grades 1 through 5. Veterans must meet minimum qualification requirements for the positions in grades 4 and 5, including passing a written test if that is required, but need not compete with other applicants. Honorable military service after August 5, 1964 meets the full qualification requirement for grades 1 through 3. Employment is contingent on participation in a program of education or training. Veterans with no more than 14 years of education who served in the armed forces on or after the above date are eligible for these noncompetitive appointments for 1 year after separation, or 1 year after release from hospitalization or treatment following honorable discharge.

In fiscal year 1972, 148,970 veterans were appointed by Federal agencies, of whom 74,450 were Vietnam era veterans. Of the Vietnam era veterans, 14,422 received this special noncompetitive appointment leading to career tenure.

III. Eligibility for veterans' preference

The following section of this report explains in greater detail some of the requirements for eligibility for veterans' preference. It is based largely on the Veterans' Preference Act of 1944.

Types of preference.—Five-point preference is allowed to an ex-service-man when he is separated under honorable conditions from active duty that included service:

During a war;

During the period April 28, 1952, through July 1, 1955;

For more than 180 consecutive days other than for training, after January 31, 1955; or

In a campaign or expedition for which a campaign badge is authorized.

Ten-point preference is allowed for disability resulting from active duty in the armed forces at any time, with honorable discharge. Disability may be established by its present existence or by current receipt of compensation, disability retirement benefits, or pension as a result of disability.

Spouse preference of 10 points is granted when the spouse is qualified for appointment and the veteran, who must be honorably separated, has a service-connected disability which prevents him from qualifying for civil service appointment along the general lines of his usual occupation.

Widow or widower preference of 10 points is granted when:

(1) The widowed party was the spouse of the actually, or legally, dead veteran on whose service the claim is based and has not remarried since the death;

(2) The veteran either:

(a) Was separated under honorable conditions from active duty that included service:

During a war;

Footnote at end of article.

During the period April 28, 1952, through July 1, 1955; or

In a campaign or expedition for which a campaign badge is authorized; or

Died while on active duty that included service specified above, provided the conditions surrounding his death would not have been caused for other than honorable separation.

Mother's preference of 10 points is awarded under two conditions: death and disability.

The mother of a deceased veteran is entitled to preference when: She is the natural mother of the veteran who lost his life under honorable conditions when on active duty:

During a war;

During the period April 28, 1952, through July 1, 1955; or

In a campaign or expedition for which a campaign badge is authorized.

The mother of a living disabled veteran is entitled to preference when she is the natural mother of the veteran who was separated under honorable conditions from active duty performed at any time and the veteran has a service-connected disability rated permanent and total that disqualifies him for civil service appointment along the general lines of his usual occupation.

For either category of mother preference, it is further required that:

(1) She is, or was, married to the father of the veteran on whose service she bases her claim; and

(2) She either:

(a) Lives with her totally and permanently disabled husband (either the veteran's father or the husband of her remarriage);

(b) Is widowed, divorced, or separated from the father of the veteran and has not remarried; or

(c) Is remarried and is the widow of, or if divorced or legally separated from the husband of her remarriage.

Two persons may have preference based on one person's service. Both a veteran's mother and spouse (or widow or widower) may have preference on the basis of the veteran's service when both meet the requirements. But both a veteran and spouse may not have preference based on the veteran's service alone, although the spouse may have preference based on her own service. Both a mother and her veteran offspring may not have preference based on the offspring's service.[14]

Factors not affecting preference.—Section 18, of the Veterans' Preference Act of 1944 provides that the Act is not to be construed to take away from any preference eligible any rights previously granted to him under any existing law, Executive Order, Civil Service Commission rule or regulation. Secondly, citizenship does not affect preference but aliens are subject to the citizenship requirements for entry into the Federal civil service. (It might be added that service in the armed forces of an ally of the United States does not carry preference rights.) Thirdly, a subsequent discharge under other than honorable conditions does not affect the preference granted as a result of a previous honorable tour of duty.

Loss of preference.—Preference may be lost in a number of ways, including: recovery from disability; divorce from an ex-serviceman; remarriage of an ex-serviceman's widow; remarriage of a mother receiving preference or by a spouse after death of the disabled veteran.

Exemptions.—Section 20 of the Veterans' Preference Act of 1944 exempts positions in the legislative and judicial branches of the Federal Government, and other positions requiring Senate confirmation of appointees.

IV. Arguments favoring veterans preference

The principle of veterans' preference has become so firmly established that relatively little has been said on the subject of its merits or flaws. There has been, in fact, little question as to the General principle. Most objections which have been made to veterans' preference in the Federal Civil Service have usually been directed at some specific provision which infringed upon the rights or beliefs of some other group.

The 1944 Veterans' Preference Act was based upon recognition of the fact that millions of young men had been called upon to give up their usual occupations, often as a great economic sacrifice, and had been put through vigorous training, with many of them being exposed to personal danger and hardships. It was felt that the readjustment to civilian life would be difficult for many, that those who remained at home had acquired a tremendous head start financially over the serviceman and that, therefore, some assistance should be given to the veterans in readjusting and regaining lost ground. Veterans' preference in the Civil Service is only one phase of the total program. The Federal Government as the largest single employer in the country undertook to provide employment opportunities for as many veterans as possible.

When the Veterans' Preference Act of 1944 was debated, Congressman Starnes of Alabama, in urging adoption of the bill, commented in part as follows:

. . . The biggest problem in the postwar period is providing jobs for able-bodied American citizens who have served in the Armed Forces—jobs by which they can support themselves and their families, jobs which will permit them to retain their self-respect and feel that the country for which they have offered their all has not failed them.

When this war is over and our boys come home, they should not be forced to tramp the streets looking for jobs, nor to live on charity. There should be a job ready and waiting in private enterprise or with the Government, Federal, State, and local, for every American fighting man when he comes home when a victory has been won.[15]

Unemployment, as well as competing for and holding jobs, is still uppermost in the minds of many. According to a recent Harris Survey, unemployment and the lack of jobs is listed as the greatest problem facing returning veterans, by both the general public and the employers polled. It is interesting to note, however, that employers cited the general state of economy to a significantly greater extent than did the public.[16]

There have been few comments as to how the veterans are performing in the Civil Service. The American Legion noted that veterans are superior to most nonveterans in their jobs, pointing out that 95 percent of the men with the highest grades in the various Federal intern programs, designed to develop the best employees for administrative or supervisory positions, were veterans. Before World War II, the President's Committee on Civil Service Improvement found that most veterans secured eligibility in Civil Service examinations without the addition of preference points. The Civil Service Commission in its annual report for 1949 stated:

Experience with young veterans who have already entered the Federal Civil Service shows that they also apply themselves with diligence to their duties. Their work is of high quality, and they are proving to be, in every way, assets to the Civil Service.[17]

V. Arguments opposing veterans' preference

The broadest objection to the principle of veterans' preference, and one which is almost invariably voiced by everyone who opposes any part of the program, is that it interferes with the principle of merit as the basis for selection for public services. One writer evaluated the Veterans' Preference Act of 1944 in the following words:

The effect of the Veterans' Preference Act was, despite the obvious laudable intention behind it, very much like that of a handful of sand in a gear box. It fouled and stalled the whole delicate machinery that had been set up to find, measure, and secure merit—the basic purpose of the Civil Service Act. Essentially, the Veterans' Preference Act meant that patriotic service—but in the armed forces alone—was being rewarded by falsely equating patriotic service with special ability.[18]

This view was somewhat more extreme than that voiced by others, although the National Civil Service League was at one time vigorous and consistent in its opposition, claiming that the merit system was being blamed for the malfunctioning of the veterans' preference program to such an extent that the very survival of the merit system was threatened.[19]

It has also been contended that the veterans' preference system violates the principle of equality of opportunity, and the appointment of unqualified persons to Federal service is unfair both to the Government and to the employees. The question has been raised as to whether Civil Service should be used as a vehicle for rewarding war service, and whether veterans, as such, should be set up as a specially favored class. It has also been pointed out that the number of veterans is now so large that if the granting of preference hurts the Federal service, it also hurts all veterans who are, after all, taxpayers and citizens with an intense interest in good government. Others hold that the "sacrifice" theory relative to veterans is unwarranted, since all citizens are expected to make some sacrifices for their country and since the degree of sacrifice, if any, varies greatly within the armed forces.[20]

The following major criticisms of the present veterans' preference system have been made:

The appointment of unqualified or inferior persons can result with the addition of preference points to earned ratings on Civil Service examinations.

Thus, it has been claimed, the Federal Government is less efficient and therefore more costly. The public interest demands the maintenace of existing minimum standards. As Frances Cahn has remarked:

Since 70 is the passing point for Civil Service examinations, the law assures the inclusions upon the registers of those the Commission has marked down as incompetent.

The preference point system is inequitable among veterans. The argument here is that many veterans who are not disabled have actually performed more significant service and are more entitled to preference than some disabled veterans with relatively minor disabilities. It is also possible for a disabled veteran who receives a score of 60 on an examination to receive appointment over a well-qualified veteran who receives a perfect score on the examination.

The present system can force out well-qualified career employees by veterans with little service.

Appeals procedures make it more difficult to fire veterans.

The restriction of certain positions to veterans is counter to American convictions as to the nature of democracy.

Mr. DURKIN. Mr. President, I am today cosponsoring with my senior colleague, TOM MCINTYRE, an amendment to the administration's civil service reform proposals which is designed to insure that our veterans continue to receive the civil service preferences to which they are entitled because of the sacrifices they made by serving our Nation in uniform.

Our amendment is simple. It would delete those portions of the administration's proposals which change the present veterans' preference structure, such as the 5-point preference for veterans and the 10-point preference for disabled veterans.

At the outset, I want to say that there is perhaps no stronger proponent of reform of the bureaucracy than myself. The present system is a nightmare which all too often stifles initiative, rewards mediocrity, and encourages timidity. The entire system needs to be taken by the lapels and shaken vigorously. Federal bureaucrats in Washington must learn one fundamental lesson which pervades the private sector—there is no right to a lifetime job regardless of your performance. If you fail to perform up to standards, then you should be in another line of work. For these reasons, I applaud the administration's initiatives to overhaul this time-worn system. However, I must oppose proposals in the name of reform which only serve to penalize men and women who have given years of their lives to military service in defense of the greatest country in the world.

Mr. President, I strongly oppose the portion of the administration's civil service reform plan which would eliminate this preference for those men and women who have been separated from the service more than 10 years, because I believe the present system does no more than recognize that our Nation owes a special debt to those who left the comforts of civilian life to serve in the military, many during the times of crisis.

The present system insures that once the candidates have met the basic job qualifications, preference is given to those with military service or with service-connected disabilities. Considering the sacrifices made by our veterans during their service, this special recognition is the least we should do.

Perhaps someone who has not served in uniform cannot appreciate the substantial sacrifices made by those serving in the military, whether it be frigid winter warfare maneuvers or subtropical jungle exercises, or prolonged separations from family. Additionally, thousands of veterans currently qualifying for the civil service preference are men who have served in combat, making the most difficult and painful sacrifices that men can make for their country. I do not think that a recognition of these sacrifices results in unfairness to the civil service system or unfairness to the Nation.

Mr. President, I would also like to make the point that for every veteran making sacrifices in uniform, there are often two or three others sharing in those sacrifices. I am of course referring to the parents, spouses, or children of veterans, who necessarily often feel very deeply and very personally the financial sacrifices, the separations, and the loneliness. They are also the ones who receive some benefit, although indirect, from the current veterans' preferences, and I can no more justify taking this away from them than I can justify taking this away from the veterans themselves.

Mr. President, I believe that the administration's proposals would not only weaken the civil service system the President is trying to improve, but they would also weaken our military structure, which must continue to attract competent and well-qualified men and women to make it the strong and effective fighting force we need in this age of uncertainty.

For these reasons, I am today cosponsoring this amendment, which will leave the present civil service veterans' preference system in place as it exists today Because of its importance, I urge its adoption by my colleagues.

PANAMA CANAL TREATIES—EX. N, 95–1

AMENDMENTS NOS. 84 AND 85

(Ordered to be printed and to lie on the table.)

Mr. GOLDWATER submitted two amendments intended to be proposed by him to the Panama Canal Treaty, Ex. N, 95–1.

(The remarks of Mr. GOLDWATER when he submitted the amendments appear earlier in today's proceedings.)

RESERVATIONS SUBMITTED FOR PRINTING

RESERVATION NO. 8

(Ordered to be printed.)

Mr. NUNN (for himself, Mr. DECONCINI, Mr. BROOKE, Mr. TALMADGE, Mr. HEINZ, Mr. RANDOLPH, Mr. CHILES, Mr. JACKSON, Mr. ZORINSKY, and Mr. BAYH) proposed a reservation to the resolution of ratification of the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal, Ex. N, 95–1.

UNDERSTANDINGS SUBMITTED FOR PRINTING

UNDERSTANDING NO. 13

(Ordered to be printed and to lie on the table.)

Mr. CHAFEE (for himself, Mr. BELLMON, Mr. BROOKE, Mr. DECONCINI, and Mr. HEINZ) submitted an understanding intended to be proposed by them, jointly, to the resolution of ratification of the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal, Ex. N, 95–1.

UNDERSTANDING NO. 14

(Ordered to be printed and to lie on the table.)

Mr. LONG submitted an understanding intended to be proposed by him to the resolution of ratification of the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal, Ex. N, 95–1.

DECLARATION SUBMITTED FOR PRINTING

DECLARATION NO. 1

(Ordered to be printed and to lie on the table.)

Mr. GOLDWATER submitted a declaration intended to be proposed by him to the resolution of ratification of the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal, Ex. N, 95–1.

(The remarks of Mr. GOLDWATER when he submitted the declaration appear earlier in today's proceedings.)

NOTICES OF HEARINGS

SUBCOMMITTEE ON FOREIGN AGRICULTURAL POLICY

● Mr. STONE. Mr. President, I wish to announce that the Agriculture Subcommittee on Foreign Agricultural Policy will

hold a hearing on Wednesday, March 22, 1978, at 9 p.m., in 324 Russell Senate Office Building. The purpose of this hearing is to provide the Florida winter vegetable producers with a forum so that they can describe the problems they encounter with vegetables from foreign countries that have no equivalent inspection standards as U.S. produce.●

COMMITTEE ON SMALL BUSINESS

● Mr. NELSON. Mr. President, I wish to announce that the Committee on Small Business has scheduled a hearing on Friday, April 14, 1978, at 9 a.m., in room 424 of the Russell Senate Office Building, on the nomination of Milton D. Stewart, of New York, to be Chief Counsel for Advocacy of the Small Business Administration. Persons wishing to testify or submit statements, please contact the committee office at 224–5175.●

RAIL TRANSPORT OF HAZARDOUS MATERIALS

● Mr. CHILES. Mr. President, the Subcommittee on Federal Spending Practices and Open Government will be holding joint hearings with the Subcommittee on Civil Service and General Services on the Rail Transport of Hazardous Materials on Monday, March 20, 1978, at 9 a.m., in 1224 Dirksen Senate Office Building. For further information regarding the hearings, please contact Mr. Ronald A. Chiodo, subcommittee chief counsel and staff director (224–0211).●

SUBCOMMITTEE ON FEDERAL SPENDING PRACTICES AND OPEN GOVERNMENT

● Mr. CHILES. Mr. President, the Subcommittee on Federal Spending Practices and Open Government will hold hearings on the Buy American Act Amendments of 1977 (S. 2318) on Friday, March 17, in Pittsburgh, Pa.; on Thursday, March 23, at 9:30 a.m., in room 3302, Dirksen Senate Office Building; and on Wednesday, April 5, at 9:30 a.m., in room 318, Russell Senate Office Building. For further information regarding the hearings, please contact Mr. Joseph W. Robinson of the subcommittee staff (224–0211).●

RESCHEDULING OF HEARING ON S. 571

● Mr. BAYH. Mr. President, the hearings on S. 571—to amend title VIII of the act commonly called the Civil Rights Act of 1968 with respect to the awarding of attorney's fees and the authority of the Department of Housing and Urban Development to initiate a civil action to enforce the provisions of such title have been postponed. The hearings have been rescheduled for April 10, 1978, at 9 a.m. in room 2228, Dirksen Senate Office Building.

Anyone wishing to submit testimony for the hearing record should send his or her statement to or contact Ben Dixon, room 102–B, Russell Senate Office Building, Washington, D.C. 20510.●

ADDITIONAL STATEMENTS

TERRORISM IN THE MIDDLE EAST

Mr. EAGLETON. Mr. President, the terrorist attack launched by the Palestine Liberation Organization against Israel over the weekend was a tragic reminder that the peacemaking process in the Middle East is, at best, fragile and tenuous. It should also remind us that the PLO will resort to the most contemptible tactics in their effort to prevent the negotiation of a peace settlement.

Terrorism is nothing new in the Middle East, but with each incident it becomes that much more intolerable, and that much fiercer. And with each incident, the possibility of a meaningful peace settlement is set back. The recent attack which took the lives of 30 Israelis was senseless and despicable and was clearly intended to disrupt the current Middle East negotiations which are in a delicate stage.

I would like to take this opportunity to add my voice to those condemning this and all acts of terrorism. It is time to set aside hatred and weapons and to push even harder for a peace settlement. Any other course of action would only serve to bolster the PLO's objectives. It is only under the mantle of peace that a united Middle East can deal effectively with terrorist organizations which seek only to serve their own selfish motives by perpetuating the violence which pits neighbor against neighbor. It is time for Arabs and Israelis together to renounce the terrorist activities which seek only to deepen their differences, and to work together to construct a peace which will put the terrorists out of business.

Mr. President, I ask unanimous consent that an excellent editorial which appeared in today's New York Times, entitled "To Break the Cycle of Hate" be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

TO BREAK THE CYCLE OF HATE

It is not enough to condemn the senseless terror against Israel. It is not enough to warn that if the negotiations falter now, the Fatah guerrillas will have won again, destroying not the lives of dozens but the peace of millions. It is not enough to recognize that the terror, born in Palestinian hate, also threatens the interests of other Arab nations, notably Egypt. None of this is enough because in their torment Israelis also hate.

Inevitably, the Israelis will respond with force against the terrorist havens in Lebanon. They believe it necessary for self-defense and to still the fear of a vulnerable population. The world that expects Israel, yet again, to contain its grief and to regain its faith will have to demonstrate understanding for that impulse. Beyond messages of condolence, it owes the Israelis an honest sympathy and partnership in measures to punish terrorism on every front.

And those neighbors of Israel who share its revulsion and sense of danger owe it a sign that their common humanity transcends the claims of Arab unity. Those who seek Israel's trust ought now to reaffirm their acceptance of the Jewish state in the Middle East and their renunciation of the threats and terror that they once embraced. If Egypt and Saudi Arabia and perhaps also Jordan and some Palestinians intend to build a stable peace upon Israel's recognition of Palestinian rights, they need to seize this moment to show that they are strong enough to stand with Israel against Palestinian wrongs.

The calculus of this week ought to go beyond the chilling rosters of victims and numbers killed in retaliation. The Israelis will be counting their supporters against terrorism. They must not be left to conclude, as so often before, that they stand alone.●

TAXES, TAXES, TAXES

● Mr. GARN. Mr. President, the other day I received an interesting letter from a constituent, complaining about his taxes. We all get letters from constituents complaining about taxes, of course; we probably complain about them ourselves. But this man had done something different. He had included a chart showing exactly how his tax bite was pinching him.

Year	(1)	Federal income tax (2)	(3)
1970	100.0	$2,979	100.0
1971	105.1	3,184	106.9
1972	113.3	3,434	115.3
1973	129.3	4,332	145.4
1974	150.2	5,819	195.3
1975	180.3	7,629	256.1
1976	193.3	8,844	296.9

[1] Income as a percent of 1970 income.
[2] Amount.
[3] Percent of 1970 tax.

Mr. President, the figures this man presents are incredible. Since 1970, his personal income taxes have almost tripled. Of course, his taxes might well increase, if he is now making more money, but the fact is that there is no real indication that he is making more money. Because of the inflation that has raged through our economy since the early 1970's, it is quite conceivable that his buying power is even less than it was in 1970. Certainly, his buying power has not tripled. He has been inflated into a higher tax bracket by the cruelest tax of all, inflation.

That is a situation which is simply too often these days, Mr. President, and it has to stop. There can be no denying the impact of such tax rates on the willingness of our citizens to increase their productivity, or even on their willingness to pay their taxes. Why should they work harder, or smarter, to produce more? The Government will simply take from them any gains they might make in monetary income. How long are they expected to resist the temptation forced on them by a callous government to fudge on their income taxes?

Indeed, there is ample evidence that many of them are not resisting the temptation. An editorial in Friday's Salt Lake Tribune commented on the so-called underground economy. This economy operates in the shadows of our society, often in large cities, but increasingly in smaller ones as well. Simply put, our people are restorting to an exchange of services in order to keep their transactions off their books, and out of the

hands of the tax collector. To quote the Tribune:

So-called off-the-books earnings are an attempt to lighten what the evader considers a too heavy tax burden. Failure to report such income is clearly illegal but the odds against getting caught are apparently attractive enough to encourage this kind of defiance.

A barter economy is inherently inefficient. That is why it is normally replaced by a money economy. However, when the money economy involves rates of taxation which are, at the margin, confiscatory, barter regains its attractiveness. Apparently, an increasing number of people regard today's tax rates as confiscatory at the margin. Business Week magazine recently estimated that the underground economy might total as much as $195 billion per year. Had that amount been subject to today's taxes, says Business Week, last year's deficit, which totaled $48 billion, would not have existed.

Unfortunately, as long as tax rates are what they are, there is little likelihood of that "off-the-books" economy surfacing to be accounted for. It is much more likely that it will increase. Especially in view of President Carter's tax proposals for this year, which simply increase the tax burden on the most productive members of our society. Never have I seen tax proposals so openly biased to transfer resources from the most productive to the least productive sectors of our economy.

Of course Government can tighten the tax collecting screws. We can hire more tax collectors, increase enforcement, write more restrictive tax rulings. The Congress can write more laws closing off loopholes, and so on. History clearly teaches that such efforts will fail. Human ingenuity is stronger than the most determined tax collector. This country was founded on opposition to unfair taxation. I would not like to see it founder on the same rock. We must not allow ourselves to be persuaded that millions of Americans are unfairly sheltering income, and that they should be squeezed by the Internal Revenue Service and the Congress. In fact, an article in this morning's Washington Post shows clearly that the common understanding of who pays the taxes in this Nation is a misconception. According to the Post reporter, the richer half of the people in the United States pay 94 percent of the income taxes. The most incredible thing about that statement, Mr. President, is that is those who make over $17,000 per year. In other words, if you make over $17,000, you are in the richer half of the country. You are one of those President Carter, and before him, my colleague Senator McGovern, wanted to take money away from. And the very richest, those 0.3 percent of us who make over $100,000 per year, pay over 10 percent of the taxes. We simply have to admit that this 0.3 percent have been judged by the rest of us as the most productive individuals in the country. That is why they make over $100,000 a year. These are not bank robbers.

And how do we reward them for their productivity? We tax the hell out of them.

Fortunately, there is another way. The Roth-Kemp tax reduction bill, which I have cosponsored, would reduce tax rates across-the-board. It would encourage the subterranean economy to surface, thus actually increasing tax revenues to the Government, and would reduce the powerful incentive which now exists for individuals to cheat on their income taxes. It is critical that we move now to pass this bill. Our constituents are being eaten alive by taxes, and they demand relief. They do not want tinkering, they do not want redistribution of income. They want tax relief, and only the Roth-Kemp bill offers it.

I ask unanimous consent that the articles and editorials referred to be printed in the Record.

There being no objection, the material was ordered to be printed in the Record, as follows:

[From the Salt Lake Tribune, Mar. 10, 1978]

CHANGE TAX LAWS TO NEUTRALIZE DISRUPTIVE INFLATION FACTOR

When taxes are too high people find ways of not paying them. That applies to levies on cigarettes, on automobiles, on incomes and other items.

That excessive tobacco taxes in some states have given rise to widespread bootlegging from low tax states is well documented. Although proof is not as easy to come by, there are mounting indications that soaring income tax bills have triggered extensive evasion, too.

Inflation has pushed millions of workers into higher income tax brackets where they are subject to steeper tax rates although their inflation-sapped buying power bears little relation to income.

To compensate, a growing number of normally conscientious taxpayers are thought to be taking payment for goods and services in cash and not reporting it as income.

Peter Gutmann, head of the Department of Economics at Baruch College of the City University of New York, estimates that the "underground work force" accounts for about 10 percent of the gross national product already. That translates into some $176 billion on which no taxes are being paid.

A Wall Street Journal editorial reprinted the other day in The Tribune explained why striking coal miners would have gained almost no income under terms of the recently rejected contract proposal. The miners would have been pushed into higher tax brackets and inflation over the three-year period of the agreement would eat up what taxes didn't take.

So-called "off-the-book" earnings are an attempt to lighten what the evader considers a too heavy tax burden. Failure to report such income is clearly illegal but the odds against getting caught are apparently attractive enough to encourage this kind of defiance.

The United States has long taken pride in its high degree of taxpayer cooperation. But this cooperation is based on a general belief among taxpayers that the system is equitable. If, in fact, many people are cheating, there is more at stake than individual morals and lost tax revenue. The income tax system itself is being challenged.

Any tax reform Congress considers must include an attempt to neutralize the disruptive inflation factor.

[From Business Week, Mar. 13, 1978]

THE FAST GROWTH OF THE UNDERGROUND ECONOMY

Paul Green sells sneakers at flea markets in New Jersey, earns $25,000 a year, and files no income tax return; Charlotte Kane waits on tables part-time in Florida, makes $150 a week, but reports only $50 of it; Tom Wright, a West Virginia coal miner, picks ginseng roots in the summer and earns an extra $1,000 that he does not report on his tax return; Dr. John Sloan, a general practitioner in Los Angeles, pressures patients to pay cash and routinely under-reports his income by about one-third. These names are, of course, fictitious. But it is no fiction that people such as these are members of what may be the fastest growing segment of U.S. society: the subterranean economy.

Some members of the subterranean economy are engaged in illegal activities, such as prostitution, gambling, and narcotics. A far greater number, however, work legally, but what they do and how much they earn simply goes unreported to government agencies, especially to the Internal Revenue Service. Although no one knows precisely how big this underground economy is, most experts agree that it is enormous. One controversial estimate puts this income generated in the subterranean economy in 1977 at a mind-numbing $195 billion, or about 10 percent of the recorded gross national product.

The implications of this underground stream of money for economic and tax policy are equally enormous:

To the extent that the subterranean economy is growing faster than the "legal economy," both the level and rate of growth of economic activity are being seriously understated by the GNP numbers. Further, had taxes on subterranean income been paid, last year's $48 billion federal budget deficit would have been almost wiped out.

The official unemployment rate, which in January stood at 6.3 percent, probably overstates the amount of actual unemployment in the nation. It is fairly easy to work in ghettos without reporting income, for example. Likewise, the actual number of families living in poverty is less than the official estimate.

The U.S. may be approaching the point where heavy marginal tax rates are eroding the traditional belief that Americans voluntarily pay their taxes far more readily than citizens in other democracies (box).

Peter M. Gutmann, of Baruch College of the City University of New York, is the economist creating all the controversy with this estimate that the underground economy produces $195 billion in income. "Getting a direct estimate of the subterranean economy may be impossible," he says. "I use an indirect measure based on the sharp increase in the growth rate of currency. And it indicates that the subterranean economy is huge and growing rapidly."

Gutmann focuses on trends in the relationship of cash to checking deposits. That proportion had been falling since the turn of the century. In the period immediately before World War II, cash amounted to about 21% of demand deposits. By 1945, as taxes were raised, black markets mushroomed, and the avoidance of taxes accelerated, the the public demanded more cash, and cash rose to 36% of demand deposits. It dropped off after the war as black markets disappeared but has been rising ever since. Last year the proportion was almost back to its 1945 high.

THE EXCESS OF DOLLARS

Gutmann attributes the rise to the growth in the subterranean economy, which needs cash to operate. Were the same relation of cash to demand deposits that existed in the

late 1930s to prevail today, there would be $30 billion less in circulation than there actually are. The additional currency, Gutmann asserts, is lubricating a subterranean economy that produces almost $200 billion in goods and services a year.

"No one has adequately explained the sharp increase in cash, especially in light of the so-called move to the cashless society," says Gutmann. Indeed, Gutmann argues his estimate may be low because demand for cash should have declined as credit cards increased.

Many economists believe that Gutmann may be overstating the size of the underground economy. "I'm sympathetic to what he is doing," says Phillip Cagan of Columbia University, who in the early 1960s examined the problem of the increasing demand for cash. "But the estimates that you get this way are only suggestive. You can't pinpoint the amount of cash that should be outstanding and then conclude the residual is due to the subterranean economy." Cagan argues, for example, that Gutmann fails to consider the growing amount of U.S. currency that is held overseas.

HOARDING

While conceding that "there is a huge subterranean economy out there," Robert Laurent of the Federal Reserve Bank of Chicago also questions Gutmann's estimate. He argues that Gutmann failed to make two important adjustments to his data: the more than one-third decline over the past 40 years in the rate at which the typical dollar's worth of currency circulates, and the more than fivefold increase in the rate at which the typical dollar's worth of demand deposit moves through the economy. Both of these developments would tend to increase the ratio of cash to checking accounts for each level of the GNP, Laurent notes. "There's also a lot more hoarding of cash than Gutmann allows for, and his estimate is therefore biased upward," Laurent adds.

Fitting the components of income together like a giant GNP jigsaw puzzle indicates that Gutmann's estimate is not wildly off the mark, however. It is not difficult, in fact, to come up with an estimate close to $100 billion for the size of the subterranean economy. For example, the IRS estimates that 99.8% of all wages that should have been reported were indeed reported. This estimate is based on 50,000 randomly selected tax returns that have been extensively audited by the IRS. Unlike the normal auditing procedure, this audit, called TCMP, for taxpayer compliance measurement program, checks into every source of income and all deductions. TCMP is conducted every three years to refine the statistical method for selecting returns to be audited on a normal basis.

UNREPORTED INCOME

But TCMP seems to do a far better job getting at questionable deductions than it does ascertaining the correct reporting of income. Says Ross Summers, a planning officer at IRS, "TCMP does not get at unreported income with a great degree of reliability." Adds Nelson McClung, assistant director for personal tax at the Treasury Dept.: "Almost all wages subject to withholding are reported. But the reporting of wages not subject to withholding is very, very low. I would be amazed if more than 95% of all wage income is reported." If McClung is right, unreported wages alone could amount to $50 billion, and most would not be picked up in the GNP.

A far higher percentage of the income earned by the self-employed is underreported to the IRS. According to the TCMP, the self-employed fail to report about 19% of their income, and the Commerce Dept.'s Bureau of Economic Analysis adds this 19% in when figuring the GNP numbers. But one BEA economist says, "The unreported figure is probably 30%." And other government experts believe that it may be closer to 40%. This works out to about $25 billion of which only half is included in the GNP.

RETICENT FARMERS

Similar problems afflict other BEA estimates incorporated in the GNP accounts. The bureau uses tax returns to estimate the rental income of individuals and corporate profits, for example. And the rental income of individuals and corporate profits of small corporations are underreported by as much as 50%, according to many estimates. This could add another $25 billion to the GNP.

These legal income receipts that evade inclusion in the GNP add up to over $85 billion. And no taxes are paid on them, either. There are also huge amounts of income that, while included in the GNP, escape taxation. Farmers' income is a notorious example. The IRS estimates that farmers fail to report about 30% of income, while the Census Bureau estimates that 52% goes unreported .

Similarly, although the IRS figures that taxpayers report 97.7% of interest income received, John Gorman of the BEA concludes that taxpayers were underreporting interest income by one-third, or some $14 billion.

So, even if Gutmann's estimate of the underground economy is overblown by half, much of last year's federal deficit could have been eliminated if taxes on unreported income had been paid.

COUNTING THE UNEMPLOYED

Gutmann will venture no firm estimate of how much lower is the actual unemployment rate, but he is convinced that it is lower. Cagan agrees: "The high unemployment rates reported for the ghettos, especially among the young, are unrealistic. Many are working, performing economic services for small businesses, but it doesn't show up in data."

Furthermore, according to the evidence turned up by the states, between 2% and 3% of those receiving unemployment benefits were found to be working off-the-books. This may be a bare minimum. Says Charles C. McMann, director of labor special investigations for New York State: "We're trying to uncover those working off-the-books. But we never know whether we merely have the tip of the iceberg."

Not only is the unemployment rate overstated, but so too is the government estimate of families who live in poverty. Based on a 1977 Congressional Budget Office study, the estimate of 10.7 million families whose income falls below the poverty level would be reduced by about 1 million if adjustment is made for unreported income.

Like Gutmann, Cagan argues that the subterranean economy is growing. "High income tax rates are being eroded by people doing business outside the government's purview," he says. And this may be as true for the doctor and lawyer as it is for the waitress and cab driver. For example, the Treasury Dept. took 1929 income tax returns and projected them to 1973 levels. That projection indicates that average income for the group earning over $72,000 should come to $282,000. But actual returns for 1973 showed an average of only $123,000. Part of the difference probably reflects the incentive to avoid taxes as tax rates rise sharply. Says Cagan: "We are beginning to pay the long-run costs of heavy taxation."●

[From the Washington Post, Mar. 13, 1978]

RICHER HALF OF U.S. PAYS 94 PERCENT OF INCOME TAXES

(By Art Pine)

The richest one-fourth of American households—those with incomes of $17,000 a year or higher—took home half the income in this country in 1976 and paid more than 70 percent of all personal income taxes.

By contrast, those in the poorest one-fourth—wage earners making less than $5,000 a year—received less than 5 percent of the nation's income that year and paid a minuscule 0.1 percent or less of the income-tax tab.

Those in the richest 5 percent of the country—taxpayers with incomes of $30,000 or more—earned 22 percent of the income in 1976 and paid 39.2 percent of all income taxes.

By contrast, the poorer half of all persons filing tax returns earned 19 percent of all income and pai d6 percent of the personal income taxes in 1976, while the richer half paid 94 percent.

Those figures, compiled by the Treasury Department from estimates based on 1976 income levels, show a stark fact about the way the tax burden is distributed in this country:

While it's true, as some studies show, that wealthier persons enjoy the biggest tax breaks and deductions, they also shoulder a disproportionate share of the tax burden—far beyond what is perceived generally.

Moreover, the distortion has been heightened by the tendency of Congress in recent years to skew most of the tax breaks it has enacted to those at the lower end of the income scale.

To make up for inflation and higher Social Security payroll taxes, the lawmakers have cut income taxes. But most of the cuts have benefited lower- and lower-middle-income taxpayers—not the middle or the top.

The result of all this has been a significant tax squeeze on the so-called "middle" and "upper-middle" income brackets—the 10.7 million taxpayers whose incomes fall between $20,000 and $35,000 a year.

While the proportion of Americans' personal income eaten up by the income tax has remained relatively constant over the past few years, at about 13 percent, the burden of that tax load has shifted to higher-income brackets.

For example, figures compiled by the Tax Foundation show that the richest 25 percent of the nation's taxpayers paid 68.3 percent of all taxes in 1970. By 1975, that figure had risen to 72 percent.

Those in the richer 50 percent paid 89.7 percent of the total tax in 1970. By 1975, that had increased to 92.9 percent. All taxpayers in the richer 50 percent bracket saw their share of the total tax tab rise.

At the same time, those in the poorer half enjoyed a shrinking tax burden during the period. The taxes paid by the lower half fell from 10.3 percent in 1970 to 7.1 percent in 1975.

For the poorest 25 percent of all taxpayers, the proportion of the total tax bill fell to 0.4 percent in 1975, from 0.9 percent in 1970. In any case, the trend is clear.

President Carter's new tax-cut package would only heighten the disparity. Carter has proposed replacing the present $750-a-dependent personal exemption with a new $240 credit that would shift the burden further toward the middle- and upper-middle-income brackets.

The battle in Congress now is precisely over how far that shift should be allowed to go. Members of the House Ways and Means Committee have indicated that they are concerned about the tax burden borne by upper-income brackets and most likely will revamp the Carter proposals.

Moreover, the heavier tax burden continually is reaching downward to include people who used to be in lower-middle-income brackets. As inflation pushes incomes higher, taxpayers are thrust into higher brackets.

With the combination of inflation and higher tax rates in the upper brackets, the wealthiest of the nations' taxpayers pay disproportionately high shares of the total tax burden—even including their shelters and deductions.

For example, the richest 1.4 per cent of the nation's citizens—some 985,000 whose incomes total $50,000 or more a year—take home 10.7 percent of the income, but pay 23 percent of the taxes.

The wealthiest 0.3 per cent—those in the $100,000-and-up category—receive 4.5 percent of the total income, but pay 10.5 percent of the tax burden. (The poorest 0.3 percent escape taxes altogether.)

The breakdown portrayed by these figures pertains only to personal income taxes. With Social Security payroll taxes included, the pattern is different but the point remains the same.

The figures used in the computations include income from capital gains—profits from the sale of stocks or other assets—only half of which are subject to tax. The totals for tax liability include writeoffs and deductions.

But the fact remains that, for all the complaining about wealthy taxpayers, those in the richer half of the nation's income brackets are paying 94 percent of the personal income taxes. The other half is paying the rest.●

HUMANITARIAN FOOD FOR LAOS

● Mr. KENNEDY. Mr. President, reports from Laos continue to tell of growing food shortages that threaten famine conditions in many areas. Despite the efforts of several United Nations agencies and private voluntary agencies, as well as several governments, the food needs of Laos are still great.

The ravages of drought and the dislocations of war have seriously affected many areas of Laos. My office has received extensive information from the United Nations on the scope of humanitarian needs in Laos, and its efforts to help, if sufficient support is received from the international community.

And representatives of the Mennonite Central Committee, who recently returned from several years service in Vientiane, have described in personal terms the hardships confronting thousands of Laotian refugees attempting to return to their lands and homes, only to find it impossible to grow the food they need.

The need for humanitarian food for Laos was thoughtfully reviewed today in an article in the New York Times, which I commend to the attention of my colleagues. I am hopeful that in the days ahead the United States will finally take action to provide emergency food for Laos—to redeem our humanitarian tradition of responding to appeals for food and assistance by any country in need of help.

Mr. President, I ask unanimous consent that the article in the New York Times be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LAOS' NEED: U.S. RICE

(By Peter Kovler)

WASHINGTON.—As a result of widespread drought last year, Laos faces food shortages and, in many areas, the likelihood of famine. To try to stave off the impending disaster, the Laotian Government has appealed to the world for aid, and in early January made a direct request to the Carter Administration. But the State Department and the Administration have refused to respond.

Instead of giving the necessary rice, the Government has decided to play politics with starving Laotians' lives.

That is, for fear of seeming too liberal to the Congress, an especially dangerous image that President Carter wants to avoid as he tries to get the Panama Canal treaties ratified, the Administration has refused to make a decision. But for the Laotians no decision is tantamount to a direct refusal.

According to a joint Laotian Ministry of Agriculture and United Nations report in December, Laos must survive a rice deficit of 261,000 tons (about 40 percent of its annual national requirement) until next autumn. The report emphasized that the drought was especially destructive in the traditional rice-exporting areas in the south where last summer's rainfall was 75 percent below normal. The situation is so precarious in the southern provinces of Saravene and Khammouane that many people are already eating one bowl of rice a day.

The difficulties of postwar recovery have added to Laos's hardships. Some 385,000 displaced persons have returned to homes and native villages. According to two Mennonite missionaries who have just returned from Laos, Murray and Linda Hiebert, these refugees have discovered that irrigation networks have collapsed and that paddy fields are pockmarked with bomb craters. Other observers estimate that in the Plain of Jars 50,000 of 83,000 buffalo have been killed. Consequently, often groups of eight farmers will have to harness themselves to plows to till fields.

Worse, unexploded bombs buried in the ground hamper food production. Since 1973, it is believed, munitions in fields have killed 267 civilians and seriously injured 343 in Xiengkhouang Province alone. No safe method of removing the weapons has been found. Particularly dangerous are bombs the size of tennis balls that explode when simply touched by a farmer's tool or when stepped on.

According to the Laos-United Nations report, Laotians would be able to survive barely if they can get 113,000 tons of rice in the next few months. That figure would mean that a Laotian's diet would be 12 kilograms of rice per person per month, or 1.8 pounds per person per day—a minimal ration. As of March 7, some 59,000 tons had been pledged. There is still a need for 54,000 more tons. People who watch the world rice market closely will tell you that the United States, with the largest surplus, can offer it most easily.

However, there is such great fear in the Administration that it will appear to be pro-Communist, thereby jeopardizing the canal treaties, that approval of the "Laotian case"—as it is called in Washington—is believed politically imprudent. Even though some officials, including the Assistant Secretary of State for East Asia and Pacific Affairs, Richard Holbrooke, favor granting the aid immediately, there is a general belief that "the time just isn't right."

Undoubtedly President Carter is also in a dangerous political situation because last year the Congress specifically forbade direct aid to Laos. Nevertheless, there is an exemption in Public Law 480, the Food for Peace law, which allows the President to provide free food to people in need.

In a recent Senate speech, Edward Kennedy pointed out how it has been a "hallmark of our country to have a humanitarian tradition." Irrespective of another nation's ideology, we have given: whether it was in the 1920's when the United States sent food to the Soviet Union, or after World War II when aid went to our former enemies, Germany, Italy and Japan, as well as to Communist countries.

It is imperative that President Carter move to help the Laotians. Any more delay in Washington would simply compound the barbarity that the United States has already brought to that region. In short, Laos must not become another sub-Saharan Africa, where people died because governments had more "pressing matters."●

UNIFIED SOLAR ENERGY AND ENERGY CONSERVATION PROGRAM

● Mr. DECONCINI. Mr. President, at a time when the use of fossil fuels is leading this country to an ever-increasing trade deficit and causing us to be more dependent on foreign nations for our basic energy needs, the current administration continues to budget a disproportionate share of its energy research and development funds for reliance on "hard path," nonrenewable energy sources.

It is heartening to note this same short sightedness does not exist at the local level of government. I would like to share with my distinguished colleagues the efforts of the residents of Pima County, Ariz. in both exploring and implementing the possibilities of solar energy. The Unified Solar Energy Committee, a group composed of representatives from county government, the University of Arizona, and local business has for the last 2 years been pooling money and awarding grants to develop Arizona's most abundant resource: sunshine.

Mr. President, I hope administration officials charged with setting energy priorities will follow the example set by Pima County, Ariz. in moving forward with renewable energy source development as a top national energy priority. I request that an item appearing in the Tucson Daily Citizen of January 10, 1978, entitled "Solar Subsidies Awarded" be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SOLAR SUBSIDIES AWARDED

Cash subsidies of $12,847—including $10,000 in Pima County funds—were to be distributed today to 11 builders installing solar heating equipment on houses in the Inner City Parade of Homes.

In addition, the University of Arizona has agreed to provide an estimated $10,000 in manpower to monitor for one year the performance of the equipment at the homes' site, near West St. Mary's and North Silverbells roads.

The project is the fourth, directed by the Unified Solar Energy Committee, a two year-old coalition of government, university and business representatives formed to encourage solar energy projects.

Three builders, Herder Construction Co., Miller Homes, and William Lester Pritchett & Sons, will receive $3,000 grants to help defray the costs of installing solar space heating equipment.

The rest of the grant will be divided among building firms installing solar water heaters.

The $2,847 in non-government funds is being supplied by six local banks; the Arizona Bank, Banco Internacional de Arizona, First National Bank of Arizona, Union Bank, United Bank of Arizona and Valley National Bank.

Scheduled for completion in March, the Parade of Homes is a 6.2-acre, 35-home project sponsored by the Southern Arizona Home Builders Association and the City of Tucson, at a cost of $1.77 million in private funds and nearly $290,000 federal and local tax dollar.●

ON RETIREMENT OF CONGRESSMAN JOE D. WAGGONNER

● Mr. LONG. Mr. President, it is with deep regret that I note the decision of a close and valued friend and colleague, Congressman JOE D. WAGGONNER, JR., not to seek reelection this year.

The people of Louisiana's Fourth District, and the Nation as a whole, will be less effectively represented here in the Congress without JOE WAGGONNER. By any standard, JOE is one of the truly great Congressmen of all time, a man who reflects the fundamental good sense and patriotism of the people of north Louisiana. America needs as much of that kind of philosophy as can be found.

Undoubtedly, another good man can represent the same general point of view. But it will take many years for someone to gain the respect, the stature and the following that JOE WAGGONNER has acquired in his 17 years of devoted and hard work in the House of Representatives.

It has been my earnest wish that JOE's constituents would be able to demonstrate how much they appreciate him and persuade him to continue his service to America here in Congress.

However, JOE's decision apparently is final. I am greatly saddened to see a man who has been such an effective and dedicated legislator lay down the cudgel in the prime of his career.

Mr. President, I hope that JOE WAGGONNER will continue to be active and offer us his counsel and guidance whenever possible.

He will be able to devote more time to his family. Shedding the burden on long hours, along with the opportunity to enjoy the love and companionship of his family and friends in Louisiana can only be of benefit to JOE.

Their gain is the Congress loss. Few men have ever displayed such an understanding of the legislative process here, or have been as effective in performing the arduous duties of the office.

Mr. President, I ask unanimous consent to print in the RECORD JOE's statement issued when he announced he would not run again for Congress.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY CONGRESSMAN JOE D. WAGGONNER, JR.

After the most arduous and searching examination of my life and affairs and after the most prayerful consultation with my family, I have concluded to retire from public life. I will not be a candidate for re-election to the office I now hold.

Of the thirty-five years of my married life, almost thirty have been spent in service to my country in public office and in the armed forces. My desire to be with my family and to share with them for a while God's abundance of life has been ever pressing through all these years. It is an urge I can no longer resist. I must yield to the clear logic of the Son of David in the Third Chapter of Ecclesiastes: "For everything there is a season and a time for every matter under heaven." It is time for me to leave public life.

I harbor no regret for having chosen public service as my life's work though there is, perhaps, no more demanding a life than in the political arena nor a more brutal one. It can also be the most disappointing if one were to let it be, but I have not.

I have tried to make it the noble and honorable profession it can be. I have spent seventeen years trying to represent the people of the Fourth Congressional District in the Congress, to act for them singly as they would act for themselves if they were there collectively. I have fought to preserve the greatest concept of government man has yet devised, and I have sought to preserve the free enterprise system that has given this Nation its freedom and its dignity. I have struggled to limit the increasing domination of the lives of our people by the government and those who look to the government for solution to our every problem—both real and imaginary. I have long believed that too many Americans expect too much from the government without a contribution on their part. I am completely convinced that we have long since exceeded our ability to pay for the cost of government at every level in this country.

I entered public life without any obligation save to my Maker and without any yoke around my neck. I leave it in the same manner. I recognize that some of those who would enjoy dictating my every action resent this independence.

It is not for me to judge to what degree I succeeded in my life's work. History will write it clearly. I believe that history will reflect that I understood representative government and practiced what I preached. I have not been a political expedient. I know my people.

The burden and responsibility of equitable and impartial representation in government is awesome. A clear conscience would not allow me to be the spokesman and unbending advocate of management alone, or labor alone, or government alone, though on occasion this would have been the easier course. On more occasions than were known, my alternative choices of action were both bad and I conscientiously sought the lesser of the two evils. Sometimes these dilemmas were misunderstood, and I did not and do not expect everyone to agree with my every choice. With a constituency of almost half-a-million, it was and is manifestly impossible. I ask only the understanding that I did, in every case, what I thought was best for us all.

In public office, men often do one of two things: they swell or they grow. I hope that, in the judgment of my constituents, I have grown. I did not seek after personal power, vain publicity, or monetary gain. I sought only two things: the trust and respect of those who elected me and the same trust and respect of my colleagues. "Plain Dealing" has been my watchword. I have attempted to run an office with an open door and accessibility. I have tried hard to serve all our people and in an effort to do so have turned no one away who came to me with a problem seeking help. Literally thousands have come. On occasion, we succeeded in helping; on others, we failed but we always tried. I have treated everyone as good as they would let me.

Though I now retire from public life, I intend to associate actively with the private sector. And though I do not anticipate ever again being a candidate for office, my interest in public affairs has not and will not diminish. I consider that I have a vested interest in what happens to my state and my nation.

I make this announcement five months before any qualifying deadline to insure that the machinery of elections has full time to function and to allow the voters full time to decide upon my successor. Too few understand the magnitude and totally demanding nature of this job. None who seek it should take lightly its effect on their personal and family lives. Every American should face reality and know that if some existing attitudes continue to prevail that the day will soon come when a draft will be required to get desirable candidates to seek public office.

I am painfully conscious of my indebtedness to so many people; a debt I will never be able to satisfy. To, first of all, my family whose patience and understanding were my principal succor and support. There is no means, monetary or otherwise, of compensating for their sacrifices. To past and present members of my staff who unselfishly gave of their own lives to share with me the burdens and sacrifices of public office. To the voters who, by their votes, paid me their highest compliment.

The rewards have been more than I was worthy of having. I was given the opportunity to gain a perspective of government and the world. I was privileged to walk with Presidents, Kings, Potentates, and Princes. I have been more privileged to walk with the people of the Fourth District of Louisiana, my fellow men.

To the question, can I come back home now and be content in a simpler life after such an exhilarating experience, my answer is: I never left.

I sought your approval, and you gave it to me. My accomplishments may have been meager, but I discharged your trust to the best of my ability. If I could have done more, I call all Heaven to be my witness, I would have done it. I lay claim to nothing but an honest effort.

Again, for my family and myself, from the depths of my heart, I thank you for your patience, your understanding, your friendship, your support, and your prayers.●

RECOMMENDED READING ON SALT

● Mr. MATHIAS. Mr. President, Averill Harriman is generally acknowledged to be one of America's sagest and most experienced statesmen. He is also one of its most alert and conscientious citizens.

Not content to rest on the mountain of laurels earned in his unique career of public service, Averill Harriman continues to be an energetic student of public affairs, educating himself constantly on the swiftly flowing stream of events and plunging far beneath the surface of these events to examine their true significance.

It is for this reason, that whenever Governor Harriman speaks, I listen and I learn. And whenever Governor Harriman commends some book or article to my attention, I read it and invariably my perceptions are enhanced.

Recently Governor Harriman called my attention to an article that appeared in the New York Times magazine on November 27, 1977, which I consider so important that I now commend it to the attention of my colleagues. As we move closer to a SALT agreement with the Soviet Union, the arguments advanced by its author G. B. Kistiakowsky, are more important than ever. I ask unanimous consent that this article, "The Arms Race: Is paranoia Necessary for Security?" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE ARMS RACE: IS PARANOIA NECESSARY FOR SECURITY?

(By G. B. Kistiakowsky)

Thirty years after the start of the cold war, the United States and the Soviet Union still live in a state of uncertainty and insecurity. In America, this condition has been attributed from the start to the aggressiveness of Soviet Communism, which is seen as striving for world hegemony and bent on the destruction of its principal obstacle, the United States. In Moscow, just as consistently, the guilt has been assigned to the evil designs of American militarism and imperialism.

Today, in facing the consequences of this confrontation, we Americans are at a crossroads. Depending on which road we take, we may win, or lose, one of those rare opportunities in modern times to bring a measure of stability to an increasingly dangerous world.

For five years now, an interim agreement known among the experts as SALT I has limited the number of strategic land-and sea-based ballistic-missile launchers on each side. The agreement expired last October, and although both sides have promised to continue abiding by its provisions, the self-restraint this requires, in the absence of a new formal agreement, could well erode fairly soon. For waiting in the wings on both sides are new types of strategic weapons—bigger and more accurate ICBM's with multiple warheads, some even mobile, and the long-range air-, land-and sea-based cruise missiles. Many of these new weapons are clearly capable of more than a deterrent or defensive mission, and are, therefore, provocative by nature. Others are difficult to detect by reconnaissance satellites, and thus add to the other side's sense of insecurity. Some are destabilizing in both ways.

The Soviet-American negotiations for a new agreement—SALT II—that were resumed last spring have been making headway, but accord is still blocked by a number of technically complex issues. President Carter, Secretary of State Cyrus Vance, Secretary of Defense Harold Brown and Arms Control Director Paul Warnke have all shown a clear understanding of the dire potential consequences of the arms race, and have given arms control new priority on their agenda. Yet, despite the urgency of the situation, the Administration's policy, and the narrowness of the gap that separates the parties to the talks, there is real danger that no agreement will be reached—or, if reached, that it will not be ratified by the Senate.

Why?

Part of the answer has to do with the technicalities of missile performance, and with differences between the strategic doctrines and negotiating tactics of the two sides. But another, and perhaps the major, reason, is to be found in the domestic politics of arms control.

Once again, as so often in the past, there are powerful voices in this country urging intensification of the cold war and rejection of efforts at moderation—efforts that are construed as serving Moscow's aggressive designs. Once again, we are asked to determine our actions not in the light of our demonstrated ability to more than compensate for any Soviet military advance, but, rather, in response to imaginings, fueled by fears, as to what the Soviets *might* do. This, lamentably, has been the pattern of our decisions on weapon acquisitions and arms control since World War II. To understand it, we must go back to the beginnings of the nuclear age.

While the origins of the cold war are too complex to go into here, it is undeniable that, by the end of the 1940's, political positions in Washington and Moscow had hardened. West Berlin was under Soviet blockade; the Korean War was only months away; the United States was heavily committed against Communist insurgency in Greece; and, in Congress, the House Un-American Activities Committee was riding high. Stalin's extreme secretiveness at home, and his iron curtain on the world, kept the Truman Administration guessing about Soviet military capabilities and foreign-policy objectives. Diplomatic negotiations were at a standstill. Then, in September 1949, the first Soviet atom bomb shattered American illusions of a prolonged United States monopoly in atomic weapons.

In January 1950, President Truman ordered a speedup on research on the hydrogen bomb and asked for a secret reassessment of our defense and foreign posture. The resulting paper—N.S.C. 68—made predictions that were nothing short of apocalyptic in substance and tone. "It is quite clear . . . that the Kremlin seeks to bring the free world under its domination," wrote the authors of the report; being "inescapably militant," the Soviet Union "seeks to impose its absolute authority over the rest of the world"; and so on. Given its grim conclusions, which had strong impact on government policy and fed the country's apprehensive political mood, the paper naturally urged a sizable increase in the country's military budget. With the additional stimulus of the Korean War, military budgets rose from $15 billion in 1949 to $50 billion in 1953.

Though much of this money was spent fighting in South Korea's defense, a good portion went to a general buildup of military strength, and especially of the Strategic Air Command. Fragmentary and flimsy intelligence about Soviet bomber forces was characterized by Air Force partisans as evidence of a disastrous "bomber gap." The result was a great buildup of our nuclear-armed heavy-bomber force was modest in size, and that the the intercontinental B–52. Some years later, it was generally agreed that the Soviet heavy-bomber force was modest in size, and that the "bomber gap" was a myth. But, by then, another "gap" was in the making.

In 1957, a top-secret study group (the Gaither panel) reported to President Eisenhower that, according to the latest intelligence, the Soviet threat would "become critical by 1959 or early 1960," since, by then, the U.S.S.R. would "acquire significant ICBM delivery capability with megaton warheads." Once again, the White House was urged to increase military spending—and, in addition, to initiate a multibillion-dollar civil-defense program to counter a similar program attributed to the Soviet Union.

President Eisenhower took unkindly to most of the report's recommendations. But the contents were leaked to the press, and, in the summer of 1959, the syndicated columnist Joseph Alsop argued for the existence of a "missile gap." Secretary of Defense Thomas Gates denied the existence of this new gap, but Senator John F. Kennedy used the issue effectively against the Republicans in his 1960 Presidential campaign. And although Kennedy learned upon entering the White House that the "missile gap" was indeed a myth, he had our Minuteman and Polaris strategic-missile programs greatly enlarged in compliance with his campaign promises.

The real missile gap, in point of fact, had been in our favor. This advantage over the Soviets continued on an increasing scale well into the 1960's. It probably was a factor in Nikita Khrushchev's 1962 decision to deploy medium-range missiles in Cuba—and it certainly was a factor in his subsequent compliance with American demands to remove the missiles from the island. In the aftermath of this fearful crisis, the Soviet Union embarked on a buildup of its own strategic missile forces, both land- and submarine-based. A decade later, these Soviet forces were substantially larger numerically (in terms of launchers, not warheads) than those of the United States. This massive Soviet program was underestimated by Secretary of Defense Robert McNamara and overestimated by his successor, Melvin Laird.

The shifts in numerical strength had been accompanied by shifts in strategic doctrine. The American doctrine of massive retaliation, devised when the United States still had a virtual monopoly of nuclear weapons, was succeeded in the early 1960's by the concept of "mutual deterrence." The reasoning was that, by that time, both the United States and the Soviet Union knew, beyond any doubt, that each had the means to visit on the other a degree of destruction exceeding anything that any government could accept. The American program projected a force of 1,000 land-based Minuteman ICBM's; 54 of the larger but older land-based Titan II ICBM's; 41 Polaris submarines deploying a total of 656 missiles, and a fleet of B–52's and other heavy bombers—an arsenal considered powerful enough to assure "unacceptable damage" to the Soviet Union (and/or China) even after a surprise Soviet or Chinese nuclear attack.

In spite of that, there were suggestions at several junctures during the 1960's—indeed, they took on the proportions of public campaigns—that Soviet weapons development might have rendered our capability for "assured destruction" inadequate to the task—and, hence, that deterrence might fail.

First came stories about a rapid expansion of the Soviet civil-defense program—measures that would give the Soviet population added protection against any retaliatory American strike, and that would therefore make the option of a Soviet first strike more tempting to the Soviet leaders.

Then came reports that our intelligence-gathering satellites had spotted a ring of antimissile defenses (ABM's) around Moscow, as well as signs of another ABM system being deployed in other parts of the Soviet Union. To Pentagon officials dedicated to the "worst-case" approach to uncertain intelligence data—what is the worst that the potential enemy is capable of doing to us?—these sightings raised the specter of a countrywide Soviet air-defense system. The following sequence of events was thereupon envisaged: The Soviets could launch a first strike; those of our missiles that survived this attack would be launched against their Soviet targets; yet most of the retaliatory American warheads would be unable to penetrate the Soviet air-defense system; and the damage inflicted by the few that did penetrate the Soviet shield would not be "unacceptably" severe. Expectations of this outcome would make the Soviet leaders confident of their military superiority.

Though rejected on available evidence by more objective American analysts, this pro-

jection was a major factor in the decision to develop a new missile system—MIRV's. Each MIRV (Multiple Independently Targetable Re-entry Vehicle) would be equipped with several warheads; each warhead could be released at a separate target; the new system would multiply the warhead count of an American retaliatory strike and overwhelm the best air defense the Soviets could put up.

While the MIRV's were being developed, however, new and clearer evidence indicated that the Soviet countrywide air-defense system had been designed not against missiles but against bombers, and that construction of the ABM system around Moscow had been halted halfway. In spite of that, the MIRV program was continued—justified by the new argument that we had to be able to destroy a larger number of targets in the U.S.S.R. It didn't take great expertise to understand that deploying these MIRV's could stabilize the state of mutual deterrence: With each MIRV'ed missile capable of destroying more than one missile silo, a surprise pre-emptive strike aimed at destroying the other side's entire land-based missile force would become a worrisome possibility. Yet little heed was paid to this aspect of the program.

It stood to reason that the Soviet Union would match our MIRV program with one of its own. Yet when the strategic arms limitation talks (SALT) began in 1969, the Pentagon vetoed suggestions that the United States propose a moratorium on MIRV development by both sides. At that juncture, such a freeze could have been accomplished by simple agreement with little likelihood of undetectable violations. Today with MIRV's being extensively deployed within the Soviet Union, detection is a much more difficult problem and concern about this new factor is understandably acute in the United States. Once again, a missed opportunity for restraint has led to another erosion in our own security.

The same blind opposition to restraining American weapon development plagued every effort to arrive at a total nuclear-test ban. Opponents of the idea in the 50's and 60's concocted elaborate scenarios on the feasibility of clandestine Soviet tests, belittling the central issue that a comprehensive ban would have been to our advantage, in view of our technological lead. Once again, the political opposition prevailed: The Kennedy Administration had to settle for a partial ban limited to tests in the atmosphere, outer space and under water. The treaty, concluded in 1963, is now adhered to by many nations, though not among the nuclear powers, by France and China. It has resulted in an immense reduction in radioactive falling from nuclear testing above ground. The underground testing has been pushed by the superpowers at a much faster clip, so that development of new nuclear weapons has continued as before.

The SALT I agreement signed by President Nixon and Secretary General Brezhnev in Moscow in 1972 was accompanied by much fanfare about détente that has been rendered questionable by the passage of time. Yet the atmospherics were accompanied by a significant accomplishment—a treaty to limit each side to only two ABM sites (later reduced to one); to refrain from testing and deploying new ABM technology and, most important, to refrain from interfering with each other's technical means, such as satellites of gathering intelligence on each other's weapon development.

The American and Soviet Governments' willingness to virtually clear their territories of ABM defenses left the population of each of the two countries hostage, in effect, to the others' strategic nuclear force. By inference the treaty recognized that a surprise attack by either side would be too irrational for any sane Government to undertake. Under the conditions that prevailed in 1972, no surprise attack could be expected to destroy the other side's offensive forces; most of the forces would be left undamaged—more than enough to inflict lethal distruction on the aggressor nations populace and civilization. In such a war, there could be no winner.

SALT I also produced a five-year interim agreement on offensive missiles. This left our strategic forces unchanged, while putting a ceiling on further expansion of Soviet land-based missiles—but, in recognition of the Soviets' weaker overall position, permitting further numercial expansion of their sea-based missile force. Today, the forces on both sides stand at about the agreed level—some 1,500 Soviet versus 1,054 American land-based ICBM's, and about 880 Soviet versus 656 American submarine-based ballistic missiles. To these should be added more than 400 American heavy bombers, armed with air-to-ground missiles or gravity bombs, versus 140 rather obsolescent Soviet bombers. The Soviet Union now has about a two-to-one advantage in megatonnage—the total nuclear payload or "throw weight" of its missile forces. But the United States, because of its more extensive MIRVing, has about 7,500 missile warheads, smaller but much more accurate than the Soviet Union's 3,500. This gives the United States a two-to-one advantage in targeted warheads—the truest measure of nuclear strength—quiet apart from our superiority in bombers.

There the situation remains, except for the refinements added by President Ford and Secretary Brezhnev at their 1974 meeting in Vladivostok. The guidelines produced there—never converted to a formal agreement—set a top limit of 2,400 offensive delivery vehicles (whether strategic missiles or bombers) for each side, with the qualification that only 1,320 of these could be MIRV'ed. Our forces today are well below this total, but not much below the MIRVing limit; the Soviet Union's forces are slightly over the total numerically but nowhere near the permitted quota for MIRV's. The destructive potential on each side is staggering—at least a thousand times greater than that of all the bombs exploded during World War II.

In this history of the nuclear arms race, the United States has been first with most of the technological innovations and new weapon systems, except for some systems of defense, to which the Soviet Union has traditionally dedicated a far greater portion of its military effort. The American innovations—such as heavy bombers, solid-fueled missiles (whether land-based or aboard submarines), inertial guidance and MIRV's—were all followed a few years later by the Soviet versions. Soviet political and military writers have argued that the nuclear arms race is in large measure a consequence of this pattern of American innovation—and, hence, solely the fault of the United States. The truth is not that simple.

Soviet military intelligence analysts, reading transcripts of Congressional committee hearings, the budgets and annual "posture statements" of the Secretary of Defense, periodicals like Aviation Week and other open material, have no trouble obtaining fairly accurate knowledge of American forces in being and of what they will be like a few years hence. For us, however, reliable estimates of current Soviet military capabilities were virtually unobtainable a couple of decades ago, and only the advent of sophisticated "national technical means" of information gathering, such as satellites, has rectified this deficiency to some degree. Projection of future Soviet capabilities, however, still depends largely on value judgments, in view of the lack of open public debate on these matters in the Soviet Union, and in view of the Soviet practice of shrouding official policy statements in generalities. By necessity, therefore, American projections, such as the National Intelligence Estimates, involve a wide range of possibilities. The "worst-case" assessment that frequently prevails can often call for anticipatory measures, including a research-and-development project for some novel weapons system. This prudent, if often exaggerated, American reaction has not differed, in essence, from the ways other nations have responded to similar stimuli. It is something the Soviet leaders would have been wise to foresee, since prodding the American military industry into greater production cannot have been part of their objective, and is clearly against their interests, as it is against ours.

On several occasions, as we have noted, American proponents of an uncompromising "worst-case" view of Soviet intentions have sought to swing public opinion behind them. Sometimes their efforts have taken the form of exaggerated stories devoid of technical foundation—current science fiction about particle-beam weapons are an example of the genre—that tend to spread concern. That, in turn, tends to generate additional pressures for a new American arms program to meet the new alleged threat. A heated campaign of this type has now been under way for about a year, led by two private groups—the newly formed Committee on the Present Danger and the older American Security Council (not to be confused with the National Security Council, the President's advisory body).

The campaign was highlighted last December by leaks to the press about a collision between the professional group responsible for the National Intelligence Estimate and what the reports described as the winner of the contest—an ad-hoc "Team B" of outsiders selected by the Ford White House to represent the "hard line" view. "Team B" concluded, to no one's surprise, that there was an imminent threat of Soviet domination of the world. Its findings are said to have been largely dismissed by the Carter Administration, after a detailed study, but the thrust provided by the episode is still very much with us. The views of the hard-liners deserve our careful consideration.

While some members of this school have made much of a possible gap between Soviet and American capabilities, it is Soviet intentions that have dominated the new debate, almost to the exclusion of technical realities. Those who have sounded the alarm anew are fond of citing Soviet military writers to show that the Soviets reject the concept of mutual deterrence, stress the Clausewitz dictum that war is but an extension of diplomacy, and deny that nuclear weapons have ruled out war as a policy option. For instance, it is pointed out, in his 1963 book on military strategy, Soviet Marshal Vassily Sokolovsky argued that nuclear war can be fought and won by the Soviet Union.

Citing Soviet military writers as guides to Soviet military policy is, however, of questionable value. The argument attributed to Sokolovsky has been developed by other Soviet officers as well, but what should one expect from a senior Soviet military figure? Should he tell his juniors that they cannot win a future nuclear war? In the old Stalinist days he could have been stood up against the wall and shot for such heresy.

Even if genuine, belief that nuclear wars can be "won" is not limited to Soviet generals

and marshals. Gen. Curtis LeMay, of Strategic Air Command fame, used to urge on us an ability "to fight and win any war—including a general war." Former Defense Secretary Melvin Laird, in his book "A House Divided" (issued in 1962 and reissued in 1969), wrote that our "strategy must aim at fighting, winning and recovering"; that we must therefore develop "the willingness . . . to wage total nuclear war," and that we must make it "credible to the enemy that we will take the initiative and strike first." Another Defense Secretary of the Nixon era, James Schlesinger, talked repeatedly while in office of "surgical" strikes against military targets, and of other aspects of waging "flexible" nuclear wars.

The plain fact is that it is easy to find examples of aggressive or provocative utterances on both sides. But it is definitely not a fact that they represent the stated policies or known beliefs of the leaders of either country. In any case, statements of political intent, unsupported by capability, should be pretty much discounted. The real question is whether the Soviet Union could arrive at the military capability to bring the United States to its knees.

The hard-line scenario for such an eventuality goes something like this:

By the time it completes deploying its very heavy—and now MIRV'ed—SS–18 ICBM and its somewhat smaller SS–19, the Soviet Union will have the capability to destroy virtually all American ICBM's in their silos, all our bombers not in flight, and all our missile submarines in port—all this at one blow and with the expenditure of only a small part of its missile forces. A massive Soviet civil-defense program, now under way, will provide blast shelters for the country's political and industrial cadres, while the plain people will be told to evacuate the cities and dig fallout shelters for themselves in the countryside—a process, according to Soviet civil-defense manuals, that is to take three days. Since the only remaining American forces would be those armed with small warheads, Soviet cities and industrial plants could be restored within an acceptable period of time after an American retaliatory strike; and, because of the mass-evacuation measures, there would be only 10 million to 20 million Soviet citizens killed—no more than perished during World War II. By contrast, the remaining Soviet strategic forces could destroy American society totally, and kill a large part of the population. Confronted with such a prospect, the United States would concede world hegemony to the Soviet Union without war.

How is one to evaluate this kind of thinking? What, for one thing, is the past record of the prophets? Many of the men who proclaimed the bomber gap, the missile gap and the ABM gap are the very ones who today warn of the civil-defense gap and the Soviet Union's nuclear superiority. Paul Nitze, for example, was chairman of the staff that produced N.S.C. 68 in 1950 and a member of the Gaither panel in 1957. During the missile buildup, the test-ban debates and the ABM scares of the 60's, he was Secretary of the Navy and Deputy Secretary of Defense. He was a member of "Team B" in 1976, and is one of the moving spirits of the Committee on the Present Danger.

Men of Nitze's persuasion are entitled, of course, to their opinion, and no one should question their motives or their good faith. But the American public, in evaluating that opinion, may well ask whether it is a reflection of reality or a repetition of the all too familiar myth-making of the past.

It is difficult to regard these doomsday scenarios as anything more than baseless nightmares. First, an attack on our very hard—that is, blast-and shock-resistant—missile silos would be a highly complex and very uncertain operation. The first nuclear explosions of the first incoming warheads can destroy the other warheads still coming into the target area, and they can do so in ways and for periods of time that cannot be calculated accurately in advance. Some of the targeted missile silos would thus be left undestroyed, and the attacker would have to cope with an unpredictable number of retaliatory ICBM's launched during and after his strike.

Nor would it be a simple matter for the Soviets to catch us off our guard with a surprise attack. We would in all likelihood have advance warnings of a less obvious nature than the trek of millions of Muscovites armed with shovels to the countryside. Our space sensors would be primed to signal a Soviet launch; or they would be put out of commission in advance by Soviet antisatellite systems, and this in itself would alert us to imminent attack. The Soviets well know that, instead of waiting a minute longer, the American President could order our own ICBM's launched against the Soviet Union, leaving empty silos for the Soviets to destroy.

Moreover, an American retaliatory strike by only a portion of our strategic force would inflict damage of such magnitude that the ability of Soviet society to recover from the blow would be in serious question. By the mid-80's, our Polaris, Poseidon and Trident submarines—two-thirds of them safely at sea at all times—will be armed with about 7,000 missile warheads. The smallest of these warheads will have at least three to four times the explosive power of the Hiroshima bomb. The Soviet Union has a fragile transportation system, mostly railroads and ship canals; its heavy industries tend to be concentrated in giant units; its cities are compact. Our submarine-based warheads alone could wreak total destruction on nearly all Soviet habitation centers, industrial plants, railroad yards, canal locks and airfields.

As to the latest evocation of the specter of Soviet civil defense, this rests on gross exaggeration of the program's ability to protect the populace. It is asserted that the Soviets spend five to 10 times more on civil defense than we spend in the United States, and it is true that their manuals imply a state of great preparedness, including plans for the evacuation of their cities. But American civil-defense manuals similarly claim a state of readiness that includes shelters for nearly the entire population; the literature goes into descriptions of blast shelters for millions in mine galleries. Yet it requires only a short sojourn in our cities to realize that the populace, except for the civil-defense officialdom, is so uninvolved in these preparations that it would take a long and arduous effort by the American Government to put the country on a state of civilian preparedness.

Common sense suggests that the Soviet civil-defense program is not unlike our own. But let us, for the sake of argument, accept the claims that our hard-liners make on its behalf. How effective, even then, could the program be? The Soviet populace and the more privileged cadres, on emerging from their shelters shortly after an American strike, would find themselves without transportation; facing starvation; without shelter for the winter in a landscape of ruined cities and towns contaminated by radioactivity and millions of decaying bodies; with tens of millions of victims of radiation sickness to care for, and with epidemics certainly in store.

What rational policymaker would take action inviting consequences of that sort? Our "realists" nonetheless insist that the Soviet Government can be expected to do just that—and to use arms-control agreements as subterfuge for advancing toward global hegemony. What they propose is that we proceed to arm ourselves at an accelerated pace, so as to put the United States in a position of military superiority beyond the Soviets' reach. What awaits us if we succumb to this advice and, in the words of one of the proponents of that course, former Under Secretary of State Eugene Rostow, "arm ourselves to the teeth"?

Some of our actions are likely to be potentially provocative. Thus, by equipping our Minuteman III with the new Mk 12A warheads, and with the ultraprecise guidance systems that are now in an advanced state of development, we would make that missile into an effective weapon against the Soviets' land-based ICBM's, the backbone of their strategic forces. If we then proceed to deploy our MX ICBM—a larger follow-up on the Minuteman that is now under development—it would increase the explosive potential of our offensive force still further. If the MX missiles are made mobile, instead of being stationary, as our silo-based missiles are at present, the Soviets will be left in the dark about the very magnitude of our ICBM forces.

President Carter's decision to deploy the long-range cruise missile, designed to be launched from B–52 bombers some distance from Soviet borders, may be compatible with the mutual-deterrence posture, if kept within the authorized limits. But deploying a much larger number of cruise missiles with long-range capacity—missiles that could be launched from land or sea from just about all points of the compass—would totally negate the mutual monitoring of strategic forces now in effect and could be regarded as highly provocative by the Soviet Union.

The Soviets, of course, will not be indifferent to such moves; we can be sure that, once again, they will respond in kind. Deployment of the MIRV'ed SS–18, and of the still more advanced missile that, according to Defense Secretary Harold Brown, are now under development, will doubtless be stepped up. Mobile ICBM systems can be expected to spread over the land mass of the Soviet Union, leaving us in reciprocal ignorance about the number of missiles involved. After a few years' time, we will learn of the deployment of the Soviet version of our long-range cruise missiles—perhaps aboard ships off our coasts.

In this atmosphere of all-out competition for military superiority, any political crisis that may arise between the United States and the Soviet Union is not likely to be resolved the way the Cuban missile crisis was in 1962. That experience must have been a humiliating one not only for Khrushchev but for the entire Soviet hierarchy. Since then, the Soviets have made major sacrifices for their huge armament effort, designed to assure that never again will they have to back down on a major issue because of military inferiority to the United States. The American people, for their part, have had much difficulty in accepting the Soviet Union as equal to the United States in power terms on the international plane. To give in to the Soviet Union in some future crisis might be infinitely difficult for us. Because of these attitudes both in Washington and in Moscow, the crisis could become unmanagable, in spite of the hot line and the Soviet-American agreement of 1973 not to seek recourse to nuclear arms.

Apart from the risk of war by miscalculation, due to the hair-trigger readiness of the strategic forces of both sides, there are other factors that will make crisis situations increasingly probable if the strategic arms race is allowed to heat up. For example, increased

emphasis on nuclear arms by the superpowers would intensify the urge among nonnuclear states to acquire nuclear weapons. That would create new focuses for the germination of nuclear wars. In that new context, Soviet-American cooperation in measures against nuclear proliferation is likely to collapse. And without such East-West cooperation—evidenced recently by the intense pressure on South Africa to suspend preparations for a nuclear weapons test—nuclear proliferation around the world is certain to accelerate.

Another adverse effect would arise in the area of "conventional" arms. The strategic arms race has been paralleled by an arms race for general armed forces, including tactical (or battefield) nuclear warheads and all types of conventional arms. Advanced conventional weapons and delivery systems have become a substantial part of international trade. Some of the hardware being provided to the nonnuclear countries could be used to deliver nuclear warheads, and this makes acquisition of a nuclear capability more tempting to those states.

Imported modern arms have been used in numerous local wars since the end of World War II. Through the sale of such arms, the superpowers have acquired a patron status in many of these regions—this apart from local conflicts in which the superpowers' involvement was more direct. If the arms race heats up, the patron-client relationship characteristic of the third world will inevitably be emphasized, and the occasions for Soviet-American confrontations, like the one that occurred during the 1973 Mideast war, will be multiplied.

Is all this inevitable? Yes, but only if we fail to make a genuine effort to end or at least curb the Soviet-American arms race and progress toward a more satisfactory state of detente, or peaceful coexistence, than we now have. These are, of course, risks inherent in the effort—though far smaller than the risks of an intensified nuclear arms race—and we should be clear-eyed in making the attempt. We should, for example, assure ourselves of adequate means to verify Soviet compliance with any agreements we reach. But to reach such agreements, we must—unequivocally—concede equal status to the Soviet Union and accept its own legitimate security needs.

The ultimate objective should be the elimination of all nuclear arsenals. But more immediately urgent is the need to stop deploying those new strategic weapon systems that destabilize deterrence and increase tensions by virtue of their provocative character. Top priority should go to an agreement to curtail further deployment of any "counterforce" missiles (those aimed against the other side's missile silos) that have already been developed. A close second should be an agreement to limit missile tests to those necessary for the quality control of deployments already in effect. Both agreements could be monitored by currently accepted, nonintrusive means of verification. Each would go far toward stabilizing the state of mutual deterrence.

High priority should also go to an international treaty for a total nuclear test ban. A move in that direction would signify to the rest of the world that the superpowers are in earnest about ending the nuclear arms race. Constraints against nuclear proliferation would be immeasurably strengthened if the ban covered not only weapons tests but so-called peaceful nuclear explosions—a proposition seemingly agreed to by Brezhnev in a recent speech.

Progress along this road would be rocky, at best, because of the different natures of American and Soviet societies, because of mutual suspicions nurtured by many years of angry confrontation, and because of the opposition of the hard-liners in both camps. President Carter's SALT proposals of last March constituted an important move toward genuine arms control, and it is regrettable that they were summarily rejected by the Soviet Union. Progress, or lack of it, in the current SALT II negotiations will indicate whether the proposals were rejected because they were sprung on the Soviets, as some say; or because some of the specifics were disadvantageous to the Soviets, as Moscow claimed; or because of an intrinsically hard-line position of the Soviet Union, as our own hard-liners assert. One must hope that the initial Soviet reaction is not the final one, that a SALT II agreement will be reached, and that this will be the starting point for a winding down of the arms race and a new and safer era.●

THE ATTACK BY PLO TERRORISTS

● Mr. BAYH. Mr. President, the thoroughly reprehensible and savage attack by PLO terrorists on Israeli civilians this past weekend has prompted the revulsion and condemnation by the United States and the international community it so clearly deserves.

The most recent bloody and barbaric attempt by radical elements in the Arab world is meant not only to intimidate the courageous pople of Israel but also to wreck the peace process itself. However, as history has shown, such cowardly acts serve only to stiffen the resolve of the Israelis to defend their homeland and the determination of Israel's friends to stand steadfastly by her in time of need.

Leaders of conscience, hope, and vision such as Prime Minister Begin of Israel and President Sadat of Egypt will surely continue their search for a just and lasting peace in the Middle East. Despite the wanton fanaticism of the PLO and cruel suffering again inflicted upon innocent men, women, and children this search will go on. A determination has been made that political power will not be allowed to grow out of the barrel of a gun and no amount of PLO brutality will be able to stifle the yearning for peace by the people in the Middle East.●

GOV. WESLEY BOLIN

● Mr. DECONCINI. Mr. President, when Governor Bolin passed away last week, it ended a great era of Arizona's history. His service to the State of Arizona, spanning a period of 40 years, is impressive.

He was born in 1909 on a farm outside of Butler, Mo., and moved to Arizona 61 years ago. Although Arizona was his life, he had regrets that it was not the State of his birth. Wes served the State of Arizona in its highest office, Governor, as well as secretary of state, justice of the peace, and constable. He will always be remembered for his service as secretary of state, which spanned a period of 29 years and six Governors. Howard Pyle, Ernest McFarland, Paul Fannin, Sam Goddard, Jack Williams, and Raul Castro, and each of them was in attendance at his funeral. He was able to work with Governors of both political parties and all of them trusted him.

Whether he was serving as Governor of the State of Arizona or constable of the West Phoenix precinct, his first thoughts were of the people that he represented and he spent hour after hour of his time working with, talking with, and helping those people.

Wesley Bolin served the people of Arizona continuously since I was an infant and during all of those years, he served well. My memories of Wesley Bolin go back to when I was a little boy and his office and my father's were not very far apart. Those memories of Wes were of a good and kind man, epitomizing the "Western image," and one who was always there to help if help was ever needed.

The State of Arizona has suffered a great loss in the passing of Wesley Bolin, but he died doing the thing that he liked best—serving the people of Arizona.●

MALCOLM JOHNSON RETIRES WITH GOOD COUNSEL

● Mr. CHILES. Mr. President, a man who many in Florida thought surely was a permanent fixture on the journalistic scene in Tallahassee, our State capitol, has instead seen fit to retire. He did so because, he said:

I have this awful compulsion to do nothing compulsory. I must try indulging it. Forty-two years of making deadlines is enough.

That is the same kind of logical, basic approach Malcolm Johnson applied to his work and life, and he carried it into the retirement column he wrote as part of the "I Declare" columns he has been writing for years. True to form, he made this column one of value, worth sharing beyond the 25 Florida papers that regularly carry it. Mr. President, I ask unanimous consent that this column, headlined "Newspapering Is a Fun Career," be entered in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NEWSPAPERING IS A FUN CAREER

After more than four decades at it, I still can't imagine being able to enjoy working for a living except as a newspaperman.

That sentiment was written 10 years ago for a publication only in a little leaflet the Tallahassee Democrat produced for high school students who might want to follow our craft.

I've come now to the week I can begin not working for a living, having earned by labor and advancing age a retirement to seeking enjoyment outside the workaday world.

But I wouldn't back down from that advice I gave to the kids casting about for a career. It was recalled when someone read it at a retirement party, as a summation of one man's newspaper career. It went like this:

It's for each to his own taste and talents, fortunately; and if our game isn't for you, hunt one that is because life is too short and pay not sufficient to compensate for an unhappy career.

But for myself, I never see a doctor called out of a party or a meeting or a football game that I don't give a little thanks for whatever

whim or judgment it was switched me, late in college, from pre-med to journalism.

How else could a man of no special position in life have come to meet and know governors, presidents, ambassadors, multi-millionaires, artists, celebrities of sports, science and aeronautics—and quite a few intriguing tramps, rogues and charlatans—in both their success and distress?

What other work could have sat me at the ringside of history in national politics, scentific advance, and natural phenomena? Flying with astronomers to get above the clouds to photograph an eclipse . . . watching the first movies of development of a chicken in the egg . . . talking to a killer moments before his walk to the electric chair . . . reporting the birth of a third political party presidential candidate . . . watching men rise to seats of the mighty, and fall again . . .

My field has been politics, Florida's in particular. Others of our craft have and do find the same excitement in sports, in covering riots and raids, crime and courts, war and economics.

Whatever there is that people want to read and know about, you'll find a person dedicated to learning and writing about it for their benefit—and reaping high satisfaction, even after inevitable frustrations in his pursuit of the news.

And it always will be that way, because people will keep on yearning for information they haven't the time or means to gather firsthand.

We'll need reporters, analysts, interpreters of events and personalities even if we do away with presses and the printed page and someday develop communication by some process of mass mental telepathy.

Also we'll need the salesmen and technicians to relay the information to people at a profit sufficient to pay the cost.

The opportunity in our kind of work, as in others, will multiply with the broadening of human problems and experiences.

"Interested in such a career?" I asked.

Well, it takes burning interest to succeed at it . . . intellectual curiosity bold to the point of brashness . . . a relentless desire to learn and tell . . . and all the tact, courtesy, character and poised confidence that are required to rise above the crowd in any field you choose.

It takes a talent for expression, which a teacher may not be entirely able to impart, a smattering of information about nearly everything under the sun, a touch of healthy skepticism but never a dogmatic disbelief.

Compensation? I know reporters who started with nothing and became rich and famous, some who ended up owning great papers; and others who never attained much affluence, but wouldn't trade places with those who did.

If it's money alone you're looking for, no trade or profession is likely to satisfy you.

Mr. President, Malcolm Johnson has enjoyed an outstanding journalistic career. Following his graduation from the University of Florida in 1936, having abandoned pre-med studies in his junior year because journalism looked more interesting to him he went to work for the Jacksonville Journal, later reporting and editing for the Daytona Beach Sun-Record and the Tallahassee Democrat before joining the Associated Press in Jacksonville in 1939. Later, he moved to AP's Tallahassee bureau to cover State government, staying there 14 years, 11 as bureau chief, before taking the job of editor of the Tallahassee Democrat which he has held the past 23 years.

What kind of journalist has he been? The best testimony is a listing of some of the awards he has gained: Florida Bar award for State's outstanding journalistic contribution to the administration of justice (three times); University of Florida Centennial Award for Meritorious Service; Freedom Foundation citation for editorial writing; Tallahassee Jaycee's award for outstanding contribution to better government; Florida Legislators' Press Award as outstanding columnist; Florida Historical Society's Award of Merit for presentation of Florida history; University of Florida Journalism Honor Award; National Newspaper Association Herrick Editorial Award; Florida Engineering Society Protection of Environment Award.

Malcolm Johnson also found time for involvement in his community, having been president of the Tallahassee Historical Society, the Rotary Club, and the Tallahassee Torch Club. In 1970 he started and still heads Funders, Inc., a nonprofit organization which has been raising funds and sending needy children to camp. Then there's Springtime Tallahassee, a spring celebration he helped found, and the Upsy Daisy Plant Uplift Society, which he was responsible for initiating to salvage plant life that would otherwise we lost to bulldozer "progress."

His "I Declare" column has been the primary means of spreading his reputation beyond Tallahassee, being carried by newspapers around the State. He had long since become an authority in particular on Florida politics and State government, and through the column he shared that knowledge and understanding, often accompanying it with a sting or prod for those of us in public office.

Since I got to know Malcolm Johnson while serving in the State legislature, my respect for him has grown, for there has never been a time I could question his good motives or high principles whether I agreed with him or not. His efforts have served Florida well, and I hope retirement serves him as well.

THREE QUARTERS OF A MONOPOLY

Mr. STEVENS. Mr. President, I recently had occasion to talk to my good friend, the former Senator from Utah, Frank Moss. Senator Moss is still active in public affairs and he is interested in the ongoing FTC investigation of the cereal industry. Ted brought to my attention a recent editorial in the Wall Street Journal entitled, "Three Quarters of a Monopoly." Because of his interest in this matter he has asked that I insert the editorial in the RECORD so other Senators might have a chance to consider it. I am delighted to do so as a courtesy to my old friend and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THREE QUARTERS OF A MONOPOLY

What is good news for Quaker Oats Company must logically be good news for the other ready-to-eat cereal companies in the industry's almost eight-year struggle against the Federal Trade Commission.

Quaker last week won from Harry R. Hinkes, administrative law judge of the FTC, a dismissal as defendant in the agency's "shared monopoly" case. Quaker, he decided, was not sharing in the monopoly. What this leaves us with is the silly proposition that Kellogg, General Foods and General Mills now constitute three quarters of a monopoly. This confounds logic as much as the idea of a three-quarters murder, which suggests to us that the sooner the government dismisses the entire case the sooner it can wipe the egg off its face.

The whole concept of shared monopoly was a silly one from the start, the idea that when a few producers share a major portion of the market they can act as a monopoly even without conspiring or colluding. The government would have us believe the four companies would make believe they were competing, dividing up the market with winks and signals, rigging high prices and preventing new competition from coming in to beat these shared-monopoly prices by spending lavish amounts on advertising that the "little guy" can't afford.

Quaker, we see, gets off this twisted hook because it increased its market share to 9 percent in 1972 from 2 percent in 1960 and because it evidenced "more rivalry" than the others in seeking supermarket shelf space. Thus, says Mr. Hinkes in his dismissal, the "record fails to show that an order against Quaker is necessary to restore competition in the industry."

It does not take a Jesuit to figure out that it takes two to tango and at least two to compete for supermarket shelf space. And if indeed the other three companies were somehow sharing a monopoly, it is not much of a monopoly if it allows a competitor to quadruple its market share. If there is no case against Quaker there's no case against anyone. We think the FTC and even much of its staff must know it has been engaging in foolishness.

And very costly foolishness at that. Quaker estimated that "despite efforts to minimize costs by handling its defense 'in house' (we) estimate the direct cost to it alone to be $1,888,405 aside from the nonquantifiable disruptive effects to Quaker's business and the substantial expenditure of taxpayers' money by Complaint Counsel."

Indeed the FTC's staff architect of this effort, Michael Glassman, almost gave Judge Hinkes no other choice when he testified that relief against Quaker "was not essential and would do very little, only make a marginal contribution to increasing competition in the industry," and relief should be pursued only if "It could be obtained cheaply." Dropping Quaker, he said, "would save the public some money."

Does this mean that our bureaucrats in Washington are beginning to sense that their moments of whimsy, as with the concoction of the shared-monopoly theory, involve extraordinary expenses to the taxpaying and consuming public? FTC Chairman Michael Pertschuk says yes, from now on there will be a "cost-benefit analysis" of each FTC proceeding "to make sure consumers are better off than they were before as a result of our action."

But wait a minute! On the very day Quaker finally got out from under the shared-monopoly suit the Federal Trade Commission announced a brave, new proceeding. An inquiry would begin on whether or not all television advertising aimed at children should be banned altogether. An incredible FTC bureaucrat named Tracy Weston appeared on the Today Show to announce, wild-eyed, that television commer-

cials manipulate little minds and must be prohibited. "Parents are helpless," he said. "Government must help parents, who after all cannot police their children day and night."

Who buys those commercials? Cereal companies. Luther McKinney, Quaker's senior vice president who personally argued the Quaker case on the shared monopoly suit, thus did not get even one day to celebrate. "The advertising ban proceedings," he says. "may take four or five years."●

TIGER TEAGUE: THE VETERANS' FRIEND

● Mr. CRANSTON. Mr. President, Congressman OLIN (TIGER) TEAGUE has received the highest honor the Veterans' Administration can bestow and it was granted—for the first time—to someone outside that Agency.

I have worked with TIGER since I first came to the Senate in 1969 and I learned a great deal from him. I know firsthand just how valuable his contributions have been to the veterans of America.

The Exceptional Service Award, which he received, recognizes the able leadership of TIGER TEAGUE and reads:

In recognition of his unmatched service to the veterans of America and for the invaluable guidance and support he has given the Veterans Administration during his long tenure in the House of Representatives.

TIGER TEAGUE has announced his retirement from the Congress at the end of this session after 32 years. He will be most sorely missed as the veterans' friend and champion.

I would like to share with all of you a letter I sent to TIGER congratulating him on this well-deserved honor. I ask unanimous consent that this letter and the Veterans' Administration press release be printed in the RECORD.

There being no objection, the materials were ordered to be printed in the RECORD, as follows:

COMMITTEE ON VETERANS' AFFAIRS,
Washington, D.C., March 13, 1978.

Hon. OLIN E. TEAGUE,
U.S. House of Representatives,
Washington, D.C.

DEAR TIGER: I want to extend to you my very warmest congratulations as the first person outside the Veterans Administration to receive that agency's Exceptional Service Award.

No one more deserves the high honor, Tiger.

As one of the most decorated combat soldiers of World War II, a disabled veteran, and Chairman of the House Veterans' Affairs Committee for 18 years, you have been the veterans most steadfast friend and ally in the Congress for the last quarter century. As VA Administrator Max Cleland said, the award was made "with admiration and gratitude".

Again, my very best wishes. We in Congress and this nation's veterans will surely miss your support and leadership next year.

With warmest best wishes,

Cordially,

ALAN CRANSTON,
Chairman, Committee on Veterans' Affairs.●

WATERWAY USER CHARGES: KMOX–TV SAYS USER FEES ARE ONLY FAIR

● Mr. DOMENICI. Mr. President, a recent editorial was carried on KMOX–TV in St. Louis, discussing the issue of waterway user charges. KMOX urged the Senate to adopt a waterway user charge proposal broader than the "token" adopted by the House. Specifically, KMOX–TV said the Senate should "adopt the broader reform proposal that would require barges to pay user fees on the waterways built and maintained by our tax money. It is only fair."

Because of the significance of these views from people in an area served by a major inland waterway port and the area of locks and dam 26, I ask unanimous consent that a copy of this editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

WHO PAYS THE TOW?

The U.S. Senate is about to vote on a bill that would make barge operators pay for the free ride they now get on inland waterways, like the Mississippi River. We think that's a good idea.

About $400 million in federal tax money is now spent each year to maintain and improve our inland waterway system. Allowing barges to use that system for free gives them an unfair advantage over financially-troubled railroads in the Mississippi Valley and elsewhere. It just doesn't seem right that our tax dollars should support this advantage.

The White House supports the effort to change this system. The Senate bill would require barges to pay fees along segments of inland waterways equal to 50 percent of construction costs and 100 percent of operating costs of the waterways. Barge operators have countered with a proposal for a six cent per gallon tax on fuel sold along the routes.

President Carter says this fuel tax is merely a token, and we agree. The President says he will withhold approval of all new waterway construction until the system gets the reform it needs. That includes the $432 million reconstruction of the Alton Locks and Dam, which are now so inadequate that grain traffic on the river gets backed up three to four days sometimes.

We urge the Senate to adopt the broader reform proposal that would require barges to pay user fees on the waterways built and maintained by our tax money. It's only fair. If you agree, let your Senators know.●

THE KOREAN INVESTIGATIONS

● Mr. STEVENSON. Mr. President, I have just read the remarks of Senator WEICKER yesterday in which he indicated that the executive branch was aware of a systematic plan by the Republic of Korea to influence the Congress in the early 1970's.

There was such a plan, and, as the Senator says, the agencies of the executive branch were aware of it. The distinguished Senator goes on to say that the executive branch "tracked" the implementation of the plan and was aware of the identity of "bribers" and "bribees." The Senator is correct in suggesting that the executive branch failed to take all the steps available to enforce the law and thwart these efforts to influence American policy. If he has any reason to think that the executive branch under President Carter is not now enforcing the law, or taking such steps, he will, I assume, make his complaints, together with his evidence, known to the Justice Department. The Senator indicates that something should be done about past derelictions, and, of course, he is right.

Mr. President, something is being done. The Select Committee on Ethics is investigating possible improprieties in the Senate, and the Select Committee on Intelligence is investigating the performance of the intelligence community, including the Justice Department, during the events in question. As chairman of the Ethics Committee and a member of the Intelligence Committee, I can assure the Members that these investigations are coordinated and going forward diligently. There are still other aspects of this unfortunate matter which bear looking into. With the efforts in the Senate, together with those in the House, as much as can be done to ascertain the facts is being done. In time, reports, including possible recommendations for remedial action, will be available to the public. In the meantime, we have hard work to do in both the Ethics and Intelligence Committees of the Senate.

I appreciate the kind words yesterday of the distinguished Senators, Messrs. WEICKER, MORGAN, and SCHMITT. Their work on the Ethics Committee has been invaluable. Senator MORGAN, like myself, also serves on the Intelligence Committee. And I am confident that he would agree with me that the lengthy investigation by that committee has been conducted with skill, persistence and a fair measure of success. Finally, Mr. President, a word of commendation is owing to the staffs of both these committees. They are thoroughly professional, nonpartisan, highly capable and unswerving in their determination to ascertain the truth. In time that truth will be told.●

A REVIEW OF MINING IN 1977

● Mr. STEVENS. Mr. President, 1977 was an important year in many legislative areas. Not the least of these was the area of public land legislation; more specifically, that which deals with America's mining industry. Among the different issues considered by Congress during 1977 was the revision of the general mining laws which this country has been operating under for the past century; the designation of new parks, wildlife refuges, forests, and wild and scenic rivers in Alaska; and the passage of surface mining control and reclamation legislation. These are only three of the many matters which most affected the mining industry during 1977.

The Federal Government has also been involved with the mining industry through the publication of administrative regulations. A number of these administrative activities are ongoing and will be further resolved in 1978. In a recent issue of the Mining Congress Journal, a good summary of activities which have affected the mining industry was published. Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PUBLIC LANDS—1977: MINERS EXPERIENCE A YEAR OF UNCERTAINTY AND TURMOIL

1977 began with a new administration and Congress, and for the mining industry the outlook for public land legislation, rulemaking and management was murky. As the year progressed it became more than clear that mining on public lands would continue to be controversial.

The thrust of the new administration's "mining program" rapidly became apparent when it initiated recommendations to repeal the Mining Law of 1872, completely halt onshore leasing with the exception of oil and gas, lock up more than 90 million acres of land in Alaska, restrict use of off-road vehicles, and add large areas to the National Wilderness Preservation System.

The administration was not alone in its zeal to stifle mining on public lands. On Capitol Hill the Congress was considering legislative proposals that would add several million acres to the Wilderness System, withdraw almost 150 million acres of land in Alaska from mineral entry and repeal the mining law.

Notwithstanding this onslaught, the mining industry was able to effectively muster opposition at the grassroots level to these attempts to make it more difficult to mine on public lands.

What follows is a closer look at some of the major public land issues of 1977.

AMC PROPOSAL TO MODERNIZE MINING LAW GAINS SUPPORT

Addressing members of the American Mining Congress at the association's annual meeting in January 1977, Rep. Morris K. Udall (D–Ariz.), chairman of the House Interior Committee, stated his belief that a new mining law should be written and recommended legislation that would establish a leasing system for hard-rock minerals. Nine months later Udall was voicing support for retention of a modified location/patent system, an approach recommended by the American Mining Congress, and also saying he would work diligently and aggressively to defeat proposals that would establish a leasing system for hard-rock minerals.

Udall's switch is a result of increasing pressure on him to defer "to the needs and judgment of the people I represent." It is also indicative that pressure to change or repeal the Mining Law of 1872 is intense and cannot be expected to abate in the near future.

The AMC-supported bill to reform the general mining laws was introduced as H.R. 5831 by Rep. Philip E. Ruppe (R-Mich.), the ranking Republican on the House Interior Committee's Mines and Mining Subcommittee, and as S. 2210 by Sen. James A. McClure (R-Idaho). The bill, drafted by the AMC Public Lands Committee, would establish a modified location/patent system closely modeled on the recommendations of the Public Land Law Review Commission.

Bills to repeal the Mining Law and establish a leasing system for hard-rock minerals have been introduced. H.R. 9292 and S. 2133 embody the proposals of the administration. President Carter, in his environmental message to Congress, called for "development of legislation to replace the anachronistic Mining Law of 1872 with one that establishes a leasing system for hard-rock minerals." According to the President, the law is outdated and inadequate and fails to set forth clear authority for establishing environmental standards.

The administration-backed bills would establish a leasing system for hard-rock minerals with explicit federal discretionary authority over exploration and development on public lands. Strict standards would be set for environmental protection and reclamation, with a requirement for approval of operation and reclamation plans before mining could begin. These bills also require royalties and integration of mining into land use plans.

Sen. Lee Metcalf (D-Mont.), chairman of the Subcommittee on Public Lands and Resources, Senate Committee on Energy and Natural Resources, introduced S. 1248. This bill, which would establish a leasing system for hard-rock minerals, is similar in philosophy to the administration approach and contains all of the deficiencies of the administration bill.

The Subcommittee on Mines and Mining of the House Interior Committee held three days of hearings in October on H.R. 5831 and H.R. 9292. Howard L. Edwards, chairman of the AMC Public Lands Committee, told the committee that the ability of the domestic mining industry to explore for and develop minerals would be greatly affected by the outcome of congressional deliberations. He outlined the problems that would be encountered under a federal leasing system, stating that such a system for hard-rock minerals would be tantamount to a ban on new exploration for years. Edwards stated why the AMC believes that H.R. 5831 is a sound and sensible approach to mining law revision, saying that the AMC would endorse new language to be added to H.R. 5831 that would provide for reasonable environmental regulations and protection of the surface owner over federally owned minerals.

The committee gave Secretary of the Interior Cecil Andrus a thorough going over, charging that H.R. 9292 would be another severe blow to the domestic mining industry, which already finds itself in severe difficulties resulting in part from ill-conceived legislation. It was pointed out to Andrus that, according to Interior Department reports, there is actually more land withdrawn from mineral exploration and development under the mineral leasing laws than under the general mining laws. He was hard put to explain why a similar situation would not occur under a new leasing law for hard-rock minerals.

Senate and House committees have announced that field hearings will be scheduled, and further congressional activity can be expected this year.

THE FUTURE OF ALASKA: FOR WHAT AND FOR WHOM?

The Alaska Native Claims Settlement Act, among other things, authorized the study of up to 80 million acres of land as potential additions to the National Park, Forest, Wildlife Refuge and Wild and Scenic Rivers Systems. A bill introduced in Congress, H.R. 39, would dispose of these so-called "d–2 lands" in a way that presents a grave threat to the economic potential Alaska offers the whole nation. Under its provisions more than 100 million acres would be designated as wilderness and thus closed to mining.

All geologic evidence indicates that Alaska is rich in minerals. Thirty-three minerals of strategic importance to the United States are found there, many in known commercial quantities.

The House Interior Subcommittee on General Oversight and Alaska Lands held nationwide hearings on Alaska land bills during the course of the year. Howard L. Edwards, chairman of the AMC Public Lands Committee, represented AMC before the subcommittee. He pointed out that Alaska's mineral potential is unknown and should be inventoried so that land use in Alaska can be adequately planned to maximize the return to society from its public lands. "To the extent Congress closes the door to mineral activity in Alaska, Congress is locking away an uninventoried resource." He expressed concern about the long-term mineral needs of the nation. Edwards emphasized that only a true multiple-use administrative system would provide the flexibility required to properly evaluate the mineral potential of the virtually unexplored areas of the state.

Washington hearings originally scheduled for four days were extended to seven days to accommodate the flood of witnesses. Additional hearings were held in Chicago, Atlanta, Denver, San Francisco, Seattle, Sitka, Juneau, Ketchikan, Anchorage and Fairbanks. Hearings in the "lower 48" were generally dominated by preservationist groups with the exception of the Seattle hearing, where pickets appeared in opposition to H.R. 39 and where there was considerable testimony in opposition to the bill.

In contrast, the hearings in Alaska produced overwhelming testimony in opposition to H.R. 39, primarily centering around job losses from a curtailed timber and mining industry that would result from passage of the bill.

In September the Carter administration made its recommendations on d-2 lands legislation. Under the proposal, some 92 million acres of federal land would be put into the "four systems" as follows: (1) National Park System, 41.7 million acres; (2) National Wildlife Refuges, 45.1 million acres; (3) Wild and Scenic Rivers, 2.45 million acres, and (4) National Forest System, 2.5 million acres.

Rep. Don Young (R-AK) submitted an alternate proposal that would designate some 16 million acres for addition to the National Park System, 11 million acres to the National Refuge System, 9.6 million acres to the National Forest System, and 600,000 acres to the Wild and Scenic Rivers System. Existing d-2 withdrawals in areas not covered by these classifications would be extended for five years with an inventory of surface and subsurface values mandated.

The Alaska lands issue will be at the top of the congressional agenda this year since 1978 is the deadline set by Congress for its resolution. Uncertainty about the future of the d-2 lands robs exploration of all incentives. They should not be padlocked before finding out what is inside. Economic growth and environmental protection can exist harmoniously in Alaska.

REPORTS CONFIRM EXCESS WITHDRAWALS, BUT THEY CONTINUE UNABATED

Two reports published in 1977 confirmed previous allegations that a large proportion of federal land is withdrawn from mining and that the federal government has no accurate inventory of the total withdrawn.

The 1977 report of the Secretary of the Interior under the Mining and Minerals Policy Act of 1970 concluded that until the status of lands affected by the Alaska Native Claims Settlement Act is decided, about two-thirds of federal lands have moderate to prohibitive restrictions on mineral exploration and development. For lands not affected by that act, about 50 percent of federal lands have similar restrictions. The report pointed out that severe restrictions on mineral development are likely to continue.

"Because it is impossible to predict where valuable minerals may be discovered in the future, there can be no means of proving or disproving that these restrictions on mineral development will reduce domestic mineral production. In any event, the effect of these restrictions will not be felt for years, as existing mineral deposits are depleted and as fewer new discoveries are made because of restrictions on mineral development on federal lands. At that point, a decision to reverse the trend and again allow mineral exploration on federal lands will take years to show significant results because of the inherently long lags in the exploration and discovery process. In addition to the uncertainty of when a discovery will be made, it sometimes takes as much as 20 years between the initial identification of a promis-

ing deposit and the start of commercial production."

In July the report of the Interior Department's Task Force on The Availability of Federally Owned Mineral Lands was released. Interior Secretary Andrus, obviously displeased with its conclusions, then published the following memorandum: "The Task Force on Mineral Lands Availability was created by the previous administration. This report was prepared by that task force and was submitted to the department. As such, its findings and recommendations do not represent the official views or policy of the Department of the Interior." Printing of additional copies of the report reportedly has been frozen.

What caused the Secretary to disavow the report?

The task force pointed out that hidden mineral deposits are difficult to evaluate and finding such deposits requires access to large areas for mineral exploration while only small areas are needed for development. Because of the rarity of economic mineral deposits, their occurrence usually gives high economic values to land.

It further states that federal lands play a significant role in supplying mineral needs; and it summarizes the present estimates of federal mineral lands available, which has substantially decreased in recent years.

The task force recommended that a comprehensive inventory of the availability of federal lands be prepared.

Included among the findings and recommendations of the task force are the following:

Withdrawal inventory and information base—The task force found that increasing restrictions on the amount of land available for mineral exploration will reduce future mineral production from such lands. The lack of a comprehensive inventory of withdrawn lands has resulted in an inadequate information base for making land use decisions. To correct this deficiency, the task force recommended preparation of an inventory of federal lands where mineral exploration and development are prohibited or restricted.

Specific problem areas of formal and informal withdrawal process—The task force found that administrative and other decisions to withdraw land have been made without knowledge of the cumulative effects of such decisions. It stated that the Federal Land Policy and Management Act of 1976 will remove many of the problems encountered by the formal withdrawal process. The task force recommended that all land use decisions that excluded mineral development on 5,000 acres or more should be submitted for review and recommendation to the Geological Survey and Bureau of Mines prior to a final decision.

Mining Law—The task force found that one reason for many formal withdrawals was the belief that mining activity could not be controlled under the 1872 Mining Law. It found to the contrary that mining operations can be regulated, although the regulations now in effect by the Forest Service and National Park Service and proposed by the Bureau of Land Management will not solve the problem associated with patenting. The task force recommended amending the Mining Law to spell out more clearly the scope of the Secretary's authority to regulate access and mining operations and to amend the patenting provisions so that a patent can be granted only to the mineral estate.

Improved mineral assessments—The task force found that mineral assessments are frequently not sufficient for use in making land use decisions. It recommended that the department institute standardized procedures for preparing and reviewing mineral assessments of areas proposed for withdawal.

Improved land use decision-making—The task force found that mineral assessments often were duplicated or inadequately considered during the withdrawal decision-making process. It recommended that complete information should be available when making land use decisions.

Withdrawal review—The task force found that the present system for reviewing existing withdrawals was ineffective. It recommended that an effective withdrawal review program be implemented at an early date.

Increased revocation and restoration of withdrawn lands—The task force found that a large backlog of applications to revoke outstanding withdrawals exists. It recommended that all such applications be processed within 18 months from submission and that sufficient funds be made available so that processing can be made current.

The Forest Service in June announced its intent to restudy 56 million acres of roadless areas for identification of wilderness characteristics and potential recommendations for additions to the National Wilderness Preservation System.

To explain the program, the Department of Agriculture held an "exploratory get together" with organizations interested in management of national forest lands. Present from the Department of Agriculture were Assistant Secretary Rupert Cutler, Forest Service Chief John R. McGuire and Deputy Chief Tom Nelson.

Cutler opened the session with an outline of the new program which he said was being undertaken because of concern with the slow pace of the Forest Service land use planning process and because it was necessary to complete the Wilderness System.

Environmental groups were thinking of an eventual 40 to 60 million-acre wilderness system when the Wilderness Act passed, Cutler said, of which the national forests would contribute 30 million acres. "Progress has been agonizingly slow to complete the system."

During the first Forest Service review of roadless areas, 56 million acres were identified for further study. It was agreed that impact statements would be completed on the roadless areas identified for potential inclusion in the Wilderness System (some 12.6 million acres), but according to Cutler, so many steps have been added to the process that it could take 10 or more years to reach a decision. "Some areas simply don't need all these steps."

So as to be able to respond to wilderness groups' pleas for more wilderness and to concern expressed by industry that thousands of acres would be tied up during this period, Cutler ordered the Forest Service to telescope the process which he characterized as "all planning and no decisions."

Cutler expressed the belief that the only way to make "multiple use" operational is to identify "key values." By doing this, he said, we can move away from the "glib generality" of multiple use. Cutler stressed that the key values must be identified on these 56 million acres in faster fashion. "In most cases, with the possible exception of mineral data, we have a good data base to develop a set of alternatives to submit to the interagency review."

The study schedule was announced as follows:

June 1977—Begin review process

October 1, 1977—Complete mapping and inventory with concomitant public involvement (workshops)

February 1, 1978—Completion of analysis and development of alternatives

March 1978—Complete draft environmental impact statement

August 1978—Publish final environmental statement.

The Forest Service was asked that, in view of the statement that an adequate data base is available, with the possible exception of mineral data, how it expects to obtain adequate data on minerals within one year on some 56 million acres of land, presuming that minerals are considered a "key value." Cutler replied that this would probably form the basis for putting some areas into the wilderness study category. If the area appears to have wilderness potential, he stated, but there is insufficient mineral information available, it would "probably" be put in the study category.

Under questioning Cutler also admitted that the Resources Planning Act passed by Congress envisions some 24 to 30 million acres of national forest wilderness. He is going to see if that shouldn't be expanded. Cutler also suggested that wilderness organizations review their policies as to where priorities lie. We should get the "good stuff" into the system soon, he said. He also stated that "we" ought to proceed in recognition that there is a limit at some point in the number of acres of wilderness that should be included in the system.

In November the Forest Service announced that about 65.7 million acres in 1,920 areas had been identified as roadless and undeveloped within the National Forest System. These areas will be evaluated to determine which are best suited for wilderness designation and which should be devoted to other uses. Of the areas identified, 1,615 covering 63.4 million acres are in the West, and they include 16 areas in national grasslands. The other 305 areas cover 2.3 million acres in eastern national forests.

Evaluation of the roadless areas began immediately. This evaluation will examine "the wilderness, social and economic values of the roadless areas to determine which should contribute to a total federal wilderness system and which have other resource values that would indicate they should be used for nonwilderness purposes."

A draft environmental statement will be issued in late spring 1978 on alternative proposals for wilderness and nonwilderness designations. It will include information on other resource values, as well as wilderness qualities, in alternative proposals. The public will be given the opportunity to comment on the alternative proposals next summer.

A final environmental statement will be issued later this year and will include decisions on which areas should be proposed to Congress for wilderness classification and which will be designated nonwilderness areas. Areas lacking resource information and on which no decision is reached will be studied further through the national forest land management planning process.

A one-million-acres-plus withdrawal will be accomplished by enactment of H.R. 3454, The Endangered American Wilderness Act. It is now under congressional consideration. The legislation in effect, would designate "instant" wilderness without benefit of the study and review procedures established and carried out for other areas within national forests. AMC strenuously objected to enactment of H.R. 3454 as follows:

"We . . . suggest that if consideration is to be given to these areas for possible addition to the National Wilderness Preservation System, established review and study procedures be followed, including adequate and accurate mineral surveys. Wilderness is not costless in today's world. The values foregone when wilderness is created should be put before the public. This was the intent of the review, study and public hearing process."

BLM ANGERS MINERS

Regulations to control surface effects of mineral development on locatable lands, published by the Bureau of Land Management in December 1976, continued to be the object of strong objections from miners. BLM received several thousand comments on the proposed rulemaking and, following extensive public hearings, retired to the drawing room to redraft the regulations. By the end of 1977, the new proposal was not yet ready.

Twelve U.S. senators found the regulations so objectionable that they cosigned a letter to BLM Director Curt Berklund and recommended that:

Field hearings be held to receive comments on the regulations followed by issuance of modified proposed regulations with final rulemaking 30 to 60 days later.

Regulations take effect after the end of the current field season so as not to interfere with this year's assessment work requirements.

The Bureau of Land Management work closely with the Forest Service to minimize conflicts between the agencies' respective mining regulations.

The Department of the Interior published in the Federal Register final regulations pertaining to recordation of mining claims.

The department disagreed with the contention of the AMC that it had exceeded the authority granted it in Section 314 of the BLM Organic Act. "... [C]omments objecting to the regulations as beyond the intent of the Act address the wrong issue [instead of regulatory authority of the department under the Mining Law of 1872] and are not accepted."

The rules requiring recordation of mining claims are, in the opinion of many people, including some members of Congress, invalid because they go far beyond the intent of the BLM Organic Act which they are supposed to implement. The legality of these regulations has been challenged.

Bureau of Land Management officials were called before the Subcommittee on Indian Affairs and Public Lands of the House Interior Committee in October and questioned on implementation of the BLM Organic Act.

Guy R. Martin, Assistant Secretary of the Interior for Land and Water Resources, in his prepared statement, said that procedures for public participation in rulemaking need improvement. In regard to the wilderness review required under the BLM Organic Act, he said a draft wilderness policy is now being prepared that will include a suggested review procedure covering criteria to be used to identify wilderness characteristics and define wilderness study areas.

He estimated that 120 million roadless acres and 13,000 roadless islands would be studied for wilderness suitability. "It is our intention not to utilize a purist concept in identifying study areas." According to Martin, man-made features may be included in study areas as long as they do not detract from wilderness values.

Committee members gave Martin and BLM officials a thorough grilling, covering implementation of several provisions of the BLM Organic Act. The wilderness study was the primary topic. Rep. Jim Santini (D-NV) suggested that bureaucratic imagination is being invited and expressed concern that provisions of the 1964 Wilderness Act were being degraded and that the intent of Congress is being subverted.

THE AMERICAN MINER—AN ENDANGERED SPECIES?

Oversight hearings on the Endangered Species Act of 1973 were conducted by the Resource Protection Subcommittee of the Senate Committee on Environment and Public Works in July. The announced purpose was to explore the progress and problems which have been encountered in administration of the act.

The witnesses on behalf of the administration emphasized that amendments to the act were not necessary and were particularly defensive of Section 7. That section requires all federal agencies to insure that their actions do not jeopardize the continued existence of endangered or threatened species or result in the destruction of critical habitats.

They stressed that almost all the conflicts created by Section 7 had been resolved through consultation with the Endangered Species Office of the U.S. Fish and Wildlife Service. The only admitted unresolved conflict was the Tellico Dam case. It was suggested that congressional resolution was necessary in that case.

Jerry L. Haggard of Evans, Kitchel and Jenckes testified on behalf of AMC. In his testimony he stressed the need for amendments to the act, particularly Section 7. Sen. Malcolm Wallop (R-WY) requested Haggard to supply for the record a discussion of specific actions which have been prevented by the act.

The subcommittee is currently engaged in a review of the hearing records. It has not been decided whether amendments to the act are necessary or whether, if amendments are necessary, they should be limited to the Tellico Dam case.

THE TRAGIC STATE OF MINERAL LEASING

The mineral leasing situation is nicely summed up in a memorandum from Secretary of the Interior Andrus to the director of BLM issued early in the year which states: "Until further notice, there will be no leases issued for coal, oil shale, oil and gas on the OCS, uranium, phosphate, potash or sodium without my express approval. You may continue to process upland oil and gas leases as usual."

Most of the controversy swirled around coal. In September the U.S. District Court for the District of Columbia, in Natural Resources Defense Council v. Hughes, held that the environmental impact statement on the proposed federal coal leasing program (coal programmatic) prepared by the Department of the Interior was inadequate and enjoined the department from taking, directly or indirectly, any steps to implement the new coal leasing program except:

(1) When the proposed lease is required to maintain an existing mining operation at present levels of production; or

(2) When the proposed lease is necessary to provide reserves to meet existing contracts, and

(3) The reserves of the proposed lease are not greater than required to meet the above two criteria for more than three years in the future.

The coal programmatic was held inadequate because the Energy Minerals Activity Recommendation System (EMARS) was not adequately explained and lack of an alternative to present policy. The Interior Department was directed to issue a press release, publish a notice in the Federal Register and take other appropriate steps announcing that Interior will reevaluate its coal leasing program and policy and that it will accept comments on the final EIS for a period of 60 days. Subsequently, Interior must publish a draft supplement to the final EIS seeking to correct the defects with a 45-day comment period. Thereafter, Interior is to prepare a new final environmental impact statement.

Coal leasing appears to remain at a standstill.

In October the Senate Committee on Energy and Natural Resources began a series of oversight hearings on the coal leasing program and general impacts of coal development in the West. Guy Martin, Assistant Secretary of the Interior, Land and Water Resources, estimated that leasing of coal could begin in mid-1980.

The Department of the Interior ruled in August that prospecting permits issued for coal and phosphate under the Mineral Leasing Act of 1920 would be invalid if mining claims have been filed covering the same ground for minerals located under the Mining Law of 1872.

Solicitor Leo M. Krulitz concluded in an opinion that the Mineral Leasing Act authorizes issuance of prospecting permits only in "unclaimed areas." The ruling does not affect noncompetitive preference-right leases already issued. However, the opinion could invalidate in part many of 183 pending preference-right lease applications covering 466,000 acres and nine billion tons of coal, and 40 preference-right lease applications covering 35,000 acres and 130 million tons of phosphate. Pending applications will be reviewed on a case-by-case basis.

Krulitz stated that Congress has said prospecting permits for coal and phosphate should be issued only where little mineral information is available. According to Krulitz, areas covered by mining claims have already been explored, and Congress did not intend to authorize issuance of prospecting permits and ultimately noncompetitive leases in such areas.

The decision would not totally invalidate an existing prospecting permit if only part of the area covered by the permit includes a mining claim, but it would invalidate that portion where a prior mining claim exists.

The Department of the Interior in January 1977 proposed to amend 43 CFR in two respects: (1) provide that a sodium, phosphate, potash or sulfur preference-right lease applicant or lessee may in certain situations exchange the preference-right lease entitled to or held to a mineral lease to another deposit of the same mineral of comparable value, and (2) provide that a coal lessee or preference-right lease applicant may in certain circumstances relinquish same in exchange for bidding rights equal to the fair market value of the relinquished leasehold.

The reason given for seeking these regulations, according to the Interior Department, is "to remedy those situations in which, due to newly identified or newly established environmental land or resource values, operations on an existing or a preference-right lease are not regarded as in the public interest."

In September 1976 the courts ordered the Secretary of the Interior to issue phosphate leases in the Osceola National Forest in Florida to Kerr-McGee Chemical Corp. In March 1977 the district court reaffirmed that order and directed the department to take the necessary steps to comply. The government has filed a notice of appeal and asked for a stay of the decision.

OUTLOOK FOR 1978 IS CLOUDY

1978 will probably bring a repeat of 1977. Congressional action will continue on Mining Law Revision, Alaska land legislation and other withdrawal issues.

The executive branch will no doubt continue the ban on onshore hard mineral leasing. BLM is expected to repropose its surface management regulations, and the final recommendations of the Forest Service for inclusion of areas in the National Wilderness Preservation System should become known.●

CONSUMER AND AGRICULTURAL PROTECTION ACT OF 1978

● Mr. BAYH. Mr. President, since January, when the current organized effort

by farmers first began in Washington. much has been said about problems on the farms. There have been long discussions in every Senate office and numerous speeches in this Chamber. Now, it is the middle of March and across the country it is time to start planning this year's crops. In part of the South it is already time to return to the fields. Here, in the Nation's Capitol, it is due time that Congress take action to improve the agricultural crisis. The provisions of the 1977 farm bill have proven to be inadequate for this emergency situation. We must establish a responsible pricing policy to help farmers produce adequate food supplies and earn fair incomes.

Today, I am pleased to cosponsor S. 2626, a bill authored by my distinguished colleagues from Arkansas, Senator BUMPERS and Senator HODGES. S. 2626, through commodity loans and reserves, will establish equitable prices and provide needed price stability in domestic and foreign markets. I have long believed that we should seek a farm policy that will assure market price levels which are high enough to cover reasonable production costs and provide reasonable profits to family farmers. This price policy must be coupled with substantial crop reductions when necessary to insure that the taxpayers do not carry the burden of buying huge quantities of farm produce that may be too great for the market to absorb. The policy must also provide for farmer-held grain reserves to meet foreign trade demands as well as protect us from possible domestic shortages.

Although I have reservations about certain aspects of the bill, I strongly support the overall intent to aid America's farmers and the specific intent to establish a farm price level that will allow farmers to make a reasonable living. The exact composition and authority of the Agricultural Governors Board created by S. 2626, and the bill's effect on international trade should be considered carefully by the Committee on Agriculture. The anticipated powers of the Board should be defined more precisely and limited in some respects, especially where those powers may overlap with the responsibilities now shared by other bodies. For example, we must avoid overly restrictive import duties on any products which might decrease our foreign markets in other products. However, import policies should remove unfair advantages which now exist for some foreign producers. I am confident that these and other areas of question can be worked out in committee.

If we want to preserve our productive family farms and secure foods supplies, we must act quickly. Congress must take steps to avert the potential disaster which threatens all segments of the economy. I encourage my colleagues now to lend their support to the pricing policies contained in S. 2626. American agriculture and indeed the entire American economy cannot wait much longer.●

SENATOR HASKELL AND SOCIAL SECURITY REFORM

● Mr. HATHAWAY. Mr. President, Senator FLOYD HASKELL is a close friend and valuable colleague on the Senate Finance Committee. He is a champion of both social security reform and tax reform.

Senator HASKELL speaks eloquently of the need to infuse general Treasury revenues into the social security system. He has supported legislation to revise the current payroll financing of the program.

However, through a clerical error Senator HASKELL has been erroneously listed as a cosponsor of S. 2501.

He has asked that the sponsors of this bill be revised to delete his name.●

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

ENVIRONMENTAL PROTECTION AGENCY

Mr. ROBERT C. BYRD. Mr. President, the Committee on Environment and Public Works has reported favorably today the nomination of Stephen John Gage, of Maryland, to be an Assistant Administrator of the Environmental Protection Agency. I ask unanimous consent that the Senate proceed, notwithstanding the 1-day rule, to the consideration of that nomination.

Mr. BAKER. Mr. President, reserving the right to object, and will not object, I merely want to say that we have cleared this nominee, this nomination, and this course of action in proceeding, and we have no objection to proceeding in this manner.

The PRESIDING OFFICER. The nomination will be stated.

The second assistant legislative clerk read the nomination of Stephen John Gage, of Maryland, to be an Assistant Administrator of the Environmental Protection Agency.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, in this case I will not move to reconsider.

Mr. President, I ask unanimous consent that the Senate proceed to the consideration of two nominations on the Executive Calendar under New Reports, James C. Cissell and William M. Isaac.

The PRESIDING OFFICER. The nominations will be stated.

DEPARTMENT OF JUSTICE

The second assistant legislative clerk read the nomination of James C. Cissell, of Ohio, to be U.S. attorney for the southern district of Ohio.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FEDERAL DEPOSIT INSURANCE CORPORATION

The second assistant legislative clerk read the nomination of William M. Isaac, of Kentucky, to be a member of the board of directors of the Federal Deposit Insurance Corporation.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask that the President be notified of the confirmation of the nominations of Mr. Cissell and Mr. Isaac.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene tomorrow at 11 a.m. After the prayer, Mr. LEAHY will be recognized, as in legislative session, for not to exceed 15 minutes, after which the Senate will resume its consideration of the Resolution of Ratification on the Neutrality Treaty, at which time Mr. FORD will be recognized for not to exceed 15 minutes, to be followed by Mr. RIEGLE for not to exceed 15 minutes, to be followed by Mr. LONG for not to exceed 30 minutes, to be followed by Mr. GARN and Mr. HATCH for not to exceed 45 minutes between the two Senators, to be followed by Mr. BARTLETT for not to exceed 30 minutes, after which the question will be on the adoption of the amendment to the Resolution of Ratification offered by Mr. NUNN and Mr. BELLMON. Rollcall votes will occur during tomorrow.

RECESS UNTIL 11 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess, in executive session, until the hour of 11 o'clock a.m. tomorrow.

The motion was agreed to; and at 6:50 p.m. the Senate, in executive session, recessed until Wednesday, March 15, 1978, at 11 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 14, 1978:

DEPARTMENT OF JUSTICE

James R. Williams, of Ohio, to be U.S. attorney for the northern district of Ohio for the term of 4 years.

Richard W. Nehring, of Iowa, to be U.S. marshal for the southern district of Iowa for the term of 4 years.

James C. Cissell, of Ohio, to be U.S. attorney for the southern district of Ohio for the term of 4 years.

FEDERAL DEPOSIT INSURANCE CORPORATION

William M. Isaac, of Kentucky, to be a member of the Board of Directors of the Federal Deposit Insurance Corporation for a term of 6 years.

ENVIRONMENTAL PROTECTION AGENCY

Stephen John Gage, of Maryland, to be an Assistant Administrator of the Environmental Protection Agency.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES—*Tuesday, March 14, 1978*

The House met at 12 o'clock noon.

Rabbi Morris D. Rosenblatt, Congregation K'neseth Israel, Annapolis, Md., offered the following prayer:

Paraphrasing the 23d Psalm:

The Lord is my pacesetter, I shall not rush
He makes me pause and rest for quiet moments
He provides me with images of still waters which restore my serenity.
He leads me in ways of efficiency through calmness of mind.
Even though I am pressured in many directions each day,
I will not fear, for His presence is with me.
His timelessness, His all importance will keep me in balance
He prepares refreshment and renewal in the midst of my busy hours,
By anointing my mind with oils of tranquility.
My cup of joyous energy runneth over,
Surely harmony and effectiveness shall be the fruits of my labors
For I shall walk in the pace of my Lord and dwell in His house forever.
His house is your house
His house is wherever you will let him in.
His house is wherever we praise his name.

Amen.

CALL OF THE HOUSE

Mr. RHODES. Mr. Speaker, under rule I, clause 1, of the rules of the House, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Without objection, a call of the House is ordered.

There was no objection.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 138]

Anderson, Ill.	Garcia	Risenhoover
Andrews, N.C.	Goldwater	Rogers
Archer	Harrington	Rostenkowski
Ashley	Harsha	Ruppe
Beard, R.I.	Heckler	Santini
Beilenson	Hubbard	Scheuer
Bingham	Jones, Okla.	Shipley
Bonker	Kastenmeier	Shuster
Breaux	Kindness	Skubitz
Chappell	Krueger	St Germain
Collins, Ill.	Long, La.	Steiger
Conyers	Lujan	Teague
Cornwell	McCloskey	Thornton
Cunningham	McHugh	Tsongas
D'Amours	McKinney	Tucker
Davis	Mathis	Waxman
Dent	Metcalfe	Weaver
Diggs	Meyner	Wiggins
Drinan	Nix	Wilson, C. H.
English	Nolan	Wilson, Tex.
Erlenborn	Pressler	Young, Tex.

The SPEAKER pro tempore (Mr. MEEDS). On this rollcall 371 Members have recorded their presence by electronic device, a quorum.

Without objection, further proceedings under the call will be dispensed with.

Mr. RHODES. Mr. Speaker, reserving the right to object, yesterday the House Administration Committee voted out a bill on campaign financing that can only be described as a legislative assassination of the minority party and the two-party system. It was born without warning, and voted out of committee without hearings. It is designed to change the rules in the middle of the game so as to establish the present majority as a permanent majority. The Democratic leadership apparently has decided that even two-thirds of the House and the present set of campaign regulations, which they wrote, have not provided enough of an advantage. They want more. At stake here is not only the two-party system. This move also threatens representative government as we know it. A permanent and fixed majority, locked into office with legislative keys it fashioned, is a great deal less concerned with, and accountable to, the public.

The newly displayed predatory nature of the majority requires that the minority now act, not only to protect itself, but to protect the two-party system and the very concept of representative government. We will demonstrate our concern by invoking the rules of the House, and by demonstrating the efficacy of those rules. Our purpose is not delay for the sake of delay. It is the only way we have to call public attention to the unconscionable, unfair, and uncalled-for assault the majority is mounting. Our hope is that this delay, and increasing public attention, will assist the majority in coming to its senses and calling a halt to this unwarranted attack. Let me underscore that the actions of the minority are not aimed at any measure now on the floor or to be on the floor. They are a direct consequence of the disregard for political responsibility shown by the majority in the measure voted out by the House Administration Committee. The great strength of the American political system has been the willingness and ability of the two major parties to compete vigorously, but in an atmosphere of "live and let live." Now, however, the majority has seen fit to draw the sword with intent to kill, and the minority must take what steps it can to protect itself and our two-party system. The minority has long been the anvil upon which the majority has shaped the legislation emerging from this body. We would hope that there can be a return to an atmosphere under which the minority and majority can work in their own ways for the good of the country. But until then, we intend to draw upon every resource at our command to preserve the American two-party system.

Mr. MICHEL. Mr. Speaker, further reserving the right to object, far be it from me to interfere in the internal affairs of the majority party, but I would like to suggest a new party symbol.

A new symbol is obviously needed because the majority is going all out to change the campaign spending laws to its advantage. This crude power grab leaves no doubt that the donkey, traditional symbol though it may be, no longer suffices to capture the true spirit of the Democratic Party.

Let me first suggest a steamroller. That would capture the essence of this reform. It would more accurately portray to the American people how the 2-to-1 Democrat majority operates around here.

But perhaps the majority wishes to retain an animal as its symbol. If so, why not the dinosaur? It has all of the attributes of an overbloated majority party: a powerful, unwieldy body, a tiny brain, and an inability to adapt to changing circumstances.

Admittedly, for those of us in the minority, it is a fight for our survival and we are now being forced to utilize every parliamentary device to defend ourselves.

The majority party has positioned itself outside the boundaries of fair play and basic justice.

Perhaps, the dinosaur best represents the majority party which by its action in the last few days has to be regarded as the first step toward its planned extinction of our Republican Party.

Mr. Speaker, for those reasons I must object to dispensing with further proceedings under the call.

The SPEAKER pro tempore. Objection is heard.

MOTION OFFERED BY MR. SISK

Mr. SISK. Mr. Speaker, I move that the House dispense with further proceedings under the call.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. SISK).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. MICHEL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 331, nays 72,

answered "present" 1, not voting 30, as follows:

[Roll No. 139]

ANSWERED "PRESENT"—1

Duncan, Oreg.

NOT VOTING—30

Anderson, Ill.	Harrington	Ruppe
Bonker	Hubbard	Shipley
Breaux	Kindness	Teague
Collins, Ill.	Krueger	Thornton
Conyers	Lujan	Tsongas
Cunningham	McCloskey	Tucker
Dent	McHugh	Weaver
Diggs	Metcalfe	Whitten
Erlenborn	Pressler	Wilson, C. H.
Gammage	Rostenkowski	Young, Tex.

Messrs. STEERS, JEFFORDS, MADIGAN, THONE, KETCHUM, MITCHELL of New York, CONABLE, MOORE, FREY, HAGEDORN, JOHNSON of Colorado, HYDE, WALKER, BROWN of Ohio, TAYLOR of Missouri, EDWARDS of Oklahoma, QUAYLE, DICKINSON, and COLLINS of Texas changed their vote from "nay" to "yea."

Messrs. DORNAN, MARKS, KELLY, MARLENEE, FISH, BADHAM, CORCORAN of Illinois, STANGELAND, LENT, RUDD, FORSYTHE, BEARD of Tennessee, and SCHULZE changed their vote from "yea" to "nay."

Mr. ROUSSELOT and Mr. McEWEN changed their vote from "present" to "nay."

So the motion was agreed to.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. For what purpose does the gentleman from Maryland (Mr. BAUMAN) rise?

Mr. BAUMAN. Mr. Speaker, I offer a preferential motion.

The SPEAKER pro tempore. The Chair will state that we have not reached that point. The Chair will protect the gentleman's rights.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

Mr. BAUMAN. Mr. Speaker, I object to the approval of the Journal.

The SPEAKER pro tempore. Objection is heard.

Does the gentleman from Maryland offer a motion?

Mr. BAUMAN. I do, Mr. Speaker.

PREFERENTIAL MOTION OFFERED BY MR. BAUMAN

Mr. BAUMAN Mr. Speaker, I offer a preferential motion.

The SPEAKER pro tempore. The Clerk will report the preferential motion.

The Clerk read as follows:

Mr. BAUMAN moves that the Journal be read in full.

The SPEAKER pro tempore. The question is on the preferential motion offered by the gentleman from Maryland (Mr. BAUMAN).

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. BAUMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 99, nays 301, not voting 34, as follows:

[Roll No. 140]

NOT VOTING—34

Anderson, Ill.	Hubbard	Ryan
Boggs	Ichord	Shipley
Brademas	Krueger	Teague
Breaux	Leggett	Thornton
Collins, Ill.	Lujan	Treen
Conyers	McCloskey	Tucker
Davis	McDade	Weaver
Diggs	Metcalfe	Wilson, C. H.
Erlenborn	Mitchell, Md.	Young, Alaska
Gammage	Pressler	Young, Tex
Gephardt	Rostenkowski	
Goldwater	Ruppe	

Messrs. McCLORY, SCHULZE, WALKER, DICKINSON, VANDER JAGT, STANGELAND, STEERS, and LIVINGSTON changed their vote from "nay" to "yea."

Messrs. MOORE, EDWARDS of Oklahoma, STRATTON, MARLENEE, DON H. CLAUSEN, and BURGENER changed their vote from "yea" to "nay."

The SPEAKER pro tempore (Mr. MEEDS). All time has expired.

The Chair will take votes of those Members who have not had an opportunity to vote, and those who have had such an opportunity can clear the well. If there are people here who have not voted, the Chair will take those votes. Otherwise, the vote is closed.

Mr. ASHBROOK. Mr. Speaker, I object.

The SPEAKER pro tempore. All time has expired.

POINT OF ORDER

Mr. ASHBROOK. Mr. Speaker, a point of order.

The SPEAKER pro tempore (Mr. MEEDS). The gentleman will state it.

Mr. ASHBROOK. Mr. Speaker, under Cannon's Precedents it says clearly:

> The vote of a Member failing to be recorded, he may insist that it be recorded even after the Chair has declared the result and the Chair then makes a new declaration (V, 6064, 6065; VIII, 3143).

Under the precedents, I would like to suggest that the Chair is not making a proper ruling.

The SPEAKER pro tempore. Those precedents apply only to rollcalls preceding the installation of the electronic device and are not a precedent for holding the vote by electronic device open indefinitely.

All time has expired.

So the motion was rejected.

The result of the vote was announced as above recorded.

POINT OF ORDER

Mr. SCHULZE. Mr. Speaker, a point of order.

The SPEAKER pro tempore. The gentleman will state his point of order.

Mr. SCHULZE. Mr. Speaker, I attempted to change my vote under the electronic device process before the conclusion of the vote and was unable to do so. So, if we are not going to be able to change our vote by electronic device then we must be able to change our vote in the well or change the electronic device so that we can watch our vote.

The SPEAKER pro tempore (Mr. MEEDS). The gentleman's objection will be noted. The Chair will rule that a point of order will not lie when the Chair exercises his discretion to close the voting.

In the absence of an objection the Chair will approve the Journal.

Mr. BAUMAN. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

Mr. FOLEY. Mr. Speaker, I move that the Journal be approved.

Mr. BAUMAN. Mr. Speaker, I demand that the gentleman submit a written motion.

Mr. FOLEY. I have a written motion at the desk.

The SPEAKER pro tempore. The Clerk will report the motion.

MOTION OFFERED BY MR. FOLEY

The Clerk read as follows:

> Mr. FOLEY moves that the Journal be approved.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. FOLEY).

The question was taken and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 371, nays 29, not voting 34, as follows:

[Roll No. 141]

Goldwater	Pressler	
Hubbard	Pursell	

The SPEAKER pro tempore. Are there Members in the Chamber who have failed to cast their votes?

The Chair will advise Members that the electronic voting stations are still open, and they will remain open for 5 minutes.

Mr. BADHAM. My card did not work, Mr. Speaker.

The SPEAKER pro tempore. If there are Members who do not have cards, the Chair will certainly take the word of those Members and they may vote in the well.

Mr. BROWN of Michigan. Mr. Speaker, I do not recall that the rules provide for qualification.

The SPEAKER pro tempore. Members who desire to vote may do so. The voting stations will remain open for 5 minutes.

PARLIAMENTARY INQUIRIES

Mr. BAUMAN. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The Chair will take the parliamentary inquiry, although he is not required to do so during the vote.

Mr. BAUMAN. The gentleman from Maryland thanks the Chair for his indulgence.

The gentleman from Maryland was aware that the Speaker of the House of Representatives had previously announced rules governing the operation of the electronic voting device. Is the Chair now announcing that those rules have been permanently changed, and that there will be no 5-minute closed period at the end of all 15-minute rollcalls?

The SPEAKER pro tempore. The Chair will state that he is not making a change. He is just adapting the procedure to fit the situation.

Mr. BAUMAN. I thank the Chair.

Mr. MARTIN. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. MARTIN. Mr. Speaker, the Speaker has announced that the electronic recording devices are open. They are, but they have neglected to throw the switch which will allow us to change our vote, which is what I have been trying unsuccessfully to do.

The SPEAKER pro tempore. The Chair would advise the gentleman that the voting stations remain open for those Members who have not yet recorded their votes. Pursuant to the announcement of the Speaker on March 22, 1976, changes in votes already recorded may not be made from the voting stations during the last 5 minutes of a vote taken by electronic device, but must be made by card from the well.

Mr. MARTIN. That is right, Mr. Speaker, because I have not been able to change my vote.

The SPEAKER pro tempore. Will the gentleman from North Carolina (Mr. MARTIN) bring his card to the well?

The gentleman will not be able to change his vote at this time; he will be able to vote for the first time. If the gentleman desires to change his vote, he should come to the well when we take changes at the end of the 5 minutes.

The SPEAKER pro tempore. Five minutes has expired. The Chair will accept changes for an additional 5 minutes.

Messrs. JOHNSON of Colorado, SCHULZE, HAGEDORN, KETCHUM, WAMPLER, COUGHLIN, O'BRIEN, WALKER, COLLINS of Texas, CRANE, DEL CLAWSON and TREEN changed their vote from "nay" to "yea."

Messrs. KINDNESS, DICKINSON, LIVINGSTON, MARTIN, and STEERS changed their vote from "yea" to "nay."

So the motion was agreed to.

The result of the vote was announced as above recorded.

PREFERENTIAL MOTION OFFERED BY MR. EDWARDS OF OKLAHOMA

Mr. EDWARDS of Oklahoma. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. EDWARDS of Oklahoma moves to reconsider the vote whereby the Journal was approved.

MOTION OFFERED BY MR. FOLEY

Mr. FOLEY. Mr. Speaker, I move to lay the motion to reconsider on the table.

The SPEAKER pro tempore. The question is on the motion to table the motion to reconsider.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. EDWARDS of Oklahoma. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 308, nays 91, not voting 35, as follows:

[Roll No. 142]

Messrs. RINALDO, MOORE, ROBINSON, STEERS, and RAILSBACK changed their vote from "nay" to "yea."

Mr. McEWEN changed his vote from "present" to "yea."

Mr. BEARD of Tennessee changed his vote from "yea" to "nay."

So the motion to table was agreed to.

The result of the vote was announced as above recorded.

RABBI MORRIS ROSENBLATT

(Mrs. HOLT asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. HOLT. Mr. Speaker, it is my great privilege to welcome to the House my constituent and friend, Rabbi Morris Rosenblatt.

Rabbi Rosenblatt has been associated with the Congregation Kneseth Israel in Annapolis, Md., for the past 33 years. He is a native of Galveston, Tex., and spent his early years in New York City. He holds a bachelor's degree from the City College of New York and was ordained as a rabbi 40 years ago from Yeshiva University.

Throughout his service in Annapolis, he has consistently demonstrated a high degree of spiritual leadership and community activity. Some of his extensive activities include service as president of the ministers group, a member of the board of governors of the Anne Arundel County General Hospital, and he is affiliated with the Rabbinical Council of America.

Rabbi Rosenblatt has been married to his lovely wife Esther for 40 years, and they have two sons and four grandchildren.

I am pleased to welcome him to the House and thank him for his inspiring prayer.

CONFERENCE REPORT ON H.R. 5383, AGE DISCRIMINATION IN EMPLOYMENT ACT AMENDMENTS OF 1978

Mr. HAWKINS submitted the following conference report and statement on the bill (H.R. 5383) to amend the Age Discrimination in Employment Act of 1967 to extend the age group of employees who are protected by the provisions of such act, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 95-950)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5383) to amend the Age Discrimination in Employment Act of 1967 to extend the age group of employees who are protected by the provisions of such Act, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Age Discrimination in Employment Act Amendments of 1978".

SENIORITY SYSTEMS AND EMPLOYEE BENEFIT PLANS

SEC. 2. (a) Section 4(f)(2) of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 623(f)(2)) is amended by inserting after "individual" a comma and the following: "and no such seniority system or employee benefit plan shall require or permit the involuntary retirement of any individual specified by section 12(a) of this Act because of the age of such individual".

(b) The amendment made by subsection (a) of this section shall take effect on the date of enactment of this Act, except that, in the case of employees covered by a collective bargaining agreement which is in effect on September 1, 1977, which was entered into by a labor organization (as defined by section 6(d)(4) of the Fair Labor Standards Act of 1938), and which would otherwise be prohibited by the amendment made by section 3(a) of this Act, the amendment made by subsection (a) of this section shall take effect upon the termination of such agreement or on January 1, 1980, whichever occurs first.

APPLICATION OF AGE LIMITATION

SEC. 3. (a) Section 12 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 631) is amended to read as follows:

"AGE LIMITATION

"SEC. 12. (a) The prohibitions in this Act shall be limited to individuals who are at least 40 years of age but less than 70 years of age.

"(b) In the case of any personnel action affecting employees or applicants for employment which is subject to the provisions of section 15 of this Act, the prohibitions established in section 15 of this Act shall be limited to individuals who are at least 40 years of age.

"(c)(1) Nothing in this Act shall be construed to prohibit compulsory retirement of any employee who has attained 65 years of age but not 70 years of age, and who, for the 2-year period immediately before retirement, is employed in a bona fide executive or a high policymaking position, if such employee is entitled to an immediate nonforfeitable annual retirement benefit from a pension, profit-sharing, savings, or deferred compensation plan, or any combination of such plans of the employer of such employee, which equals, in the aggregate, at least $27,000.

"(2) In applying the retirement benefit test of paragraph (1) of this subsection, if any such retirement benefit is in a form other than a straight life annuity (with no ancillary benefits), or if employees contribute to any such plan or make rollover contributions, such benefit shall be adjusted in accordance with regulations prescribed by the Secretary, after consultation with the Secretary of the Treasury, so that the benefit is the equivalent of a straight life annuity (with no ancillary benefits) under a plan to which employees do not contribute and under which no rollover contributions are made.

"(d) Nothing in this Act shall be construed to prohibit compulsory retirement of any employee who has attained 65 years of age but not 70 years of age, and who is serving under a contract of unlimited tenure (or similar arrangement providing for unlimited tenure) at an institution of higher education (as defined by section 1201(a) of the Higher Education Act of 1965).".

(b)(1) Sections 12(a), 12(c), and 12(d) of the Age Discrimination in Employment Act of 1967, as amended by subsection (a) of this section, shall take effect on January 1, 1979.

(2) Section 12(b) of such Act, as amended by subsection (a) of this section, shall take effect on September 30, 1978.

(3) Section 12(d) of such Act, as amended by subsection (a) of this section, is repealed on July 1, 1982.

ENFORCEMENT PROCEDURE

SEC. 4. (a) Section 7(c) of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 626(c)) is amended by inserting "(1)" after the subsection designation and by adding at the end thereof the following new paragraph:

"(2) In an action brought under paragraph (1), a person shall be entitled to a trial by jury of any issue of fact in any such action for recovery of amounts owing as a result of a violation of this Act, regardless of whether equitable relief is sought by any party in such action.".

(b)(1) Section 7(d) of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 626(d)) is amended to read as follows:

"(d) No civil action may be commenced by an individual under this section until 60 days after a charge alleging unlawful dis-

crimination has been filed with the Secretary. Such a charge shall be filed—

"(1) within 180 days after the alleged unlawful practice occurred; or

"(2) in a case to which section 14(b) applies, within 300 days after the alleged unlawful practice occurred, or within 30 days after receipt by the individual of notice of termination of proceedings under State law, whichever is earlier.

Upon receiving such a charge, the Secretary shall promptly notify all persons named in such charge as prospective defendants in the action and shall promptly seek to eliminate any alleged unlawful practice by informal methods of conciliation, conference, and persuasion.".

(2) The amendment made by paragraph (1) of this subsection shall take effect with respect to civil actions brought after the date of enactment of this Act.

(c)(1) Section 7(e) of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 626(e)) is amended by inserting "(1)" after the subsection designation and by adding at the end thereof the following new paragraph:

"(2) For the period during which the Secretary is attempting to effect voluntary compliance with requirements of this Act through informal methods of conciliation, conference, and persuasion pursuant to subsection (b), the statute of limitations as provided in section 6 of the Portal-to-Portal Act of 1947 shall be tolled, but in no event for a period in excess of one year.".

(2) The amendment made by paragraph (1) of this subsection shall take effect with respect to conciliations commenced by the Secretary of Labor after the date of enactment of this Act.

FEDERAL GOVERNMENT EMPLOYMENT

SEC. 5. (a) Section 15(a) of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 633a(a)) is amended by inserting "who are at least 40 years of age" after "applicants for employment" and by inserting "personnel actions" after "except".

(b)(1) Section 3322 of title 5, United States Code, relating to temporary appointments after age 70, is repealed.

(2) The analysis for chapter 33 of title 5, United States Code, is amended by striking out the item relating to section 3322.

(c) Section 8335 of title 5, United States Code, relating to mandatory separation, is amended—

(1) by striking out subsections (a), (b), (c), (d), and (e) thereof;

(2) by redesignating subsections (f) and (g) as subsections (a) and (b), respectively; and

(3) by adding after subsection (b), as so redesignated, the following new subsections:

"(c) An employee of the Alaska Railroad in Alaska and an employee who is a citizen of the United States employed on the Isthmus of Panama by the Panama Canal Company or the Canal Zone Government, who becomes 62 years of age and completes 15 years of service in Alaska or on the Isthmus of Panama shall be automatically separated from the service. The separation is effective on the last day of the month in which the employee becomes age 62 or completes 15 years of service in Alaska or on the Isthmus of Panama if then over that age. The employing office shall notify the employee in writing of the date of separation at least 60 days in advance thereof. Action to separate the employee is not effective, without the consent of the employee, until the last day of the month in which the 60-day notice expires.

"(d) The President, by Executive order, may exempt an employee from automatic separation under this section when he determines the public interest so requires.".

(d) Section 8339(d) of title 5, United States Code, relating to computation of annuity is amended by striking out "section 8335(g)" and inserting in lieu thereof "section 8335(b)".

(e) Section 15 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 633a) is amended by adding at the end thereof the following new subsections:

"(f) Any personnel action of any department, agency, or other entity referred to in subsection (a) of this section shall not be subject to, or affected by, any provision of this Act, other than the provisions of section 12(b) of this Act and the provisions of this section.

"(g)(1) The Civil Service Commission shall undertake a study relating to the effects of the amendments made to this section by the Age Discrimination in Employment Act Amendments of 1978, and the effects of section 12(b) of this Act, as added by the Age Discrimination in Employment Act Amendments of 1978.

"(2) The Civil Service Commission shall transmit a report to the President and to the Congress containing the findings of the Commission resulting from the study of the Commission under paragraph (1) of this subsection. Such report shall be transmitted no later than January 1, 1980.".

(f) The amendments made by this section shall take effect on September 30, 1978, except that section 15(g) of the Age Discrimination in Employment Act of 1967, as amended by subsection (e) of this section, shall take effect on the date of enactment of this Act.

REPORT BY SECRETARY OF LABOR

SEC. 6. (a)(1) Section 5 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 624) is amended by inserting "(a)(1)" after the section designation, and by adding at the end thereof the following new sentence: "Such study shall include—

"(A) an examination of the effect of the amendment made by section 3(a) of the Age Discrimination in Employment Act Amendments of 1978 in raising the upper age limitation established by section 12(a) of this Act to 70 years of age;

"(B) a determination of the feasibility of eliminating such limitation;

"(C) a determination of the feasibility of raising such limitation above 70 years of age; and

"(D) an examination of the effect of the exemption contained in section 12(c), relating to certain executive employees, and the exemption contained in section 12(d), relating to tenured teaching personnel.".

(2) Section 5(a) of the Age Discrimination in Employment Act of 1967, as so redesignated by paragraph (1) of this subsection, is amended by adding at the end thereof the following new paragraph:

"(2) The Secretary may undertake the study required by paragraph (1) of this subsection directly or by contract or other arrangement.".

(b) Section 5 of the Age Discrimination in Employment Act of 1967, as amended by subsection (a) of this section, is further amended by adding at the end thereof the following new subsection:

"(b) The report required by subsection (a) of this section shall be transmitted to the President and to the Congress as an interim report not later than January 1, 1981, and in final form not later than January 1, 1982.".

AUTHORIZATION OF APPROPRIATIONS

SEC. 7. Section 17 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 635) is amended by striking out ", not in excess of $5,000,000 for any fiscal year,".

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5383) to amend the Age Discrimination in Employment Act of 1967 to extend the age group of employees who are protected by the provisions of such Act, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

BONA FIDE OCCUPATIONAL QUALIFICATION EXCEPTION

Senate amendment

The Senate amendment clarifies the meaning of section 4(f)(1) which provides that it is not unlawful to mandatorily retire an

employee at an age less than the upper age limitation in the Age Discrimination in Employment Act of 1967 where the employer demonstrates that age is a bona fide occupational qualification.

The House bill

The House bill contains no comparable provision.

Conference agreement

The Senate recedes.

The conferees agree that the amendment neither added to nor worked any change upon present law.

PROHIBITION AGAINST MANDATORY RETIREMENT

Senate amendment

The Senate clarifies section 4(f)(2) of the Act to prohibit the mandatory retirement of an employee within the protected age group pursuant to a bona fide employee benefit plan or seniority system which requires or permits such retirement.

House bill

The House bill is substantially the same.

Conference agreement

House recedes to the Senate amendment.

The conferees agree that the purpose of the amendment to section 4(f)(2) is to make absolutely clear one of the original purposes of this provision, namely, that the exception does not authorize an employer to require or permit involuntary retirement of an employee within the protected age group on account of age.

In *McMann* v. *United Airlines* (98 S. Ct. 244 (1977), the Supreme Court held to the contrary, reversing a decision reached by the Fourth Circuit Court of Appeals, 542 F.2d 217 (1976). The conferees specifically disagree with the Supreme Court's holding and reasoning in that case. Plan provisions in effect prior to the date of enactment are not exempt under section 4(f)(2) by virtue of the fact that they antedate the Act or these amendments.

COLLECTIVE BARGAINING EXEMPTION

Senate amendment

The Senate amendment defers the effective date of the prohibition against mandatory retirement of persons 65 through 69 years of age if such retirement is required or permitted by bona fide employee benefit plans or seniority systems provided by collective bargaining agreements in effect on September 1, 1977. The effective date of the prohibition in these situations is the termination date of the collective bargaining agreement or January 1, 1980, whichever occurs first.

House bill

The House bill delays the effective date in such cases for collective bargaining agreements in effect at least 30 days before the date of enactment. The delay is for 2 years after the date of enactment or until the termination of such agreement, whichever occurs first.

Conference agreement

The House recedes.

BONA FIDE EXECUTIVE EXEMPTION

Senate amendment

The Senate amendment provides that certain high-level executives may be mandatorily retired between the ages of 65 and 70. The amendment includes in the exempted group those who are members of a select group of management or highly compensated employees who are entitled to an immediate nonforfeitable annual retirement benefit provided by the employer which is the equivalent of a straight life annuity equal to $20,000 per year, exclusive of Social Security, amounts attributable to employee contributions and contributions by prior employers. The Senate amendment provides that the Secretary of Labor shall annually adjust the retirement income amount to reflect increases or decreases in the cost of living. The amendment also authorizes the Secretary to develop regulations regarding the computation of the retirement income test.

House bill

The House bill contains no such provision.

Conference agreement

The House recedes with an amendment. To prevent an employer from circumventing the law by appointing an employee to a bona fide executive or high policymaking position shortly before retirement in order to permit compulsory retirement of that employee, the conference agreement provides that the exemption applies only to those employees who for the two years prior to retirement serve in such a capacity.

Under the conference agreement, the retirement income test is raised from $20,000 to $27,000 per year and the provision requiring the Secretary of Labor to make an annual adjustment for increases or decreases in the cost of living is eliminated. In calculating the retirement income figure, the conference agreement, like the Senate amendment, excludes amounts attributable to Social Security, employee contributions, and contributions of prior employers.

The phrase "bona fide executive or high policymaking position" is intended to clarify the class of employees covered by the Senate amendment. Concerns were expressed by the conferees that low level managers, supervisors, or blue collar workers could be mandatorily retired under the Senate amendment. The conference agreement makes clear that an employee will not be subject to mandatory retirement solely because he or she meets the retirement income test. The employee must also be a bona fide executive or high policymaking employee.

The definition of bona fide executive under the Fair Labor Standards Act of 1938 contained in 29 C.F.R. 541.1 is intended to be a guideline for determining those employees who meet the definition of executive for purposes of this amendment. However, that definition has been expansively interpreted, whereas the amendment is intended to cover only certain high level executives of employers who are subject to the provisions of the Act. The conferees agree that to fall within the test the employee must be a bona fide executive as defined in 29 C.F.R. 541.1 and in addition meet the criteria described below. Although the examples used to describe such criteria refer to corporations, the conferees do not intend to exclude any covered employer.

Typically the head of a significant and substantial local or regional operation of a corporation, such as a major production facility or retail establishment, but not the head of a minor branch, warehouse or retail store, would be covered by the term "bona fide executive". Individuals at higher levels in the corporate organizational structure who possess comparable or greater levels of responsibility and authority as measured by established and recognized criteria would also be covered.

The heads of major departments or divisions of corporations are usually located at corporate or regional headquarters. With respect to employees whose duties are associated with corporate headquarters operations, such as finance, marketing, legal, production and manufacturing (or in a corporation organized on a production basis, the management of product lines), the definition would cover employees who head those divisions.

In a large organization the immediate subordinates of the heads of these divisions sometimes also exercise executive authority, within the meaning of this exemption. The conferees intend the definition to cover such employees if they possess responsibility which is comparable to or greater than that possessed by the head of a significant and substantial local operation who meets the definition.

The conferees added the term "high policymaking position" in order to assure that certain top level employees who are not "bona fide executives" under this amendment could nevertheless fall within the exemption. This group of employees is limited to those individuals who have little or no line authority but whose position and responsibility are such that they play a significant role in the development of corporate policy and effectively recommend the implementation thereof.

For example, the chief economist or the chief research scientist of a corporation typically has little line authority. His duties would be primarily intellectual as opposed to executive or managerial. His responsibility would be to evaluate significant economic or scientific trends and issues, to develop and recommend policy direction to the top executive officers of the corporation, and he would have a significant impact on the ultimate decision on such policies by virtue of his expertise and direct access to the decision makers. Such an employee would meet the definition of a "high policymaking" employee.

The conferees further agree that this exemption is not applicable to Federal employees covered by section 15 of the Act.

COLLEGE AND UNIVERSITY FACULTY EXEMPTION

Senate amendment

The Senate amendment permits mandatory retirement of college and university faculty members between 65 and 70 years of age who are serving under a contract or similar arrangement which provides for unlimited tenure.

House bill

The House bill contains no comparable provision.

Conference agreement

The House recedes with an amendment which provides that this exemption is repealed on July 1, 1982.

The conferees agreed that this provision is not applicable to Federal employees covered by section 15 of the Act.

RAISING THE UPPER AGE LIMITATION

Senate amendment

The Senate amendment raises the upper age limit of the Act from 65 to 70 years of age effective January 1, 1979.

House bill

The House bill raises the upper age limit of the Act from 65 to 70 years of age 180 days following the date of enactment.

Conference agreement

The House recedes.

REMOVING UPPER AGE LIMITATION FOR FEDERAL EMPLOYEES

House bill

The House bill amends section 12 of the Act by eliminating the upper age limitation for most civilian Federal employees, but does not affect certain Federal employees whose retirement is required or otherwise authorized by statute.

The House bill also makes it clear that section 15 of the Act relating to Federal employees is independent of any other section

of the Act, except section 12(b) which contains the age limitation for Federal employees.

The House bill also requires the Civil Service Commission to study the effects of the amendments concerning Federal employees. The Commission is required to report its findings to the President and to the Congress not later than January 1, 1979.

Senate amendment

The Senate amendment contains no comparable provisions.

Conference amendment

The Senate recedes, with an amendment which provides that:

(1) The effective date of the elimination of the upper age limit for Federal employees is September 30, 1978.

(2) The Civil Service Commission study of the Federal employee provisions will be completed and transmitted no later than January 1, 1980.

REPORTS BY THE SECRETARY OF LABOR

Senate amendment

The Senate amendment requires the Secretary of labor:

(1) to conduct a study on the effect of raising the upper age limitation to age 70, the feasibility of raising the limitation above 70 years of age, and the feasibility of lowering the minimum age for coverage under the Act;

(2) requires that an interim report be submitted no later than 2 years after the effective date, and that a final report be submitted no later than 3 years after such effective date; and

(3) provides that the Secretary of Labor may carry out the study directly, or by contract or other arrangement.

House bill

The House bill requires the Secretary of Labor:

(1) to submit an interim report to the President and the Congress no later than 1 year after the effective date, and a final report no later than 2 years after such effective date; and

(2) to conduct a study to determine the feasibility of eliminating the upper age limitation established in section 12(a) of the Act.

Conference agreement

The House recedes with an amendment which:

(1) provides that the Secretary's interim report shall be submitted by January 1, 1981 and that the final report shall be submitted to Congress and to the President by January 1, 1982;

(2) provides that the study focus on the feasibility of eliminating the upper age limitation;

(3) strikes the requirement that the study focus on the feasibility of lowering the minimum age for coverage under the Act, while retaining the requirement that the study focus on the effect of raising the age limitation to 70 and the feasibility of raising the age limitation above 70 years of age;

(4) requires the Secretary to examine the effect of the bona fide executive and tenured faculty exemptions and to make recommendations thereon; and

(5) requires the Secretary to complete the study required by section 5 of the Act.

The conferees intend that the Secretary adopt the report and recommendation as his own whether or not it has been contracted out.

180-DAY NOTICE REQUIREMENTS

Senate amendment

The Senate amendment eliminates the requirement in section 7(d) of the Act that an individual notify the Secretary of Labor before the commencement of a civil action no later than (1) 180 days after the alleged unlawful practice occurred; or (2) no later than 300 days after the occurrence of the alleged unlawful practice if the aggrieved individual chooses to commence proceedings before a State agency which is empowered by State law to grant or seek relief from age discrimination.

The Senate amendment retains the requirement that no civil action may be commenced by an individual until notice of intent to file suit has been given the Secretary not less than 60 days prior to commencement of such action.

House bill

The House bill contains no comparable provision.

Conference agreement

The House recedes with an amendment retaining the 180-day and 300-day time limitations in section 7(d), but requiring that a "charge" rather than a "notice of intent to sue" be filed with the Secretary of Labor within this period. The 300-day limitation and related State deferral procedures are described in more detail in Senate Report 95–493 at p. 5–7. The conferees adopt this discussion in the Senate Report.

This change in language is not intended to alter the basic purpose of the notice requirement, which is to provide the Department with sufficient information so that it may notify prospective defendants and to provide the Secretary with an opportunity to eliminate the alleged unlawful practices through informal methods of conciliation. Therefore, the conferees intend that the "charge" requirement will be satisfied by the filing of a written statement which identifies the potential defendant and generally describes the action believed to be discriminatory.

The conferees agree that the "charge" requirement is not a jurisdictional prerequisite to maintaining an action under the ADEA and that therefore equitable modification for failing to file within the time period will be available to plaintiffs under this Act. See, *e.g., Dartt* v. *Shell Oil Co.*, 539 F. 2d 1256 (10th Cir. 1976), affirmed by an evenly divided court, 98 S. Ct. 600 (1977); *Bonham* v. *Dresser Industries, Inc.*, 16 FEP Cases 510 (3d Cir. 1977); *Charlier* v. *S. C. Johnson & Son., Inc.*, 556 F.2d 761 (5th Cir. 1977).

TOLLING OF THE STATUTE OF LIMITATIONS DURING CONCILIATION

Senate amendment

The Senate amendment amends section 7(e) of the Act to provide that the statute of limitations as provided in section 6 of the Portal-to-Portal Act of 1947 shall be tolled (for a period not exceeding two years) during the period in which the Secretary of Labor is attempting to effect voluntary compliance pursuant to section 7(b). This amendment does not apply to conciliation required by section 7(d).

House bill

The House bill contains no comparable provision.

Conference agreement

The House recedes with an amendment which limits the period of tolling to one year rather than two.

The conferees agree that it is appropriate for the tolling of the statute of limitations to begin when the Department of Labor states, in a letter to the prospective defendant(s), that it is prepared to commence conciliation pursuant to section 7(b) of the Act.

The conferees wish to make clear that conciliation is not a jurisdictional prerequisite to maintaining a cause of action under the Act. In *Brennan* v. *Ace Hardware Corp.*, 495 F. 2d 368 (8th Cir. 1974), the court reflected a proper understanding of the conciliation requirement in rejecting the employer's argument that the statutory directive is a "condition precedent to the court entertaining jurisdiction of the legal action." In that case the court correctly noted that section 7(b) grants to district courts the equitable discretion to stay lawsuits pending before them in order to permit conciliation to be completed before the lawsuit continues.

JURY TRIAL

Senate amendment

The Senate amendment provides that in any civil action brought by a person alleging discrimination on account of age there shall be a right to a jury trial if the action involves monetary damages, whether or not equitable relief is sought by any party in the same action.

House bill

The House bill contains no comparable provision.

Conference agreement

The House recedes with an amendment which provides for a jury trial on any issue of fact in an action for recovery of amounts owing as a result of a violation of the ADEA. Under section 7(b), which incorporates the remedial scheme of sections 11(b), 16 and 17 of the FLSA, "amounts owing" contemplates two elements: First, it includes items of pecuniary or economic loss such as wages, fringe, and other job related benefits. Second, it includes liquidated damages (calculated as an amount equal to the pecuniary loss) which compensate the aggrieved party for nonpecuniary losses arising out of a willful violation of the ADEA.

The Supreme Court recently ruled that a plaintiff is entitled to a jury trial in ADEA actions for lost wages, but it did not decide whether there is a right to jury trial on a claim for liquidated damages *Lorillard* v. *Pons*, 98 S. Ct. 866 (1978). Because liquidated damages are in the nature of legal relief, it is manifest that a party is entitled to have the factual issues underlying such a claim decided by a jury. The ADEA as amended by this Act does not provide remedies of a punitive nature. The conferees therefore agree to permit a jury trial on the factual issues underlying a claim for liquidated damages because the Supreme Court has made clear that an award of liquidated damages under the FLSA is not a penalty but rather is available in order to provide full compensatory relief for losses that are "too obscure and difficult of proof for estimate other than by liquidated damages" *Overnight Transportation Company* v. *Missel*, 316 U.S. 572, 583–84, (1942).

AUTHORIZATION OF APPROPRIATIONS

House bill

The House bill eliminates the current authorization ceiling of $5,000,000 for any fiscal year for the purpose of administering the ADEA.

Senate amendment

The Senate amendment contains no comparable provision.

Conference agreement

The Senate recedes.

ADVISORY COMMITTEE ON SHELTERED WORKSHOPS

Senate amendment

The Senate amendment requires the Secretary of Labor to appoint a committee to advise the Secretary on the administration

and enforcement of section 14 of the Fair Labor Standards Act.

House bill

The House bill contains no comparable provision.

Conference agreement

The Senate recedes.

BUDGET DEFICIT

(Mr. VANIK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VANIK. Mr. Speaker, yesterday, the administration disclosed that the 1978 budget deficit will be $53 billion and not the $61.8 billion deficit predicted last January or the $60 billion deficit predicted last month.

As recently as February 27, 1978, the Treasury officials requested an extension of the debt ceiling to $781 billion for 1978 and to $871 billion for fiscal 1979.

The news that the 1978 deficit will be $8.8 billion less than Government estimates of only several weeks ago is shocking good news.

However, I am also shocked that Congress did not have this vital information before it considered debt ceiling legislation last week. There is a wide credibility gap on the availability of public information.

As a legislator, I feel insulted to learn about a $8.8 billion error in the 1978 budget deficit estimate. Those in Government who erred in advising the Congress should not be permitted to repeat their mistakes.

It is high time that the Congress have its own computer system to provide instant information of Government receipts, Government expenditures, and the status of the Federal deficit and debt on a daily basis.

TEACHER DAY, U.S.A., BILL

(Mr. SEBELIUS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SEBELIUS. Mr. Speaker, today I am introducing a resolution to honor and recognize our Nation's teachers by designating the first Friday of March of each year as "Teacher Day, U.S.A."

I am sure we can all recall a teacher who had a special influence on our lives in one way or another—a teacher whose dedication and hard work enriched our lives far beyond the few years spent in the classroom. By designating a special day to honor our teachers, we have the opportunity of paying tribute in a special way to those individual teachers.

Teachers Day could be a day when students at all grade levels would be encouraged to pay tribute to individual teachers through a kind note or word or in many other appropriate ways. Former students may wish to communicate their appreciation to the teacher whom they feel influenced their lives.

The Teacher Day, U.S.A., concept intiated by the Kansas Teachers Hall of Fame has received a tremendous response from the State conventions to the PTA, the Kansas State Legislature, the Retired Teachers Organization, Kansas National Education Association, and many other groups. I urge my colleagues to support this resolution recognizing the efforts of teachers throughout our Nation.

THE RECENT ACT OF TERRORISM IN ISRAEL

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, as we all know, over the weekend a small band of Palestinian terrorists stole into Israel and attacked two defenseless tourist buses. Today the families of 37 slain men, women, and children grieve. I rise to condemn this wanton act of terrorism and express my condolences to the Israeli people.

Whatever the misguided motives behind this brutal murdering spree, it has once again turned the volatile Middle East from talks of reconciliation to talks of retaliation, from peace to provocation.

Mr. Speaker, this is an atrocity that should be soundly and universally condemned. I join with those who have done so, I share the grief of the Israeli people, and I cannot help but fear the toll that this act will take on the prospects for peace in this area.

DOES THE HOUSE NEED A "NANNY"?

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, I have been reflecting upon the employment problems of the country and some of the things that we in Congress need to do for the American people. I think a lot of us have been very nervous about creating public jobs to alleviate unemployment because we thought they might be "make-work" jobs.

However, after being in attendance today in this body I have thought of public jobs that we have proven we can create and with today's wonderful record, no one could say they were make-work jobs. Today we have proven a dire need for these new jobs.

I think what this Congress needs is a nanny. We need some nannies around here for the boys. We need some warm milk, we need some cookies, and then maybe we can have a little better decorum in this body and be able to deal with a little more substance.

So, Mr. Speaker, I hope this body thinks seriously about my suggestion. If we hire nannies for certain Members we would be helping the employment situation. After this afternoon, no one could possibly accuse us of making up a job description that is not needed. I hope this amendment is made to the Humphrey-Hawkins bill. It would save the taxpayers a lot of money if the nannies could get this body to deal with substance once again.

PERSONAL EXPLANATION

(Mr. MIKVA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

● Mr. MIKVA. Mr. Speaker, on Friday, March 10, 1978 I was unable to attend the session of the House. Had I been present, I would have voted "yea" on rollcall No. 129, for the passage of H.R. 10982 to rescind certain budget authority contained in the message of the President of January 27, 1978.●

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 3(b) of rule XXVII, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

After all motions to suspend the rules have been entertained and debated and after those motions to be determined by "nonrecord" votes have been disposed of, the Chair will then put the question on each motion on which the further proceedings were postponed.

ABSAROKA-BEARTOOTH WILDERNESS ACT

Mr. RONCALIO. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 1671) to designate the Absaroka-Beartooth Wilderness, Custer, and Gallatin National Forests, in the State of Montana.

The Clerk read as follows:

S. 1671

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in accordance with section 3(b) of the Wilderness Act (78 Stat. 890), the area classified as the Beartooth and Absaroka Primitive Areas, with the proposed additions thereto and deletions therefrom, as generally depicted on a map entitled "Absaroka-Beartooth Wilderness", dated February 1978, which is on file and available for public inspection in the office of the Chief, Forest Service, Department of Agriculture, is hereby designated as the "Absaroka-Beartooth Wilderness", within and as part of the Custer and Gallatin National Forests, comprising an area of approximately nine hundred and four thousand five hundred acres.

SEC. 2. As soon as practicable after this Act takes effect, the Secretary of Agriculture shall file a map and legal description of the Absaroka-Beartooth Wilderness with the Energy and Natural Resources Committee of the Senate and the Interior and Insular Affairs Committee of the House of Representatives, and such description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographic errors in such legal description and map may be made.

SEC. 3. The Absaroka-Beartooth Wilderness shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness areas, except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act.

SEC. 4. Nothing in this Act shall be construed as affecting in any manner or to any extent any claim by Park County, Montana, and Sweet Grass County, Montana, to a right-of-way from Cooke City, Montana, to Boulder, or to affect in any manner or to any extent the relative rights and liabilities between the parties in connection with Cause numbered 76–125–BLG, Park County, Montana, and Sweet Grass County, Montana, versus United States of America, et al., filed in the United States District Court for the District of Montana, Billings Division, on October 4, 1976. Nothing in this Act shall be construed as abating such cause or as amending or otherwise affecting or modifying the provision of law pursuant to which such cause was filed.

SEC. 5. The previous classification of the Beartooth and Absaroka Primitive Areas is hereby abolished.

The SPEAKER pro tempore. Is a second demanded?

Mr. JOHNSON of Colorado. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

Mr. ROUSSELOT. Mr. Speaker, I object, and on that I demand tellers.

Tellers were ordered, and the Speaker pro tempore appointed as tellers Mr. RONCALIO and Mr. ROUSSELOT.

The House divided, and the tellers reported that there were—ayes 71, noes 27.

Mr. BAUMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 380, nays 20, answered "present" 1, not voting 33, as follows:

[Roll No. 143]

Messrs. MOORE, GUDGER, and WALKER changed their vote from "nay" to "yea."

So a second was ordered.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Wyoming (Mr. RONCALIO) and the gentleman from Colorado (Mr. JOHNSON) for 20 minutes each.

The Chair now recognizes the gentleman from Wyoming (Mr. RONCALIO).

Mr. RONCALIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, S. 1671 would designate approximately 904,500 acres of national

Mr. Speaker, S. 1671 would designate approximately 904,500 acres of national forest lands in Montana as the Absaroka-Beartooth Wilderness. This bill, together with the proposed Great Bear Wilderness which we will consider later this year, are two of the unprotected areas in the State of Montana which were so dear to the heart of our beloved friend and colleague, Senator Lee Met-

calf. I was privileged to cochair a hearing on the Absaroka-Beartooth area with Senator Metcalf in Billings last August, and know how strongly he felt about the area. I only regret he cannot be alive to see his wishes enacted in the law.

The Absaroka-Beartooth is a consolidation of the existing Absaroka and Beartooth Primitive Areas plus additional contiguous roadless lands. It contains the oldest known rocks found to date in the world, several waterfalls, Montana's highest peak, and important habitat for grizzly bear and the Northern Rocky Mountain wolf. The area has been thoroughly studied by the Forest Service, and the administration has recommended a consolidated wilderness. In response to administration and other suggestions, the Senate deleted five areas from the bill totaling approximately 6,900 acres, and added some 600 acres on the northern boundary to protect the spectacular Woodbine Falls above the Stillwater River; 2,700 acres were also deleted to exclude valid mining claims above the West Fork of the Stillwater River.

Support for S. 1671 is strong from virtually all quarters. A wilderness area to unite the existing Absaroka and Beartooth Primitive Areas is endorsed by both Senators MELCHER and PAUL G. HATFIELD, Congressman BAUCUS (in whose district half of the area lies), Governor Judge, and scores of other prominent Montanans. At our hearing in Billings sentiment in favor of the unified wilderness ran over 3 to 1. The southwestern portion of the area borders on Yellowstone National Park for over 30 miles, and, as can readily be seen from topographic maps, is an inseparable part of the Yellowstone ecosystem. Inclusion of the 904,500-acre Absaroka-Beartooth area in the National Wilderness Preservation System, along with possible future wilderness designation for the nearby Hyalite-Porcupine-Buffalo and Taylor-Hilgard Wilderness Study areas (which passed Congress in 1977) will go a long way toward insuring that the Yellowstone ecosystem is preserved intact for future generations of Americans. This is critical as the Yellowstone ecosystem contains some of the finest and most diverse wildlife habitat in North America, and has been described as the best sport fishing area in the entire continent. In addition to these attributes, the North Absaroka roadless area contained in the bill was the only area nationwide to obtain the maximum 200 wilderness quality rating in the Forest Service's 1972 roadless area review.

Further, three road corridors which penetrate the area, plus innumerable fringing roads will insure that the Absaroka-Beartooth Wilderness is accessible to the public from all directions and at differing elevations. As such, it may well be the most accessible wilderness area in the entire Nation.

With all these merits, I am amazed that the area was not afforded wilderness protection long ago. It is my sincere wish that my colleagues will today act swiftly to pass S. 1671, and fulfill one of the lifelong dreams of the late Senator Metcalf.

I should finally note that S. 1671 does not contain those Wyoming roadless lands contiguous to the Absaroka-Beartooth in Montana and known as the Wyoming High Lakes. These lands will be considered by the subcommittee this spring, after a field hearing in Powell, Wyo., on March 31.

Mr. BAUCUS. Mr. Speaker, will the gentleman yield?

Mr. RONCALIO. I will be happy to yield to the gentleman from Montana.

Mr. BAUCUS. I thank the gentleman for yielding.

I am proud to rise today and voice my support for the enactment of S. 1671, the Absaroka-Beartooth Wilderness Act of 1978.

Mr. Speaker, while no area of this size could be completely free of controversy, the concept of an expanded Absaroka-Beartooth wilderness proposal has received a remarkably wide degree of acceptance. This legislation has been strongly endorsed by Montana's Gov. Tom Judge and my Democratic colleagues in the Senate, JOHN MELCHER and PAUL HATFIELD. In addition, the Montana Department of Fish and Game and many local organizations support the creation of a unified Absaroka-Beartooth area. President Carter in his environmental message of May 23, 1977, singled out this area for inclusion into the national wilderness preservation system.

Located in the Gallatin and Custer National Forests of southern Montana, this magnificient expanse of nearly 1 million acres includes the major part of remaining wild country in the Absaroka Range and the Beartooth Plateau. This is an area of timbered glacial valleys and rugged summits. Granite Peak, reaching to a height of 12,799 feet on the Beartooth Plateau, is the highest peak in Montana. This entire roadless tract is a major quality watershed for the Yellowstone River, one of America's finest blue-ribbon trout streams.

This high country has caught the imagination of countless thousands of people who have seen it. The Crow Indians have always revered it as sacred giving it its current name "Absaroka." Rugged mountain men followed in the wake of the Indians and succeeding generations have crisscrossed it, taking occasional metals and other resources. However, the region remains pristine in almost all its aspects, and is qualified as an outstanding example of remaining wilderness in the country.

The Beartooth-Absaroka region offers the ultimate in recreational possibilities. In fact, it is already used by thousands of people as de facto wilderness, and the numbers grow annually. It supports a large guiding and outfitting industry, which adds to the economy of the area. It is particularly attractive to visitors because of its accessibility. The area can be reached easily from Billings and Red Lodge in the east, Columbus and Big Timber in the north, Livingston in the west, Gardiner and Cooke City in the south, and from several points in Yellowstone National Park. The overwhelming majority of current visitors are Montanans, supporting the pattern in other Montana wilderness areas which show that 80 percent of the users are Montanans.

This proposal, like most wilderness proposals, is not without controversy. Where possible, it has been amended to meet what I consider to be sincere and legitimate criticism of the bill. A major concession has to do with a possible road route from Cooke City northward to the Boulder Basin. During 1974, there was discovered in the records of Park County, a petition dating from the late 1800's for a county road right-of-way through this corridor, also called the Slough Creek corridor. The counties of Park and Sweet Grass, through which the corridor runs, maintain that the document gives them jurisdiction over a road right-of-way through this area. Such a right-of-way would permit the splitting of the huge area in two nearly equal parts. The Forest Service has ruled that a road was never established and that the area has always remained under the jurisdiction of the United States.

Park and Sweet Grass Counties dispute this and have entered a challenge in the Federal courts. Although this bill contains the Slough Creek corridor, it contains a provision which will, in effect, abide by the court's decision. The Congress could be persuaded to declare the corridor as wilderness, thereby nullifying a judicial decision in favor of the counties. In the interest of fairness, the matter should be determined on its legal merits and I am willing to abide by a court decision.

The boundaries have been modified to resolve possible mineral claim conflicts near the West Fork Stillwater River Valley by the Interior Public Lands Subcommittee. I agree with the subcommittee recommendations regarding this boundary change.

Mr. Speaker, I would like to make one final point in closing. A great many comments have been made in recent months concerning this wilderness bill and its sponsor, the late Senator Lee Metcalf. Some people feel that this area should be included in the wilderness system—solely as a memorial to Senator Metcalf. I think that Lee would disagree. The Absaroka-Beartooth area should be included in the national wilderness preservation system, because it is sound public policy. This area has been considered on its own merits and fitness for designation as wilderness. This wild expanse of high mountain country has been found exceedingly worthy of wilderness classification.

This bill is in large measure the result of the dedicated efforts of our late colleague and friend, Lee Metcalf. I urge my colleagues to support this bill, not only in his memory which is indeed fitting, but also because the Absaroka-Beartooth area is superbly qualified to be designated wilderness.

I ask my colleagues to join with me and pass this legislation.

Thank you, Mr. Speaker.

I thank the gentleman from Wyoming for his efforts in conducting and

marshaling this bill through to successful passage.

Mr. RONCALIO. I thank the gentleman.

I would like to add, Mr. Speaker, that the two Members in this body from Montana deserve commendation and praise. It has been a pleasure for me to observe how they have worked together, despite their being members of opposite parties, the center aisle splitting them.

I see in this legislation a dedicated and successful effort to have a meeting of the minds on the part of the Montana delegation regarding the land, the gentlemen from Montana (Mr. MARLENEE and Mr. BAUCUS).

Mr. MARLENEE. I thank the gentleman from Wyoming for his kind remarks. I will ask for a period of time to speak on this bill. It has been a pleasure to work with both the chairman of the subcommittee on this and with my colleague, the gentleman from Montana.

Mr. RONCALIO. I must, I believe, state for the record, too, that there was originally a 46,500-acre intrusion of this wilderness designation into the State of Wyoming, and because we felt—we being the three members of the delegation with two of my colleagues on the other side of the rotunda—and because we thought there ought to be hearings up around Powell and Cody, we have deleted that proposition from coming in under this bill. It is our intention to have it come in under a separate bill and to conduct hearings in Powell on March 31. Then we will present legislation to add 25,000 or 30,000 acres in Wyoming to the wilderness area.

Mr. Speaker, I yield back the remainder of my time.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Colorado (Mr. JOHNSON).

Mr. JOHNSON of Colorado. Mr. Speaker, I yield 5 minutes to the gentleman from Montana (Mr. MARLENEE).

Mr. MARLENEE. Mr. Speaker, wilderness designation for the Absaroka-Beartooth area has been studied and debated for a number of years. The question now is not whether there should be a designation of wilderness, but rather how much wilderness and where.

Half of this wilderness proposal involves land within my district and my comments today reflect the concerns of many local residents who believe the total acreage for this Absaroka-Beartooth proposal is excessive and offers little but a "keep out" notice to the many people who enjoy portions of this land by 4 by 4, motorbike, and snowmobile.

Mr. Speaker, out of concern that we not deny this land to many who have enjoyed it over the past years, I offered an amendment to delete 28,800 acres to allow for continued snowmobile, 4 by 4, and trailbike use. The Interior Committee did not accept my amendment. Our vote today is the final step before passage of this wilderness proposal.

The Forest Service estimates that approximately 2,500 snowmobiles will cross between Big Timber and Cooke City from January to April of this year. This bill will make this their final trip into this area. We are told that snowmobiles must be excluded from the area because they interfere with wilderness management and yet we are not shown one instance where they have interfered with any other use or user.

Snow cover ranges from 10 to 14 feet in this area during the winter months protecting the surface of the land. There is no established snowshoeing, backpacking, or cross country skiing and no game animals during the winter months for snowmobilers to disrupt.

Today would have been a happy day for my former colleague and friend Senator Lee Metcalf, had he lived. The passage of this unified wilderness proposal was a dream of his for many years and its passage will speak highly of his dedication to and concern for this precious area of Montana called the Absaroka-Beartooth and his desire to preserve part of the wilderness he knew so well as Montana.

However, there are many Montanans who did not agree with the distinguished late Senator and will not be happy today. It is for these Montanans that I rise in opposition to S. 1671 as it is written today.

Mr. JOHNSON of Colorado. Mr. Speaker, given the time of day and the importance of this bill, I expect we will probably finish it in the record time that the minority has on this particular subject; although, it will be appropriate for us today to talk about some of the things that affect wilderness in general. The gentleman from Wyoming in his last year here in the Congress has led the way for the endangered American Wilderness Act which involves over a million acres. This bill is some 904,000 acres. There are some more wilderness bills pending.

The gentleman from Wyoming is trying to tread this very delicate ground about as carefully, I think, as anybody could possibly do. He deserves far more recognition for his legislative skills than he has received.

While we have the time today, after paying my kudos to the gentleman from Wyoming who is retiring, I thought we could talk about wilderness in general in using the balance of the minority's time. The question of how much wilderness is enough is one we have to address ourselves to and we have not addressed ourselves to as a body. This is a good time to do that. I would like to quote from an interview that the senior Senator from Idaho gave not too long ago on this very subject. The gentleman said:

WESTERN WILDLANDS

How much wilderness is enough? How large a wilderness system will be ultimately have?

Senator CHURCH. How much is enough? The better question, perhaps, is how much is feasible, given our need for wood products, minerals and other uses. I would guess about twice as much as the 40 to 50 million acres anticipated in 1964, when Congress passed the original Wilderness Act—which is about half as much as ardent wilderness proponents want. If you look at the figures, you will see that, at the beginning of 1977, 62.5 million acres were either already classified as wilderness, proposed to Congress for such classification, or reserved for future wilderness study. If these areas are incorporated into the wilderness system, that would leave an additional 20 to 30 million acres to be taken from the remaining 145 million acres of roadless lands. This excludes most of the large allocations in Alaska that may be made under the Native Claims Settlement Act.

Mr. Speaker, if we are talking about setting aside somewhere around 100 million or 120 million acres in the lower States, then another 100 million acres in Alaska, there are items that must be taken into consideration which have not as yet even been considered seriously in the Committee on the Interior of both the House and the Senate or in the House or the Senate proper.

For example, Mr. Speaker, we have areas in this country that are designated as wilderness where timber will be rotting and falling down in the next 25 or 50 years. Was it the intention of the Wilderness Act that we set aside these areas in perpetuity and go through the normal life cycle? There are some that advocate that. If that is the case, then we would be having in the Rocky Mountain areas vast acreages where the timber will be lost. It ultimately dies and lightning strikes and fire rages. Or we have the process of disease. The aspen trees will take over. Ultimately in another 100 years the aspens are taken over by the Englemann spruce or the Douglas firs or Ponderosa pine. Here we are going to set aside 100–120 million acres in the Lower 48 States. Should we not be considering the process of rotating wilderness, rather than setting aside vast acreages for this kind of process where millions of board feet of timber will be decimated by disease or by fire?

On the front range of the Rocky Mountains that stretches from Boulder almost to Cheyenne, the home of the gentleman from Wyoming, we have large areas of national forest that are unavailable for timber cutting, and yet at the same time the timber is sitting there and rotting.

We as a House have never faced up to this kind of a process. We have set aside areas in Colorado for wilderness designation that 25 or 50 years from now will be nothing but rotten timber and timber down on the ground. It will not have been used for any particular purpose. It certainly will not be available for any recreational purpose because access is impossible when the forest is old and the timber is down.

Mr. KETCHUM. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of Colorado. I yield to the gentleman from California.

Mr. KETCHUM. Mr. Speaker, I thank the gentleman from Colorado for yielding.

I think the point the gentleman made about a rotating wilderness has some real validity to it. Just a short time ago I had an opportunity to visit southeastern Alaska, in which is located part of the proposed Alaskan Wilderness. In flying over the area by helicopter, I saw that there are literally millions of board feet of timber laying on the forest floor. Much of the timber that should have been harvested is dying.

By the same token, for the past 7 years it has been my privilege to belong to a trail-riding group that rides in an area served by the gentleman from Oregon (Mr. ULLMAN), specifically, the Three Sisters Wilderness Area, which is certainly one of our most beautiful wilderness areas.

In riding through that area, I find it is getting to the point that we can hardly ride through it because of the deadfall timber. It is really a shame to see a resource like that wasted in this way, not to mention the economics of the situation.

In my own case, as the gentleman well knows, with the advent of the infamous Golden Trout Wilderness, I feel that no consideration was really given to the economics of the situation. No consideration was given to the loss of jobs of individuals in the timber industry or to the loss of multiple use so that we could recognize that old people and infirm people would like to get into these areas. As it stands, it is impossible for them to do that.

The loss of jobs, of course, impacts very heavily on the small communities that are usually adjacent to a wilderness area. We do not seem to give very much consideration to that.

I think it is time that we really slowed down a little bit and held our breath a little and took a look at what we are doing to jobs. It is very easy for Members to vote for a wilderness area and listen to the cries of "Save the Golden Trout," "Save the Three-Toed Salamander," or "Save the Snail Darter." It is sort of sexy, for lack of a better term, to vote that way, because the jobs that are lost are not their jobs. It is easy for a Member to vote for a wilderness bill because it perhaps looks good on that Member's record, but that Member does not have to worry about that job of that family in that particular area and the impact it has on these small communities.

What happens to the hardware store? What happens to the grocery store? What happens to the gasoline station? the tire salesman? and all the rest of them?

It seems to me that as we proceed with these wilderness classifications, we absolutely must take into consideration the economic impact of creating a wilderness and, very possibly, consider very seriously the suggestion of the gentleman from Colorado (Mr. JOHNSON) that perhaps these wilderness areas should be rolled around just a little bit so we can take advantage of some of the economic resources that lie within the bounds of those wilderness areas.

Mr. JOHNSON of Colorado. Mr. Speaker, I would like to ask the gentleman a question, since I know he has been spending a great deal of time in various wilderness areas on these different rides.

Has the gentleman found, when he is going on one of these rides in a wilderness area, that they tend to stick to the trails, or do they get off and go through the tangled underbrush?

Mr. KETCHUM. Mr. Speaker, the group I ride with—and most of the members of the group are constituents of the gentleman from Oregon (Mr. ULLMAN)—is a group of hard-riding individuals, and they do not stick to the trails too much. I am speaking now specifically of the Three Sisters Wilderness Area in Oregon.

One of the reasons we do not stick to the trails in that particular wilderness area is that there are many back-packing individuals there who resent the fact there are those of us riding horses through the wilderness. Therefore, in acquiescence to their desires, we often go across the country.

Mr. JOHNSON of Colorado. Mr. Speaker, I would like to ask the gentleman this question: How can he go across country by horse in a wilderness area that is comprised mostly of timber when the timber is down on the ground?

Mr. KETCHUM. It is very difficult, believe me.

Mr. JOHNSON of Colorado. It would seem that it almost destroys the effect of the wilderness area when they have to fight their way through tangled underbrush and fallen timber.

Mr. KETCHUM. There is no question about that. There are places in the Three Sisters Wilderness Area where it is almost impossible to ride through some of the very beautiful parts that one would like to visit.

Another thing that deeply bothers me about the trails—and they have an excellent trail system in the Three Sisters area—is this: Each year when the Forest Service goes out to clear the trails, because of the abolition of anything using power, they have to go out with a whole trail crew, three or four of them, with pack mules, and saw most of the downed timber out of the trail by hand, although one individual could go through and cut the timber with a chain saw.

Mr. JOHNSON of Colorado. I would like to point out to the gentleman that the colloquy on the endangered American wilderness that took place on the floor today between the gentleman from Wyoming, the gentleman from Arizona, and myself directed itself to just what the gentleman has pointed out. I went through a wilderness area in Colorado this last summer, and the Forest Service guide had to saw through by hand enormous logs that had fallen across the trail, and the gentleman from Wyoming, the gentleman from Arizona, and myself all agreed that the Forest Service should be allowed, and that the Wilderness Act did not contemplate that they should not be allowed, to utilize chain saws in clearing trails. And if that message is passed around elsewhere in the country, the rest of the Forest Service operatives would be using that. So far, in Colorado they are using chain saws to clear trails, but I do not think they are doing it elsewhere in the wilderness system.

Mr. KETCHUM. Mr. Speaker, I think that is a valid point, too. Another thing that is always sort of interesting is that those people who are so adamant about not having anything mechanized in the wilderness areas are the first individuals who, when they break a leg, want a helicopter to come in and take them out.

Mr. JOHNSON of Colorado. There are examples of people who do not want snowmobiles in the wintertime. I am not a snowmobile fan, but those are experiences which I am told are exciting, and it leaves no marks on the land. This is something, it seems to me, that would be appropriate in the wilderness area, but at the present time we do not allow that.

Mr. MARLENEE. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of Colorado. I yield to the gentleman from Montana.

Mr. MARLENEE. I thank the gentleman for yielding.

Mr. Speaker, I think that in the future consideration of wilderness we have to be careful in our headlong, pellmell rush in the creation of these new areas. We have the inflexibility that we have to deal with in regard to wilderness, and I have promised and vowed that I would try to make these areas more accessible for the elderly and the handicapped. There is no reason in the world why rudimentary trails and primitive trails could not be maintained for horse-drawn vehicles or carts, or some other means of convenience for the handicapped and the elderly, so that they, too, could enjoy this wilderness experience.

Mr. Speaker, I agree somewhat with some of the wilderness concept, but the inflexibility in that regard leaves me pretty cold. I know what a handicapped person is. I know from firsthand experience, and you will find me in this Congress fighting for access by the handicapped and the elderly.

I would like to call to the attention of the Members that recently my office called for a GAO investigation, where we found that the concept of sustained yield timber needed to be questioned seriously. There was as much as 50 percent error in the sustained yield timber concept that the Forest Service was coming up with. And if this is the case, do we really have enough timber, and are we able to maintain those small communities and the jobs in those small communities if we do not have valid figures to work from?

Mr. DON H. CLAUSEN. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of Colorado. I yield to the gentleman from California.

Mr. DON H. CLAUSEN. I thank the gentleman for yielding.

Mr. Speaker, as a member of the Public Lands Subcommittee, I want to extend to the gentleman in the well (Mr. JOHNSON of Colorado) my accolades and my appreciation for all of the work he has done in bringing about what was alluded to earlier in the way of a compromise that would satisfy, hopefully, the interests of the people of Montana. I also want to extend to my colleague, the gentleman from Wyoming (Mr. RONCALIO), my whole-hearted commendation and appreciation for the manner in which he has conducted himself as chairman of this committee. TENO RONCALIO is not going to be returning to the Congress, but I have to say that the kind of compromises that have been worked out under his leadership are going to leave a tremendous legend on his behalf. I say this as a friend. I do not know if I will have the opportunity to say this, but having served with the gentleman from Wyoming (Mr. RONCALIO) and the gentleman from Colorado (Mr. JOHNSON) on this important subcommittee, I have come to appreciate the very constructive and respossible working relationship of this bipartisan legislation team.

Mr. JOHNSON of Colorado. Mr. Speaker, I thank the gentleman for his comments.

I will get to see the gentleman from Wyoming, however, next year and the year after. We will probably take wilderness rides together and will go through some of the areas we have been fortunate enough to have been working on.

I would just like to point out in closing, Mr. Speaker, that the RARE 2 study which the Forest Service is undertaking at the behest of the administration is an alarming study. The RARE 1 study, the roadless area evaluation which took place previously, was sufficient. This administration has taken it upon itself to reevaluate the roadless areas under the guise that the previous study was insufficient and not adequate. It has alarmed a large number of people in the timbered areas of the country, including my own area. We have timbered areas in the State of Colorado that are not included in wilderness areas and that are not being harvested. There are timber mills which are being shut down, and small towns that are dependent upon milling operations are gradually drying up.

Mr. Speaker, that has been the experience throughout our Rocky Mountain region; and as a result of this administration's attitude, I think at least it is demonstrable that they have taken the position that forest areas should be treated as wilderness areas, whether or not they are designated as wilderness areas. That policy is a dangerous one for the timber interests in this country and for everybody who relies upon timber availability.

Mr. Speaker, I feel that if we were really alert and really concerned about managing forests properly, we would provide for the cathedral experience which the environmentalist is asking for in the wilderness designation areas; and we can provide more than enough timber for the requirements of the population. We could provide it at prices that would not be inflationary and which would bring the cost of the average home down for the average purchaser.

Mr. Speaker, these things could be done by proper administration through the Forest Service; and this administration as well as others have not been alert to this fact and have not demonstrated their interest in proper management.

Mr. Speaker, in deference to the wilderness ethic, which we are subjected to now, the idea that more wilderness is automatically better is prevailing now. It is something that we must be getting away from. We must become more sophisticated in our approach to wilderness and forest management.

I have used this bill as a vehicle to discuss wilderness in general. This bill is a good one, I feel, and should be passed overwhelmingly.

Mr. RONCALIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to take a few minutes to rebut some of the observations; and I do not believe they were in objection to the legislation so much as they were observations made by my two friends, the gentleman from California (Mr. KETCHUM) and the gentleman from Colorado (Mr. JOHNSON).

In the first place, I concur that there ought to be an end to the classifying of lands into wilderness. That is what Congress intended in 1964 when the act was passed. That is what RARE 1 and RARE 2 were all about.

Mr. Speaker, I think we are coming to an end of the wilderness classification.

There are, indeed, in my State precious few areas left which would qualify as being large enough to be called wilderness areas. We have conferred in the last few months about which of these bills might be favored to serve certain purposes. There has been discussion with snowmobilists and other people about their uses so that the particular legislation would, at least, not be adverse to those people and be put to the most beneficial uses possible under given circumstances.

Mr. Speaker, I think this is the case with the Absaroka Wilderness. I think it is an area of matchless, indescribable beauty in Montana. Since 1924 it has been a primitive area. Since 1932 it has been protected.

We are doing very little more here than to fulfill a mandate placed in the 1964 act which says that this wilderness area shall be kept with the preservation of mining and other interests in mind. Accordingly, it has been placed in that category.

Mr. Speaker, I have no further requests for time, and I move the previous question on the motion to suspend the rules and pass the bill.

● Mr. UDALL. Mr. Speaker, I rise in support of S. 1671, legislation designating the Absaroka-Beartooth Wilderness in the State of Montana.

Mr. Speaker, the legislation we have before us today is the outcome of years of work by that tireless and dedicated conservationist, the late Senator Lee Metcalf. As the principal sponsor of this legislation, Senator Metcalf fashioned a bill that will benefit the people of Montana, and our Nation as well. The legislation seeks to place over 900,000 acres of beautiful back country alpine lakes, meadows, and mountains into the national wilderness preservation system. This legislation will consolidate into one large wilderness unit the Absaroka and the Beartooth Primitive Areas, long recognized as two of the finest wild areas in the nation, supporting a substantial outdoor recreation industry important to the local economy.

The proposed wilderness does contain some commercial timber. However, average timber harvest levels in recent years have been far below the annual potential yield of the surrounding forests and it has been clearly demonstrated that the timber values of the Absaroka-Beartooth proposed wilderness proposal are not needed to sustain the local forest products industry. The proposed wilderness also contains significant mineral resources. In recognition of this possible conflict, the Subcommittee on Indian Affairs and Public Lands, chaired by my able colleague, TENO RONCALIO, deleted most of the active mining claims in the area to accommodate possible future resource development and extraction.

In conclusion, Mr. Speaker, I urge my colleagues to vote favorably on this important conservation measure; the preservation of this magnificent area, so close to the heart of Senator Metcalf, is a fitting tribute to his sincere dedication to the wilderness ethic in America.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wyoming (Mr. RONCALIO) that the House suspend the rules and pass the Senate bill S. 1671.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SYMMS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 3, rule XXVII, and the Chair's prior announcement, further proceedings on this vote will be postponed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 9518, AMENDING THE SHIPPING ACT OF 1916

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 95–952) on the resolution (H. Res. 1074) providing for the considera-

tion of the bill (H.R. 9518) to amend the Shipping Act, 1916, to provide for a 3-year period, to reach a permanent solution of the rebating practices in the U.S. foreign trade, which was referred to the House Calendar and ordered to be printed.

TRAVEL EXPENSES OF GOVERNMENT OFFICIALS PAID BY PRIVATE FOUNDATIONS

Mr. ULLMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 810) to amend section 4941(d)(2)(G) of the Internal Revenue Code of 1954.

The Clerk read as follows:

H.R. 810

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4941(d)(2)(G) of the Internal Revenue Code of 1954 (relating to payment or reimbursement of certain traveling expenses) is amended by striking out "or" at the end of clause (vi), by striking out the period at the end of clause (vii) and inserting in lieu thereof ", or", and by adding at the end thereof the following:

"(viii) any payment or reimbursement of traveling expenses for travel between a point in the United States and a point outside the United States, but only if such payment or reimbursement with respect to any one trip by an official does not exceed the lesser of the actual cost of the transportation involved or $2,500, plus an amount for all other traveling expenses not in excess of 125 percent of the maximum amount payable under section 5702(a) of title 5, United States Code, for like travel by employees of the United States for a maximum of 4 days.

Clause (viii) shall not apply to any payment or reimbursement made by a private foundation if more than one-half of the foundation's support (as defined in section 509(d)) is normally derived from any business enterprise, trade association, or labor organization.".

SEC. 2. The amendments made by the first section of this Act shall apply to travel beginning after the date of the enactment of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. CONABLE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

Mr. ROUSSELOT. Mr. Speaker, I object. And on that I demand tellers.

Tellers were ordered, and the Speaker pro tempore appointed as tellers Mr. ULLMAN and Mr. ROUSSELOT.

The House divided, and the tellers reported that there were—ayes 15, noes 1.

Mr. BAUMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 387, nays 2, answered "present" 2, not voting 43, as follows:

[Roll No. 144]

Mr. MOORE changed his vote from "nay" to "yea."

So a second was ordered.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The gentleman from Oregon (Mr. ULLMAN) will be recognized for 20 minutes and the gentleman from New York (Mr. CONABLE) will be recognized for 20 minutes.

The Chair now recognizes the gentleman from Oregon (Mr. ULLMAN).

Mr. ULLMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 810 modifies a restriction imposed by the tax code on private foundations, to permit foundations to pay or reimburse Government officials for limited amounts of expenses incurred for travel outside the United States.

The Tax Reform Act of 1969 generally prohibits foundations from making any payments to Government officials. The act does permit payments to an official for certain travel expenses, but only if

the travel occurs solely within this country.

On reviewing this provision, the Committee on Ways and Means concluded that the present limitation to expenses of U.S. travel is too restrictive. For example, conferences are held in London dealing with British-American relations and similar topics. Attendance by officials from both the United States and foreign countries at such meetings would be useful, and there is no reason to prohibit foundations from making possible attendance by U.S. officials.

Accordingly, the bill permits foundation payments for such foreign travel by a Government official, but only up to certain dollar limits. The foundation's payments are limited to actual transportation costs up to $2,500, plus no more than 4 days of traveling expenses up to 1¼ times the Federal per diem allowance. Under the bill, no payments at all are permitted to be made by a foundation which is primarily supported by any one business, trade association, or labor organization.

In the case of domestic travel expenses under current law or foreign travel expenses under the bill, the foundation can pay such expenses only if the travel by the Government official carries out some educational, charitable, or other exempt purpose. For example, a foundation is not permitted to pay expenses of travel for vacation purposes.

Mr. Speaker, this bill represents a responsible and carefully limited modification of the current provision permitting foundation payments to Government officials for certain travel expenses. The bill does not have any direct revenue impact. I urge adoption of H.R. 810.

Mr. CONABLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 810, which allows a private foundation to reimburse a Government official for certain foreign travel expenses.

The Tax Reform Act of 1969 designated certain acts of private foundations as acts of "self-dealing" and imposed an excise tax on these acts. Generally classified as an act of "self-dealing" was the reimbursement of a Government official by a private foundation for travel expenses. An exception was provided where a Government official was reimbursed for certain domestic travel expenses. However, the reimbursement of a Government official by a private foundation for any foreign travel expenses is under the act "self-dealing."

There really is not that much difference between foreign and domestic travel. The current restrictions imposed on the reimbursement of Government officials for foreign travel expenses has resulted in private foundations not being able to carry out their exempt function to the fullest extent possible. It also results in public officials occasionally traveling at public expense. Thus, the reimbursement restrictions in practice have gone beyond their intended purpose and we believe that this amendment would be desirable.

The bill provides that a private foundation may reimburse a Government official for certain foreign travel expenses. Thus, the foreign travel expenses must be incurred as a result of travel between the United States and a point outside the United States. In addition, the amount of reimbursement for transportation cannot exceed the amount of such expenses or $2,500, whichever is less.

Further, in the case of other traveling expenses the amount of reimbursement cannot exceed 125 percent of the maximum amount payable under section 5702(A) of title 5 of the United States Code, concerning travel by U.S. employees, for a maximum of 4 days. These limitations are similar to those imposed under current law in the case of reimbursement for domestic travel, and we consider them reasonable.

The bill also requires the private foundation to meet certain support requirements. Thus the reimbursing private foundation cannot normally receive more than half of its support from any business enterprise, trade association, or labor organization. If it does, its reimbursement payments are not eligible for the bill's exceptions. This, of course, is to prevent the foundation's mode of reimbursement from being used as a subterfuge for some type of proscribed reimbursement.

I believe the bill will allow private foundations more effectively to pursue their tax-exempt purposes, and I urge its passage.

Mr. Speaker, this is a very modest bill. It has been passed by this House previously. It has not come to final passage, only because of the manner in which it was handled in the other body. There is not substantial opposition there either, but it is one of those measures which, because it does not have a very large constituency, does not always command the attention it should. I see no reason why my colleagues should not support this measure, and I urge its adoption.

Mr. ULLMAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. CONABLE. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Oregon (Mr. ULLMAN) that the House suspend the rules and pass the bill H.R. 810.

The question was taken.

Mr. ROUSSELOT. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 3, rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

HOME PRODUCTION OF BEER AND WINE

Mr. ULLMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2028) to authorize the home production of beer and wine, as amended.

The Clerk read as follows:

H.R. 2028

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) EXEMPTION FROM TAX ON WINE.—Section 5042(a)(2) of the Internal Revenue Code of 1954 (relating to production of wine for personal consumption) is amended to read as follows:

"(2) WINE FOR PERSONAL OR FAMILY USE.—Subject to regulations prescribed by the Secretary—

"(A) EXEMPTION.—Any adult may, without payment of tax, produce wine for personal or family use and not for sale.

"(B) LIMITATION.—The aggregate amount of wine exempt from tax under this paragraph with respect to any household shall not exceed—

"(i) 200 gallons per calendar year if there are 2 or more adults in such household, or

"(ii) 100 gallons per calendar year if there is only 1 adult in such household.

"(C) ADULTS.—For purposes of this paragraph, the term 'adult' means an individual who has attained 18 years of age."

(b) EXEMPTION FROM TAX ON BEER.—

(1) IN GENERAL.—Section 5053 of such Code (relating to exemptions from excise tax on beer) is amended by redesignating subsection (e) as subsection (f) and by inserting after subsection (d) the following new section:

"(e) BEER FOR PERSONAL OF FAMILY USE.—Subject to regulations prescribed by the Secretary, any duly registered adult may, without payment of tax, produce beer for personal or family use and not for sale if the amount of such beer on hand at any time (including beer in process) does not exceed 30 gallons. The aggregate amount of beer exempt from tax under this subsection with respect to any household shall not exceed—

"(1) 200 gallons per calendar year if there are 2 or more adults in such household, or

"(2) 100 gallons per calendar year if there is only 1 adult in such household.

For purposes of this subsection, the term 'adult' means an individual who has attained 18 years of age.".

(2) ILLEGALLY PRODUCED BEER.—

(A) Section 5051 of such Code (relating to imposition and rate of tax) is amended by adding at the end thereof the following new subsection:

"(c) ILLEGALLY PRODUCED BEER.—The production of any beer at any place in the United States shall be subject to tax at the rate prescribed in subsection (a) and such tax shall be due and payable as provided in section 5054(a)(3) unless—

"(1) such beer is produced in a brewery qualified under the provisions of subchapter G, or

"(2) such production is exempt from tax under section 5053(e) (relating to beer for personal or family use)."

(B) Section 5054(a)(3) of such Code (relating to illegally produced beer) is amended to read as follows:

"(3) ILLEGALLY PRODUCED BEER.—The tax on any beer produced in the United States shall be due and payable immediately upon production unless—

"(A) such beer is produced in a brewery qualified under the provisions of subchapter G, or

"(B) such production is exempt from tax under section 5053(e) (relating to beer for personal or family use)."

(3) DEFINITION OF BREWER.—Section 5092 of such Code (defining brewer) is amended to read as follows:

"SEC. 5092. DEFINITION OF BREWER.

"Every person who brews beer (except a person who produces only beer exempt from tax under section 5053(e)) and every person who produces beer for sale shall be deemed to be a brewer."

(4) EXEMPTION FROM CERTAIN PROVISIONS RELATING TO DISTILLING MATERIALS.—Section 5222(a)(2)(C) of such Code (relating to certain exemptions) is amended by striking out "; or" and inserting in lieu thereof "or 5053(e); or",

(5) PENALTY FOR UNLAWFUL PRODUCTION OF BEER.—

(A) Section 5674 of such Code (relating to penalty for unlawful removal of beer) is amended to read as follows:

"SEC. 5674. PENALTY FOR UNLAWFUL PRODUCTION OR REMOVAL OF BEER.

"(a) UNLAWFUL PRODUCTION.—Any person who brews beer or produces beer shall be fined not more than $1,000, or imprisoned not more than 1 year, or both, unless such beer is brewed or produced in a bewery qualified under subchapter G or such production is exempt from tax under section 5053(e) (relating to beer for personal or family use).

"(b) UNLAWFUL REMOVAL.—Any brewer or other person who removes or in any way aids in the removal from any brewery of beer without complying with the provisions of this chapter or regulations issued pursuant thereto shall be fined not more than $1,000, or imprisoned not more than 1 year, or both."

(B) The item relating to section 5674 in the table of sections for part III of subchapter J of chapter 51 of such Code is amended to read as follows:

"Sec. 5674. Penalty for unlawful production or removal of beer."

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on the first day of the first calendar month which begins more than 90 days after the date of the enactment of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. CONABLE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

Mr. ROUSSELOT. Mr. Speaker, I object, and on that I demand tellers.

Tellers were ordered, and the Speaker pro tempore appointed as tellers Mr. ULLMAN and Mr. ROUSSELOT.

The House divided, and the tellers reported that there were—ayes 17, noes 5.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 388, nays 3, not voting 43, as follows:

[Roll No. 145]

So a second was ordered.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Oregon (Mr. ULLMAN) and the gentleman from New York (Mr. CONABLE) for 20 minutes each.

The Chair recognizes the gentleman from Oregon (Mr. ULLMAN).

Mr. ULLMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 2028 amends the alcohol tax provisions of the Internal Revenue Code to permit anyone 18 years of age or older to produce beer in limited quantities for personal or family use. Present law does not permit tax-free production of beer for home use.

In addition, this bill modifies present law relating to tax-free production of wine for home use. At present, only heads of families are eligible for that exemption. This bill makes the exemption available to anyone 18 years of age or older.

Under the bill, the amount of beer or wine which can be produced for home use without penalty or tax cannot exceed 200 gallons of beer and 200 gallons of wine annually, if there are two or more adults in the household. If there is only one adult, he or she would be limited to 100 gallons of beer and 100 gallons of wine each year.

The production of beer involves prep-

aration of a mixture suitable for distillation into alcoholic spirits, which are taxable at a much higher rate than beer. To assist the Treasury Department's enforcement of these taxes on distilled spirits, the bill requires that any individual producing beer for home use must register with the Treasury. The bill does not require registration for home production of wine, because the possibility of tax evasion is not present in that process.

Mr. Speaker, the Treasury Department supports this bill. I urge the adoption of H.R. 2028.

Mr. CONABLE. Mr. Speaker, I yield 2 minutes to the distinguished minority leader, the gentleman from Arizona (Mr. RHODES), for some significant commentary on the passing scene here.

(By unanimous consent Mr. RHODES was allowed to speak out of order.)

BUSINESS OF THE HOUSE WILL PROCEED IN ORDER FOR BALANCE OF THE DAY

Mr. RHODES. Mr. Speaker, this has been a rather interesting day for many of us. I would like to announce that as far as the minority is concerned the business will proceed in order from now on for the rest of the day. We have no idea of having any rollcalls unless, of course, there is an attempt to come in early, in which event there could possibly be a rollcall because there is some legitimate disagreement over that subject.

However, I do hope that the minority has been able to make its point that we are very disturbed over the possible consequence of the legislation which has been voted out by the Committee on House Administration.

We are not any happier about it right now than we were this morning when this all began. We welcome all of the support which we can get in our attempt to stop what we think is a real threat and danger to the two-party system. We hope that that support will be forthcoming. Pending that, of course, it will be my hope that there could be some conversation between those of us on this side and those in the majority in the hope that we can return once again to the amicable conditions in which we usually operate this House but, lacking that, all I can do is say that I will see you tomorrow. Thank you very much.

Mr. CONABLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 2028, which amends the Internal Revenue Code of 1954 to authorize the home production of beer and wine.

Presently, the head of a family who registers with the Treasury may make up to 200 gallons of wine a year for family use without any payment of tax. Single individuals, not the heads of families, are not covered by this exemption.

An exemption from the tax imposed on the production of beer is not provided under current law for beer produced at home for family use. Therefore, beer produced at home is subject to a $9-per-barrel excise tax. In addition, the home brewing of beer is viewed as an illegal act which subjects the home brewer to certain criminal penalties imposed under the Internal Revenue Code.

H.R. 2028 provides that an adult may produce for family or personal use up to: First, 100 gallons of wine per year tax free, if he or she lives in a single adult household; or, second, 200 gallons of wine per year tax free, if he or she lives in a household with at least two adults.

H.R. 2028 also provides a limited exemption in the case of beer produced for personal or family use. Under this exemption, an adult, who registers with the Treasury, may produce for family or personal use up to: First, 100 gallons of beer per year tax free, if he or she lives in a single adult household; or, second, up to 200 gallons of beer per year tax free, if he or she lives in a household with at least two adults.

In addition, under either of these exemptions, the amount of beer on hand at any one time, including beer in the process of production, cannot exceed 30 gallons.

The bill also provides that the criminal penalties contained in the code with regard to illegally produced beer, are not applicable in the case of beer which qualifies for the exemptions provided under H.R. 2028.

H.R. 2028 provides for a more equitable application of certain taxes and I urge its enactment.

Mr. Speaker, I should explain that it will no longer be necessary under this provision to register with the Treasury if you are producing wine. However, it will be necessary to register with the Treasury if you are producing beer. The reason for that is that there is no experience with respect to producing beer at home since it has been prohibited until this time and the Secretary of the Treasury is concerned that the same materials that can be used for the production of beer could also be used for the production of hard liquor. However, they have found very little reason to be concerned about the production of wine, and have decided that registry would not be required.

There is not the possibility for abuse in the case of wine that there may be with respect to the home production of beer. That explains, I think, Mr. Speaker, why we are treating these two substances differently. This is, however, a bill which many citizens with their traditions of American independence would like to have available to them if they wish to produce their own beverages at home, rather than relying on the beer barons or the people who produce wine in large quantities commercially.

Mr. Speaker, I reserve the remainder of my time.

Mr. ULLMAN. Mr. Speaker, I yield 2 minutes to the gentleman from Indiana (Mr. JACOBS).

Mr. JACOBS. Mr. Speaker, as long as we are on the subject of wine, I propose a toast to our Republican friends, the true liberals in the House—very liberal when it comes to campaign spending, and today not exactly conservative with time, which is money, the taxpayers' money.

I thank the gentleman for yielding.

Mr. ULLMAN. Mr. Speaker, I have no further requests for time.

Mr. CONABLE. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Oregon (Mr. ULLMAN) that the House suspend the rules and pass the bill H.R. 2028, as amended.

The question was taken; and (two-thirds having voted in favor thereof), the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

EXCISE TAX ON TIRES AND TREAD RUBBER

Mr. ULLMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5103) to amend the Internal Revenue Code of 1954 to provide for excise tax refunds in the case of certain warranty adjustments on tires, and for other purposes, as amended.

The Clerk read as follows:

H.R. 5103

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subparagraph (G) of section 6416(b)(2) of the Internal Revenue Code of 1954 is amended to read as follows:

"(G) in the case of tread rubber in respect of which tax was paid under section 4071(a)(4)—

"(i) used or sold for use otherwise than in the recapping or retreading of tires of the type used on highway vehicles (as defined in section 4072(c)),

"(ii) destroyed, scrapped, wasted, or rendered useless in the recapping or retreading process,

"(iii) used in the recapping or retreading of a tire the sale of which is later adjusted pursuant to a warranty or guarantee, in which case the overpayment shall be in proportion to the adjustment in the sales of such tire, or

"(iv) used in the recapping or retreading of a tire, if such tire is by any person exported, used or sold for use as supplies for vessels or aircraft, sold to a State or local government for the exclusive use of a State or local government, or sold to a nonprofit educational organization for its exclusive use,

unless credit or refund of such tax is allowable under paragraph (3);".

(b) Section 6416(b)(3) of such Code is amended by inserting after subparagraph (C) the following new subparagraph:

"(D) in the case of tread rubber in respect of which tax was paid under section 4071(a)(4) used in the recapping or retreading of a tire, such tire is sold by the subsequent manufacturer or producer on or in connection with, or with the sale of, any other article manufactured or produced by him and such other article is by any person exported, sold to a State or local government for the exclusive use of a State or local government, sold to a noprofit educational organization for its exclusive use, or used or sold for use as supplies for vessels or aircraft, unless credit or refund of such tax is allowable under subparagraph (C);".

(c)(1) Section 6416(b)(2)(E) of such

Code is amended by inserting after "paragraph 3" the following: "(or in the case of the tread rubber on a recapped or retreaded tire, resold for use as provided in subparagraph (D) of paragraph (3)),".

(2) Section 6416(a)(1)(C) of such Code is amended by striking out "(b)(3)(C)" and inserting "(b)(3) (C) or (D)".

(3) Section 6416(b)(3)(A) of such Code is amended by inserting "(D)," after "(C),".

(4) Section 6416(b)(4)(A) of such Code is amended by striking out "section 4071" and inserting in lieu thereof "section 4071 or a recapped or retreaded tire in respect of which tax under section 4071(a)(4) was paid on the tread rubber used in the recapping or retreading".

(d) Section 6416(b)(2) of such Code is amended by striking out "or" at the end of subparagraph (J), by striking out the period at the end of subparagraph (K) and inserting in lieu thereof "; or" and by adding at the end thereof the following:

"(L) in the case of a tire in respect of which tax was paid under section 4071(a)(1) or (2) or under section 4071(b), adjusted pursuant to a warranty or a guarantee in connection with the sale of a replacement tire or otherwise, in which case the overpayment shall be in proportion to—

"(i) the adjustment (whether the adjustment method is by tread wear or otherwise) in the sales price to the ultimate consumer of the replacement tire, or

"(ii) in the case of a contract providing an overall adjustment for reimbursement with respect to tire warranties or guarantees, an average amount per tire based on the adjustment method (whether the method is tread wear or otherwise) which is in accordance with regulations prescribed by the Secretary and which is used by the ultimate vendor in making the adjustment to the ultimate consumer of the replacement tire,

unless credit or refund of such tax is allowable under paragraph (3).

For purposes of subparagraph (L), in the case of a contract providing an express warranty or guarantee only between the manufacturer, producer, or importer and an immediate vendee other than the ultimate consumer, (i) subparagraph (L)(i) shall be applied by substituting such immediate vendee for the ultimate consumer, (ii) subparagraph (L)(ii) shall be applied by substituting the manufacturer, producer, or importer for the ultimate vendor and by substituting such immediate vendee for the ultimate consumer, and (iii) no adjustment shall be made under subparagraph (L) before the adjustment to the ultimate consumer is made (or, in the case of subparagraph (h)(ii), deemed made)."

(e) Section 6511 of such Code is amended by redesignating subsection (g) as subsection (h) and by inserting after subsection (f) the following new subsection:

"(g) SPECIAL RULE FOR CERTAIN TREAD RUBBER OR TIRE EXCISE TAX CREDITS OR REFUNDS.—The period for allowing a credit or making a refund of any overpayment of tax arising by reason of subparagraph (G)(iii) or subparagraph (L) of section 6416(b)(2) with respect to any adjustment of sales price of a tire pursuant to a warranty or guarantee shall not expire if claim therefor is filed before the date which is 1 year after the day on which such adjustment is made (or, in the case of section 6416(b)(2)(L)(ii), deemed made)."

(f) Section 4071 of such Code is amended by adding at the end thereof the following new subsection:

"(f) IMPORTED RECAPPED OR RETREADED UNITED STATES TIRES.—

"(1) IN GENERAL.—For purposes of subsection (a)(4), in the case of a tire which has been exported from the United States, recapped or retreaded (other than from bead to bead) outside the United States, and imported into the United States—

"(A) the person importing such tire shall be treated as importing the tread rubber used in such recapping or retreading (determined as of the completion of the recapping or retreading), and

"(B) the sale of such tire by the importer thereof shall be treated as the sale of such tread rubber.

"(2) EXCEPTION FOR CERTAIN TAXABLE SALES.—Paragraph (1) shall not apply with respect to the sale of any tire if such tire is sold on or in connection with the sale of an article on which tax is imposed under section 4061."

(g) The amendments made by this section shall take effect on the earlier of—

(1) the first day of the first calendar month which begins more than 10 days after the date of the enactment of this Act, or

(2) April 1, 1978.

The SPEAKER pro tempore. Is a second demanded?

Mr. CONABLE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Oregon (Mr. ULLMAN) will be recognized for 20 minutes, and the gentleman from New York (Mr. CONABLE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Oregon (Mr. ULLMAN).

Mr. ULLMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 5103 enacts into law a longstanding administrative practice under which a tire manufacturer is allowed an excise tax credit or refund if a tire sale is later adjusted under a warranty or guarantee. The bill clarifies the refund or credit rules in cases where the warranty adjustments are made on a tire-by-tire basis and in cases where made on an overall basis, and both where the manufacturer's warranty runs to the ultimate consumer and where the warranty runs to a distributor.

In addition, the bill provides for a refund or credit of the manufacturer's excise tax imposed on tread rubber used for recapping or retreading tires if rubber used in the retreading process is wasted, if a sale of a retreaded tire is later adjusted under a warranty or guarantee, and in certain other instances. Thus, the bill makes the tread rubber excise tax work more like the tire tax.

H.R. 5103 also extends the time for filing claims for credit or refund of tire or tread rubber taxes. The bill relates the refund claim deadline to the period for which the tire warranty or guarantee extends.

Mr. Speaker, the bill clarifies and corrects a number of inequities and inconsistencies in present law. The Treasury Department has stated that it has no objection to the enactment of the bill. I urge approval of H.R. 5103.

The SPEAKER pro tempore. The Chair recognizes the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 5103, which amends the Internal Revenue Code of 1954 to provide excise tax refunds in the case of certain tire and tread rubber price adjustments.

Currently, the sale by the manufacturer, producer, or importer of: First, new tires, is subject to a tax of 10 cents per pound; and second, tread rubber tires, is subject to a tax of 5 cents per pound. Current law does not provide for the credit or refund of either of these taxes where there is an adjustment in the tire's selling price under a warranty or guarantee. However, where such an adjustment is made in the selling price of a new tire, the Internal Revenue Service has ruled that a refund or credit of a portion of the tax will be allowed. Thus, under current law and administrative practices a refund or credit of the tax paid on the sale of tread rubber tires is not provided where there is an adjustment in price under a warranty or guarantee.

H.R. 5103 establishes specific statutory rules which authorize the credit or refund of the excise tax imposed on the sale of new or tread rubber tires where there is an adjustment in the tire's selling price under a warranty or guarantee.

The bill also extends the period in which a claim for refund may be filed with respect to a tax that is refundable due to a tire selling price adjustment under a warranty or guarantee. Currently a tax refund generally must be filed within 3 years of the day the tax is due, or 2 years of the day the tax is paid, whichever is later. In the case of tire price adjustments under a warranty or guarantee. these time periods can prevent a tax refund where the adjustment occurs several years after the tire has been sold. To avoid this result, the bill provides that a claim for credit or refund of a tax, due to a tire price adjustment under a warranty or guarantee, may be filed within 1 year after the day the adjustment is made.

The bill is effective on the first day of the first calendar month which begins more than 10 days after its enactment or April 1, 1978, whichever is earlier. The April 1, 1978, date was chosen to prevent the temporary implementation of an IRS ruling that could establish rules contrary to those contained in H.R. 5103.

H.R. 5103 will correct certain inequities in the excise tax laws and I urge its enactment.

GENERAL LEAVE

Mr. ULLMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bills, H.R. 810, H.R. 5103, and H.R. 2028.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. ULLMAN. Mr. Speaker, I yield back the balance of my time.

Mr. CONABLE. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Oregon (Mr. ULLMAN) that the House suspend the rules and pass the bill H.R. 5103, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Debate has been concluded on all motions to suspend the rules. Pursuant to clause 3, rule XXVII, the Chair will now put the question on each motion on which further proceedings were postponed in the order in which that motion was entertained.

Votes will be taken in the following order:

S. 1671, H.R. 810.

The Chair will reduce to 5 minutes the time for any electronic vote after the first such vote in this series.

ABSAROKA-BEARTOOTH WILDERNESS ACT

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the Senate bill S. 1671.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wyoming (Mr. RONCALIO) that the House suspend the rules and pass the Senate bill S. 1671, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 405, nays 7, not voting 22, as follows:

[Roll No. 146]

Breaux	McCloskey	Rostenkowski
Carney	Mahon	Ruppe
Collins, Ill.	Meeds	Teague
Goldwater	Metcalfe	Weaver
Green	Moss	Wilson, C. H.
Hubbard	Myers, John	Young, Tex.

The Clerk announced the following pairs:

On this vote:

Mr. Carney and Mr. Rostenkowski for, with Mr. Krueger against.

Until further notice:

Ms. Oakar with Mr. Ruppe.
Mr. Meeds with Mr. McCloskey.
Mr. Breaux with Mr. Aspin.
Mr. Metcalfe with Mr. Anderson of Illinois.
Mr. Teague with Mr. Goldwater.
Mr. Weaver with Mr. Green.
Mr. Huckaby with Mr. John T. Myers.
Mr. Hubbard with Mr. Pressler.
Mrs. Collins of Illinois with Mr. Mahon.
Mr. Moss with Mr. Charles H. Wilson of California.

Messrs. BAUCUS, KILDEE, SKELTON, HANSEN, BRODHEAD, and PURSELL changed their vote from "yea" to "nay."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO SIT ON TOMORROW, DURING THE 5-MINUTE RULE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs may be permitted to sit on tomorrow, Wednesday, March 15, 1978, during the 5-minute rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

Mr. MICHEL. Mr. Speaker, reserving the right to object, may I inquire of my distinguished colleague, the gentleman from Arizona (Mr. UDALL) the reason for the request?

Mr. UDALL. Mr. Speaker, if the gentleman will yield, we are nearing the end of the markup on H.R. 39, the Alaska Lands Act. We think we can conclude this. I have cleared this with the gentleman from Alaska (Mr. YOUNG) who is most directly involved, and also with the gentleman from Kansas (Mr. SKUBITZ), who is the ranking minority member.

Mr. MICHEL. Do I understand that the gentleman has checked with the gentleman from Kansas (Mr. SKUBITZ) on our side?

Mr. UDALL. That is correct.

Mr. MICHEL. And is that gentleman in agreement with this?

Mr. UDALL. As I say, I have cleared this with both the Member most directly involved, the gentleman from Alaska (Mr. YOUNG), and with the gentleman from Kansas (Mr. SKUBITZ) who is the the ranking minority member.

Mr. MICHEL. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

CONFERENCE REPORT ON H.R. 3813, REDWOOD PARK EXPANSION

Mr. PHILLIP BURTON. Mr. Speaker, I call up the conference report on the bill (H.R. 3813) to amend the act of October 2, 1968, an act to establish a Redwood National Park in the State of California, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of March 8, 1978.)

Mr. PHILLIP BURTON (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The gentleman from California (Mr. PHILLIP BURTON) and the gentleman from Kansas (Mr. SEBELIUS) are recognized for 30 minutes each.

The Chair recognizes the gentleman from California (Mr. PHILLIP BURTON).

Mr. RYAN. Mr. Speaker, will the gentleman yield?

Mr. PHILLIP BURTON. I yield to the gentleman from California.

Mr. RYAN. I thank the gentleman for yielding.

Mr. Speaker, I would like to express my strong support for the conference report on H.R. 8313, legislation to expand Redwood National Park. I believe Representative PHIL BURTON and the other House conferees have done an excellent job of preserving the important provisions in the House bill, while accepting appropriate Senate language.

I am particularly happy that the House conferees agreed to the Senate provision vesting jurisdiction in the U.S. district court for determining the value of land and timber. It is a well-documented fact that the timber companies in the Redwood Park area have in the past been compensated more than generously by the U.S. Court of Claims.

The final bill requires the Secretary of Agriculture to prepare and send to Congress a study of timber harvesting alternatives for the Six Rivers National Forest. The timber companies have argued that there should be an increase in the allowable cut in the Six Rivers area in order to offset production losses resulting from expansion of the park.

I personally do not agree with this argument, and I do not believe it is necessarily the intent of this legislation that the Six Rivers Forest study should result in an increase in the allowable cut. The final version of the bill requires that proposed alternatives "be consistent with laws applicable to management of the national forests." It also requires the Secretary of Agriculture to "take into consideration economic, silvicultural, environmental and social factors."

There is currently no reason to think that an allowable cut increase would be consistent with the multiple use and sustained yield policy for national forest lands. In fact, numerous studies indicate that overcutting on privately owned, commercial timber lands in northern California have depleted the harvestable volume of lumber. Increasing the allowable cut in the Six Rivers National Forest may further jeopardize the potential for long-term, steady timber harvests in the area. This could result in severe future economic dislocations for the timber-dependent northern coast region.

The study called for in this legislation should consider how various timber harvest alternatives affect other forest resources, such as fisheries, water quality, erosion, and so forth. It is particularly important that potentially unstable terrain be identified through land stability studies. In addition, other governmental agencies with forest-related responsibilities and expertise should be included in the study, as should public and private interests.

I once again want to emphasize this is a bill to expand Redwood National Park; it is not supposed to compensate the timber industry by allowing overcutting of the Six Rivers National Forest.

I am pleased that this legislation is moving towards final passage. The investigation by the Environment, Energy, and Natural Resources Subcommittee, which I chair, helped focus public attention on the sad condition of the Redwoods. The recommendations in our committee's report regarding expansion of the park and compensation of affected timber industry workers are reflected in this bill.

Mr. SEBELIUS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased that we are able to bring a Redwood National Park expansion bill to the floor today, which I believe has been worked out in a manner to address and solve the concerns of most of the active participants in this issue.

I want to compliment the chairman of the subcommittee, Mr. PHIL BURTON, for the oustanding job he has done in guiding this bill through to the point we have reached today. His tenacity for facts and details related to this matter has been, I believe, unmatched in recent years for issues which have been before the subcommittee.

I particularly want to commend the gentleman from California (Mr. DON CLAUSEN) in whose district the park lies, for his great effort in support and defense of title II—the jobs and worker protection part of this bill. While he fought expansion all the way through the legislative process, he also worked simultaneously with the House and Senate committees to provide protection for the workers, the economy, and the tax base of the north coast counties he so ably represents. In this instance alone, he proved himself the champion of the working men and women of the area. The fact that this provision of the legislation is still intact in the bill, as are other provisions of title I which enhance employment opportunity and security, is due in significant part to his effort.

Mr. Speaker, I still maintain, as I stated during the floor debate on initial passage of this bill, that the legislation is far too costly, because we are trying to do too much, and moreover, we are way too late in doing it to be very effective. I am very sympathetic with taking whatever measures are necessary to increase protection for the tall trees grove, but this bill is too late in coming to significantly help that problem. Nevertheless, since the main issues of the total controversy seem to be resolved by the bill adopted by the conferees, I am willing to support it.

I am very sorry that the conferees did not agree to maintain some type of provision, as the House bill attempted, to consummate the transfer of the three existing California State parks, existing within the Redwood National Park boundary for the last decade, to the Federal Government so the entire park operation could be unified. I believe the principal reason no headway was made on this matter in conference was due to the near-total indifference of the State of California to even discuss the matter. Nevertheless, I would like to encourage the Secretary of the Interior to reinvigorate discussions with the State to see if some mutual accommodation can possibly be reached.

In almost all respects, this bill pursues a total Federal takeover—of lands and responsibilities—which I feel is excessive and unwarranted. The problems of both resource and job protection should be significantly assisted by efforts of the State and local governments. I feel that the Secretary of the Interior should make a strong effort to involve the State in assisting all Federal efforts. Particularly, the Secretary should assure that all State laws and regulations are fully invoked before he utilizes Federal funds on land rehabilitation measures. There is no reason why the State should not contribute as full a measure to land rehabilitation in this way as possible to help the Federal effort.

There will continue to exist, several logging access roads within the newly expanded park. While this may be a necessary evil, it is wholly contrary for roads of this type to continue to exist within a national park, and every effort should be made by the Secretary to phase these roads out of the park over time.

Mr. Speaker, while this bill, as I said at the beginning, does tend to resolve the very basic issues, there is a great amount of fine tuning which should and could have been incorporated into this bill.

Of all features of the bill which will be most interesting to watch will be the jobs section, title II. While I am sympathetic with assisting any job displacement legitimately resulting from park expansion, I am concerned that this title of the bill will prove to be excessively liberal and indefensibly costly to the Federal Government.

Mr. Speaker, with these expressions of concern, I will reluctantly vote for the adoption of the conference report.

Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. DON H. CLAUSEN).

Mr. DON H. CLAUSEN. Mr. Speaker, I remain adamantly opposed to the 48,000-acre expansion of the Redwood National Park as proposed by my colleague from California (Mr. BURTON) and as contained in the conference report now before the House. While fighting this legislation in every way possible, I have worked for inclusion of basic improvements in it, most importantly the economic development provisions and worker protection package. Now that the congressional decision has been made to force expansion of the park on us, despite the united opposition of the people who live and work in the area, these provisions are absolutely essential.

However, I want to stress that in no way have these improvements lessened my strong belief that protection of the environmentally sensitive areas and protection of the tall trees can be accomplished by a more sensible, less expensive,

more ecomonically realistic protection package. In line with my position, I offered a protection package, as a substitute, in the form of a motion to recommit on the House floor. My proposal, if accepted, would have reduced the acreage taken from 48,000 to 14,180 acres and the cost from $500 million to only $150 million, and had a substantially less adverse impact on jobs and the economy of the area.

I am extremely proud of the manner in which the people in the Redwood Empire and our "Save the Jobs" committee have worked together in a common effort to protect the interests of our people and move to revitalize and diversify our economy in response to this congressional action. The Subcommittee on National Parks and Insular Affairs first held hearings here in Washington last March followed by field hearings in San Francisco and Eureka, Calif., in April of last year. Opposition to the proposed expansion was fierce as evidenced by the estimated 2,500 people who tightly packed the municipal auditorium in Eureka while hundreds more waited outside.

On May 24, 23 logging trucks and 400 demonstrators arrived here in Washington to bring their protest to the steps of the Capitol. They brought with them a 18,000-pound peanut carved from a second-growth redwood tree bearing the slogan, "It might be peanuts to you, but it's jobs to us."

Despite the opposition of labor, representatives of the effected companies, local elected officials, school district representatives, realtors, and many, many more concerned residents of Humboldt and Del Norte Counties, the subcommittee continued to move ahead with additional hearings here in Washington. However, our protests were effective in forcing proponents of the legislation to recognize the severity of the potential economic damage to the communities affected and we gained their support for a reduction in the expansion area from 74,000 acres to 48,000 acres and eventual inclusion of a comprehensive worker protection package.

Our continued fight in the full Interior Committee resulted in further improvements and retention of the jobs package. Our determination to protect the jobs and sustain a viable economy in Humboldt and Del Norte Counties coupled with our ability to hold the bill in the House Rules Committee for several months gained numerous concessions and improvements that could not have been won otherwise. When we reflect on the fact that the principal advocates of park expansion were President Carter, Governor Brown, Senator CRANSTON, Secretary Andrus, and Congressman BURTON it makes our accomplishments all the more significant.

The significance of our victories will be felt for many years and has focused national attention on Humboldt and Del Norte Counties. In the past, promises made have not been fulfilled. I am prepared this time to go on the offensive and see to it that the economic development package is successful and that our area receives the assistance it needs to offset the impact of this governmental decision.

The conference report before the House contains a number of beneficial and significant provisions that reflect the danger of great economic harm to the Redwood Region that would be directly caused by the proposed expansion. These provisions would not be in the bill had it not been for the diligent work of all of the people of Humboldt and Del Norte Counties and their supporters throughout the Nation.

I would especially like to thank Chairman Pat Dorsey and the Humboldt County Board of Supervisors and County Assessor Ray Flynn who developed much of the statistical evidence we used to document the effects of the expansion.

Hundreds of citizens contributed time and money to the Save Our Jobs Committee led by Mayor Sam Sacco and Bob Matthews to support the efforts in opposition to the bill and to insure an ongoing lobbying effort was maintained throughout the battle. This took a great deal of hard work that was done despite overwhelming odds against us throughout.

Charles Nichols, general treasurer of the United Brotherhood of Carpenters and Joiners, and his assistant Jay Power and their local representatives Al Lasley and Ray Nelson, fought continuously to dramatize the impact of the expansion on the workers in the area and the need for a worker protection provision in the bill as a decision was made to go ahead.

Hundreds of people came to Washington at their own expense to protest the expansion. Others gave of their time to testify here on the issues involved. Among those people were Jack Feigel, Marcia Fulda, John Grobey, Grant Ramey, Don Peterson, Jack Razzetto, Les Westfall, John Miles, Spud McNamara, Bud Harwood, and most of our Humboldt and Del Norte County elected officials and many others. The members of the local news media were most helpful.

Keeping in mind the fact that I oppose the expansion I think it is important to clarify the reasons for a number of the other provisions in the bill which I do support.

First and foremost the worker protection provisions are included in the conference report and must be included in the bill when enacted. This section reflects the fact that we are going to be seeing the lives of more than a thousand families permanently disrupted by a governmental action. An action so serious in its effect that some reasonable attempt at remedial programs is absolutely required.

Without this worker protection plan, I do not believe any reasonable person would support this expansion, because without this assistance, the impact of the bill would be a cruel blow to these individuals and their families.

In addition, and related to the assistance to directly affected employees, the bill contains a commitment to an economic development package that will help the economy of the area overcome the loss of its basic resource. Already, a basic plan has been developed by 14 public entities in Humboldt County that is aimed at beginning the economic rebuilding job that will be required. We need to implement this plan as rapidly as possible to insure that the potential for harm to the region is minimized.

The conferees agreed to authorize $33 million to carry out the land rehabilitation provision.

The conferees accepted our amendment to permit us to work with the U.S. Forest Service for the purpose of development and implementation of a program of forest resource improvement and with the Department of Interior's Fish and Wildlife Service on fisheries and fish and wildlife habitat improvements and to determine the feasibility of utilizing wood waste through the establishment of energy producing facilities that could provide an additional energy source for the area.

We added specific language to section 102(a) that would permit Humboldt and Del Norte Counties to enter into agreements with the State of California, the Secretaries of Interior, Agriculture, Commerce, and Labor to develop and implement a program of forest resource improvement and utilization including reforestation, fisheries, fish and wildlife habitat improvements, and wood energy facilities that will utilize the wood waste in the area for conversion to an alternative source of energy.

Humboldt and Del Norte Counties and the State have already initiated programs designed to revitalize presently underproductive forest lands and resources. The programs include: reforestation of poorly stocked forest lands, erosion control work, improvement of fisheries and utilization of wood waste products for energy production. These activities are of special relevance to the short and long term health of the economies of Humboldt and Del Norte Counties which should be given first option on receipt of contracts and grants and priority consideration in all agreements entered into by the Departments of Interior, Agriculture, Commerce and Labor, in order to maximize the opportunity for the affected workers of these counties to have first priority in jobs created in the above programs.

The loss of tax base to this rural area will be one of the most significant long-range difficulties that will have to be overcome. The bill provides in part for this threat by authorizing payments in lieu of taxes to continue on beyond the ordinary 5-year adjustment period to an estimated 11 or 12 years. Hopefully, this will minimize the loss to Humboldt County's tax base caused by the removal of these redwood-producing lands.

Included under the payments-in-lieu-of-taxes provision is the specific statement that the College of the Redwoods is eligible for assistance. This is important

both because the college depends on the tax base for revenue and because it is expected to be a major component of any retraining programs that follow expansion.

Lastly, the conference report retains the provision calling for a study of timber harvest scheduling alternatives for the Six Rivers National Forest.

I want to thank all the conferees for the kinds of consideration they gave us and, in particular, the support they gave to our joint efforts to provide an economic development package, rehabilitation programs, worker protection provisions, in-lieu-of-taxes payments, the right-of-way for construction of a highway bypass around Prairie Creek, and the provisions for the College of the Redwoods and the Redwoods United Workshop.

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. DON H. CLAUSEN. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding.

The gentleman from California, now speaking, has been through a very agonizing experience. This proposal directly affected his district. It has caused high emotions and great difficulty for him. He has been a real statesman. He has handled this with great skill. He is a very valuable legislator and a very valuable member of our committee, and I commend him for the way he has been able to shape and change this to make it acceptable to some of the people in California. I am a strong supporter of the conference report.

Mr. DON H. CLAUSEN. I certainly thank the Chairman.

Mr. PHILLIP BURTON. Mr. Speaker, will the gentleman yield?

Mr. DON H. CLAUSEN. I yield to the gentleman from California.

Mr. PHILLIP BURTON. Mr. Speaker, I would like to join with my colleagues in commending our friend, the gentleman from California (Mr. DON H. CLAUSEN) for the gentleman's most able and effective efforts. I think that there have been few Members in this House that have had their point of view more refined and have learned as a result of the persistence of our dear colleague, the gentleman from California (Mr. DON H. CLAUSEN). For the 1 year that we spent on this immediate effort, the gentleman persisted time and again and insisted that the committee and the author of the bill give the kind of insight that was relevant to the proposed legislation. The efforts of the gentleman from California (Mr. DON H. CLAUSEN) in terms of authority for the bypass free highway, although not quite convincing me of what we ought to do, but we could not quite convince the Senate on that.

The assistance of the gentleman from California on the economic matters in the bill and the gentleman's help on title II, the gentleman's thrust that those loggers be protected, that every effort be made for cooperation with the logging companies who stay with the private sector, so I join with the full committee chairman and add my accolades to the gentleman from California.

Mr. SYMMS. Mr. Speaker, will the gentleman yield?

Mr. DON H. CLAUSEN. I yield to the gentleman from Idaho.

Mr. SYMMS. Mr. Speaker, I thank the gentleman for yielding.

I appreciate all the kind words of the chairman of the National Parks Committee and all the rest for their work; but no amount of kind words can deny the tragic loss of resources the American people are going to have here. We have the best solar energy converters in the world in these trees.

Mr. Speaker, how many trees are we talking about locking up in this area, how many board feet?

Mr. DON H. CLAUSEN. The allowable loss will be 125 million board feet per year.

Mr. SYMMS. One hundred twenty-five million board feet per year, and the gentleman from California well knows there are clauses in the bill where now the taxpayers not only are denied access to good renewable resources in trees that you can cut down and then grow again; is that correct?

Mr. DON H. CLAUSEN. That is right.

Mr. SYMMS. I would like to know how much money is this going to cost the taxpayers?

Mr. DON H. CLAUSEN. My own projection of the total revenue will be about $1 billion.

Mr. SYMMS. How many million?

Mr. DON H. CLAUSEN. I said $1 billion. That includes the first authorization back in 1968, plus what is authorized here.

Mr. SYMMS. Mr. Speaker, if the gentleman will yield further, I would like to praise the gentleman, too, but I do not know how much good the praise is going to be to the poor guy in the sawmill that has lost his job or someone that cannot afford redwood furniture next year because of the escalating cost that we are legislating here.

Mr. Speaker, I hope we vote this measure down.

Mr. DON H. CLAUSEN. The impact remains to be seen and we hope that the job recovery provision and the worker protection clause will minimize the impact.

Mr. SYMMS. Mr. Speaker, if the gentleman will yield further, I think it will minimize the impact in the gentleman's district, but maximize the burden that is already put on the back-broken taxpayers of America who have to pay the bill. Where this seems so ridiculous to me, is the fact that people cannot go more than 50 yards into the area, while we have people going back for 50 miles in other areas and it begs reason.

Mr. DON H. CLAUSEN. Of course, all the points the gentleman mentions were brought out in the committee and floor debate. I have continued to oppose the expansion for many of the reasons the gentleman has pointed out and I appreciate his support.

Mr. PHILLIP BURTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, among other things, I do want to express my congratulations to all the conferees. I offer my congratulations to the ranking minority member of the full committee, the gentleman from Kansas (Mr. SKUBITZ), and I think even more importantly, to the ranking minority member of our subcommittee, the gentleman from Kansas (Mr. SEBELIUS), without whose leadership this bill would not be as fine a product as the one we have before us.

Mr. Speaker, H.R. 3813, as amended and agreed to by the conferees on behalf of the House and Senate, will at last resolve the long struggle to establish a Redwood National Park worthy of the name. The 1968 act which first established the park, while including magnificent old-growth redwood groves, failed to establish defensible boundaries for the full protection of these tallest living things on earth.

The conferees have agreed to a final measure which is generally similar to H.R. 3813 as it passed the House of Representatives on February 9, 1978, by an overwhelming majority. The expanded boundaries are identical to those approved by the House; we have made no compromises detrimental to our aim of providing the needed protection for this unique national resource. We have also retained the provisions of our legislation which will insure that the forest products industry employees which may be affected by the park expansion will not bear the full economic burden of any dislocations in that industry. We have agreed to constructive suggestions by the Senate conferees to clarify and improve these employee protection provisions.

Mr. Speaker, I would now like to discuss the effects of the final language we have agreed to in some detail. I want to be absolutely certain that our intent in this legislation is fully carried out. In this regard, I would like to emphasize that because of the extensive drafting and review of H.R. 3813 this bill is clearly written and easy to understand. These remarks, then, are not designed to remake this legislation but rather to insure that, as author and sponsor of H.R. 3813, my understanding of how this legislation is designed to operate will be available. No interpretation of this legislation outside of this historical context can be given equivalent weight.

In addition to those individuals I mentioned on February 9, 1978, whose assistance was so helpful in the development of the Redwood National Park expansion legislation, I would like to add Mr. Howard Chapman, regional director of the National Park Service in San Francisco; a special thanks to Don Vial, director of the department of industrial relations, State of California, Dr. Sara Behman, deputy director of the department of industrial relations, and to Dan Johnston, health, welfare, and pension plan expert, whose assistance and factual information helped produce the jobs protection program; to Dale Crane, assigned to our staff; and to Bill Anderson of the House

Committee on Interior and Insular Affairs, who worked above and beyond the call of duty—for his help and constructive expertise in helping design the various provisions of the bill in compliance with the Budget Act.

Attached is a letter from John Dewitt, secretary and executive director of the Save-the-Redwoods League which should be of interest in regard to prices paid for acquisition of redwood lands in this region. I also want to call attention to the officers and council of the Save-the-Redwoods League whose names follow:

SAVE-THE-REDWOODS LEAGUE,
San Francisco, Calif., May 17, 1977.

Hon. PHILLIP BURTON,
Chairman, Subcommittee on National Parks of the Committee on Interior and Insular Affairs, Longworth Office Building, Washington, D.C.

DEAR CONGRESSMAN BURTON: The following data will be helpful to you and your committee. The enclosed summary shows the League's purchases in cooperation with the California Department of Parks and Recreation since 1963. The amount shown is the amount the League contributed to buy these properties for inclusion in the California Redwood State Parks. This sum was matched by the State of California in the amount of $8,506,777 from State Park Bond Funds and Federal Land and Water Conservation Fund Grants to the State of California Department of Parks and Recreation in the amount of $5,119,202.

Since 1918, when the Save-the-Redwoods League was founded, it has raised over 23 million dollars, which has been used with about 18 million dollars in State matching funds to buy the 135,000 acres now protected in the 28 California Redwood State Parks. Of this 135,000 acres, 56,000 acres are old-growth virgin Redwood stands, and the balance is Redwood land with both residual old-growth and second-growth Redwood.

In the Redwood National Park as it was established in 1968, 11,000 acres were old-growth Redwood, and about 17,000 acres were second-growth and cutover lands.

In State, county and city parks there are about 22,000 acres of Redwood, but most of this is second-growth.

The attached summaries will be helpful. Table I shows the acreage in regional, county and city parks. The second table is a summary of State Redwood Parks. The League is now holding about 6,000 acres for inclusion in the State Parks.

I hope this information is helpful to you.

Sincerely,

JOHN B. DEWITT.

Summary of acquisitions January 1963 to January 1977 by the Save-the-Redwoods League in cooperation with the California Department of Parks and Recreation and the National Park Service

Redwood Park name	Acreage	League Funds Expended
Jedediah Smith Redwoods State Park	1,496	$1,991,800
Del Norte Coast Redwoods State Park	470	25,300
Prairie Creek Redwoods State Park	2,617	3,249,507
Redwood National Park	100	75,400
Humboldt Redwoods State Park	25,293	8,613,565
Benbow Lake State Recreation Area	133	216,500
Richardson Grove State Park	57	30,000
Bear Harbor State Park	130	284,500
Standish-Hickey State Park	105	388,000
Smithe Redwoods State Reserve	160	25,000
Montgomery Woods Redwoods State Reserve	294	78,231
Pygmy Forest State Park	280	483,000
Big Basin Redwoods State Park	716	918,795
Forest of Nisene Marks State Park	140	325,000
Total	31,991	16,704,598

TABLE I. *Redwood parks and reserves other than State and Federal*

COUNTY, NAME OF AREA AND LANDOWNING AGENCY, AND ACREAGE

Del Norte: Florence D. Keller Park (County of Del Norte), 20.00.

Del Norte: Ruby Van Devender Park (County of Del Norte), 53.00.

Humboldt: College of the Redwoods campus—Beatrice (Redwoods Junior College District), 100.00.*

Humboldt: Jacoby Creek (City of Arcata), 600.00.

Humboldt: Redwood Park (City of Arcata), 23.00.

Humboldt: Rohner Park (City of Fortuna), 40.00.

Humboldt: Sequoia Park (City of Eureka), 46.00.

Mendocino: Faulker Park (County of Mendocino), 40.00.

Mendocino: Indian Creek (County of Mendocino), 15.00.

Marin: Cascade Park (City of Mill Valley), 8.00.

Marin: Kathleen Norris Park (City of Mill Valley), 1.00.

Marin: Martin Municipal Water District (total area: 17,776 acres), 2,600.00.*

Marin: Miller Grove Park (City of Mill Valley), 1.40.

Marin: Old Mill Park (City of Mill Valley), 6.40.

Marin: Redwood Grove Park (City of Mill Valley), 6.20.

Alameda: Chabot Park (East Bay Regional Park District) (total area: 4,800 acres), 500.00.*

Alameda: East Bay Municipal Utility District (total area: 30,750 acres), 478.00.

Alameda: Joaquin Miller Park (City of Oakland), 513.00.

Alameda: Redwood Regional Park (East Bay Regional Park District) (total area: 2,074 acres), 933.00.*

Alameda: Roberts Recreation Area (East Bay Regional Park District) (total area: 88 acres), 40.00.*

Alameda: Strawberry Creek plantation, Berkeley campus (University of California) and Stephen T. Mather Grove, 10.00.*

Alameda: Tilden Park plantation (East Bay Regional Park District), 7.00.*

San Mateo: County of San Francisco water department (total area: 62,975 acres), 2,000.00.*

San Mateo: Huddart Park (County of San Mateo), 973.00.

San Mateo: Memorial Park (County of San Mateo), 8,000.00.

San Mateo: Sam McDonald Park (County of San Mateo), 430.00.

Santa Clara: Mt. Madonna Park (County of Santa Clara) (total area: 3,093 acres), 2,000.00.*

Santa Cruz: De Laveaga Park (City of Santa Cruz), 565.00.

Santa Cruz: Harvey West Park (City of Santa Cruz), 27.00.

Santa Cruz: Miller Estate (University of California), 300.00.*

Santa Cruz: San Lorenzo Valley County Water District (total area: 3,750 acres), 1,000.00.*

Santa Cruz: Santa Cruz campus (University of California), 1,000.00.*

Sonoma: Cazadero Music Camp (City of Berkeley) (total area: 39.65 acres), 27.65.*

Total acreage, 22,363.65.

*Redwood acreage estimated by official of landowning agency.

SUMMARY OF REDWOOD UNITS WITHIN THE STATE PARK SYSTEM: PROPERTY OWNERSHIP REPORT, FISCAL YEAR 1975-76

Name	County	Year acquired	Acreage: State owned	Acreage: Lease or permit	Visitor attendance	Land acquisition: State expenditure	Land acquisition: Gifts and grant
Adm. Wm. H. Standley S.R.A.	Mendocino	1944	45.22				$2,847
Andrew Molera S.P.	Monterey	1968	2,153.98		26,089	$1,066,760	1,448,790
Armstrong Redwoods S.R.	Sonoma	1934	680.00		117,095	85,091	70,000
Bear Harbor R.P.	Mendocino	1975	85.00				257,000
Benbow Lake S.R.A.	Humboldt	1958	499.08		38,577	472,062	40,450
Big Basin Redwoods S.P.	Santa Cruz	1902	12,643.33		866,186	2,108,971	1,506,129
Butano S.P.	San Mateo	1956	2,186.49		36,446	1,011,905	31,385
Calaveras Big Trees S.P.	Calaveras, Tuolumne	1931	5,993.77		187,818	2,337,265	1,625,311
Del Norte Coast Redwoods S.P.	Del Norte	1925	6,375.02		98,223	300,165	249,870
Forest of Nisene Marks S.P.	Santa Cruz	1963	9,780.94		32,164	612,602	2,039,500
Grizzly Creek Redwoods S.P.	Humboldt	1943	234.25		40,943	300,195	
Hendy Woods S.P.	Mendocino	1958	604.69		66,023	569,484	52,000
Henry Cowell Redwoods S.P.	Santa Cruz	1954	4,072.45		201,658		1,735,400
Humboldt Redwoods S.P.	Humboldt	1921	44,798.14		768,386	8,209,946	13,984,150
Jedediah Smith Redwoods S.P.	Del Norte	1929	9,173.98		199,476	725,295	1,418,062
Julia Pfeiffer Burns S.P.	Monterey	1961	1,804.50	1,600.00	80,529	78,619	432,119
Mailliard Redwoods S.R.	Mendocino	1954	242.00				36,100
Montgomery Woods S.R.	do	1947	1,142.36			267,176	86,523
Mount Tamalpais S.P.	Marin	1928	6,204.78	28.50	1,199,593	5,320,277	1,072,732
Paul M. Dimmick W.C.	Mendocino	1928	11.81		45,964		2,000
Pfeiffer Big Sur S.P.	Monterey	1933	801.70	20.00	354,236	236,307	94,000
Portola S.P.	San Mateo	1945	1,740.26		48,635	199,825	113,000
Prairie Creek Redwoods S.P.	Humboldt, Del Norte	1923	12,321.05	63.27	274,553	2,309,042	2,976,389

Total			129,056.85	1,803.99	5,306,056	27,260,740	29,508,335

Mr. Speaker, the amendment to the General Authorities Act of 1970 provided by § 101(b) of this legislation establishes once and for all that the administration of our great park resources is a preeminent responsibility of the United States. This provision elevates and strengthens the management standards establishing the National Park Service in 1916 to requirements of law. It insures that management decisions affecting our park system must square with this standard and that competing interests not consistent with the first section of the act of August 25, 1916, may only be approved if specifically authorized, either previously or through subsequent legislation, by Congress.

The deletion of section 109 of the House bill by the conference committee is consistent with these responsibilities. While the State of California has important responsibilities to manage its private timber operations in a careful manner, this responsibility is not an exclusive one. Protection of the various areas of the National Park System is a national problem. The standard of care due such an area is not solely dependent upon such State provisions but must also focus on the Federal purpose for which these parks have been established.

There are several important points with regard to the employment provisions of section 103 of this legislation. First, the specific employment positions established for the park by subsections (a) and (b) should be considered as minimum figures for the immediate future. The intent of these subsections is to permit the National Park Service to immediately come to grips with the management and rehabilitation problems affecting the park and to provide a positive economic impact on the community. Each additional position necessary for park management and protection purposes will also have a positive effect on the local economy. Accordingly, such positions should be added as necessary.

The subsection (a) positions are primarily for park rehabilitation purposes, both within and outside the park, and the subsection (b) positions—other than those specified to provide for the transfer of the State parks to Federal management—are to provide improved park-management, interpretation and protection. Necessarily, there should be considerable flexibility between these functions.

Additional park positions will clearly be necessary should there be a delay in the donation of the State park lands. Accordingly, a portion of the positions set aside for State park transfer purposes may be used for immediate park needs consistent with the status of the transfer discussions.

Section 101(a)(3) provides for the donation of State park lands but no date certain for the donation is stated. Section 101(a)(5) provides for the Secretary to acquire land for the right-of-way for a new highway bypass which will in turn be donated to the State of California for construction of the new highway bypass. The State of California is required to designate the route of the highway by October 1, 1984, to receive the benefit of the otherwise unconditional donation. It is our intention that both the State and Federal responsibilities be carried out expeditiously.

The rehabilitation authorization is specifically included to require the Secretary of Interior to correct the watershed erosion problems in and upstream of the park. It is essential that these highly erodible lands be rehabilitated to protect the redwoods in the flood plains of Redwood Creek. This work by its nature is labor intensive and will require several years to accomplish.

The Secretary should be aware that our purpose is to use the best possible land and resource management practices to protect the park without undue concern regarding associated benefits that might accrue to adjacent or affected private lands.

The national forest study language in the bill must be placed in the context of existing law, and congressional commitment to multiple use and sustained yield. Congress does not presuppose that this study shall result in an increased cut level. I would emphasize that increased harvesting on public lands is but one option to consider, and that prior to any congressional commitment other opportunities must be equally considered. There is currently no factual basis for safety assuming that an allowable cut increase would be consistent with sustained yield and multiple use. The House of Representatives did not change the study provision as passed by the Senate, because we concurred in the view of the study expressed by Representative JAMES WEAVER in the course of the House debate on the measure on February 9, 1978.

As numerous studies have documented, historic and continued overcutting on privately owned, commercial timber lands in northern California have depleted the harvestable volume. Future declines in annual harvest from this privately owned land are now unavoidable, regardless of park expansion. These same studies reveal that a steady flow of timber from the national forests shall provide the main significant stability to the north coast timber economy. Overcutting the public land makes no more economic sense than the historic and continued overcutting of the privately owned commercial timberlands.

The following specific considerations should be included in the Six Rivers National Forest study:

First. The study must consider the different timber-harvest-scheduling alternatives in relation to the other forest resources. Example: What is the relationship of a particular timber harvesting schedule upon fisheries, water quality, and so forth.

Second. A mechanism should be included for multiple agency and public involvement in the study. Most certainly, other governmental agencies with forest-related responsibilities should be involved, such as the State regional water quality control, State fish and game, Federal Fish and Wildlife Service, and the U.S. Geological Survey.

Third. In developing the various harvesting scheduling alternatives, the study must consider the necessary constraints upon timber harvesting, particularly water quality maintenance and the identification of unstable terrain through land stability studies. It should be noted that it is a basic procedure to develop constraint mapping prior to developing timber harvesting programs.

Fourth. The economic consequences of alternative schedules must be assessed. The Six Rivers National Forest must be viewed within the broader regional needs as outlined by the U.S. Forest Service's Pacific Northwest Forest and Range Experimental Station study of 1977, authored by Dr. Donald Oswald.

The Secretary of Agriculture should also consider the following items as issues deserving attention in the study:

First. Accelerated development of a new timber management plan under the provisions of the National Forest Management Act. Congress has already committed itself to the principle that the resource must be protected through a resource-based planning approach rather than by trying to impose cutting quotas derived by political or economic directives that cannot be achieved in practice.

Second. The jobs to be developed by replanting as required by the 1976 National Forest Management Act. Congress has previously authorized this program, and I am hopeful that it will be fully funded.

Third. An analysis of jobs impact of timber exports.

Fourth. A review of the economic value of anadromous fisheries at historic levels, how to restore fisheries productivity, and the economic value to be derived from such efforts.

Fifth. The cost of developing, building and maintaining new roads associated with different cut levels. While fully respecting land withdrawals made for wilderness and other purposes, the U.S. Forest Service should also consider the possibility of preparing an agency road plan that, if implemented, would reduce the lead times between the letting of contracts and the actual harvesting of areas.

Sixth. The economic/environmental effects of shelterwood logging on cut blocks of 10 acres or more should be assessed.

Seventh. A discussion of the feasibility and application of intensified forest management techniques, such as thinning young stands and general timber stand improvement efforts.

H.R. 3813 provides for a 30,000-acre park protection zone. Within this area, the Secretary is provided additional acquisition authority. The provision permits the Secretary to acquire lands, interests in land, or related down timber within the park protection zone from a willing seller without a showing that failure to acquire could result in physical damage to park resources. Lands may also be acquired, by condemnation if necessary, upon a showing that failure to acquire could result in physical damage.

The park protection zone provision has two basic purposes. One is the physical protection of the expanded national park itself. The second is to acquire additional lands from willing sellers to provide enhanced public benefits in this area.

As indicated in the conference report, the park protection zone is primarily designed to protect the expanded park. Acquisition of a parcel of land under the authority of this provision will not serve to authorize additional acquisition to protect the parcel just acquired nor provide the Secretary with any additional legal rights against lands adjacent thereto. Such acquisition will not, however, in any way diminish the responsibilities of adjacent landowners to protect the expanded Redwood National Park. Accordingly, this provision has been modified slightly by the inclusion of the phrase "as a result of such acquisition."

While this standby acquisition authority is provided solely for park protection purposes, it is important that the Secretary purchase manageable units of land if acquisition is necessary. Accordingly, once acquisition becomes imperative, the Secretary should also consider aesthetics, visitor use, the resources located in the area, the possibility of hard wood conversion or soft wood reforestation, and questions of severance. There may be situations where for a minor increase in cost, or even a savings in excessive severance costs, a meaningful unit of Federal lands can be added for public enjoyment, economic revitalization, resources management, or minimization of significant severance problems. If so, the Secretary should structure his acquisition accordingly. In no event should the Secretary be precluded from establishing public access to such acquired lands.

Acquisition is not an exclusive recourse. As the Department of the Interior learned since 1968, it is impossible to negotiate park protection when the only meaningful recourse is to pay the landowners if they fail to agree. Responsible litigation, when necessary to protect the physical resources of Redwood National Park, is a vital tool that should be utilized if necessary and appropriate.

This finding is consistent with the actions of the Senate Committee in establishing the Park Protection Zone. That action consisted of two separate amendments. In one amendment, the committee authorized standby acquisition authority within the Park Protection Zone. In a separate amendment, the Senate Committee deleted the administration's proposed regulatory framework for, inter alia, this area.

In the Senate's reported explanation of these changes, report 95–528 at page 7, the committee specifically noted that this standby acquisition authority is to be used only in situations of last resort, to protect the park from physical damage or likely damage. The committee envisioned the use of cooperative agreements under section 3(e) of the 1968 act and the use of litigation, if necessary, before such acquisition would take place. As the Senate report indicates, these three tools—cooperative management, litigation and selective acquisition—are designed to replace the administration's regulatory scheme to establish needed park protection.

The second major purpose of the park protection zone is to provide a mechanism whereby the Secretary, through acquisition from willing sellers, is able to consolidate the management of lands in this important area for a variety of benefits. Acquisition from a wiling seller—that is, by contract or through the filing of an agreed upon condemnation action in order to clear up title or other technical problems—is, accordingly, authorized. Acquisitions of this nature may be used to add to existing Bureau of Land Holdings in Lacks Creek. Unified management of this important drainage would further reduce sedimentation impacts in Redwood Creek. Prairie lands, such as those included in the Stover Ranch ownership, would enhance the opportunities for public use in the area.

There is one further point that should be stressed concerning this park protection zone. The Senate committee report called for a 60-day notice period prior to any acquisition in the zone. Such a provision is not desirable with regard to this emergency acquisition provision. Delay might result in the loss of a key protection area while even a rapid review process takes place. As an alternative approach, the Secretary of the Interior should keep the appropriate committees advised of difficult harvest plans as the review process proceeds, alert the committees that emergency acquisition may be necessary, and seek their review at that early point in time.

In this manner, the intent of the Senate report language can be respected without additional threats of preemptive harvesting. Such an approach would be consistent with the Senate committee's instructions that the Secretary develop clear guidelines concerning necessary park protection needs. In this regard, however, the existing preinspection of proposed timber harvest plans by the National Park Service is vital to this process. Accordingly, I urge that this requirement be formally adopted by the California State Board of Forestry for the Redwood Creek basin.

As the report of the Senate Committee on Energy and Natural Resources indicates with regard to committee amendment No. 3, the question of down timber presents two problems. The first has been to try and discourage the concerned timber companies from cutting timber just prior to passage of this legislation on the theory that once cut, they would own it regardless of passage. It is for this reason that the Senate committee had added the date October 15, 1977,

and provided that any down timber cut after that date would be the property of the United States.

The second problem is that portions of the older down timber lie in revegetated second growth forest where removal will severely damage these returning resources. Such damage was avoided following the 1968 taking only through the generous donation of such down timber interests by Simpson Timber Co. and the lapse of a reasonable time for removal with regard to other holdings, if any. The Senate amendment acknowledged but did not resolve this issue.

It is for this reason that the conference committee proposes the adoption of the House provision. H.R. 3813 provides that down timber cut before January 1, 1975, or after January 31, 1978, will be taken by passage of this act. That means that the companies will own that down timber cut after December 31, 1974, or before February 1, 1978—a period in excess of 3 years.

It is intended that down tree personal property owned by the companies, or revested to them, will be removed within a reasonable time. I suggest this period be not less than 2 nor more than 4 years. It is contemplated that additional down timber, either originally owned by the United States or subsequently abandoned by the companies, will be removed and sold in the course of rehabilitation operations consistent with the purposes of this act and subject to sound rehabilitation practices.

In accord with the terms of this provision, and section 107 of this act, I also intend that the Secretary's overall requirements for the removal of all down timber—regardless of whether title remains with the companies, title is revested, or the down timber is sold—include reasonable conditions necessary to insure the continued availability of raw materials to Redwoods United, Inc., a nonprofit corporation located in Manila, Calif.

The Senate bill provides for the continued use of the K & K, L line, M line, and Bald Hills roads. The House bill also includes the B line. The Senate language is relatively brief, It provides that:

> The Secretary shall permit continued access and use of the K and K, L line, M line, and Bald Hills roads at existing levels of access and use.

In support of this provision, the Senate report, No. 95–528 at page 10, provides as follows:

> The committee has added a provision to assure the companies with continued access and use of the K & K line, L line, M line, and Bald Hills roads at existing levels to avoid excessive severance and dislocation problems. It is the understanding of the committee that the Secretary will revest title in those roads to the companies subject to a reservation of use for park management purposes. It is further recognized that the Secretary may elect to exclude these roads or portions thereof from the park by using the presently existing authority to make minor boundary adjustments. As the legislation indicates there can be no restrictions on existing levels of company access and use. Under such a revestitute the companies shall have the responsibility to maintain these roads to protect both their access and use and park resources.

The House provision was more detailed and restrictive. It provides:

> The Secretary shall permit, at existing levels and extent of access and use, continued access and use of each acquired segment of the B line, L line, M line, and K and K roads by each current affected woods employer or its successor in title and interest: *Provided*, That such use is limited to forest and land management and protection purposes, including timber harvesting and road maintenance. The Secretary shall permit, at existing levels and extent of access and use, continued access and use of acquired portions of the Bald Hills road by each current affected woods employer or its successor in title and interest: *Provided*, That nothing in this sentence shall diminish the authority of the Secretary to otherwise regulate the use of the Bald Hills road."

The conference committee determined that the House language is more appropriate. There is one minor point. I have been advised by the National Park Service that the reference to the L line is inappropriate; that the continued use of this route is not needed. Accordingly, the reference to the L line may not be necessary.

The problem presented by the legislatively taken haul roads is one of balancing the economic and severance damage impacts of terminating their use with the need for protection of park resources should they continue to function. We believe that by limiting the future use of these roads to the affected woods employers presently using them (and their successors in title and interest) and by limiting that use to existing levels and extent of access a balance can be achieved. In this regard, affected woods employers are intended to mean Arcata Redwood, the Samoa Division of Louisiana-Pacific, and the Simpson operations in Humboldt and Del Norte Counties.

As indicated in the Senate report, secretarial permission shall be subject to the concerned timber companies accepting the responsibility to maintain these roads to protect both company access and use and park resources and to a reservation of a right of use for park management and land rehabilitation purposes. Because the main use of these routes will be trucks and heavy equipment that are incompatible with excessive visitor traffic, the Secretary is authorized to restrict public use in a manner compatible with the affected woods employers use, which is limited to forest and land management and protection purposes.

Establishment of the continued use of these haul roads may also be subject to agreement and provision for the use of portions of these or other private haul roads outside the boundaries of the park for park management and land rehabilitation purposes. We are particularly concerned that reasonable temporary access can be provided for the Secretary from Big Lagoon to the western side of Redwood Creek for purposes of watershed rehabilitation and park management via the A, B, C, and M line roads until the completion of an alternate ridge route from Orick. We intend that the Secretary proceed expeditiously with the construction of an access route leading south from Orick to provide access to the western side of the Redwood Creek watershed to allow for watershed rehabilitation and administration, consistent with the general management plan, which should be prepared for the entire 106,000 acre park, including consideration of all protected resources within the exterior boundaries.

The Secretary may accomplish the objectives outlined above through revestiture, permit, cooperative agreement or other appropriate legal binding document. In essence, this effort should be a part of the process of establishing the park boundaries on the ground. In this regard, it is imperative that this survey effort—within Interior, or pursuant to contracts—begin immediately to permit accurate and timely appraisals of the lands taken. As a part of this process, my intent is that the boundary indicated as proposed additions on map number 167–80005–D, dated March, 1978, may be adjusted by the Secretary to conform as nearly as possible to ridgetops or roads near ridgetops to include complete tributary watershed units in the park, to avoid the unnecessary inclusion of private lands outside the Redwood Creek watershed and to minimize severance damage. The means of accomplishing this change is the revestment provision of section 101(a)(5) of this amendment and section 2(a) of the act of October 2, 1968.

There is one further point of concern. Neither the House and Senate provisions nor this conference have recommended any particular period of time for this continued use. This is a matter left to the judgment of the Secretary and the concerned companies. While an unlimited or open-ended term is possible, it is our hope that some specific termination point should be agreed to if possible. This would be particularly appropriate if any arrangement for relocation of the major haul roads to areas outside the park could be established. We recognize that reasonable alternate access for affected woods employers does not presently exist. In the long run, with adequate time for planning and relocation, we believe, however, that alternate access for logging and road equipment should be found, and when found, should be utilized to minimize inevitable conflicts between visitors and logging traffic.

Several general points are in order with regard to the legislative taking provided by this bill. As in the 1968 act, this legislation provides for the immediate vesting of title to the expanded park area upon passage, with special consideration to areas of 50 acres or less. There is also a pledge of full faith and credit that just compensation will be paid. Such a legislative taking has several significant advantages. Most importantly, the immediate taking insures that there will be no further cutting of timber while tra-

ditional condemnation actions are initiated. This is of critical significance in proposed park areas where development, timbering, or inappropriate mineral extraction is foreseeable.

Such a taking also insures the earliest possible valuation date. In a market, such as redwoods, where land and resource values are increasing dramatically, it is important to establish the date of taking as quickly as possible. In a legislative taking the date of taking, and the date of valuation, is the date of passage of the act.

The other critical factor in insuring that the price paid for this land and timber is fair to both the United States and the concerned landowner is vigorous action by the Department of Justice. It should come as no surprise that in the major cases arising out of the 1968 taking, the Department of Justice attorney responsible for these cases was always confronted with numerous private counsel.

Initially, I had proposed a $5 million litigation fund to insure that Justice will establish a special section to try these cases. This was deleted only after we received repeated assurances that Justice would do the job. I fully expect that this will occur; that Justice will insure that a full complement of legal and appraisal experts are assigned or retained to protect the Government's purse.

In this regard, at the onset of this legislative process, I made extraordinary efforts to establish the exact nature of the 48,000 acres that are to be acquired. This was a most difficult job. I concluded, however, that of this 48,000 acres, less than 9,000 acres remain in intact virgin redwood forest stands.

I also concluded that the pricing of redwood timber and the sale of redwood-timber-bearing lands is an extremely closed market. I seriously question whether there is a free flow of competition requisite to establishing fair market values based upon the comparable sales process. Accordingly, I strongly recommend that the Department of Justice give very careful consideration to the nature of the Redwood market in the process of handling these cases. This may require consultation throughout the various divisions within the Department of Justice and, accordingly, should be coordinated by an individual with such responsibilities.

With regard to subsection 101(a)(6) of H.R. 3813 and the parallel subsection 1(a)(6) of S. 1976, there were two minor differences. The initial sentence of the amendatory language of this provision in the House bill did not appear in the Senate bill. In addition, H.R. 3813 contained a reference to the Secretary of Agriculture that is not found in S. 1976.

The first difference is of no substantive or technical importance. The Senate deleted the sentence in question rather than correct an inaccurate citation that was in the Senate bill. This deletion was explained as follows:

Mr. ABOUREZK. Mr. President, I propose and send to the desk an unprinted amendment.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

"The Senator from South Dakota (Mr. ABOUREZK) proposes an unprinted amendment numbered 1163:

"Page 7, beginning on line 13, delete 'Effective on the date of enactment of this sentence, there are made available from the amounts provided in section 1(c) herein such sums as may be necessary for the acquisition of interests in land.' "

Mr. ABOUREZK. Mr. President, the amendment which I have proposed is acceptable to the sponsor of this legislation and has been cleared with the minority. This is a technical amendment to eliminate an inappropriate reference. The language to be deleted is an amendment to the 1968 act, which refers to a section of this measure rather than to section 10 of the 1968 act. The sentence, if modified to refer appropriately, would merely restate the intent of Congress in 1968 and is not necessary. The Congress intended and still intends that within the limitations imposed by section 10 of the 1968 act, the Secretary should exercise his full authority for cooperative agreements and contracts. It is not necessary to restate that any sums still authorized but unappropriated in the 1968 act will continue to be available to him for those purposes.

Mr. HANSEN. I have no objection to the adoption of the technical amendments, Mr. President.

The ACTING PRESIDENT pro tempore. Without objection, the technical amendments are agreed to.

[Congressional Record S. 934, Jan. 31, 1978]

We agree with this discussion but have elected to include the specific provision of H.R. 3813. As indicated by Senator ABOUREZK, those moneys authorized to be appropriated by section 10 of the 1968 act, and that remain unappropriated at this time, are intended to be available for the various purposes established by the 1968 act. These purposes include the development of cooperative agreements and contracts under section 3(e) and they also include the completion of the scenic screen requirements established by section 3(d). In this regard, we note that the scenic screen area is depicted as the "Scenic Corridor" on map 167–80005–D, March 1978. It is our intention that the National Park Service insure that this area be evaluated for acquisition of those lands or interests in land necessary for scenic purposes as a part of the general management plan process provided by section 104(b) of this legislation. Acquisition within the "Scenic Corridor" is to restore or maintain land uses compatible and appropriate with the areas beyond or behind the corridor. In this sense, the value of the scenic buffer area has shifted since the 1968 bill from protecting the motorist from unsightly and jarring clearcut operations to enhancing and insuring a proper setting for Redwood National Park from the major road networks utilizing the corridor.

The other difference in subsection (a)(6) concerns the House reference to the Secretary of Agriculture, as well as the Secretary of the Interior, with regard to careful management of any additional lands that are within the hydrographic basin of Redwood Creek. We concluded that the language of H.R. 3813 was appropriate.

The provisions of California law referred to in section 201(18) are section 1714 of the California Revenue and Taxation Code and in section 1265.7 of the California Unemployment Insurance Code.

With respect to jobs paid on an incentive basis, the term "wage rate," whenever used in section 207, is intended to refer to average hourly earnings. The Secretary should determine the amount of such earnings for affected employees on the basis of the earnings of employees actively employed in the same occupation by the same employer during the week for which the benefit is payable or, in the absence of data on the earnings of such employees, on such other basis as he deems fair and reasonable. The review procedure provided for in section 103(h) is applicable to such determinations.

Regarding section 212(g), it is explicitly intended that the provision of the Regional Rail Reorganization Act under which previously relocated employees may, under certain circumstances, be reimbursed for expenses incurred in moving back to their original location shall be applicable, in similar circumstances, to employees covered by this act.

Title II establishes special jobs programs, including income maintenance and unemployment benefits to workers. Under title II workers are entitled to receive benefits upon enactment of this act. In fact, the entitlement authority provided by this legislation obligates the United States to make payments to those individuals who qualify for the beneficiary requirements set forth in it.

This legislation establishes the qualified beneficiary's right to receive benefits without waiting for future congressional action.

Also, the House agreed to delete its section 204(d)—in light of the Department of Labor's statement that the added employee protection language was unnecessary and that the Department desired more procedural flexibility to accomplish this objective than that provided in section 207(d).

In closing, Mr. Speaker, I should like to point out that, while I have discussed the detailed points of difference which were resolved by the conference committee, we should not lose sight of the fact that both the Senate and the House of Representatives have already passed measures which were substantially in agreement. There is no difference on the essential issues that a 48,000-acre park expansion is necessary and appropriate. Our conference committee has refined the best features of both measures into a final text which will resolve this issue to the credit of the Congress.

I want to express my profound gratitude not only to my fellow House conferees, but to the Senators and their staff who have made this final resolution possible.

Last, but not least, I want to commend our distinguished senior Senator from California, ALAN CRANSTON, for his heroic leadership in this effort—as well as Roy Greenaway, Kathy Files, Ron Antipa, and Ann Raye, of his staff, and Jim Beirne, Tony Bevinetto, and Tom Williams of the Senate committee staff. for tireless and effective work.

Also, to Senator JAMES ABOUREZK, for his strength and invaluable assistance, Californians—and all of his fellow Americans—owe him a debt of gratitude.

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. PHILLIP BURTON. I yield to the gentleman from Arizona.

Mr. UDALL. Mr. Speaker, I want to join in the commendation of the two gentlemen from Kansas. The legislation relating to the national park system has never been partisan; it has always been a bipartisan effort, going back, in my experience, to our former colleague, John Saylor of Pennsylvania. These two gentlemen from Kansas, KEITH SEBELIUS and JOE SKUBITZ, are in that tradition. They have given us a lot of good national park legislation, and I want to join with the gentleman from California (Mr. PHILLIP BURTON) in his commendations.

Mr. SEBELIUS. Mr. Speaker, I yield back the balance of my time.

Mr. PHILLIP BURTON. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. PHILLIP BURTON. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 317, nays 60, answered "present" 1, not voting 56, as follows:

Mr. Weaver with Mr. John T. Myers.
Ms. Holtzman with Mr. Pressler.
Mr. Hubbard with Mr. Mahon.
Mrs. Collins of Illinois with Mr. Broomfield.
Mr. Moss with Mr. Cederberg.
Mr. Charles H. Wilson of California with Mr. Devine.
Mr. Alexander with Mr. Hagedorn.
Mr. Biaggi with Mrs. Heckler.
Mr. Cornwell with Mr. Cohen.
Mr. Dellums with Mr. Guyer.
Mr. Harrington with Mr. Runnels.
Mr. Hall with Mr. Tucker.
Mr. Nix with Mr. Ammerman.
Mr. Nichols with Mr. Whitten.
Mr. Rahall with Miss Jordan.
Mr. Santini with Mr. Young of Alaska.
Mr. Lehman with Mr. Thornton.
Mrs. Schroeder with Mr. Lundine.
Mr. Murphy of New York with Mr. Flynt.
Mr. Fascell with Mr. Dingell.
Mr. Ford of Michigan with Mr. Fountain.

Mr. GIAIMO and Mr. EDWARDS of Oklahoma changed their vote from "yea" to "nay."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

APPOINTMENT AS MEMBERS OF BOARD OF VISITORS TO U.S. COAST GUARD ACADEMY

The SPEAKER pro tempore. At the request of the Speaker, pursuant to the provisions of title 14, United States Code, section 194(a), the Chair appoints as members of the Board of Visitors to the U.S. Coast Guard Academy the following Members on the part of the House: Mr. DODD, Connecticut, and Mr. SARASIN, Connecticut.

APPOINTMENT AS MEMBERS OF BOARD OF VISITORS TO U.S. MERCHANT MARINE ACADEMY

The SPEAKER pro tempore. At the request of the Speaker, pursuant to the provisions of 46 U.S.C. 1126c, the Chair appoints as members of the Board of Visitors to the U.S. Merchant Marine Academy the following members on the part of the House: Mr. WOLFF, New York, and Mr. WYDLER, New York.

APPOINTMENT AS MEMBERS OF BOARD OF VISITORS TO U.S. MILITARY ACADEMY

The SPEAKER pro tempore. At the request of the Speaker, pursuant to the provisions of 10 U.S.C. 4355(a), the Chair appoints as members of the Board of Visitors to the U.S. Military Academy the following members on the part of the House: Mr. MURPHY, New York, Mr. LONG, Maryland, Mr. CEDERBERG, Michigan, and Mr. GILMAN, New York.

APPOINTMENT AS MEMBERS OF BOARD OF VISITORS TO U.S. NAVAL ACADEMY

The SPEAKER pro tempore. At the request of the Speaker, pursuant to the provisions of 10 U.S.C. 6968(a), the Chair appoints as members of the Board of Visitors to the U.S. Naval Academy the following members on the part of the House: Mr. FLOOD, Pennsylvania, Mr. MCKAY, Utah, Mr. KEMP, New York, and Mrs. HOLT, Maryland.

A CONTEST TO ENCOURAGE INVENTION OF A WAY TO STORE LARGE AMOUNTS OF ELECTRICAL ENERGY

(Mr. ALLEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALLEN. Mr. Speaker, I am today introducing a bill to establish a national contest, with a prize to the winner of $10 million. If this contest succeeds in its purpose, it will save the taxpayers and consumers of this Nation many, many billions of dollars. If it fails and there is no winner, there will be no prize awarded, and it will cost the taxpayers nothing.

With full awareness of the highly technical problems and mammoth obstacles that must be surmounted—as was the case in sending astronauts to the Moon—the purpose of this contest is to challenge the same inventive genius of our best minds and top electrical engineers, against all difficulties, to invent and develop an efficient and cost-effective technology and facility for the storage of large quantities of electric energy for later use when needed. Such electricity, even now, could be produced by existing generators, and from the fuel that is now going to waste, during much of the time when the demand for electricity is far below the capacity of our present generating facilities to produce.

During such time, millions and millions of dollars in fuel are now being wasted because of the necessity of every electric utility to keep its generators and boilers fired and geared up to meet peak-load demands, which occur only a very limited number of hours on any day. The balance of the time, fuel is being wasted, and electricity either is not generated or not used, because no technology or adequate facility to store it has been developed or is presently available.

The Research Division of the Library of Congress reports that approximately 50 percent of the total of all fossil, nuclear, and other fuels consumed by existing electric generating plants is going to waste, and that existing generating facilities are producing at an annual average rate of less than 45 percent of their capacity.

All of this could be corrected, and a tremendous savings could be passed on to all consumers of electricity, in the form of greatly reduced electric bills, if an efficient and cost-effective technology and facility could be developed to store for later use the electric energy not now being used or produced from existing generating plants, and from the untold amount of fuel that is thus being wasted.

Furthermore, because of the total absence of any adequate and cost-effective means of storing large quantities of electric energy, many billions of dollars are being spent by TVA and other public and privately owned utilities, every year, to construct more and more huge and expensive electric generating plants in order to meet the ever-increasing peak-load demands of our expanding economy and growing population that must be met, all of which is reflected in higher and higher electric bills to the consumers.

This would not be necessary if adequate facilities were available to store the increased amount of electricity which could be generated and stored to meet these peak-load demands from existing plants when they are producing and generating electricity at less than their capacity. We could save also, and cut down on the huge amounts of fuel that are now being consumed and wasted so many hours each day, when these powerplants are in operation but are generating electricity on the average, according to the Library of Congess, at less than 45 percent of their capacity. So the stakes are truly high, as such an invention would also make feasible the development and storage of an assured and adequate supply of electricity from even small or medium-sized solar energy plants for homes, farms, and various size businesses.

Perhaps—just perhaps—this national contest, with a $10 million prize being held out to the winner, will challenge and inspire some inventive genius and electrical engineers to invent and develop such an electric storage facility and technology that will conserve this terrible waste of energy, and will reduce the cost of electricity to all consumers, including farmers, residential users, and small businesses that are being hit hardest by higher and higher electric bills.

In addition, the invention of such facilities and technology would greatly ease the crisis resulting from the unexpected strikes or embargoes and from the accelerating depletion of available supplies of gas, oil, coal and other fuels on which our highly industrialized society depends.

At least it is worth a try, Mr. Speaker, especially since the taxpayers will be under no obligation, and no prize money would be awarded, if, unfortunately, the contest should fail in its purpose and there is no winner.

The responsibility for conducting the contest I would vest in the Tennessee Valley Authority, the largest producer of electricity in the Nation. This is the one Federal agency which was created especially to serve as a yardstick for innovative and consumer-oriented developments with respect to the furnishing of electric power at the lowest rates possible.

The judges of the contest would be three recognized experts on the technology of electric power. They would be chosen by the TVA Board from outside the agency, not employees of the Authority.

The contest would be closed on January 1, 1983. If by that time no entry is submitted which, in the opinion of the judges and the TVA Board, would provide a safe, adequate, and cost-effective electric energy storage facility and technology, then no prize would be awarded.

But if, in the happy event a person or persons, acting in partnership, or as a corporation, should invent and develop such a valuable technology and electric storage facility that will meet the needs and requirements of large electric utility plants, such person or persons, having invented, developed and submitted such an invention, would receive and be paid a prize of $10 million, and would be permitted, in addition, to submit such invention for patent to the U.S. Patent and Trademark Office, and enjoy all of the emoluments and royalties therefrom.

TERRORIST ATTACK NEAR TEL AVIV AN AFFRONT TO BASIC HUMAN DECENCY AND AN IMPEDIMENT TO PEACE

(Mr. ANDERSON of California asked and was given permission to revise and extend his remarks.)

Mr. ANDERSON of California. Mr. Speaker, along with millions of others at home and abroad, I was shocked and deeply disturbed by the terrorist attack that occurred near Tel Aviv over the weekend.

Frankly, I am appalled. The optimism, and spirit, and hope for peace that has been building over the past several months, has been dampened. And yet, the need for it has become all the more apparent.

What prompted this band of guerrillas to do what they did? What prompted them to take the lives of innocent people, and discourage and disgust a world? What prompted them to take the laws of God and man into their own hands? There can be no right or reason for what they did.

Progress in the peace negotiations has, at times, been slow and frustrating. I have often found progress to be slow and frustrating. But it is still, by definition, a movement in the right direction. Can anything be "right" when 45 people are dead and 76 wounded? One must reply, clearly and in no uncertain terms, that the answer is a resounding "No." No, we cannot and will not accept terrorism, domestic or international, now or ever.

The people of America have, without hesitation given this as their answer. Their representatives in the House and Senate can do no less. I am today offer-

ing a concurrent resolution condemning this action as an impediment to peace, and an affront to basic human decency.

BILL ON SCIENCE, TECHNOLOGY, AND DIPLOMACY

(Mr. ZABLOCKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ZABLOCKI. Mr. Speaker, the Committee on International Relations has recently completed a long-range study on the impact that science and technology has in the formulation of U.S. foreign policy.

The initiatives for legislation in this area were begun in 1969 when the Subcommittee on International Security and Scientific Affairs, which I chair, undertook an indepth examination of the interactions of science and technology with American diplomacy. The Congressional Research Service of the Library of Congress played an important role in this effort.

This review demonstrated that there is a need to rationalize the way in which scientific and technological capabilities are factored into foreign policy decisions.

For example, the studies suggested that the United States lacks a coherent policy to make meaningful application of science and technology—two of this country's strongest assets—to attain such American foreign policy goals as development in the Third World, international environmental protection, and solutions to the population, food, and energy crises.

The studies further suggested that the U.S. Government has failed to coordinate adequately the international scientific and technological activities of its various agencies to make the most effective use of such available resources in the conduct of U.S. foreign policy.

Finally, the studies implied that the Department of State is inadequately staffed to cope with modern international problems because it lacks personnel sensitized to the problems and opportunities for American diplomacy created by science and technology.

As a result, the State Department cannot provide guidance in the formulation, execution, and evaluation of diplomatic initiatives with significant scientific or technological content.

I am introducing a bill cosponsored by my colleagues, Mr. FASCELL, Mr. DIGGS, Mr. FRASER, Mr. WOLFF, Mr. BINGHAM, Mr. SOLARZ, Mrs. MEYNER, Mr. STUDDS, Mr. BUCHANAN, and Mr. WINN, that hopefully will help solve some of these problems. The purpose of the bill is to give the U.S. Government the direction it needs in the important area of international science and technology. Enactment of this bill would accomplish three things:

First, it would establish a national policy for international science and technology, a policy consistent with that enunciated by the Congress in the National Science and Technology Policy Act of 1976.

Second, it would create an effective means of coordinating and managing U.S. Government participation in international affairs with substantial scientific and/or technological content.

Third, this bill would establish a clear mandate for the Department of State in international scientific and technological affairs. It would provide the State Department access to intellectual resources outside the U.S. Government, enabling the State Department to increase the technological sophistication of the Foreign Service. It would also mandate that long-range planning and policy studies be carried out on a routine basis within the Department.

Mr. Speaker, this bill will not solve all of the problems relating to the interactions of science, technology, and American diplomacy.

It will, hopefully, however, serve as a useful vehicle in making those responsible for the foreign policy of this country to take science and technology into consideration at all stages of the decisionmaking process.

THE ALMOST FORGOTTEN REQUIREMENT TO BALANCE THE BUDGET

The SPEAKER. Under a previous order of the House, the gentleman from Florida (Mr. SIKES) is recognized for 30 minutes.

Mr. SIKES. Mr. Speaker, there is an almost forgotten requirement to balance the American budget. Only by balancing the budget can we end the annual practice of increasing the national debt. There is a measure of reassurance in the protest vote which caused the defeat of the measure to increase the national debt limit last week. Unfortunately, it must be assumed that this is a temporary respite. It has happened before. The compelling pressure to vote for a larger debt to permit the Nation to pay its bills will again outweigh the inherent desire to get the Nation's fiscal house in order. The bill to increase the debt limit will be back at a slightly reduced figure, and if past history is any indication, the measure will be approved. The long-neglected need for a balanced budget will continue to get occasional reference—even since reeffort—but nothing of consequence is being achieved.

Regardless of what happened last week, Congress is still engaged in finding a way to increase the national debt; helping to push the budget further out of balance. To balance the budget should be our goal, not an additional increase in the public debt.

There is such a thing as fiscal collapse. With the dollar at its lowest value in modern times, there must be an awakening of what the administration and Congress are doing to America's financial stability.

A recent General Accounting Office report defining budget terminology lists five different concepts under the umbrella term "Federal debt": Public debt, agency debt, gross Federal debt, debt held by the public, and debt subject to statutory limit. The publications of the U.S. Treasury discuss Federal debt, interest charges on the interest-bearing public debt, and debt subject to statutory limit.

To my way of thinking, debt is debt. I am afraid that too often, we here in Washington get bogged down in meaningless distinctions and lose sight of the fact that the debt of the United States is a very serious and a rapidly growing problem.

Concern about the debt is a tried and true political rallying point, like motherhood and applie pie. I would like to be able to say there is increasing evidence that more and more people are becoming actively concerned about reducing the debt. Unfortunately, not even the imminent prospect of a trillion dollar debt has caused strong vocal concern on the part of the American public. Most of the effort to reduce the national debt center on bringing about a balanced Federal budget. President Carter has spoken about balancing the budget by 1981, and many of my colleagues have introduced legislation proposing constitutional amendments requiring balanced budgets. The proposed amendments get scant attention in Congress and the prospect of a balanced budget by 1981 is near the vanishing point.

It is clear to everyone that we will never be able to balance the budget and reduce the debt until we bite the bullet. It is impossible to reduce the national debt until we stop running annual deficits and start spending less than we take in. I believe there is widespread public concern even though it gets little notice in the media. Whatever the concern, in and out of Congress, it has been difficult, even impossible, to realize a reduction in the debt. In the past, efforts to do this, such as the proposals for a constitutional amendment to insure a balanced budget have not received realistic support by any Federal administration. Free-spending habits have persisted in the United States for nearly half a century. One cannot change spending habits and social inclinations that quickly.

It will be necessary to proceed slowly if we are to rein in the programed spending projected for the years ahead. I propose that we do this with legislation which would require that a certain portion of Federal tax revenues be set aside each year to retire the national debt. It is not yet clear exactly what percentage of Federal receipts should be allocated for this purpose. I would hope that this figure would be reached through legislative deliberation which would include consideration of expert opinions from any areas on the subject. We must make a start. The time is now. Soon it will be too late to slow the juggernaut of Federal spending. Through detailed and thoughtful congressional debate, we can resolve the matter, but action, not inaction, is required.

The need for such legislation is clear. The 1979 budget which President Carter has introduced shows an actual deficit of $45 billion in fiscal year 1977, an estimated deficit of $62 billion in fiscal 1978, and an estimated deficit of $61 billion in fiscal 1979. This will raise the public debt

from $699 billion in fiscal 1977 to an estimated $867 billion in fiscal year 1979. I am not afraid to say that I am horrified by these numbers. Efforts are clearly needed to stop this continued growth of the public debt. The reason the change is needed go far beyond the outrageousness of the numbers themselves. The deficit and its insidious growth affect almost every aspect of American life.

The Federal budget since 1960 has been in deficit in every year but one. The cumulative deficit of the unified budgets of the last 7 years, including the fiscal 1979 estimate contained in the budget just proposed by President Carter, comes to $312 billion. This is more than over one-third of the debt estimated to be outstanding in fiscal 1979. If the spending of off-budget entities, such as the Rural Electrification Administration is taken into account, the aggregate deficit for the 7 years totals $362 billion.

This sorry record of deficit financing means that we as a nation have been unwilling to tax ourselves sufficiently to finance the sharp increases in Government spending which have occurred or to curb the free spending which produced the deficits. These sharp spending increases have been a relatively recent development. It was 186 years from the founding of our Nation before Federal expenditures reached the $100 billion mark. This occurred in 1962. In only 9 more years, by fiscal 1971, Federal expenditures had exceeded $200 billion. Four years later in fiscal 1975, the $300 billion mark was passed. In fiscal 1977, it exceeded $408 billion.

President Carter's budget for 1979 projects Federal outlays of more than $500 billion. The huge Federal borrowing needed to finance these expenditures has had heavy impacts on the Nation's money and capital markets. It at times has helped to exacerbate inflationary tendencies in the economy. My proposal to pay off the national debt through the use of tax revenues can in time banish the specter of inflation and do so with certainty.

Inflation has been a severe and dangerous problem. One only needs to look at the experiences of the Weimar Republic in the 1920's to see the social, political, and economic problems extreme inflation can create.

Between 1921 and 1923, the value of the German Reichsmark went from 23 U.S. cents to a trillionth of that. At the end of 1923, the Reichsmark was worthless. It would buy nothing. All bank accounts were valueless and nothing could be bought or sold. Barter became the medium of exchange. In order to stop the inflation, it was necessary to increase unemployment and restrict credit. The period laid the groundwork for the rise of Hitler, a lesson we should never forget.

In order to reduce the debt and the problems that deficit spending engenders, it is necessary to balance the budget. During the 1976 campaign, President Carter pledged to balance the Federal budget by 1981. In the budget for fiscal 1979, however, the President proposes a deficit of almost $61 billion, only slightly under the estimated deficit for fiscal 1978. The President says that this budget will "place us on a path that will permit a balanced budget in the future if the private economy continues its recovery over the coming years." But how likely is that recovery to occur? The administration has said that if a balanced budget is to be achieved, real economic growth of 5 percent annually must be maintained through 1981. To sustain this rate of growth, there must be a continuing expansion of the private economy. Most economists believe that an annual rate of increase in real capital spending of about 9 to 10 percent is needed to have a reasonable expectation of meeting this target. One recent forecast estimates a 7-percent real rise in private capital spending will occur in calendar 1978, but on the other hand, a survey by another private economic consulting firm showed that most U.S. corporations are planning an increase of only 1 percent in real capital spending in 1978 over 1977 levels.

The administration now projects a real increase in the gross national product of 4.7 percent in 1978 and 4.8 percent in 1979, but many private forecasts are not that optimistic. In a recent survey by the National Association of Business Economists, the expected rate of real economic growth in 1978 was 4.5 percent, with growth expected to drop to 3.5 percent by the fourth quarter of 1978. Of the economists surveyed, 72 percent believed that an economic downturn will begin by 1979. In addition, 5-year budget projections by the Congressional Budget Office suggest that we will still run a deficit in 1983 if we are to stand a chance of realizing the other economic goals of lowering inflation and decreasing unemployment. These projections estimate the outlays and revenues which would accrue if current policies were continued unchanged, with no new policy initiatives. The projections also estimate the amounts of fiscal stimulus needed through 1983 to offset the fiscal drag implicit in the Federal tax structure if we are to attain the administration's objectives of dropping unemployment to 4.5 percent and holding inflation at 5.5 to 6 percent. In 1983, the current policy margin shows a surplus of $96 billion; with the estimated "fiscal drag offset" of $115 billion, the resulting budget deficit of $19 billion. It should be clear that the economy will not be strong enough to obviate the need or deficit spending by the end of President Carter's term in 1981, or even by 1983.

Going hand in hand with the need to balance the budget is the need for the Nation to reduce its dependence on the Federal Government and for the spirit of free enterprise to reassert itself. One important consideration would be greater inducement for the private enterprise sector to expand and modernize through tax incentives. It is true that tax incentives are a part of the newly proposed Federal tax cut but the great weight of the tax cut is for lower income families. Incentives for businesses to expand and modernize could have a much more lasting effect in producing a durable and lasting economy. It must be borne in mind that expertise and money from the United States was distributed lavishly following World War II, to help rehabilitate the war-torn countries and to encourage stability in developing countries. Now those countries have the benefit of modern techniques and cheap labor. The combination is playing havoc with the U.S. markets at home and abroad. If the American industry can be encouraged to rebuild, modernize and expand with lower production costs, there will be more jobs in the market and greater prosperity.

The growth in Federal spending and the expansion of the national debt have been the result of increased and expanded Federal activities which affect everyone. In 1929, Federal expenditures amounted to less than 3 percent of the dollar value of our total national output. In fiscal 1960, they were 18.5 percent, in fiscal 1970, 20.5 percent, and in fiscal 1979, they are estimated to be 22 percent of the gross national product. Much of this increase in the role of Government in our economy occurred because of the rapid population growth of recent decades, the increasing complexity of modern urban life, the explosion of military technology, and the enlarged responsibilities of the United States in world affairs. The trend of Federal spending has also been influenced by strong intellectual currents, both in our country and elsewhere, that keep nourishing the belief that practically all economic and social problems can be solved through the expenditure of public funds.

I do not believe that this is true. Many of our problems can be solved without the increased intervention of the Federal Government. Many of the experiences of the last few decades have shown that, however well intentioned a Federal program is, it may often fail to achieve the intended goal, and will end up costing the taxpayer money while reaping no real benefits. The free enterprise system is far from perfect, but I think that, in most cases, the solutions it puts forward are more efficient and better than those which are achieved through Federal programs. A reevaluation of the role of the Federal Government and greater reliance on people to help themselves will improve the Nation, will help reduce Federal outlays, and will reduce the Federal debt.

In addition to a reevaluation of the role of the Federal Government, it is also necessary to promote budget reform, so as to produce a budget which truly and accurately reflects the assets, liabilities, outlays and revenues of the Federal Government. At the present time the totals in the unified budget do not reflect the total outlays of the Federal Government.

Not included in the $500 billion estimate of fiscal 1979 outlays in the recently released budget are outlays for off-budget entities such as the Postal Service, the rural electrification and telephone revolving fund, and the U.S. Railway Association. Also excluded are outlays for Government sponsored enterprises such as the Federal National Mortgage Association, the Federal Land Banks, and the Federal Home Loan

Banks. Another related area left out of the budget is Federal credit programs, particularly loan guarantees. While loan guarantees do not represent current outlays by the Federal Government, they do represent potential outlays. The 1979 budget indicates that the total gross amount of loan guarantees outstanding at the end of fiscal year 1977 will be $284 billion; this will climb to $368 by the end of fiscal year 1979.

There is another manner in which the budget is made unrealistic by the Government agencies. Year after year, items which are known to have strong support in Congress are cut far below funding levels of prior years or are eliminated all together. Examples are: Impacted area school funds, certain agriculture program and even some educational programs. The administration knows from experience that Congress will increase these items to a realistic level, but in the meantime, the projected budget has been made to show a decrease in spending in these areas.

The exact method of dealing with potential liabilities in the budget is not clearly laid out, but we must take action. If we do not clean up the accounting procedures followed by the Federal Government and make the budget reflect all the actual and potential costs to taxpayers, it will be extremely difficult to know if we are actually reducing the national debt.

I feel that we need to start today to make an effort to control the debt. For years we have neglected to do so. In each passing year the undertaking will become more difficult. The proposal I have made is one small effort in this direction. By allocating a fixed proportion of Federal revenues to retire the debt, we are taking a small step toward preserving the values and traditions which have made our Nation great.

Mr. ASHBROOK. Mr. Speaker, will the gentleman yield?

Mr. SIKES. I am happy to yield to the gentleman from Ohio (Mr. ASHBROOK).

Mr. ASHBROOK. Mr. Speaker, I certainly want to commend my colleague the gentleman from Florida (Mr. SIKES) on the excellent statement he has just made.

I might add that I believe it is very prophetic that tomorrow we again take up the Humphrey-Hawkins bill, and, as my colleague knows, the principal business before us then will be an amendment adding a balanced budget to the Humphrey-Hawkins bill.

As I understand, there are a certain number of Members in this body who do not have the same tenacity or objectives of a balanced budget that the gentleman from Florida (Mr. SIKES) and I have. They will try to put in an amendment where it will really be a minimal thing. I think if we are really trying to work out a balanced budget in the next 5 years we should not adopt that amendment. I know I speak for many of the Members in this House on that subject.

Again I applaud the gentleman from Florida (Mr. SIKES) for believing, as I do, that at least a balanced budget should be a part of our plan.

Mr. SIKES. Mr. Speaker, I thank my distinguished colleague the gentleman from Ohio (Mr. ASHBROOK) for the remarks he has made and I certainly join in his beliefs.

Mr. RUDD. Mr. Speaker, will the gentleman yield?

Mr. SIKES. I am happy to yield to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Speaker, I thank the distinguished gentleman from Florida (Mr. SIKES) for yielding to me. I simply would like to underscore and join the gentleman in the remarks he has made and in support of his remarks regarding the need for a balanced budget.

I would also like to add that just recently the media has joined us also in support of this. And the thrust of the media's reporting has indicated that it believes the United States has joined England in misleading us and in leading us down the primrose path to socialism. But England has finally decided to try to pull itself up by its own bootstraps and get out of the morass of socialism. I would only hope that our country might join England in its attempt to turn away from socialism. A balanced budget will do this.

Mr. SIKES. The distinguished gentleman from Arizona (Mr. RUDD) has made indeed an important comment. I agree with the gentleman that with adequate leadership we can make some move or some progress toward a balanced budget and toward a reduction in the national debt.

THE 1-YEAR ANNIVERSARY OF THE ARREST OF ACTIVIST ANATOLI SCHARANSKY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. STEERS) is recognized for 5 minutes.

● Mr. STEERS. Mr. Speaker, events in the past few years attest to the validity of the belief that public attention and international support are crucial factors in maintaining the morale and protecting the lives of those incarcerated for their political beliefs. The recent plethora of releases, exchanges, and stays of execution of dissident individuals is directly related to world pressure and concern over the welfare of those deprived of human rights that are basic moral and legal privileges. It is, therefore, essential that we mark the 1-year anniversary of Anatoli Scharansky's arrest by joining in a worldwide appeal for his release.

As the elected representatives of the American people, we must express this Nation's commitment to freedom of conscience, religion, and emigration. As a signatory nation of the Helsinki Pact, the United States cannot ignore the serious nature of the Soviet Union's systematic violation of the rights guaranteed by that pact, an agreement very much desired by the Soviet leadership and signed solemnly over 2 years ago. Blatant dismissal of any portion of an international pact undermines the basic integrity of that document and reduces its validity as a binding agreement.

Anatoli Scharansky's attempt first to exercise his guaranteed right to emigrate and join his family and his subsequent efforts to monitor his country's noncompliance with the Helsinki Pact resulted in harassment and eventual arrest. Now faced with trial for treason, he has been denied access to adequate legal defense and all communication with his wife.

A founding member of the Public Group to Promote the Observance of the Helsinki Pact in the USSR, Scharansky has become not only an individual casualty of Soviet repression, but also a larger symbol of the recent Soviet crackdown on dissident activity. To help insure the personal safety of Anatoli Schransky, in solidarity with my colleagues, I wish today to add my voice to those of an outraged international community, and I pledge to continue my personal efforts to express my concern over the violation of his legal and human rights.●

THE VIOLATION OF THE BASIC HUMAN RIGHTS OF ANATOLY SCHARANSKY AND 3 MILLION OTHER SOVIET JEWS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. GRADISON) is recognized for 5 minutes.

● Mr. GRADISON. Mr. Speaker, 1 year ago tomorrow, Anatoli Scharansky, a prominent leader of the Jewish community in the Soviet Union, was imprisoned in Moscow and accused of treason and espionage. He has been held in isolation since he was arrested without benefit of legal counsel. I would like to reiterate my grave concern for the plight of Anatoli Scharansky and the other 3 million Soviet Jews whose basic human rights have been violated by Soviet authorities.

Scharansky's wife, Avital, emigrated to Israel, and since her husband's arrest, she has been traveling the Western world carrying the message of his plight. Several weeks ago, I had the chance to visit with Mrs. Scharansky in my office here in Washington. We discussed her husband's situation and the situation faced by all would-be emigres in the Soviet Union. Speaking with this courageous and sensitive woman, whose family has been broken up by Soviet authorities, was a deeply moving experience.

That same week, at a meeting of Members of Congress and a Soviet Parliamentary delegation, I told the Soviet representatives that I had spoken with Mrs. Scharansky and was concerned about her husband and others in the Soviet Union. Their right to be united with their families and their right to independent counsel are among the most basic human rights. I asked the Soviets to carry back with them to the Soviet Union a message: we, in the United States, are watching, and we care about Anatoli Scharansky and the many others like him in the Soviet Union.

Today, I restate that message. We are still watching, and we still care.●

KEMP PROPOSES AN AMENDMENT TO H.R. 50 WHICH WILL ACHIEVE FULL EMPLOYMENT WITHOUT INFLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentle-

man from New York (Mr. KEMP) is recognized for 5 minutes.

● Mr. KEMP. Mr. Speaker, tomorrow the House will again take up consideration of H.R. 50, the Humphrey-Hawkins bill. As I have often stated, I am in complete agreement with the need to adopt government policies which will restore full employment to this country. However, I believe that H.R. 50 is seriously deficient in not providing a proven means of achieving that goal.

Tomorrow, I will offer an amendment which will achieve that goal. It will provide that means by calling upon the President to submit plans for a tax rate reduction paralleling that of President Kennedy in 1963. Since those tax rate reductions are the most successful full employment program since World War II, I believe that a similar tax cut should form the core of a new full employment strategy.

One may ask: What proof have we that a tax rate reduction will lead to additional employment?

The proof is twofold.

On a theoretical level we know that all taxes constitute a wedge between gross wages and net wages. Thus every time taxes go up, whether they are on workers or employers, it increases the wedge and simultaneously increases the total cost of employment and reduces disposable income. Consequently, employers hire fewer workers and workers have less incentive to work to their potential.

In addition, there is ample historical evidence to show that when tax rates are reduced there is an increase in employment.

In the 1920s tax rates were reduced across the board by nearly two-thirds, leading to a vast economic expansion.

After World War II tax rates were reduced, thereby aiding the postwar recovery.

And in 1964–65 tax rates were reduced by roughly a fourth, leading to a substantial reduction in the employment rate and a tremendous economic boom. Table I demonstrates the effects of the Kennedy tax cuts on the unemployment rate.

TABLE I.—UNEMPLOYMENT RATE AFTER THE KENNEDY TAX CUTS

[In percent]

Year	All workers	Blacks	Black males 20 years +
1961	6.7	12.4	11.7
1962	5.5	10.9	10.0
1963	5.7	10.8	9.2
1964	5.2	9.6	7.7
1965	4.5	8.1	6.0
1966	3.8	7.3	4.9

One might now ask: Why did unemployment rise again a number of years after passage of these tax rate reductions?

The answer is that in each case the economic expansion created by the tax rate reduction was brought to an end by a direct or indirect increase in taxes. In 1932 Herbert Hoover raised tax rates to roughly their World War I level in an effort to balance the budget. The rates were roughly tripled for all brackets. Tax rates were raised again in 1934, 1936 and 1938, thereby prolonging the economic depression.

The tax cuts implemented after World War II were undone by President Truman to pay for the Korean War. The economic stagnation of the Eisenhower administration is largely the result of the fact that after the Korean War tax rates were not reduced back to their pre-World War II level. Again, the goal was to increase revenues to balance the budget.

The beneficial effects of the Kennedy tax cuts was undone by an increase in taxes resulting from inflation. Because the quantity of money and Government spending went up at such a rapid rate during the latter part of the 1960's and the early part of the 1970's, there were too many dollars chasing too few goods. As the inflation increased nominal incomes both marginal and average tax rates for the vast majority of Americans increased. Because of the progressive income tax, tax revenues go up faster than incomes. Tax revenues go up approximately 1.6 percent for every 1 percent increase in the consumer price index.

It is true that Congress has reduced taxes several times since 1965, but marginal tax rates have remained intact. Consequently, only those at the very bottom of the income scale have benefited from these so-called tax reductions. Table II shows what has happened to families at selected income levels whose nominal incomes have kept pace with inflation since 1965. Between 1965 and 1977 prices and incomes have roughly doubled, but taxes have gone up much more.

TABLE II.—INCREASE IN REAL TAX BURDEN AND MARGINAL TAX RATES FOR A FAMILY OF 4 CAUSED BY INFLATION: 1965–77

Adjusted gross income in 1965 dollars	Federal income tax—		Marginal tax rate (percent)	
	1965	1977	1965	1977
$4,000	$140	$260	14	15
$5,000	290	586	15	17
$7,500	686	1,556	17	22
$10,000	1,114	2,605	19	25
$15,000	2,172	5,596	22	32
$20,000	3,428	9,416	28	42

Note especially the increase in marginal tax rate, for it is the marginal rate—the tax paid on each additional dollar earned—which largely governs incentive. When marginal tax rates go up it reduces the trade-off between work and leisure, investment and consumption. In other words, it becomes progressively less costly to work less or consume one's income rather than invest it.

Sweden and Great Britain are testiments to what happens in a country when marginal tax rates are allowed to become confiscatory. Incentive, innovation and inventiveness disappear. Highly productive individuals work to less than their capability, stop work altogether or leave the country. This fact was aptly pointed out recently in an article for the New York Times by Mr. Andrew Knight, editor of The Economist:

Just for the record, I am being paid a pittance by The New York Times for this article. Why did I not chisel The Times for more? Because 83 percent of the money will already go in taxes to pay for other people's false teeth and spectacles, so why bother? I refuse all freelance, including lucrative television work, for the same reason. On a gross annual salary of about $45,000 my marginal tax rate is 83 percent. Still, I'm lucky. A friend of mine who has built one of Britain's most successful businesses pays 98 percent: This is because the dividends on his shares in the business are regarded as "unearned."

Consequently, a program for economic expansion must include a reduction in marginal rates.

Some conservatives, like Herb Stein, former chairman of the Council of Economic Advisors, may argue that the Nation does not need a reduction in tax rates because there is no economic necessity for it. Stein also argues that 7 percent unemployment is full employment.

Well I do not believe this, and I do not think very many other people do either. We certainly are not willing to accept it. But even if Stein were correct, the problem is that tax rates are not static. As long as we have inflation taxes and tax rates will go up. In table III I have shown what will happen in just the next 3 years, if we have 7 percent inflation and incomes rise by the same amount. Although there is no increase in purchasing power taxes go up dramatically, especially when one also takes into consideration social security taxes and New York State income taxes.

TABLE III.—CHANGING TAX BURDEN FOR A FAMILY OF 4 WITH 1 WAGE EARNER ASSUMING 7-PERCENT INFLATION

Year	1978	1979	1980	1981
Adjusted gross income	$10,000	$10,700	$11,449	+$12,250
Federal income tax	586	715	857	1,009
Social security tax	605	656	702	815
New York State income tax	260	302	347	397
Total tax	1,451	1,678	1,906	2,221
Effective tax rate (percent)	14.5	15.7	16.6	18.1
Marginal tax rate (percent)	29.05	31.13	31.13	32.65
Adjusted gross income	$20,000	$21,400	$22,898	$24,500
Federal income tax	2,710	3,060	3,455	3,904
Social security tax	1,210	1,312	1,404	1,629
New York State income tax	1,160	1,314	1,487	1,685
Total tax	5,080	5,686	6,346	7,218
Effective tax rate (percent)	25.4	26.6	27.7	29.5
Marginal tax rate (percent)	42.05	42.13	46.13	46.65

It is for this reason that I introduced the Tax Reduction Act, together with 145 cosponsors in the House, to:

First. Reduce all individual income tax rates by roughly 33 percent over the next 3 years: from 14 to 8 percent at the bottom and from 70 to 50 percent at the top.

Second. Reduce the corporate income tax rate from 48 to 45 percent.

Third. Increase the corporate surtax exemption from $50,000 to $100,000.

I believe that such a program will restore full employment to this country.

That is why I will introduce tomorrow an amendment to the Humphrey-Hawkins bill which would require the President to submit plans for reducing individual income tax rates by 10 percent in each of the first 3 years after passage of the Humphrey-Hawkins bill, to reduce the corporate income tax rate by 1 percentage point in each of those years, and increase the corporate surtax exemption to $100,000 starting with the first year. In other words, the President will be required to report as a goal the implementation of the Tax Reduction Act.

My amendment is perfectly consistent with the full employment goal of the Humphrey-Hawkins bill. If the aim of H.R. 50 is to achieve full employment, then my amendment will provide the means, based on both economic theory and historical experience. Remember, it was President Kennedy who said in 1963:

> The main block to full employment is an unrealistically heavy burden of taxation. The time has come to remove it.

Some may say to this: Yes, tax reduction is fine, but an across-the-board reduction does more for the rich.

I respond to this in two ways.

First, Treasury Department data indicates that we have just about reached the limit on cutting taxes for low incomes. In 1975 those with incomes under $8,930 paid only 7.1 percent of all individual income taxes. Those with incomes above $8,930 paid the other 92.9 percent. In other words, the poor are paying virtually no taxes now so we can not really cut them any more. What the poor really need are jobs and income growth, and this can only be accomplished if we restore incentive to the economy by reducing tax rates across the board.

Furthermore, it can be shown that lower tax rates actually cause the rich to pay more taxes. As the President put it in 1924:

> I agree completely with those who wish to relieve the small taxpayer by getting the largest possible contribution from the people with large incomes. But if the rates on large incomes are so high that they disappear, the small taxpayer will be left to bear the entire burden. If, on the other hand, the rates are placed where they will produce the most revenue from large incomes, then the small taxpayer will be relieved.

And the experience of the Kennedy tax cuts, in which the top rate was lowered from 91 to 70 percent, proves this thesis. If one examines the data one will see that the percentage of total income taxes paid by the wealthy from 1964 to 1968 went up considerably.

The only other point which needs to be considered is that of inflation. Many on the minority side are especially concerned about this, and I share their concern. But one thing I do not believe is that high unemployment and high interest rates reduces inflation. Quite the contrary. If they lead to a reduction in the growth of GNP they may cause inflation. Conversely, a program which stimulates the total supply of goods and services, in conjunction with a moderate monetary policy, will reduce inflation. This is why I believe that my amendment will fight inflation as well as unemployment.

In conclusion I would just like to emphasize once again my support for the goal of full employment. But without emphasis on tax rate reduction I do not see how we will ever achieve this goal, despite the rhetoric contained in H.R. 50. Therefore, I hope that all Members of Congress will support my amendment to H.R. 50 and do so on a bipartisan basis.

The amendment follows:

H.R. 50

Page 61, strike out lines 22 through 25 inclusively, and renumber succeeding subsections (c) through (f) as subsections (b) through (e), respectively.

Page 63, after line 8, add the following new paragraph:

"(1) expansion of conventional private jobs opportunities through the increase in gross national product, aggregate personal income, savings and investment, and disposable income which would occur naturally from permanent tax rate reductions for individuals and corporations;"

and renumber the succeeding paragraphs (1) through (4) as paragraphs (2) through (5), respectively.

Page 64, after line 13, add the following new paragraph:

"(2) the projections for each year of a 5-year period of increases in employment, annual wage rate, gross national product, capital outlays, consumption, and Federal tax revenues (initial impact and net impact) resulting from permanent tax rate reductions for individuals and corporations of not less than that level of reduction required to offset potential Federal tax revenue gains arising from inflation, such projections to be based upon an econometric model designed on supply-side fiscalist formulae;"

and renumber the succeeding paragraph (2) and (3) as (3) and (4), respectively.

Page 65, line 22, strike out "section 3(a)(2)" and insert in lieu thereof "section 3(a)(3)" and on line 23, strike out "section 3(a)(2)(B)" and insert in lieu thereof "section 3(a)(3)(B)".

Page 66, strike out line 3, and insert in lieu thereof the following:

(b) The medium-term goals in the first Economic Report submitted after the date of the enactment of the Full Employment and Balanced Growth Act of 1978 shall include—

"(1) a permanent reduction in the rate of tax imposed with respect to each bracket found in the tables in section 1 (relating to the tax imposed on individuals) of the Internal Revenue Code of 1954 of 10-percent in each year of that year and the two succeeding years;

"(2) a permanent reduction in the rate of tax imposed by section 11(b) (relating to the tax imposed on corporations) of the Internal Revenue Code of 1954 of 1-percent in each year of that year and the two succeeding years;

"(3) an increase to $100,000 in the corporate surtax exemption found at section 11(d) of the Internal Revenue Code of 1954.

"(c)(1) The medium-term goals in the first three Eco-".●

THE FASTENER OVERRIDE VOTE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. STEIGER) is recognized for 10 minutes.

● Mr. STEIGER. Mr. Speaker, for the information of my colleagues I want to share my perspective on the issue taken up today by the Trade Subcommittee of the Committee on Ways and Means.

Since the implementation of the Trade Act in January of 1975, resolutions seeking override of the President's trade relief determinations on four different products have been referred to the Trade Subcommittee. Thus far, for various sound reasons, the subcommittee has not supported any of these resolutions. Chief among the reasons for not supporting override resolutions have been: A strong willingness to be supportive of our trade liberalization efforts at the MTN (an override vote being viewed as protectionist and, thus, counterproductive); a general sense that on the merits the respective cases thus far referred have not warranted an override of the President's determination; a feeling that the override authority was unconstitutional; and a view that an override would cause the President undesired embarrassment and, absent extraordinary circumstances, would be an unwarranted intrusion on Executive discretion. To varying degrees I have supported these views and have, therefore, opposed override on the four resolutions that have been referred to this subcommittee during this Congress.

But the resolution before us now, House Concurrent Resolution 485, arises under circumstances which are notably different than those that existed for the previous override resolutions: First, a recent Supreme Court decision quiets the constitutional question that lingered for some but I must admit not fully for me. Second, neither our trade policy formulators, our negotiators in Geneva nor our major trading partners, notably the Europeans, are sensitive enough to the pressures coalescing in the Congress and across the country (evidenced by this override effort) for actions that would set back trade liberalization for years.

Thus, they are insufficiently aware of the absolute necessity for the Geneva exercise to conclude with substantial improvements and enhanced disciplines in international trading rules. Third, to my mind the fasteners industry has made a case both for injury and for some kind of assistance that would enable it to more effectively cope with a 44 percent market penetration by imports, a 50 percent plant utilization rate, and a 25 percent decline in employment. Fourth, the consequence of these factors raises a serious problem of trade policy that renders as secondary the otherwise valid concern for the integrity of the Executive's discretionary authority in such matters.

Having recognized that the atmosphere in which this resolution arises is changed and is serious does not, however, easily lead me to support an override. Indeed, in this climate an override vote by this subcommittee could well be the catalyst that triggers the protectionist onslaught which we all have been fearing for so long. Furthermore, it could be seen as a signal to our trading partners in Europe that we are no longer able or willing to fight the good fight at home for trade liberalization which is precisely the signal some have been looking for to rationalize their own longstanding preference for little or nothing

of substance to come out of Geneva. Moreover, in a time when worries about inflation are high, it is not easy to support a measure that has an inflationary impact.

But what is most troublesome to me, for one, is the dismal lack of alternatives available to this subcommittee to adequately resolve the problems faced by the domestic fasteners industry. Lest we forget, it is our job and the executive branch's job to resolve problems in this society not to avoid them or ignore them. Yet we have a choice of two near equally objectionable alternatives: Either to agree with the President and do nothing for an important and worthy industry or to vote for override and risk substantial disruption in trade policy formulation and implementation. Indeed, on the larger level, our trade relief laws generally seem all too inadequate in dealing with the serious trade problems our ailing industries have been facing of late while at the same time honoring our commitments to the world trading community.

Consequently, I would like to urge this subcommittee to carve out, on its own, a middle ground solution that would attempt to treat the pressing problems faced by the domestic fastener industry, limit the undesirable risks of a full override and convey to our own trade people as well as our partners in Europe that time for a significant—and I stress significant—trade agreement is running out. Such a middle ground solution could take the form of the subcommittee voting to recommend override with an invitation to the executive branch to come up with a plan to assist the domestic industry. Such a plan could include, for example, a scheme for EDA assistance or a tax relief package to be included in the present tax reform effort.

If a satisfactory plan can be devised, the subcommittee would then report such a satisfactory solution to the full committee when it takes up the matter. Obviously, if no such plan is found, the subcommittee would report its override vote to the full committee and report the failure of the administration to meet the subcommittee half way on this question. As the committee will soon lose control of this resolution, time is short. So if progress is being made, the full committee, if it would be willing, could assume the same contingent override posture reporting to the House whatever is the result of the administration effort.

Our responsibility and the administration's responsibility is to find solutions to problems faced by the good people of this country. That those problems may involve competing if not conflicting policy interests does not diminish in the least our obligation to solve them. I think this middle ground approach I have suggested is a way for us to meet our responsibility in this matter. I urge my colleagues to give it their consideration and support.

This 7-to-6 vote by the subcommittee indicates the closeness of the issue and the vote. My hope is that having favorably reported the override resolution to the full committee, we can use the time to receive more information on which to make a judgment as well as to explore alternatives. Any precipitous action in the House would be a mistake.●

GIFTED AND TALENTED CHILDREN'S EDUCATION ACT OF 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. PURSELL) is recognized for 5 minutes.

● Mr. PURSELL. Mr. Speaker, it is a fact of American history that the greatest resource this country has is the excellence, intelligence, potential, and drive of its young people. Where would this Nation be without the writings, inventions, discoveries, and leadership provided by our youth since this country's conception? Yet, it is an ironic fact of the American educational system that while quality is strived for, it is the educationally disadvantaged child who is given special programs, extra incentives, and greater emphasis. There are only token attempts to encourage and assist our brightest students realize their potentials.

In recent times we have witnessed this much-needed effort to provide disadvantaged students with the opportunity to realize their educational potential. However, we have yet to offer our gifted and talented students this same opportunity to realize their potential. I think the time has come to insure that every child is offered the kind of education that will help him/her to realize his/her individual potential.

Therefore, today I am introducing a bill to amend the Elementary and Secondary Education Act, and expand our program for the gifted and talented children of this country. My colleagues, Mr. BRADEMAS, Mr. QUIE, Mrs. CHISHOLM, Mr. PRESSLER, and Mr. KILDEE have joined me in this bipartisan effort, emphasizing the importance of this legislation.

Recent survey data indicates that 32 States reported having provided special instruction to a total of 456,518 gifted and talented children in school-year 1976–77. Progress is obviously being realized in facilitating the learning process in order that gifted and talented children may reach their full potential since this figure represents an increase of 74,360 children so served over the preceding school year.

However, of the same 32 States, only two, California and North Carolina, reported serving a number of gifted and talented children at least equaling 3 percent of their school age population—aged 5 to 17. It will be recalled that the Marland Report of 1972—after then U.S. Commissioner of Education Sidney Marland—suggested that the most conservative incidence of gifted and talented children within the school age population should be approximately 3 percent. Furthermore, 30 States surveyed reported appropriating a total State allocation of $56.23 million for the special education of gifted and talented children in school year 1976–77. However, upon closer scrutiny of the individual State funding patterns of these 30 States, it is revealed that 8 States accounted for over 90 percent of this total appropriation. These facts would seem to suggest that more needs to be done within the school systems of the Nation if the unusual—but nonetheless very real for the particular child or youth—form of educational jeopardy for gifted and talented American children is to be ameliorated.

A modest Federal role in this educational undertaking—primarily an incentive and cataclytic presence—has already been affirmed by the Congress. For many years the promotion of the special education of these children has enjoyed the benefits of title V and title IV–C—previously as title III—of the Elementary and Secondary Education Act. Perhaps more significantly, the Congress authorized through the vehicle of Public Law 93–380, the Education Amendments of 1974, the first statutory authority solely for support of the special education of gifted and talented children; namely, title IV, section 404 of the act. The U.S. Office of Gifted and Talented, designated to administer that authority, reports serving 53 projects with a total allocation of $2.5 million in fiscal 1977. The legislation now being proposed bears the following basic characteristics:

First. This bill acknowledges the appropriateness of a continuing Federal role, both by encouraging further State and local efforts by virtue of the very existence of a Federal focus and by affording a modest level of Federal fiscal support.

Second. Given the realities of available fiscal resources, this bill alters the existing section 404 structure by targeting the very limited number of Federal dollars more precisely where those dollars can do the most good, as close as possible to the actual instructional environment of children.

Third. This bill rejects the notion of a Federal response to the total universe of gifted and talented, and instead responds to practical instructional reality, namely children assessed by the school systems, through the use of professionally appropriate and acknowledged methods, as gifted and talented who by reason thereof require those necessary adjustments in their educational environment in order that the achievement of their potential will not be thwarted.

The first part of this bill provides for establishment of a broad-based local program of assistance to the gifted and talented. It would authorize grants to local education agencies with the following stipulations: First, 55 percent of the funds appropriated shall be used to fund this section; second, one-half of such grants would be awarded to local applicants proposing and promising approaches in meeting the special educational needs of the gifted and talented; and third, one-half of such grants would be awarded to local applicants stressing the identification and special education of disadvantaged gifted and talented children. Programs funded under this part may be awarded only for 5 years.

The second part provides for the establishment of a broad-based State program of assistance for gifted and talented education. It authorizes grants to assist State education agencies in their plan-

ning, development, and improvement of programs for these children as well as provide financial assistance for the training of personnel to meet the special educational needs of the gifted and talented; 30 percent of the total appropriation must be used for this part, with States being awarded grants for up to 3 years.

The third part authorizes a modest and flexible research component for the gifted and talented which shall be comprised of the following three principal segments: grants to conduct research, surveys, and demonstrations relating to the education of gifted and talented children; and the establishment of an information clearinghouse; 15 percent of the funds appropriated shall be spent to carry out this part.

The definition of "gifted and talented" as stated in this bill, means children and, where applicable, youth, who are identified at the preschool, elementary or secondary level as possessing demonstrated or potential abilities that give evidence of high performance capability in areas such as intellectual, creative, specific academic, or leadership ability or in the performing and visual arts, who by reason thereof, require special educational services.

The final provision authorizes funds in the following increments: $10,000,000 for the fiscal year ending September 30, 1979; $15,000,000 for the fiscal year ending September 30, 1980; $20,000,000 for the fiscal year ending September 30, 1981, and $25,000,000 for each of the fiscal years ending September 30, 1982 and 1983.

I feel the time has come to recognize the special needs of the gifted and talented, and urge my colleagues to support this worthy effort.●

LEGISLATION TO CONTINUE EXISTING INCOME TAX TREATMENT OF NONQUALIFIED DEFERRED COMPENSATION PLANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Delaware (Mr. EVANS) is recognized for 5 minutes.

LEGISLATION TO PRESERVE CERTAIN TAX TREATMENTS

● Mr. EVANS of Delaware. Mr. Speaker, I am introducing today legislation which will prevent the proposed Treasury action regarding many types of nonqualified deferred compensation plans from going into effect and will preserve the tax treatment of these plans which have received consistent and continuous Treasury approval for many years.

The proposed regulation would prevent both public and private employees from receiving favorable tax treatment when they defer a portion of their current earnings to provide for their retirement. Under many plans currently in use, employees are allowed to defer a portion of their salary to be received when they retire. The portion deferred is not taxed when earned, but the tax is imposed when the income is received upon the employee's retirement. The Treasury proposal would tax salaries when earned regardless of when they are received.

Capital formation is essential to the future growth of our economy and the creation of permanent jobs. The United States has the lowest capital formation increases of any industrialized nation. The encouragement of savings is essential if we are going to reverse this situation and increase investment in plants and equipment which will create new jobs for Americans. Retaining the current tax treatment of nonqualified deferred compensation plans will encourage individuals to save for the future, thereby making more money available for business investment and helping to create those very badly needed jobs.

Mr. Speaker, in these times of spiraling inflation rates, many Americans worry about having enough money to retire on. The Treasury proposal would penalize those individuals who wish to put away money on their own by providing a disincentive for saving. Individuals should not and cannot rely solely on the social security system to provide money in which to live on when they retire. Social security is designed only to supplement other sources of income, not provide total security. Our tax system should encourage, not discourage individual savings to plan for retirement. This legislation accomplishes that purpose.

Over 30 States, including my State of Delaware, have enacted or provided for salary deferral plans. These plans offer ease of administration, encourage savings for retirement, are nondiscriminatory, and enable individuals to plan for security in their future. In Delaware, the participants in these plans range from maintenance workers to school principals. Over 70 percent of the participants earn less than $25,000 a year.

The fairness of our tax code is essential to maintaining confidence in our Government. Many individuals have relied and should continue to rely on consistent interpretation of our tax laws. Those individuals who have made plans for their retirement based on the current treatment of nonqualified deferred compensation plans are being penalized as a result of this proposed ruling. This is simply not fair.

I am hopeful that prompt enactment of my proposal will reiterate congressional intent to the American people that saving for one's retirement is going to be encouraged, not discouraged. The text of my bill follows this statement:

H.R. —

A bill to continue the existing income tax treatment of nonqualified deferred compensation plans established by State and local governments and other employers

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the income tax treatment of compensation described in the notice of proposed rulemaking which was printed in the Federal Register dated February 3, 1978, (beginning on page 4638), shall continue to be determined—

(1) in accordance with the principles of the existing revenue rulings and court decisions set forth in such notice, and

(2) without regard to the tax treatment proposed by the Internal Revenue Service in such notice (and without regard to any regulation, ruling, or decision reaching the same result as, or a similar result to such proposed tax treatment).●

PLANS TO SELL FIGHTER PLANES TO SAUDI ARABIA AND EGYPT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. ADDABBO) is recognized for 30 minutes.

Mr. ADDABBO. Mr. Speaker, I recently visited Israel for the purposes of discussing with our Embassy and intelligence people, and with the leaders of that nation, the problems of Israeli national defense and other questions involving my appropriation committee jurisdiction. I take this opportunity to report my observations. I heard from the Israeli leaders the difficulties they would face if the United States were to follow through with its projected plans to sell 60 F–15 fighter planes to Saudi Arabia and 59 F–5E fighter planes to Egypt. It is clear to me that strictly from a military viewpoint the safety of Israel would be highly compromised with the introduction of F–15 fighters in Saudi Arabia, just 40 miles away from the capital of Israel.

I visited the West Bank, the Heights of Judea, and stood on a former Jordanian mountain outpost and looked out on the city of Tel Aviv across a flat and open plain only 8 miles away. I stood on heights from which cannon fire could easily destroy Tel Aviv—so one must carefully think out the question of defensible borders.

Mr. Speaker, I visited the Gaza Strip, an original refugee camp and important terrorist stronghold until the 1967 occupation by Israel, and whose occupation has turned the Gaza refugee hovels into livable communities occupied by Arab refugees in a booming society of Arab operated businesses. I visited Yamit, an Israel settlement built in the desert which turned wasteland into a veritable oasis. It is important not only for its development, but it is more important as a buffer against terrorist attacks into Israel, for beyond this point the terrorist must enter from the desert and could be easily detected.

Mr. Speaker, on my visit I met with Defense Minister Weizman and Prime Minister Begin. Besides the question of settlement, the uppermost concern they have is the sale of F–5's to Egypt and the F–15's to Saudi Arabia. Egypt is a concern for it is the first time U.S. modern planes were being sold to Arab nations. The major concern is the sale of the F–15 to Saudi Arabia which represents a serious threat to Israel's defense; Saudi Arabia has a major airfield at the Israel border. It was felt that if Saudi Arabia seeks to protect its oil fields and is concerned with its neighbor Iraq there is no need for an air field at its furthest opposite border, at Israel's backdoor.

I accept without reservation that all parties to the negotiations, that we hope

will continue in the Middle East, sincerely desire peace. Those arid lands have seen enough bloodshed to last forever, and the leaders of Israel, Saudi Arabia, and Egypt know all too well that further fighting will only increase suffering among the people of those nations who have already suffered far too much for the inability of their leaders to secure a just and lasting peace.

But it is one thing to hope for peace and to work for peace and still another to secure peace. I find it wrong for our Nation, which has been in the forefront of the effort to secure peace, to pressure our long-time ally, Israel, to accept conditions which could very likely endanger its own future national security. That is why the Israelis have been so stubborn about what, if anything, they will yield along the West Bank. We have asked Israel to give up oil fields, which it can use, defensive strongholds in the Sinai which have previously been used to shell Israeli settlements, and now we ask the Israelis to accept that 60 of the most advanced jet fighters would be based a few minutes of flying time away from their capital.

I see by yesterday's headlines that the administration is supposed to have a working agreement with the Arab nations about the price of oil that is contingent upon the sale of the jet planes. I do not know if those reports are true or not, but I do know that this would not be the first administration since the 1973 oil boycott that has sought to make concessions to the Arabs to gain lower prices on oil. I suggest once more that it is foolhardy national policy to let fuel prices determine our international agreements. And until we learn to live within the boundaries of what is available to us domestically, we will always be subject to this kind of international blackmail.

I certainly understand the desire of the administration to secure lower petroleum prices. I even applaud that goal. But I cannot permit the need for imported petroleum to commit my vote for introducing into the Middle East negotiations the threat that the sale of these planes could well bring.

I would like this Nation to retain the friendship and trust of both Saudi Arabia and Egypt. The Saudis have been the most moderate of people in recent years and deserve our heartfelt thanks for their peace-loving ways. I do not believe it is in the best interest of ours to consumate the sale of these offensive weapons at this time.

President Sadat has emerged as perhaps the single most important force for peace in the Middle East today, and he may in the future deserve the world's full approval for his courageous acts. Nevertheless, I fear that if the war planes were available to Egypt and the peace talks continue to be deadlocked, there are those within Egypt who might bring enough pressure to bear upon the government to utilize those planes in conflict with Israel.

Additionally, we know from the events of this past weekend that there are elements within the Arab world who do not seek peace under any circumstances. Those elements will not rest until they are either victorious in eradicating Israel from the family of nations or until they are themselves isolated from the vast majority of people in the Middle East who seek a just and lasting peace.

We cannot afford to simply take blithe assurances that these highly sophisticated weapons may not fall into the hands of terrorists one way or another.

For all of these reasons and others, Mr. Speaker, it seems to me to be not in the best interest of anyone to seek to conclude this sales of arms at this time. I would hope that the administration would have second thoughts on this matter. But, if it does not, I would hope that my colleagues in the House would join with me in strongly opposing this sale, and by our actions, keep this travesty from coming to realization.

The United States must continue its role as mediator not as a promoter of conditions, for a lasting peace can only be achieved by the direct negotiations and agreements between Israel and the Arab nations.

THE FIRST-YEAR ANNIVERSARY OF ANATOLI SCHARANSKY'S ARREST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. DODD) is recognized for 60 minutes.

Mr. DODD. Mr. Speaker, I rise today for the purpose of commemorating, with a great many of my colleagues, the first-year anniversary of Anatoli Scharansky's arrest and imprisonment in Moscow on unsubstantiated charges of treason. I will not go into the many sad events that have taken place since I first met Anatoli in the Soviet Union in 1975 since we are all too familiar by now with what has become a standard pattern of harassment and oppression. What is important is that Anatoli Scharansky is still in prison, and about to face the most frightening experience of his life—a trial in the hands of Soviet authorities.

We come together here to warn these very authorities that they will never succeed in their attempt to repress the voice of Soviet Jewry, and that condemning Anatoli to a prison existence will serve no purpose whatsoever. To date, the credibility and effectiveness of one of the great leaders of the Russian dissident movement has not been in the least bit affected by the grim nature of the Soviet activities. In fact, holding Anatoli incommunicado in the Lefertovo Prison and attempting to tie him to American intelligence efforts has only helped the cause of the Soviet human rights movement.

I believe that I can state unequivocally that such behavior on the part of the Soviets can only succeed in furthering the determination of all of the millions of us, both inside and outside the Soviet Union, who are concerned with the right of an individual to emigrate and to live in freedom in the country of his choosing.

In the last year, world opinion has rallied with increasing strength around the cause of Anatoli Scharansky—and today, on the eve of the 1-year anniversary of Anatoli's imprisonment, we pledge to continue with our efforts until he is released. Last July, an International Committee for the Release of Anatoli Scharansky was formed under Congressman DRINAN's leadership, and it has done an enormous amount—in cooperation with the National Conference on Soviet Jewry, and particularly the Union of Councils for Soviet Jews to keep the Scharansky case in the public eye. The courageous efforts of Anatoli's wife, Natalia, and his brother-in-law, Michael Stiglitz, have also been instrumental in keeping alive the great interest that has been demonstrated by citizens around the world.

On another front, President Carter has put his personal prestige on the line in a very unusual manner by denying that Scharansky has ever had any connection with the Central Intelligence Agency, and by appealing to the Soviets for his release. And finally, tomorrow, a worldwide program of activities is scheduled to show once again to the Soviet authorities that their actions are not going unnoticed.

We do hope that such a lasting and serious show of support will convince the Soviet Government that it is in their own best interest to free Anatoli. To make this point even stronger at a time in which it appears likely that the Soviets will soon be bringing Anatoli to trial, it is of critical importance that we pressure our own Government to take as strong a stand as possible against any further violations of Scharansky's rights.

It would also be helpful for as many people as possible to communicate directly with the Soviet Government on this matter, and I therefore urge all of my colleagues, and all of my constituents, to send letters and telegrams to Moscow conveying our resolve to continue working for the release of Anatoli Scharansky.

There are those who, in the name of détente, would have us mute our call for human rights in the Soviet Union. But we cannot in good conscience lessen our efforts for if, in securing increased economic and cultural cooperation with the Soviet Union, we at the same time abandon those principles of freedom upon which this Nation was founded, we will have violated the faith passed on to us by our forefathers and that we are dutybound to pass on to our children. We must speak out on behalf of Anatoli Scharansky: His cause—the cause of freedom—is our cause as well.

Mr. ADDABBO. Mr. Speaker, will the gentleman yield?

Mr. DODD. I yield to the gentleman from New York.

Mr. ADDABBO. I thank the gentleman for yielding.

I wish to commend the gentleman for bringing this matter before the House at

this time, and for his great leadership in this matter, and I wish to associate myself with his remarks.

Mr. Speaker, I yield back the remainder of my time.

Mr. WEISS. Mr. Speaker, will the gentleman yield?

Mr. DODD. I yield to the gentleman from New York.

Mr. WEISS. I thank the gentleman for yielding.

Mr. Speaker, I want to commend our distinguished colleague, the gentleman from Connecticut (Mr. DODD), for requesting this special order to discuss the plight of Anatoli Scharansky. A year ago today. Anatoli Scharansky was imprisoned in Lefortovo prison in Moscow. He is being held incommunicado while he awaits his trial on charges of treason.

Scharansky is an important force in Russia and is recognized not to be only as a dynamic leader, but as a spokesman and architect of the "refusenik" movement inside the Soviet Union. As a founding member of the Group to Monitor the Helsinki Agreement in the U.S.S.R., he has fought for Soviet adherence to the human rights principles that all signers must abide. In addition he has pushed for an open emigration policy for Soviet Jews and other minorities. He has himself been prohibited from joining his wife in Israel.

I have joined my colleagues in numerous appeals to both the Soviets and the Belgrade Review Conference on behalf of the release of Anatoli Scharansky so that he might be reunited with his wife. Anatoli Scharansky continues to need our support.

The Soviet Union has tried to discredit Scharansky by accusing him of being a CIA agent. This appears to be a Soviet maneuver aimed at undermining the whole "refusenik" effort and eliminating world pressure on the Soviets to comply with the Helsinki human rights principles. President Carter has taken the unusual step of publicly verifying that Scharansky is in no way tied in with the CIA.

Most importantly, Scharansky has received the support and admiration of other "refuseniks" who have worked with him in the name of an open Soviet society. In regard to Scharansky's alleged CIA links, a distinguished group of refuseniks, including Vladimir Prestin, stated in an appeal to the New York Committee to Free Anatoli Scharansky—a group which I am happy to be sponsoring:

> After the arrest of Anatoli Scharansky it became clear that the investigation had turned into a campaign directed against the activists of the Jewish emigration movement and the movement as a whole. This all-Union undertaking, as it was called by one of the investigators, has nothing to do with the monstrous charges of treason to Motherland that had been officially presented against Shcharansky. . . .

There is no doubt that Scharansky has provided an invaluable spur to the effort inside the Soviet Union to end human rights violations and improve the overall tolerance for dissenting views within Soviet society. Hence he has become an indispensable symbol to not only disenchanted Soviets, but to all citizens of the world who value freedom and would protest against authoritarian rule.

The Soviets must not be permitted to ambush the issue of human rights through a kangaroo trial of Scharansky. Scharansky must be allowed to join his wife in Israel. The eyes of the world will be carefully watching the Soviet Union to see that Scharansky is not used as a scapegoat or manipulated to suit its own shortcomings.

I will continue to lend my support to efforts to free Anatoli Scharansky.

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. DODD. I yield to the gentleman from New York.

Mr. GILMAN. I thank the gentleman from Connecticut for yielding.

Mr. Speaker, I want to commend the gentleman from Connecticut for having taken the time to bring this issue before this body.

Mr. Speaker, I rise to join with the gentleman from Connecticut (Mr. DODD) and my other colleagues in commemorating the 1-year anniversary of the arrest of Anatoli Scharansky in Moscow where he has been awaiting trial on charges of treason. This is a most critical time for Mr. Scharansky; the Soviet authorities intending to bring him to trial in the near future. It is therefore important that those who are willing, speak out now on his behalf.

For those of my colleagues who may be unfamiliar with Mr. Scharansky, and I hope there are not many who are, permit me to highlight some of the background of his case. Mr. Scharansky is a 30-year-old Russian Jew, a mathematician and engineer by profession. He is married, with his wife presently residing in Israel. He has been charged by Soviet authorities with treason and espionage. Mr. Scharansky's ordeal began with his first application for emigration to the State of Israel in April of 1973 which was refused on the extremely vague grounds of general state interests, though he was never engaged in sensitive work. Repeatedly refused thereafter, he has, to this day, not been given sufficient cause or explanation for the continued refusals, the latest occurring in March of 1976. In addition, Natalya Scharansky, a new bride, was forced to leave the Soviet Union 1 day after her marriage to Anatoli on July 4, 1974.

Mr. Scharansky is one of the key leaders of the Jewish activist movement in Moscow, a group of whom, wishing to emigrate, have become known as the "refuseniks" because of the number of times they have been refused permission to emigrate. He has been arrested several times, with his current incarceration resulting from his participation in the October 1976 Moscow protests. Prior to this, in the summer of 1974, Mr. Scharansky was dismissed from his job and then subsequently threatened with arrest, ludicrously for parasitism, that is, for being unemployed.

Mr. Scharansky, because of his courage, personality, intellectual capabilities, and mostly because of personal experience, became one of the more important spokesmen for the legal rights of and against the repression directed at those desiring to leave the Soviet Union. He helped many people, both in Moscow and elsewhere in the Soviet Union, who wished to leave the country and got in trouble for it. Mr. Scharansky fought for the right to emigrate by challenging the forces within the Soviet Union. However, he exposed the plight of those wishing to leave by exposing the real situation to the daylight of world opinion by dealing with and talking to the foreign correspondents and tourists who showed an interest in the problem. Scharansky felt that this was the only way that the truth would be known and that, somehow, it might aid himself and others in a similar plight in some way. For example, according to testimony by V. Elistratov, a fellow "refusednik," Scharansky served as an interpreter at a press conference of foreign correspondents following the breakup of a "refusednik" protest by members of the Soviet "People's Guard" in October 1976.

Mr. Speaker, now it has come to our Nations attention that Soviet authorities are attempting to silence Mr. Scharansky once and for all by linking him with past CIA activity and pinning a permanent label of "espionage agent" upon him in order to discredit the cause, and people along with it, that he and his fellow "refusedniks" have been fighting for such a long time.

It is imperative that this Nation, with the accent that exists today throughout the world on the importance of individual human rights, support the efforts of those wishing to see justice come to Mr. Scharansky, as well as the others unjustly imprisoned for what they believe. The Soviet Jewry have fought long and hard for the ability to emigrate to Israel, or whatever other nation they may choose for a new home and the kind of future they wish to have, Anatoli Scharansky is a symbol of that struggle.

As Representatives, it is essential that we speak out, as an indication of where our Nation truly stands on the matter of freedom and basic human rights. The Soviet authorities obviously are hoping to silence Anatoli Scharansky, and thereby discourage others who might wish to protest the long denial of basic rights to Soviet citizens. This is the time for the Congress and all Americans to speak out, proclaiming that we will no longer tolerate the unjust imprisonment or denial of the basic liberties of any human being.

Mr. EDWARDS of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. DODD. I yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I want to commend the gentleman for the gentleman's leadership in this area. I agree with the gentleman and

will continue to support the gentleman in these efforts.

Mr. FISH. Mr. Speaker, will the gentleman yield?

Mr. DODD. I yield to the gentleman from New York.

Mr. FISH. Mr. Speaker, I want to thank my colleague, the gentleman from Connecticut, for providing this opportunity to discuss the Anatoli Scharansky case on the House floor.

Mr. Speaker, I accompanied the gentleman from Connecticut (Mr. DODD) in 1975 on a study mission composed of Members of the House Judiciary Committee to the Soviet Union, where on several occasions we met with Mr. Scharansky. It was after our first visit in June that many other congressional colleagues followed us that summer. I think for all these groups he was in many ways a guide and liaison. Beyond just the fact that he is a friend of many Members of Congress, he is particularly prominent in the Soviet Union because of his close association, not only with dissidents, but Democrats and members of the American press corps. He is vulnerable because of his connections and he is an important target.

Mr. Speaker, the implications of the Scharansky trial go beyond the fate of one individual. Scores of other Soviet Jews have met with American visitors, tourists and officials, and they committed the same innocent acts as did Anatoli Scharansky. A treason conviction, I am sure my colleagues will agree, will make all of them—Learner, Slepac and others—vulnerable to similar arrests and charges. This case will most certainly isolate Soviet Jews from their friends in the West.

I think we are also witnessing a dramatic increase in anti-Semitic articles and television programs in the Soviet Union. The implication that all those who wish to emigrate from the Soviet Union are traitors could serve to destroy the emigration movement.

As the gentleman from Connecticut (Mr. DODD) indicated, the President and the administration have spoken out on their concern over this case.

I myself this past fall took the opportunity in Belgrade to address our U.S. mission. I took the opportunity in Geneva to talk to the president of the International Committee of the Red Cross. There were others, including our SALT negotiators, representatives of the League of Red Cross Societies, and individuals who I knew had Soviet counterparts. I expressed in as strong terms as I could what I sensed would be the response of the U.S. Congress should they proceed to a trial on the treason article.

I just hope, if there is any question left in the minds of Soviet officials as to the congressional view, that this special order called by the gentleman from Connecticut (Mr. DODD) this evening will lay that to rest. Some people say that our response in foreign policy matters is a blunt instrument, and perhaps it has to be, because our only vehicle is legislation.

I am sure there will be congressional reaction in terms of trade, cultural relations, and SALT negotiations if this trial proceeds.

Mr. Speaker, I thank my colleague, the gentleman from Connecticut, once again for yielding.

Mr. Speaker, the following article from the March 13, 1978, issue of Time magazine provides an excellent insight into the Scharansky case:

UNORDINARY CASE—A KGB FRAME-UP

Anatoli Scharansky, the Soviet computer expert and Jewish activist who has become the leading target of Moscow's campaign against dissidents, is nearing a grim anniversary: as of next week, he will have been held incommunicado for a full year in Moscow's Lefortovo prison while awaiting trial on espionage charges. Last week the regime gave him a present of sorts, a state-appointed lawyer named Silva Dubrovskaya, who was described by the chairman of the Moscow bar association as a "lovely woman and a very experienced trial lawyer." One of her first acts was to express surprise to Western newsmen at their interest in what she called "an ordinary case." Said she: "Very soon the time will come when you will find out everything you want to know."

Scharansky faces a sentence that ranges from ten years in prison to an unlikely extreme of execution if he is convicted, and Attorney Dubrovskaya probably could not get him off even if she seriously attempted to. After all, he has already been convicted in the Soviet press. Tass Commentator Yuri Kornilov, for instance, insists that he will be found guilty because he helped a foreign state (meaning the U.S.) in hostile activities against the Soviet Union. Moscow radio's foreign-language broadcasts have frequently cited "facts" to "demonstrate" his guilt.

Most important, the regime has already made clear that it has a star witness to link the leader of Soviet "refuseniks"—Jews who have sought but were refused permission to leave the country—with the CIA. Dr. Sanya L. Lipavsky, a Jewish surgeon who knew Scharansky, signed an "open letter" to Izvestiya last March in which he implicated Scharansky in an alleged, largely Jewish spy ring that supposedly included dissidents, U.S. embassy officials in Moscow and members of the American press corps.

Lipavsky's broadside caused much discomfort in the Carter Administration. Shortly after Scharansky was charged with treason last June, President Carter broke a Washington policy of not commenting on spy charges* and said publicly what the Soviets had already been told privately: Scharansky, Carter announced, "has never had any sort of relationship to our knowledge with the CIA." The Administration had hoped that this might halt the Soviet momentum toward a Scharansky trial, but it has not been successful; the trial is expected to begin soon—after the Belgrade conference on human rights closes.

The Administration is troubled, Time has learned, because Lipavsky—though not Scharansky—did indeed once have a brief link with the CIA, which Carter knew about when he made his June statement. In Moscow in 1975, Lipavsky presented himself as a "walk-in," or volunteer spy, to CIA agents and offered to provide information on the basis of his contacts in the Soviet scientific community. Soviet walk-ins are often KGB operatives. Nevertheless, to the CIA's later regret, it was decided to string Lipavsky along and see what developed. Little did, and eventually concern arose that he was a KGB *agent provocateur* whose contacts among intellectuals would later be used to frame dissidents—as they have been. Lipavsky was cast off nine months after he first walked in, but it was too late. As it happened, after the CIA cut Lapavsky loose, he shared a Moscow apartment with Scharansky for a time; this thin bit of guilt by association may be all that Scharansky's prosecutors need to make a treason case plausible.

Thus the Scharansky affair has become a problem for the U.S. and the Soviet Union. If he were to be convicted of espionage in spite of Carter's public assertion of his innocence, the Soviets would in effect be accusing the President of telling untruths. If the U.S. were to accept a Soviet offer to exchange Scharansky for some Russian operative held in the West—which some observers insist may be Moscow's aim—the U.S. would in effect seem to be admitting that Scharansky was a trade-off CIA man after all. From this imbroglio the lesson is, unfortunately, clear: CIA activity aimed at producing espionage results can also play into the hands of the KGB in its efforts to persecute innocent dissidents.

Mr. DODD. Mr. Speaker, I thank the gentleman from New York (Mr. FISH) for his fine remarks. I agree wholeheartedly with his statement.

Mr. PHILLIP BURTON. Mr. Speaker, will the gentleman yield?

Mr. DODD. I am delighted to yield to the gentleman from California.

Mr. PHILLIP BURTON. Mr. Speaker, I was privileged to serve with the delegation headed by our then Speaker, Carl Albert, upon the occasion of the first official visitation of Members of the House of Representatives to the Soviet Union. During the course of that trip I, along with my wife, met in the apartment of Dr. Learner a number of the courageous Soviet Refusniks. Included in that group was Anatoli Scharansky.

It was my concern before I arrived in the Soviet Union that these courageous people should not have a sense of being alone, and that they and the Soviet governmental leaders should be aware that freedom-loving people everywhere in the world were watching with interest the immediate matter which is the subject of this special order. I wanted them to know that we were watching with great concern and alarm the treatment of those who were seeking to emigrate from the Soviet Union.

Anatoli Scharansky's crime was merely that he wanted to live as a free person in a free society. During the course of our official discussions with the Soviet leadership the congressional delegation, Republicans and Democrats alike, submitted to the Soviet leadership a list of several hundred names that had been brought to us by virtue of our contact with our own constituents or through friends and relatives of those who had kin living in the Soviet Union. These were people who wanted to have the right to emigrate.

I believe this is an appropriate time to record the fact that our delegation was promised in unambiguous terms that we would get a response as to the status of these various individuals whose names we submitted. We were promised that we would be given that response within a day

* Reason: if false accusations were challenged publicly, charges that were not specifically refuted might be taken to be true.

or two. A couple of days passed, and we renewed our request for a status report with reference to each of these individuals. We were promised that, though it might take a few days longer, by the time the delegation visited with Brezhnev in the Crimea that response would have been forthcoming.

We asked again during the course of our visitation with Brezhnev as to whether or not our official delegation's request as to the status of these individuals was going to be honored, and we were assured by him that the request would be honored.

That visitation was over 1½ years ago. It may be 2½ years ago by now. I to date—and I am unaware of any member of our delegation to date—have received no response to this petition given to them by our official House delegation. Lest anybody not understand the background, it was made very, very clear by discussions that among our primary responsibilities as elected Representatives of the American people trying to help constituents deal with the problems of Government—our own or others—was one of the major functions of an elected representative, and that our request was one about which we felt very strongly and the compliance with which would have been received with affirmative interest, just as an absolute refusal would have to be interpreted for exactly what it was. And I would interpret that as an indifference as to the reaction of the American representatives of the House of Representatives as it was viewed by the Soviet hierarchy.

But there is another fundamental point that I think must be underscored, the point being that we were given their word that we were going to get a response. On the record, they just plain did not keep their word. I must affirm that I draw an object lesson from this, and the object lesson simply stated is as follows: that if we enter into understandings or accords with the Soviet Union, those accords had better have self-implementing protections, because we would be most irresponsible if we assumed merely by an exhange of words that their word can be relied upon; because not once but three times during the course of this visit we were given assurances, and those assurances were not forthcoming.

Mr. DODD. I thank the gentleman for his remarks.

Mr. Speaker, I must point out that I was there approximately the same time the gentleman from California was there, and we experienced the exact same occurrence involving a number of people. I think the point here is that, while Mr. Scharansky is one individual, there are hundreds of people, if not thousands of people, in the Soviet Union today who, while they may not be threatened with imminent trial, are threatened with the deprivation of the right to freely express themselves, to freely associate with people, and to freely practice their religion. So Mr. Scharansky stands for far more than the case of just one man facing a Soviet tribunal. The eyes of the world are on this case. If the Soviet Union does not recognize the tremendous importance that is being attached to this individual and his trial, they miss the point. It is vitally important that everyone, regardless of their philosophy or ideology, recognize that bottom line of basic fundamental freedoms for all mankind.

And Mr. Scharansky's trial will stand as a witness to the Soviet commitment to that issue.

Mr. PANETTA. Mr. Speaker, will the gentleman yield?

Mr. DODD. I yield to the gentleman from California.

Mr. PANETTA. Mr. Speaker, I thank the gentleman for yielding and wish to commend him for his special order today.

Mr. Speaker, I rise to add my voice to the chorus of protests we have heard here in this Chamber today.

One year ago tomorrow, a dissident Jewish activist named Anatoli Scharansky was arrested and imprisoned in Moscow. Charged with treason because of his alleged connections with the American CIA, Mr. Scharansky has been held incommunicado in Moscow's Lefortovo Prison since his arrest. He has not had the benefit of visitors from members of his family, nor has he been allowed the assistance of legal counsel.

While we do not have any hard evidence that Mr. Scharansky has been tortured or subjected to other cruelties while in prison, we do know that he has been held for an entire year awaiting trial. Aside from considerations involving the psychological pressures to which he is daily subjected, I believe we need to focus on the need to stand up for recognized legal procedures.

I would submit that the struggle for universal human rights is primarily a struggle for certain universally applicable legal procedures. The United States cannot afford to countenance the blatant disregard for the rights of suspects to be apprised of the specific charges against them and the right to be allowed legal counsel. Recognized legal procedures is the only solid foundation upon which to build a strong framework of protection against human rights violations. I would stress to my colleagues that it is not only concern for the rights of others which motivates me to speak out today. It is also a very real fear that less than total commitment to the cause of universal human rights will make more likely the eventual occurrence of similar violations here in our own society. Because our own country is not immune to the abuse of power, I call on my colleagues to exercise untiring vigilance in defense of human rights everywhere.

Mr. DODD. Mr. Speaker, I thank the gentleman for his remarks. I agree with his point that this should be the basis upon which we deal with all of our friends.

Mr. CORRADA. Mr. Speaker, will the gentleman yield?

Mr. DODD. I yield to the gentleman from Puerto Rico.

Mr. CORRADA. Mr. Speaker, I rise to add my voice and the voice of the people of Puerto Rico to the loud reverberations heard around the world on behalf of Anatoli Scharansky. Mr. Scharansky has been held, incommunicado, in Moscow's Lefortovo Prison for 1 year—since March 15, 1977, on charges of treason. His only crime is the desire to be free to join his wife in Israel. Anatoli Scharansky has been singled out because he became a spokesman for the growing number of Jewish citizens of the Soviet Union who are demonstrating their desire to emigrate based on the principles of the Helsinki Final Act and the Soviet Constitution itself.

The people of Puerto Rico whose struggle for dignity and concern for human rights has made them sensitive to the rights of all people, join with all their fellow citizens in the United States, and call upon all freedom loving people in the world to raise their voices in protest against his basic denial of fundamental human rights. The Soviet authorities are planning a "show trial" of Scharansky in order to dissuade others who want to emigrate from Soviet Russia. The Soviet authorities have waited until after the Belgrade Conference to commence with the trial; any action prior to the conclusion of the conference would, no doubt, have brought cries of outrage by everyone concerned with Mr. Scharansky's case.

Anatoli Scharansky has been denied all semblance to due process, even under Soviet law; he has been held without any contact to family, friends, or legal counsel. He has been held without the filing of formal charges against him, beyond the time limit allowed by Soviet law. All this has happened because Anatoli Scharansky has dared to want to be free, in a country which denies him and his fellow Jews the right of freedom.

Mr. Speaker, let all Members of the House, all citizens of our United States, and every free person in the world be aware of what is happening. Let us never cease in our efforts to bring justice and human rights to all who have been persecuted and denied their humanity. We call upon the authorities in the Soviet Union to quickly release Anatoli Scharansky from prison. Allow him to emigrate to Israel to rejoin his wife. Allow all Jews in the Soviet Union full and equal rights to practice the religion of their ancestors, or let them leave.

If the Helsinki agreement is to be considered an accurate representation of the world community's concern for human rights, the United States must seek to enjoin signatory countries to abide by the provisions of the accord.

Mr. Speaker, the people of Puerto Rico, who love justice and freedom, cry out on behalf of Anatoli Scharansky. Let us all echo this cry.

Mr. DODD. Mr. Speaker, I thank the gentleman from Puerto Rico (Mr. CORRADA).

● Mr. YATES. Mr. Speaker, today I join with a number of my colleagues in observing the anniversary of an event that saddens and distresses millions of thoughtful people throughout the world.

It is now 1 year since the leaders of the Soviet Union, in a crude and heavy-handed assault on the principles of human rights, arrested and imprisoned Anatoli Scharansky. This young man, who was trained as a computer expert, was, as the world knows, participating

with a handful of other courageous Soviet citizens in an effort to assess Soviet implementation of the human rights provisions of the 1975 Helsinki accord.

The human rights issue has rightfully captured the imagination of the world community, and the citizens initiative of the Helsinki Monitoring Group in the Soviet Union was seen by many hopeful people in both the East and West as a step in opening the door on human rights in Eastern Europe. But it was not to be. The Soviets have responded like the Russians of czarist times and a dozen or more members of the monitoring group have now been arrested. Mr. Scharansky, who is Jewish, is reported to have been accused of treason and espionage. These are by far the most serious charges that have been made against a dissident. Both offenses are capital crimes in the Soviet Union.

While we do not know what the Soviets plan, there are indications that they may bring Mr. Scharansky to trial in the near future. He has been held incommunicado for a year now, but decent people remember, and the Soviet Union needs to understand that in 1978 "show trials" and capricious charges of treason and espionage are an outrage that the world community will not tolerate.●

● Mr. BLANCHARD. Mr. Speaker, today we sadly commemorate the 1-year anniversary of Anatoli Scharansky's arrest in Moscow. Since the day of his arrest he has been held incommunicado awaiting trial on charges of treason.

On this day we must once again strongly reaffirm our support for Mr. Scharansky, as well as our protests against the treatment he has received from Soviet authorities. Mr. Scharansky has been the target of systematic abuse by officials of the Soviet Government. He has been denied his most basic human rights in blatant violation of the Helsinki accords. He has not been allowed to see his family and has been threatened with court proceedings and criminal charges that could be punishable by death.

At this time when Anatoli Scharansky is facing great hardship and fears of an uncertain future, all people who cherish freedom must rally to support him and his cause. If he is to be tried, then his trial must be free from censorship, with all of the facts openly presented. For we must do everything possible to protect Mr. Scharansky's welfare and insure that Soviet authorities do not use his case to attempt to justify the continued persecution of other dissidents.

Anatoli Scharansky has been a brave and valiant fighter for freedom. For himself, he has only sought to leave the Soviet Union to join his wife in Israel. Yet, he has become the focal point of the Russian dissident movement by virtue of his efforts to help other Soviet Jews who have been the victims of government oppression.

Relations between our country and the Soviet Union cannot and, in fact, should not improve when individuals such as Anatoli Scharansky are subjected to treatment that flagrantly violates the rights guaranteed by the Helsinki accords. I have joined with my colleagues on a number of occasions in writing to the Soviet Union and to our State Department urging that the Soviet Union desist from its harassment of Mr. Scharansky and its continuing campaign of fear against dissidents. I again call on the Soviet Union to release Mr. Scharansky and in accordance with his basic human rights, allow him to emigrate. I also urge all of my colleagues to step forward and lend their full support for this freedom fighter.●

● Mr. LENT. Mr. Speaker, I am honored to participate with so many of my colleagues in this important effort on behalf of Anatoli Scharansky. It is most fitting that we Members of the House of Representatives join today in expressing support for one of the chief victims of the Soviet Union's grim campaign of oppression against its Jewish citizens.

Just 1 year ago, officials of the Soviet Union, in an arrogant flaunting of world concern, threw Anatoli Scharansky into prison. We know the move was one of desperation. Soviet officials were growing fearful of the increasing world support for the courageous Soviet citizens like Scharansky, who continued to call attention, publicly, to Russia's failure to live up to the Helsinki Accords on human rights.

Scharansky's arrest was a miserable confession of guilt and embarrassment on the part of the Soviet leaders. Truth is, indeed, a sharp weapon against oppression and tyranny. In their fearful attempts to suppress the truth of their own callous brutality and inhumanity, Soviet officials are now moving to an even greater cruelty. We hear that Anatoli Scharansky may soon be tried for treason. What a travesty of justice. What a violation of human rights. What an insolent destruction of a solemn international commitment.

In August of 1975 the leaders of 35 nations, including the U.S.S.R.'s Chairman Leonid Brezhnev, joined in signing the Helsinki Accords. Included in that historical document was a commitment on the part of each signatory nation to protect the human rights of its citizens. In sending Anatoli Scharansky to prison and threatening to try him for treason because he called attention to Russian violations of the human rights of its citizens, Soviet officialdom has displayed its contempt for its own solemn pledges. It has displayed to the world the worthlessness of a Soviet signature on an international agreement.

The Soviets compounded that contempt for its own pledges just last week in the Belgrade Conference on European Security and Cooperation. After 6 months of discussion of the implementation of the Helsinki Accords, including a review of individual cases of violation of human rights, the Russians brutally crushed all efforts to even so much as mention human rights in the final communique on the Conference.

But, as U.S. Ambassador Arthur Goldberg pointed out, "[Soviet] efforts to squelch the truth at Belgrade or at home will not change the truth." Nor will they stop an aroused world opinion from proclaiming the truth. The more the Soviets attempt to prosecute their own citizens who speak out for human rights, the stronger will be the protests from those throughout the world who know the precious value of those rights.

That is why we are speaking out today. In our words before the House of Representatives we are sending yet another message of hope and support to the oppressed citizens of the Soviet Union. We are sending yet another message of protest to the cruel Soviet leaders who inflict their inhuman policies on their long-suffering countrymen. We are reminding those Soviet leaders that we who love freedom will continue to denounce those who trample on human rights. We will continue to support those who suffer the loss of those rights in the Soviet Union.

On this grim anniversary marking Anatoli Scharansky's loss of his rights, we reaffirm our faith in the power that lies in the human will to be free. We reaffirm our conviction that the weight of public opinion can overcome the heaviest chains of oppression. We call on every person who values the precious gifts of freedom to join with us in this protest to the Soviet Union.

We pray that we may soon see the day when the Russian chains of oppression give way; when Anatoli Scharansky and his brave fellow fighters for human rights in the Soviet Union will be able to live without fear of persecution, to practice their chosen religion without oppression, and to join their families in Israel, if they so wish, without interference.●

● Mr. KEMP. Mr. Speaker, how much longer must Anatoli Scharansky wait before the Soviet Government decides to bring his case to trial? What kind of a trial will it be? How much more slander must he and his family bear before he is given the opportunity to defend himself? Will he be able to defend himself? Although it is gratifying to see the degree of support which Anatoli is receiving from Members of Congress and members of the press, our patience grows thin waiting for the Soviets to exercise human decency and basic justice. Our patience grows thin, but our determination must grow stronger at every new delay in the due process of his human rights.

Anatoli Scharansky never wanted to become a martyr in the Soviet Union. He wanted to emigrate to a country where he could be free to live with his wife and practice his religion as he pleased without the all-consuming fear that he might be ostracized or arrested for his beliefs. Most of us take these freedoms for granted, thus it is hard for us to appreciate exactly what his life has been like, exactly what is uppermost in the minds of most of the Soviet Union's 2 million Jews. It is hard for us to comprehend the devastating effects of a national policy which dictates conformity to its image of the ideal Soviet citizen, while it clearly will not allow its Jewish members to become integrated. Thus, the Soviet Government has created and has perpetuated the driving need for Soviet Jews to embrace their heritage, yet punishes them for doing so within Soviet

borders and will not release them, fearing that they will strengthen the Jewish state as well as the cause of democracy for which Israel exists.

Mr. Speaker, our forefathers knew religious discrimination and persecution, and all of us here today can be glad that they had the courage and foresight to settle in a new country and to adopt and enforce a bill of rights which has protected our citizens from knowing the repression which is known by 2 million Soviet Jews and countless other citizens of "the captive nations." We would be denying our own heritage if we were to deny Anatoli Scharansky and his fellow Soviet Jews our utmost support and effort to insure them the same opportunity as our forefathers had to live their lives without fear of persecution and to insure better lives for generations to come.

Mr. Speaker, exactly how much longer will we allow ourselves to tolerate this anti-Semitism in the Soviet Union? Are we to wait until there are no more Scharansky's who will stand up and speak out against repression?

I feel fortunate to have become acquainted with Avital Scharansky, a courageous woman who is totally dedicated to her husband's freedom. Avital has a great deal of strength and determination, and I admire her unceasing advocacy of this cause. I thank my colleague from Connecticut, Congressman DODD, for taking leadership in the commemoration of the anniversary of Anatoli Scharansky's imprisonment, and I urge all of my colleagues to pledge their commitment to any effort to insure justice for him. We must undertake a campaign of support for Anatoli with renewed vigor in behalf of him, his family, and all those courageous Soviet Jews who yearn for freedom and dignity.●

● Mr. DRINAN. Mr. Speaker, we are about to mark a sad anniversary. Precisely 1 year ago tomorrow, agents of the KGB arrested Anatoli Scharansky, a young computer specialist who had become one of the leaders of the Soviet Jewish "refusednik" community. He was incarcerated incommunicado in the KGB's notorious Lefortovo Prison, where he remains today, about to be brought to trial on treason charges.

What had Mr. Scharansky done to merit this extraordinarily severe charge? He had expressed his desire to emigrate to Israel and tried to help others exercise their fundamental right to do the same. As a result, he faces trial on a charge whose penalty ranges from 10 years to execution.

Mr. Speaker, let me review briefly the history of harassment to which Anatoli Scharansky has been subjected since he first applied for permission to emigrate in 1973. Almost immediately, he lost his job. All of his subsequent requests for permission to emigrate were denied. The KGB carried out a continuing campaign of harassment against him. In the 2 years prior to his arrest he spent a total of 100 days in prison on a variety of charges. He was once detained for 15 days merely for asking an official why he could not obtain an exit visa.

On July 4, 1974, Anatoli Scharansky was married. The next day, his wife received a grim ultimatum: Leave the Soviet Union now or you will never leave, and "terrible things" will happen to your husband. Natalia Scharansky left, and has not seen her husband since.

Over the years, his fluency in English, his courage, and his dedication made Anatoli Scharansky one of the acknowledged leaders of the "refusednik" movement. He acted as a liaison to the Western press for Jews who wished to emigrate, and he was a founding member of the group of Soviet citizens who organized to monitor compliance with the Helsinki Final Act by the U.S.S.R. The Soviet Government has, of course, destroyed this group by systematically arresting its members.

During my visit to Moscow in 1975, Anatoli Scharansky acted as my host, introducing me to other members of the Soviet Jewish community in Moscow. It is inconceivable that this dedicated man has acted as an agent for American intelligence agencies. Yet these are the charges which have been brought against him. The accusation first appeared in the March 4, 1977, edition of the official government newspaper Izvestia. The same issue of that newspaper charged Senator HENRY JACKSON, Representative DANTE FASCELL, and myself with some form of undefined "involvement" in Anatoli Scharansky's "espionage" activities. In an obvious appeal to anti-Semitism, the Izvestia article charged several other prominent Soviet Jews with similar activities and identified two Jewish members of the U.S. Embassy delegation as "contacts" in the "spy ring."

President Carter explicitly denied the existence of any relationship between Anatoli Scharansky and any U.S. intelligence agency. The treason charges brought against Mr. Scharansky, with their evocation of the Stalinist "show trials," prompted former Israeli Foreign Minister Yigal Allon to state:

[This is] a new dimension in the persecution of the emigrant activist movement—a grave and worrisome development such as we have not seen in the past 25 years.

Recent developments have been far from encouraging. After learning that Scharansky had been formally charged with treason against the state (article 64(a) of the Russian Federated Criminal Code), the Scharansky family attempted to secure legal counsel of their own. The Government prevented them from doing so. One attorney who offered his services was immediately placed on a pension and forced to retire, unable to practice law in the Soviet Union again. The family retained Roland Rappoport of Paris, a prominent attorney and member of the French Communist Party—but he was denied an entry visa into the U.S.S.R. Finally, the Soviet Government imposed a lawyer to defend Scharansky. She described the case as ordinary.

Soviet newspaper and radio correspondents have already referred to Scharansky's guilt. And it turns out that the star witness against Scharansky, Sanya Lipavsky—the man who accused his former friend of working for the CIA—did in fact himself work briefly for the CIA in a very tangential sense, probably as a plant by the KGB.

What, then, can be done at this point? One thing which we must not do is relax our efforts to bring to the attention of the world the massive injustice which is being perpetrated against Anatoli Scharansky. The International Committee for the Release of Anatoli Scharansky, whose American branch I am proud to chair, has sent letters, organized demonstrations, and taken out newspaper advertisements all over the world calling for the release of this innocent man. The committee will continue its activities on behalf of Anatoli Scharansky until he is released from prison and permitted to join his wife in Israel.

Of more immediate concern is the absence of adequate defense counsel. The specter of a show trial is imminent. At the very least, if the Soviet Government means to persecute Anatoli Scharansky, they should be made to confront the profound legal, ethical, and moral questions involved. And Scharansky ought to be entitled to all of the existing evidence in his defense.

To that end I sent a telegram on March 6 to Silviia Dubrovskaia, Mr. Scharansky's court-appointed defense attorney. Speaking on behalf of myself and Prof. Alan Dershowitz of the Harvard Law School, I urged Ms. Dubrovskaia to meet with us in Moscow so that we could present to her important evidence gathered by Professor Dershowitz, who had been appointed by Mr. Scharansky's mother to represent his interests in the United States.

The text of that telegram follows:

Advocate SILVIIA DUBROVSKAIA,
Presidium of the Municipal Kollege Barristers of Moscow, Moscow (USSR).

I have been informed of your appointment as advocate for Anatoli Scharansky. As you may know I have spent considerable time with Scharansky during a visit to Moscow and regard him as a personal friend. I have been following his case with great interest and concern. On several occasions I have been assured by Soviet authorities that Scharansky will be vigorously represented by an advocate of his choice pursuant to Soviet law.

Professor Alan Dershowitz of the Harvard Law School has been appointed by Mrs. Ida Milgrom, Scharansky's mother, to represent Scharansky's interest in the United States. Professor Dershowitz has interviewed numerous witnesses to events relevant to the Scharansky case who have left the Soviet Union. The testimony and information provided by these emigre-witnesses is obviously not available to you, and yet it may prove crucial to the Scharansky defense case. Professor Dershowitz and I would very much like to share our information and research with you in your capacity as Scharansky's advocate. We do not seek to interfere with your representation or with any legitimate domestic affairs of the USSR. We seek merely to meet with you—lawyer to lawyer—and to share with you relevant information to which we have had unique access.

Since Soviet law requires you to present all information favorable to the accused, and since we have critical information favorable to Scharansky to which you have no access, there is every reason for you to agree to meet with us and no reason why you should be unwilling to receive our important information. We are confident therefore that you will be as anxious to meet with us as we are to meet with you.

Accordingly Professor Dershowitz and I respectfully request an opportunity to come to Moscow at your earliest convenience to

meet with you and to brief you on our information and research. Since time is apparently of the essence please respond immediately and indicate whether you would be prepared to receive us at your office. If you respond favorably, as we hope and expect you will, we will make immediate plans to travel to Moscow in the spirit of cooperation and mutual understanding.

Sincerely,

Father ROBERT DRINAN,
Member of Congress from Massachusetts.

On the eve of the first anniversary of his arrest, we must hope that the Soviet authorities will bend to the weight of international opinion and cease their persecution of Anatoli Scharansky. Should they fail to do so, then we have no choice but to increase our efforts to secure his basic human rights and end the nightmare in which he lives.●

● Mr. REUSS. Mr. Speaker, I join my colleagues in expressing our deep concern about the continued detention of Anatoli Scharansky, as well as the continuing reports of mistreatment of other Soviet citizens who represent political or religious viewpoints of which the Soviet Government disapproves.

Scharansky is a young computer specialist, who served as an interpreter for Russian Nobel Peace Prize winner Andrei Sakharov. He incurred his Government's disapproval by joining an ad hoc committee organized to monitor Soviet observance of the Helsinki agreements, and by serving as a spokesman for other Soviet Jews who wished to emigrate from the Soviet Union to Israel. Today marks the 1-year anniversary of his arrest and detention on charges of treason. He has been separated from his wife since their wedding day in 1974, when she was permitted to leave but he was refused an exit visa.

Many of us, as Members of Congress, have constituents who are relatives of Mr. Scharansky, and we voice today the personal anguish which they feel over his detention and the reports that he will soon be subjected to a trial. But even apart from that, his plight is a fitting subject of concern to all those who cherish human rights, particularly the freedom of religious worship and the freedom of speech.

The rights of all are jeopardized when the rights of any are diminished. As a member of the International Committee for the Release of Anatoli Scharansky. I have joined with other Members of Congress in making a personal appeal to General Secretary Brezhnev, asking that Mr. Scharansky be released and be permitted to emigrate from the Soviet Union in order to join his wife in Israel. Today we demonstrate again that the world is watching the actions of the Soviet Government. I join in the prayerful hope that that Government will act favorably on our request.●

● Mr. METCALFE. Mr. Speaker, I am pleased to join under the special order of Congressman CHRISTOPHER J. DODD and others in calling attention to the plight of Anatoli Scharansky.

Today marks the last day of 1 full year of his imprisonment without trial. On March 15, 1977, Anatoli Scharansky was arrested by the Soviet Government's secret police, the KGB. He has been held incommunicado ever since in Moscow's Lefortovo Prison.

Looming before him now is the prospect of a potentially spectacular show trial for the capital crime of treason and espionage.

Anatoli Scharansky has been one of the leading Jewish activists in the Soviet Union and a major figure in the group of dissidents monitoring Soviet compliance with the Helsinki human rights accords.

Today we are highlighting the case of Anatoli Scharansky. An additional purpose is to present the plight of the dissident movement in the Soviet Union. Soviet repression of this movement has been intense, often effective. Soviet authorities have resorted to arrests, trials, and imprisonment, confinment in psychiatric hospitals, forced emigration for some, and refusal to allow emigration for others, as in the cases of many Soviet Jews.

I protest that the Soviet Government is repressing people who are exercising basic and fundamental human rights.

I have spoken out many times when human rights have been violated at home. We can do no less when we know that human rights are being denied abroad.●

● Mr. HORTON. Mr. Speaker, today we commemorate the 1-year anniversary of Anatoli Scharansky's arrest in Moscow. In the year that he has been held, on charges of treason, no one has been allowed to visit him, nor has he been given the opportunity to refute the charges leveled against him. This kind of treatment, a gross violation of the Helsinki agreement, to which the Soviet Union is a signatory, comes as no surprise to those of us who have monitored the Soviet's treatment of political dissidents.

We are attempting to negotiate further disarmament agreements and to provide an improved international atmosphere with the Soviet Union. Instead, the Soviet Union completely disregards individual and human and political rights by its blatant disregard for Anatoli Scharansky's rights.

Our commemoration of Mr. Scharansky's arrest takes an even greater meaning and import when considered in the light of a recent decree signed by President Brezhnev stripping World War II Major General Grigorenko of his Soviet citizenship. General Grigorenko, in the United States for medical treatment, held to his self-imposed vow to remain silent in order that he might protect his citizenship. In spite of his commendable behavior, the Soviet's chose to respect the meaning of the Helsinki accords by stripping this Russian patriot of his citizenship. Mr. Scharansky may not be so fortunate.

If we are to bring a measure of reality to the international struggle in behalf of human rights, political rights, and religious rights, then we must make our voices heard in Moscow where men like Anatoli Scharansky face repression by the Soviet authorities. I join my many colleagues in the House and others around the world who decry the abuse to which Mr. Scharansky has been subjected in demanding his release.●

● Mr. MIKVA. Mr. Speaker, March 15, 1978, is a grim day, for it marks the first anniversary of the imprisonment of Soviet dissident Anatoli Scharansky. It is imperative that we, as Members of Congress, remind Americans and the rest of the world of Anatoli Scharansky's plight. I would like to take this opportunity to insert into the RECORD an article written by Jeff Lyon of the Chicago Tribune entitled, "No Trial, No Charge—Just Wait In Russia." It is a poignant description of the human suffering caused by Soviet suppression of dissent.

[From the Chicago Tribune, Feb. 24, 1978]

NO TRIAL, NO CHARGE—JUST WAIT IN RUSSIA

(By Jeff Lyon)

Her face is wan. Her hair, at 27, has wisps of gray in it, like the streaks in black marble. Endless travel across oceans and continents, to get the world's ear, has taken part of the toll on Avital Scharansky. But mostly her enemy is uncertainty—the day-after-day uncertainty which works deep inside a person, boring away at hope like a termite, silently, steadily.

A grim anniversary is upon her. March 15 will mark a year since her husband, computer scientist Anatoli Scharansky, was arrested by Soviet KGB agents and thrown in Moscow's Lefortovo Prison. He has been held incommunicado ever since, while the Soviets issue dire accusations of high treason, a crime punishable by death.

He was a spy for the CIA, the Soviet government contends. Somehow this short little man, one of a handful of dissidents among 250 million people, a man whose every statement was quoted worldwide, a sore thumb of a man followed day and night, somehow managed to squeeze in a little spying, the Soviets argue.

It is preposterous. But it is also ghastly. Because 11 months have passed and still Anatoli Scharansky languishes in the clammy warrens of Lefortovo. There has been no trial. There has been no formal charge. Just an inexplicable, taunting wait.

Avital and her brother Mikhail fight back with travel. To the White House, to Capitol Hill, to the university campuses of America. And to the capitals of Western Europe to keep the case of Anatoli Scharansky alive.

"We are trying to stir up as many people as possible," she says, sitting shyly in a straight-backed chair in her Sheraton-Blackstone Hotel room. "Public support can only be helpful. If we didn't have it right from the beginning, nobody knows what might have happened. Maybe he would already be convicted and sentenced."

Support has been considerable. President Carter openly affirmed last June that Scharansky had never dealt with the CIA. Washington legislators have petitioned Moscow in his behalf. American and European scientists have attacked the arrest, as have jurists worldwide.

The Soviets have responded by flashing their fangs.

"It is so important to tell the truth," Avital says through Mikhail, her English being weak.

"The way it is with Soviet propaganda, they never prove what they say. They just repeat it many, many times, and finally it fills the world up. So it is important to say the truth many, many times back."

Her married life has been an empty sorrow. They were wed in 1974 and one day after the ceremony she emigrated to Israel with the promise that Anatoli would get a visa soon after. It never came through. The government, laughing up its sleeve, told Anatoli he knew too many state secrets, even though his scientific work had been confined to decision-making methods in the game of chess.

They have not seen each other in nearly four years. While Avital watched, helplessly, from Jerusalem, her husband stepped up his role as a Jewish activist, and finally became a gladiator in the arena of human rights. He bravely defied Soviet authority by becoming spokesman for a little band of Moscow dissidents monitoring, for the Western press, Soviet compliance with the Helsinki accords.

In the end, the state, that nightmare beast whose single purpose is to survive, had to crush him.

Mikhail is speaking fondly of Anatoli in the hotel room. "He's a small man," says Mikhail, who stands 6 feet 6 inches. "It is unusual for a small man to be . . . well, the small guys you see in the street, there are so many of them, but when you begin to talk to Anatoli you realize you are talking to a man overflowing with internal energy. He is like a boiling pot. And he is a precise, logical man, a very great scientist."

Avital begins to speak. Mikhail translates: "She thinks what's happening now is he's a hostage in terrorist hands. She fears for his life. What is the real reason they refuse his mother permission to see him for 11 months? Maybe it's not only they are stubborn. We hear of abuses of political prisoners, of how they are medically abused, given drugs that induce madness. I'm afraid they are doing something to Anatoli because they won't even show him to his mother.

"You know, it is forbidden by the Soviet constitution to hold someone without trial for more than nine months. But the Supreme Soviet issued a special bill to keep him another six months, a complete contradiction of their own law.

"It seems to me is very difficult now to let him go. We think they are planning to destroy the whole dissident movement in the U.S.S.R., because the movement had made their lives miserable and had gained worldwide credibility.

"If that is their aim, I don't see any other weapon available for us to save him than public pressure," Mikhail says.

An hour later they have carried their fight to University of Illinois Chicago Circle Campus. They are trying to build student sentiment for a nationwide hunger strike on March 15 in Scharansky's behalf. It isn't easy. Ten years ago, hundreds, thousands of students would scream themselves hoarse in a frenzy to "Free Huey," or "Bobby," or the "Berrigan Brothers." This Thursday noon only 25 students show up to help "Free Anatoli."

"There is now an official media campaign against Jews in the Soviet Union," Mikhail tells them. "They sing the same old song. Jews are to blame for everything. For bad weather and grain imports, for starting World War II, for bad relations with the United States. It reminds many older Jews we talk to of the period when Hitler was coming to power."

A youth in the front row looks sullenly up from a page of Arabic. The egotism of suffering is about to rear its head: Only my cause is just.

"You believe only Jews have human rights?" he asks sullenly of Mikhail, who does a double take. "You should practice human rights in your own country, Israel, where there are 13,000 Palestinians under torture."

Mikhail seems bemused by this irrelevance. But he gathers himself for a reaonable answer.

"Everyone has human rights," he says. "But right now I am only concerned with my family's rights. I'm trying to get my own people out of prison, and I don't have energy for anything else. I'm not going to involve myself with the Palestinians."

It is early afternoon. Avital and Mikhail are going to their next stop with Lorel Pollack, of the Chicago Action for Soviet Jewry, which is sponsoring their Chicago visit. Mikhail is speaking of the madness of his brother-in-law's plight.

"Here is the biggest machine in the world, the Soviet Union. Millions of people are pushing that machine, and there is just one single person getting up and saying, 'Hey, you're wrong.' It isn't possible. It isn't logical. But all those who felt logically probably bent to the will of the state.

"I have no explanation for why Anatoli is the way he is. But he is a man. One big man." ●

● Mr. EDWARDS of California. Mr. Speaker, like many of my colleagues here in the House of Representatives, I am deeply distressed by the continued imprisonment of Anatoli Scharansky. Tomorrow Mr. Scharansky will have been held incommunicado by the Soviet authorities for 1 year.

He has been accused of treason and espionage, and Soviet officials have attempted to link Scharansky with the CIA, a connection which President Carter has repeatedly denied. Indications are that the Soviet Government intends to bring Scharansky to trial soon.

As one of the most prominent of the Soviet Jewish dissidents, Scharansky has apparently been singled out by the Soviets in their efforts to quash the activities of other dissidents. Prior to his arrest on March 15, 1977, Scharansky was an English translator for the "refuseniks" in Moscow, and thus became known to those who oppose the Soviet Government's oppressive treatment of Soviet Jews. He worked to spread Jewish culture in small communities throughout the Soviet Union, and to many Soviet Jews he, perhaps more than any other individual, has become a symbol of Soviet Jewish resistance to Soviet oppression.

Since 1973, Scharansky has sought permission to emigrate to Israel. Although Scharansky's wife was granted an exit permit and permitted to leave, the Soviet Government has refused to allow Scharansky to join his wife. The case of Anatoli Scharansky thus is one more tragic example of Soviet refusal to comply with the guarantees of the Helsinki Declaration.

Now is the time for the Congress of the United States to demonstrate its commitment to the cause of human rights. I join with my colleagues in calling once more for the release of Anatoli Scharansky and in urging the Soviet Government to permit him to join his family in Israel.●

● Mr. TSONGAS. Mr. Speaker, tomorrow marks the grim anniversary of Mr. Anatoli Scharansky's arrest by the the Soviet Government on charges of treason. Mr. Scharansky has become in the last year the chief target of the Soviet Union's efforts to destroy the Russian dissident movement. A worldwide program has been scheduled to call attention to the plight of Anatoli Scharansky whose rights have been violated by the Russian authorities. I participate with the hope that if enough protest is raised, Mr. Scharansky will be granted his freedom, or at least his rights as a prisoner will be respected.

Anatoli Scharansky, once a computer expert, was denied emigration papers in 1973 to join his family in Israel. Since then he has been continually harassed, cross-examined, and kept under constant surveillance by Russian authorities. Consequently, he became an English interpreter for the "refusenik" community. This organization has brought to public attention the plight of the Russian Jews who are denied emigration. Scharansky also became a spokesman for an unofficial commission to monitor the Helsinki accords. This group was successful in reporting violations of the accords by Russian authorities.

Anatoli Scharansky has become Russia's example to the public of the fate of dissidents. He is presently in the Lefortova prison where he has been denied the right to see his family, as well as the right to choose his legal counsel. Both of these basic rights were internationally agreed upon in Basket Three of the Helsinki Final Acts. Despite both a public and private statement by President Carter declaring that Scharansky "has never had any sort of relationship with the CIA" he is still being held under espionage charges.

There is rising concern that his trial will begin soon, probably after the Belgrade Conference on Human Rights closes. If found guilty, Mr. Scharansky faces the possibility of a death penalty, or at least a 10-year prison sentence. Mr. Scharansky's rights have been openly and flagrantly violated by Russian officials. The time to speak out in protest for Anatoli Scharansky is now.

I appeal for his immediate release and permission for him to join his family in Israel. I urge all of you who are supporters of the Helsinki accords and share my concern in protecting human rights to publicly protest on Mr. Anatoli Scharansky's behalf.●

● Mr. CONTE. Mr. Speaker, I join my colleagues during this special order called today to offer my continued support of efforts to release Anatoli Scharansky, Russian dissident and spokesman for the Helsinki watch group, from his year's imprisonment in the Soviet Union.

Sadly, it seems that we and other peoples of the world still have a long way to go on the road toward recognizing and honoring basic human rights.

The continued imprisonment and possible trial of Mr. Scharansky because of his "crime" of being an outspoken defender of human rights, is a continued violation of the Helsinki Final Act and other international agreements signed by the Soviet Union and should not be tolerated.

The silencing of Mr. Scharansky represents the silencing of thousands of voices there and throughout the world that would clamor for justice except for the presence of intolerant government policies that depend on the negation of the human will for their own survival. We must no longer leave room for such intolerance.●

● Mr. EILBERG. Mr. Speaker, I am proud to inform my colleagues that thousands of people all across Greater Philadelphia are outraged by the continued imprisonment of Anatoli Scharansky.

As the evidence mounts that the So-

viets intend to press their outrageous charges against Scharansky. I know that the determination grows stronger among my constituents to intensify their protest against what is happening to this brave man.

For me, the action against Anatoli has a very special meaning. Nearly 3 years ago, I met him in Moscow when I traveled to the Soviet Union as chairman of the House Judiciary Subcommittee on Immigration, Citizenship, and International Law. I was tremendously impressed at that time by Anatoli's courage in defying Soviet authorities by volunteering to serve as a translator for my colleagues and me.

Since then, I have met his wife, Natalia, and have taken part in many efforts on his behalf to point out that the detention of Anatoli and the refusal to allow his emigration is in violation of both Soviet law and international law.

Just recently, two distinguished members of the bar in Philadelphia returned from a visit to the Soviet Union where they raised the question of Anatoli Scharansky's continued imprisonment with leading Soviet jurists. On their return, Peter J. Liacouras, dean of the Temple University School of Law, and Burton Caine, well-known attorney in Philadelphia and a member of the faculty under Dean Liacouras, circulated a petition among their colleagues all across the country. As a result, the deans of 72 law schools added their voices to the protest against Anatoli Scharansky's imprisonment.

I offer for the RECORD the Temple University news release describing the campaign by Dean Liacouras and Mr. Caine on behalf of the man whose courage we pay tribute to today:

The deans of 72 law schools throughout the United States, including Puerto Rico, have signed a resolution deploring the actions of the Soviet Union in the case of imprisoned Soviet Jew and human rights activist Anatoli Scharansky.

Scharansky was arrested last March 15 and has been held incommunicado, unable to see, speak with or write to his family or legal counsel. His family, which has only the government's assurance that he is alive, was told last June that he faces a possible charge of treason, punishable by death.

In addition to the law deans, more than 100 law professors have signed the resolution, which is being forwarded today, Jan. 6, to Leonid I. Brezhnev, chairman of the Presidium of the Supreme Soviet of the USSR, by Dean Peter J. Liacouras, of the Temple University School of Law. The professors include Soviet legal scholars, experts in human rights and specialists in constitutional law.

"Never in memory have so many law school deans united in support of a single cause," Dean Liacouras said. "This is an indication to me of the gravity and urgency of the Scharansky case. I hope that this action will persuade the Soviet authorities to release Scharansky and permit him to emigrate, a right guaranteed to him under law."

The resolution was circulated by Dean Liacouras and Professor Burton Caine, also of the Temple law school, after returning on December 20 from a week's visit to Moscow and Leningrad. They were there on December 15, the day when the nine-month maximum period for investigation under Soviet law expired in the Scharansky case.

The Temple visitors, in discussing the rule of law with the president of the Moscow Kollegium of Barristers, K. N Apraksyn, and other Soviet officials, raised the question of the authority of the Presidium of the Supreme Soviet to extend the investigation and confinement of Scharansky for another six months, as reportedly had been done by a secret decree applying only to this case.

Before returning to the United States Liacouras and Caine interviewed Scharansky's mother in the presence of correspondents for the New York Times and Baltimore Sun. She categorically denied she had been allowed to see her son the day before, as Apraksyn had reported, or at any time since his imprisonment.

At the annual meeting of the Association of American Law Schools in Atlanta, Ga., on December 27–30, Liacouras and Caine convened an unscheduled panel discussion to see what American law professors could do to guarantee human rights in the Scharansky case. They were joined on the panel by Professors Harold J. Berman and Alan M. Dershowitz, both of the Harvard Law School.

Professor Berman is a world renowned authority on the Soviet legal system, and Professor Dershowitz is a well-known human activist.

Anatoly Dobrynin, Soviet Ambassador to the United States, was invited to participate but did not respond.

A capacity audience responded enthusiastically to the call for action on behalf of Scharansky. One proposal was to send a resolution to Soviet authorities deploring their actions in the Scharansky case. The resolution was written by Liacouras and Caine.

Since the Atlanta meeting, Liacouras has contacted additional law school deans throughout the country. The deans signed the resolution as individuals and not on behalf of their institutions. They include the heads of the Harvard, Yale, Chicago, Michigan and Stanford law schools.

Liacouras and Caine noted that there was strong sentiment among the law professors that an American legal representative be permitted to attend Scharansky's trial, if one is held.

TEXT OF RESOLUTION

"Be it resolved that we, the undersigned Law Professors and Law School Administrators of the United States Law Schools convened at the Annual Meeting of the Association of American Law Schools in Atlanta, Georgia—

Deplore the actions of the Government of the Soviet Union in relation to the case of Anatoli Scharansky in that:

1. Scharansky has been held incommunicado since March 15, 1977, unable to see, speak with, or otherwise communicate with anyone except KGB interrogators;

2. No counsel has been provided or permitted to Scharansky;

3. On December 15, 1977 the Presidium of the Supreme Soviet of the U.S.S.R. in a special, secret decree applied only to Scharansky, has extended for an additional six months his incommunicado investigation and interrogation despite the absence of any express provision of law or Constitution authorizing such action;

4. The Government of the Soviet Union will give no assurances that Scharansky's trial, if one is held, will not be secret;

All of which facts run counter to the Rule of Law, minimum standards of justice and Declaration of Human Rights, the International Covenant of Political and Civil Rights, and the Helsinki Final Act." ●

● Mr. ROSENTHAL. Mr. Speaker, I rise today on behalf of Anatoli Scharansky, who, like so many other Soviet Jews, has been harassed, persecuted and imprisoned for his desire to emigrate to Israel. Tomorrow will mark a full year since Scharansky's arrest and imprisonment. A national hunger strike will take place tomorrow in solidarity with Scharansky and in protest of his arrest.

Anatoli Scharansky has become a worldwide symbol for all prisoners of repressive states who are denied their basic human rights. Unwittingly, he has become a martyr for freedom.

As one of the key leaders of the Jewish activist movement in Moscow, Scharansky tried to convince the Kremlin to abide by the Helsinki Human Rights accords, which the Soviet Union had signed and endorsed calling for the free movement of peoples. This was the "crime" that led to his incarceration.

Scharansky has been in solitary confinement since his arrest 1 year ago. Sylvia Zalmanson, a Soviet Jew who has spent 4 years in Soviet prisons, recently described the conditions for the Washington Star. She said:

Prisoners receive no vegetables, no fruit, no vitamins, no meat. Sick people only, with ulcers, could get one glass of milk. Nobody else . . . In solitary confinement, it is terribly cold. The floor is cement, the bed is wood, with no blankets. The prisoner is not allowed to dress warmly either . . . People die in these prisons.

Amnesty International calls solitary confinement torture by isolation.

No date for a trial has been set, no charges have been formally made. The Kremlin continues to argue its case in the press attacking Scharansky and his wife, Avital, on personal grounds. The Kremlin has accelerated its attacks on Scharansky, whom it repeatedly has accused of working for the American CIA. Most recently, the Soviets trooped out Scharansky's former roommate, an apparent double-agent who claims to have worked for the CIA himself, to repeat the charge. In an unprecedented move, President Carter publicly has stated all such charges untrue.

Scharansky has been incarcerated for an excessive amount of time—certainly longer than necessary to conduct a preliminary investigation. It appears the Soviets may have delayed his trial until the Belgrade Conference on the Helsinki accords had adjourned. Now that the Belgrade Conference is over—with no real accomplishments in the area of human rights—the Soviets can be expected to take even bolder steps to repress those who disagree with them. I fear for the safety of Scharansky and other prisoners of conscience. ●

● Mr. WAXMAN. Mr. Speaker, Anatoli Scharansky, aged 30, has been held incommunicado in Lefortovo Prison in Moscow for a year. He is charged with treason, which carries a possible death sentence. He will most likely be brought in the very near future to a show trial staged for the benefit of the Soviet people in which the state will attempt to prove that Scharansky was a CIA agent. The prime witness will be a doctor who was forced by the KGB into working as a double agent for the CIA, all for the purpose of discrediting, and ultimately eliminating, Anatoli Scharansky.

His only "crime" is that he wants to leave the Soviet Union.

Scharansky's case has brought worldwide attention to bear on the Soviet Government's shameful and brutal tactics of intimidation and repression. But in the Soviet Union, the citizens view a differ-

ent story, one carefully orchestrated by authorities. Refuseniks who wish to emigrate have been linked with the dissidents who are both monitoring Soviet compliance with the Helsinki accords and working for reform of the Soviet system. The arrest of Scharansky has been used by Soviet authorities to in turn link these two movements with alleged foreign espionage activities. And so the bizarre equation is made between would-be emigrant and treasonous criminal.

The Scharansky case will surely test our resolve no less than the courage and determination of those who stand behind him. The Soviet Government clearly hopes this will be the culmination of a campaign begun over a year ago to eliminate once and for all organized opposition—no matter how patriotic, or how inconsequential—to the regime.

Our efforts must not cease until Scharansky is free, for some of us is imprisoned with him.

I wish to attach for my colleagues a distressing article from the New York Times describing the Soviet Government's systematic efforts to silence the voices of freedom.

SOVIET DISSIDENT MOVEMENT IS AT LOW EBB

(By David K. Shipler)

Moscow, December 29.—The small Soviet human-rights movement, which attracted so much attention around the world though it is probably unrepresentative of any broadly held opinion, is at its lowest point in years after a campaign of arrests, threats and forced exile directed against most of its prominent leaders. Its momentum has been curbed, its political dexterity undermined and its communications network in the Soviet Union badly disrupted.

Yet new people have joined almost as fast as the old have disappeared. Inexperienced for the most part and less dynamic organizers than the previous generation, they have positions of less stature in this supremely status-conscious society, so they may be somewhat less able to generate respect than their predecessors.

"FEWER OF US REMAIN"

But the unending appearance of new names on open letters and of new faces at press conferences supports the dissidents' contention that the movement cannot be pronounced dead. At worst, they predict, it will experience a pause, a lull, a period of somewhat less coordinated activity as a new community of dissent takes shape.

"One part of the movement has gone to the West, another to the east, and fewer of us remain," said Naum Neiman, a mathematics professor, referring to the emigration and the imprisonment that have sapped the front ranks of the activists. "The movement will continue, though, at a higher or lower level. It cannot stop."

Some think Soviet dissent has become "inevitable, a kind of natural phenomenon," in the words of the Yugoslav dissident Milovan Djilas. In part it is a continuing reaction to the latent neo-Stalinism that lurks in this society and to the Stalinist oppression that was suddenly exposed in 1956 by Nikita S. Khrushchev in a secret speech to a Communist Party congress that swept away a patina of falsehood and illusion and allowed the truth to be told.

It is driven also by personal imperatives. "This act is forced on you because you are trying to keep yourself decent," said Valentin F. Turchin, former head of the Moscow branch of Amnesty International, before he was harassed into emigrating last fall. "I consider myself a scientist mostly and not a political activist. I don't enjoy press conferences—they're not for me. But in this country if you try to behave decently you become a dissident."

A QUESTION OF IMPORTANCE

How important the dissidents are in political life is subject to debate. Small and unrepresentative though they may be, they act as a pressure point for foreign views of Soviet behavior—views of both Western governments and some European Communists—and as such they subject the Kremlin's domestic policies to close international scrutiny.

Furthermore, they often elicit expressions of sympathy and regard from other Russians, suggesting that their crusade may have some resonance at home. After Andrei D. Sakharov, the physicist and human-rights advocate, won the Nobel Peace Prize in 1975, an elderly cleaning woman told her Russian employer, "You know, they wanted to raise the price of vodka but Sakharov would not let them." Others have heard the same thing from cab drivers.

After Veniamin G. Levich, a high-ranking physical chemist, was denounced in the press last summer for laziness and anti-Soviet slander because he wanted to emigrate to Israel, a saleswoman in a food store appeared at his apartment with some vobla, a hard-to-get dried and salted fish that she knew he liked. "We read the article," he quoted her as saying. "We were indignant. We know it's all a lie, so please eat some vobla and don't be sad."

NOVELTY IN RUSSIAN HISTORY

The phenomenon of open dissent outside the circles of power is relatively new in Russian history, at least in its present form, and a contrast with the clandestine, conspiratorial activity that existed at times under the czars. Even the modicum of debate that was tolerated in the Communist Party during the first years after the Bolshevik Revolution was snuffed out by Stalin's terror and has been kept from re-emerging in the quarter of a century since the dictator's death.

Not until the mid-1960's, near the end of a brief, tentative trend toward liberalization, did the human-rights movement as it is now known spring up. At first it was little more than an assortment of Moscow intellectuals demonstrating and petitioning on behalf of the writers Andrei Sinyavsky and Yuli Daniel, who were tried in February 1966 and convicted of slander against the state.

The writers' supporters made contact with the Western press at the trial, when reporters and sympathizers stood outside the courtroom waiting for news. At first, according to one account, the Russians and the Westerners kept to themselves; then one or two Russians approached American and British correspondents. The information the dissidents provided, sent to the West by news agencies, came pouring back in Russian on broadcasts by the Voice of America and the British Broadcasting Corporation. The newborn dissidents' heady sensation of having their words suddenly amplified so their countrymen could hear began a chain of communication and reinforcement that has persisted despite the repeated efforts of authorities to break it.

THE PATTERN FOR A DECADE

Those early months set the pattern for a decade. As intellectuals pleaded for public trial and for compliance with the rights set forth in the Soviet Constitution and as they conveyed reports of injustices in the courts, some were arrested in turn, with those arrests provoking new protests and still more arrests. This produced a rights movement with a constantly changing cast, one almost wholly concerned with ad hoc statements on specific cases rather than proposals for fundamental change or visions of a new political order.

When there has been philosophical discussion it has tended to divide the dissidents by accentuating their differences, for the movement is really a set of parallel, disparate streams that, flow together occasionally, then move apart again. At least six such currents can be identified.

The most Western-oriented is that represented by Dr. Sakharov. He and those around him are known here as democrats, for although he has written that he is a socialist, he has advocated the evolution of a multiparty, democratic state tolerant of criticism and diverse opinion. He has also spoken for the right of all to live where they wish, thereby supporting the second large group of dissidents and the one receiving the most vocal defense in the United States: Jews striving to emigrate. (Although some conflict has existed between those who want to leave and those who want to stay and change the system, it has diminished recently in recognition of the impact that free emigration would probably have on making the authorities more responsive to citizens' concerns.)

The third strain of dissent is a form of Russian nationalism, or nostalgia for the roots of Russianness to be found in the Russian Orthodox Church, in the village, in czarism. Its most prominent representative was Aleksandr I. Solzhenitsyn, another Nobel laureate, whose first volume on the Stalinist labor camps, "The Gulag Archipelago," resulted in his expulsion in 1974. Among those left behind are some who see Marxism as an alien, un-Russian ideology and some whose views contain overtones of racism, Russian supremacy in the Soviet Union and anti-Semitism.

KEEPING THE PARTY PRE-EMINENT

The historian Roy A. Medvedev articulates the fourth line of dissent, the one that might conceivably appeal to some party members, though how many is impossible to say. As described in his book, "On Socialist Democracy," his formula is democratization within the bounds of Communist Party pre-eminence. He believes that free debate is essential rather than anathema to an efficient economy and a robust Communist ideology.

Religious observers make up a fifth tendency. Baptists, Seventh-day Adventists, Pentecostalists, Lithuanian Roman Catholics, Russian Orthodox and others have protested the denial of religious freedom, published underground journals and the like, usually separately.

Finally, the country is laced with ethnic minorities, such nationalities as Georgians, Lithuanians, Ukrainians and Tatars that struggle for the preservation of their cultures, languages and traditions in the face of Russian dominance.

What began to happen a year and a half ago, and what apparently provoked one of the most carefully executed crackdowns on dissidents in the last decade, was an unprecedented coalition, including democrats, Jews seeking emigration, ethnic nationalists and, to a lesser extent, religious believers.

THE CATALYST IN HELSINKI

The catalyst was the European security document signed at Helsinki in August 1975 by the United States, the Soviet Union and 33 European states. Its so-called Basket Three provisions called for more humanitarian behavior by governments: reunification of families across frontiers, increased contact among peoples, the improved flow of information internationally. The pact having created common ground for the dissidents, nine activists formed a group in May 1976 to monitor Soviet compliance. Similar "Helsinki watch committees" appeared in Kiev, Tbilisi, Yerevan and Vilnius, and all began issuing periodic reports on violations.

The pace of dissident activity quickened.

A broad array of Protestant, Catholic and Orthodox clergy and laymen joined in an open letter to the Soviet leaders pleading for religious freedom. Jews, all wearing bright yellow stars of David, assembled at the reception room of the Supreme Soviet—the legislature—in Moscow to push their demand for emigration, then walked along Karl Marx Prospekt to the offices of the Central Committee of the Communist Party. Other Jews planned a seminar on Judaic culture. Painters formed a group to protest artistic oppression. Activists organized to publicize the use of psychiatric institutions as detention centers.

Yuri F. Orlov, a toughly built physicist who headed the Moscow watch committee, undertook to establish links between the strands of dissent. He introduced Georgian nationalists to Jewish activists in Tbilisi and democrats to religionists in Moscow. Zealous and tireless, he brought the movement a political canniness that Dr. Sakharov, a more academic moralist, did not possess.

At the same time new dissent was emerging in Eastern Europe, long a point of acute sensitivity among Soviet officials on the problems of orthodoxy and control. In Poland workers rioted to protest announced price rises, which the Government was forced to rescind. In Czechoslovakia and Hungary intellectuals signed statements against oppression and in East Germany the number of applications for emigration to the West soared.

The ferment in Eastern Europe must have been worrisome to Moscow, especially as its leadership of the world Communist movement was coming under fresh challenge by West European Communists, particularly the Italian, Spanish, and French parties. A centerpiece of this independently minded movement, which came to be known as Eurocommunism, was rejection of the Soviet-style closed political system.

The foundation for a crackdown was laid, then, by the accelerated dissident activity, the growing unification of previously fragmented elements of disaffection, the persistent problems of the Soviet economy and the danger of a coalition between spokesmen for workers' grievances and human-rights activists—plus the centrifugal tendencies in European Communism.

Furthermore, the Russians were apparently distressed at the specter of dissident groups putting out regular statements during the Belgrade follow-up meeting on the Helsinki pacts and they presumably did not want disharmony at the celebrations of the 60th anniversary of the Bolshevik Revolution.

The campaign by the K.G.B., the secret and security police, began in the fall of 1976 when a dozen Jews were seized in the Supreme Soviet's reception area, bused to the outskirts and beaten by plainclothesmen. Jew planning a cultural seminar were subjected to house searches, confiscation of materials and detention. Activists were called in repeatedly for interrogation, told that the K.G.B. had been given more latitude to move against them and warned that criminal cases were being prepared. In January 1977, before Jimmy Carter came into office with his outspokenness on human rights, Mr. Orlov, the head of the Moscow watch committee, was picked up and told that he and others would be prosecuted.

BLEND OF TOUGHNESS AND SOFTNESS

The K.G.B. used a blend of toughness and softness to get rid of key dissidents.

Some who had tried for years to emigrate, such as Vitaly Rubin, a Sinologist and a founding member of the Moscow committee, and Veniamin Fain, chief organizer of the abortive cultural seminar, suddenly found themselves with exit visas.

Some who did not want to leave were threatened and forced to emigrate. The Amnesty International head, Mr. Turchin, a friend of Dr. Sakharov, was informed by the K.G.B. official that he would never work again as a mathematician in the Soviet Union and he was led to believe that he would be arrested if he stayed. Similarly, Tatyana Khodorovich was told to leave or face prosecution, and Dina Kaminskaya, a lawyer who defended many activists, was forced out by threats of imprisonment for her husband.

Sixteen members of Helsinski watch groups have been arrested this year, including Mr. Orlov; Aleksandr Ginzburg, who administered a fund for political prisoners with money sent by Mr. Solzhenitsyn; Anatoli Scharansky, a Jew who seeks to emigrate and who worked as a consummate public-relations man for the dissidents; Mikola Rudenko, a poet and a head of the Kiev group, and Zviad Gamsakhurdia, a Georgian separatist and head of the Tbilisi committee. Most of the nine founding members of the Moscow group are in jail, in Siberian exile or in the West. Only one remains active—Yelna Booner, Dr. Sakharov's wife, who has had to go abroad for medical treatment.

Though the watch group has been replenished, the losses have dulled its political acumen. It failed to take advantage of the attention focused on the follow-up conference in Belgrade in October, at one news conference its members were not prepared for questions on their views of the West's handling of human-rights issues at the meeting and declined substantive comment.

The dissidents issued no detailed analysis of the Soviet Constitution adopted in October, nor any appraisal of the political and judicial rights contained and limited in the document.

SAKHAROV: ISOLATED AND BITTER

Lacking friends and colleagues who understand something about Western opinion, Dr. Sakharov has struck some dissidents and Western correspondents as increasingly isolated and even bitter. He has lashed out several times at the American press, accusing it of giving dissent too little attention; reporters have found it difficult to get him to talk about anything alse.

K.G.B. STUNNINGLY ACCURATE

He rejected a chance recently to bring some ordinary workers—they had sought his help after having been discharged for complaining of corruption and safety violations on the job—into the human-rights movement, partly, a friend said, because he was afraid that simple, relatively unknown people would be hurt and perhaps even slain if they had contact with him. "Unfortunately, unlike Poland, we have no workers in the movement," said Professor Meiman, a watch group member who has been refused permission to go to Israel. "Our people don't really trust the intelligentsia."

Paranoia, always present where the K.G.B. operates, is especially strong now in the wake of disclosures that a trusted "dissident," Dr. Sanya Lipavsky, a Jew, was a police agent. He wrote a letter, published in the Government newspaper Izvestia, accusing Mr. Scharansky and others of working for the Central Intelligence Agency. Mr. Scharansky is awaiting trial, and his case has cast a chill over dissidents, making people suspect their friends.

The K.G.B. has focused on potentially influential activists with stunning accuracy. The most charismatic and eloquent of the new generation, Aleksandr Podrabinek, has been the target of threats and pressure in the form of a falsified case against his older brother designed to force the family to leave the country—something he has refused to do—or face persecution. A 24-year-old medical assistant, uncannily calm and steady in the face of adversity, he has collected data on the abuse of psychiatry. As others have disappeared from the movement, he has stepped in to fill the gap as a clearing house for reports of political arrests.

"I do not want to sit in prison," he said. "I value even the image of freedom, which I have now. I know that in the West I could live freely and receive, finally, a genuine education. I know that there I would not be followed by four or five agents threatening to beat me or push me under a train. I know that there I would not be placed in a concentration camp or a psychiatric hospital for trying to defend the rightless and the oppressed. I know that there I could breathe freely, whereas here—heavily. They stop up your mouth and smother you if you speak too loudly. I know that our country is unhappily doomed to suffering. And therefore I will stay."

"I do not want to sit behind prison bars, but I am not afraid of prison camp," he continued. "I value my freedom, as I do the freedom of my brother, but I will not sell it. I will not yield to any blackmail. For me a clean conscience is more valuable than everyday well-being. I was born in Russia. It is my country and I must remain in it even if it is difficult here and easy in the West. As much as I can I will try henceforth to defend those whose rights are so crudely trampled in our country. That is my answer. I will stay." ●

● Mr. RICHMOND. Mr. Speaker, March 15, 1978, represents an anniversary—not the kind of anniversary that gladdens the heart.

It is a time when all freedom-loving people must pause to ponder the cost in human suffering of expressing one's convictions in a nation that does not tolerate dissent.

Sadly, tragically, on March 15, Anatoli Scharansky will complete 1 full year in prison in the Soviet Union. His "crime" was that he did not agree with his government. For expressing his views, he has been falsely charged with treason and espionage and held incommunicado in a Soviet prison for this entire year.

Now it appears that the Soviet authorities will bring this young man to trial as a way of further stifling free expression and further isolating Soviet Jews and discouraging those who want to emigrate.

Anatoli Scharansky had the courage to speak out on behalf of Soviet Jews. He is recognized as the leader of the "refuseniks," a group of Soviet Jews who have sought to leave their country and who were callously refused permission to do so by Soviet authorities.

More than his outspoken efforts on behalf of Soviet Jews, and, more than his leadership of their cause, Anatoli Scharansky is a symbol to all the world of the continuing violation of human rights within the Soviet Union.

The trial, even though it will be a sham, poses real dangers to Scharansky, who could be sentenced to 10 years in prison and perhaps even sentenced to death for his alleged "crimes."

Such a trial could also signal the start of a new wave of oppression against Soviet Jews.

The continued brutal and oppressive treatment of this one individual is a direct affront to President Carter's outspoken commitment to human rights.

I call upon my colleagues and upon the President to make it clear to the Soviet Union, in the strongest possible terms, that the actions of Soviet authori-

ties in violation of the Helsinki Accords is a direct threat to United States-Soviet relations and that we will tolerate nothing less than the immediate release of this courageous young man.

Anatoli Scharansky must be allowed to emigrate from the Soviet Union, to join his wife, and—wherever he may choose to live—to live his life according to his own convictions, free from the threat of harassment and oppression.●

● Mr. WOLFF. Mr. Speaker, tomorrow, March 15, marks the anniversary of the arrest of Anatoli Scharansky on charges of treason. He has been held incommunicado at Lefortovo prison since his arrest 1 year ago. This is a case where the Soviet Union clearly could advance the cause of détente, but rather has chosen to heighten tensions between our nations.

Anatoli Scharansky is a leading Soviet dissident who was one of the leaders of the movement to monitor the degree of compliance of the Soviet Union with the Helsinki accords. This was his crime. He was harassed and threatened, and finally accused of being a CIA agent and arrested. Mr. Scharansky's case is another example of the great lengths to which the Soviet Union will go to avoid any criticism of the deplorable lack of human rights and civil liberties there. The herculean efforts which they employed to avoid any mention at all of human rights in the final document of the Belgrade Conference is but another example.

Recently, it has been determined that Scharansky's apartment mate. Sanya Lipavsky, did have some connections with the CIA. He was a "walkon" volunteer, who was connected with the CIA for only a short time. It appears that the Soviet Union "set-up" Scharansky in this transparent ploy to implicate him by association.

My colleagues and I have worked hard during the past year to secure the release of Anatoli Scharansky. I added his name to House Concurrent Resolution 387, the "Omnibus Human Rights Resolution," which urged the U.S. delegation at the Belgrade Conference on the Helsinki accords to examine the treatment of Soviet dissidents and reaffirmed the U.S. commitment to obtain full compliance with the human rights provisions of the agreement. I have joined with my colleagues, my constituents and other interested citizens and groups in the International Committee and the Long Island Committee to Free Anatoli Scharansky in working for his release. I add my voice to the millions of outraged people who are calling upon the Soviet Union to release this man. Even the French Communist Party has broken with its Soviet allies in this case, calling the charges against Scharansky reminiscent of stalinism. They offered to provide a French Communist lawyer for Mr. Scharansky, an offer which was flatly refused.

This case calls out for justice. I again demand that the Soviet Union free Anatoli Scharansky. If the Soviet Union wants to press this case, even though détente will suffer, then suffer it will, because the United States will not back down.●

● Mr. BINGHAM. Mr. Speaker, it is with sadness and increasing frustration that we mark the 1-year anniversary of Anatoli Scharansky's arrest and incarceration in Moscow's Lefortovo prison. Mr. Scharansky passed his 30th birthday of January 30 in isolation, as he has passed all his days since his March 15, 1977, arrest. Five years earlier the gifted computer specialist applied to emigrate to Israel and found himself without an exit visa and without a job. That proved to be a serious tactical mistake on the Soviet Government's part, because they found themselves saddled with a young man who became one of the boldest champions of emigration and human rights to speak out from within their borders.

They did their best to silence him. During the 2 years before his arrest, Mr. Scharansky spent more than 100 days in jail on minor charges—15 days for asking why his visa application was denied. The KGB surveillance was incessant; he did not move in Moscow without two to eight police tails. His marriage was shattered the day after the wedding when his bride received an ultimatum to emigrate or forgo her option to leave at all. She left, hoping Mr. Scharansky would soon join her in Israel. The separation has extended into years.

But Mr. Scharansky did not relax his advocacy of human rights. His compassion extended to all those who came for assistance, including Germans and Christians, groups often singled out for harsh treatment by the Government. He served as a liaison to the Western press for Jews seeking to emigrate and dissidents wishing publicity.

Mr. Scharansky finallly proved intolerable to the Soviets when he founded the Public Group to Promote Observance of the Helsinki Agreements, an unofficial association set up to monitor Soviet compliance with the 1975 accords. Signed by the U.S.S.R. and 34 other countries, the accords provide for the free movement of people, ideas, and information between participating States.

Mr. Scharansky's arrest last March, the slander in the Soviet media and the accusations of treason all coincided with the opening of the Belgrade Conference to assess compliance with the Helsinki accords. For the Soviet Government, it was the worst time to suffer a citizen monitoring group and a hold human rights advocate. He was stifled—held incommunicado in a transparently political action.

Despite the provisions of the 1975 Helsinki Final Act, the 1948 Universal Declaration of Human Rights and the 1966 International Convenant on Civil and Political Rights, Mr. Scharansky was imprisoned. Despite the efforts of the International Committee to Free Anatoli Scharansky working in Canada, Great Britain, and here, Mr. Scharansky remains imprisoned. Despite the letters, the petitions to the United Nations and our meetings with Soviet officials, Mr. Scharansky has not been allowed to see his family or a lawyer of his choice. Despite the State Department's assertion that the article 64 treason charge is "misinformation laced with slander and innuendo," Mr. Scharansky's right to a fair trial appears more compromised each day. And despite the intercession of the President of the United States and his word that Mr. Scharansky "has never had any sort of relationship to our knowledge with the CIA," the threat against this brave man grows.

Just before his arrest, Mr. Scharansky said, "the atmosphere now smells of a pogrom." His intuition, unhappily, was keen. Scores of Jewish refuseniks have been interrogated about their relationship to Mr. Scharansky in a clear and obvious attempt to frighten Jewish activists around the country. Many have never met him. One dissident, Vladimir Kislik of Kiev, was held for questioning for 3 days. During one intense period last fall, more than 70 people were questioned in 15 cities. Some were asked about Mr. Scharansky's mental stability. Those people targeted for these sinister interrogations have been threatened with criminal procedures for "anti-Soviet" activities and have been warned about a connection between receiving emigration visas and the character of their answers.

Such travesties recall the show trials and purges of the 1930's and the so-called "Doctors Plot" of 1952. What they show is a mockery of the Helsinki Accords and the 34 other nations which signed them. What they show is an affront to the humane values of all people. What they show is a disregard for inalienable rights.

What we must show, as Congress and as a people, is our seriousness about human rights and the welfare of Anatoli Scharansky. The Soviets cannot make a mockery of international law and human decency and not expect repercussions in the international community. It is not easy to separate our support for détente and the easing of tensions from our revulsion at Soviet handling of these "international mistakes."

Sanya Lipavasky has accused Mr. Scharansky of "collecting on behalf of CIA agents secret intelligence in scientific, technical, military, and political fields." The accusation is absurd, if only for the reason that a person with eight KGB shadows could not make a CIA contact. The truth is that intelligence in science, technology, and politics will suffer between our two countries unless the Soviets free Mr. Scharansky, end their harassment of Jewish dissidents, allow emigration and observe their obligations to the spirit and letter of the Helsinki Accords.

Our efforts in this country to push for these ends are essential especially now. Ida Milgrom, Mr. Scharansky's mother was told in December,

> Thanks to your friends in the West we cannot conclude this case in the normal way.

And 33 Soviet citizens, writing to the New York Committee to Free Anatoli Scharansky, stated.

> Only the continuous attention of the world public and its active struggle in

Scharansky's defense could remove the danger that is now being faced by him personally and by the whole Jewish emigration movement.

Mr. Speaker, we are all indebted to Anatoli Scharansky for his courageous advocacy of human rights in a very oppresive environment. He added his voice to an ancient insistance that we be free, an insistence which protects us all. He is a person we cannot ignore. His cause is our own.●

● Mr. SOLARZ. Mr. Speaker, today we honor Anatoli Scharansky, a courageous young man who is the victim of an effort to discredit the validity of attempts for people to be free. On espionage charges which are solely designed to discredit this man's cause, Mr. Scharansky has been detained in Lefertovo Prison in the Soviet Union for 1 year.

What has this 29-year-old computer engineer done which warrants such action on the part of the Soviet authorities? Perhaps it was the belief that he would be allowed to emigrate to Israel, the land of his ancestors, and the country in which his wife now resides. Perhaps it was the belief that the nations which took part in the Helsinki Accords on human rights have a responsibility to take those commitments seriously.

Rather than ignore the preposterous charge of treason against Mr. Scharansky, we must discredit the charge and reveal it for what it represents. As Representative DANTE B. FASCELL stated in testimony last year—

No group of Soviet citizens are under more constant KGB surveillance than the Jewish activists. Scharansky used to walk around Moscow with a tail of anywhere from two to eight police shadows at a time. Hiring him to spy on the USSR would make as much sense as hiring a burlesque queen to infiltrate a nunnery.

In a most unusual statement, President Carter has put his credibility on the line in declaring that a Soviet citizen—Anatoli Scharansky—was not a U.S. intelligence agent.

While further revealing the nature of the charges against Mr. Scharansky, Mr. Carter's statement causes one to question the intent of the Soviet authorities. This action against Mr. Scharansky is another attempt to discredit the human rights concerns of the United States, and link these concerns to U.S. strategic interests vis-a-vis the Soviet Union. In addition, it is an attempt to discredit the legitimate desires of a people to be free. In the wake of this past weekend's tragedy in Israel, we are reminded of the continued curse of anti-Semitism in today's world.

It is through the suffering of people such as Mr. Scharansky that the implications of the Soviet atrocities become clear. We in the United States cannot shrink from the responsibility of our ideals, nor from our commitment to those who suffer as Mr. Scharansky.●

GENERAL LEAVE

Mr. DODD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

SENIOR CITIZEN FISHING RIGHTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. LEGGETT) is recognized for 5 minutes.

● Mr. LEGGETT. Mr. Speaker, I wish to bring to my colleagues' attention a new measure that will be of interest to many of their constituents, and will increase recreational opportunities for America's senior citizens.

I am, today, introducing legislation to amend the Dingell-Johnson Sport Fish Restoration Act to remove the financial burden of nonresident fishing licenses for individuals of 62 years of age or older. I believe such action is long overdue, and that it will meet with the approval of most Americans.

Under present law, an amount equivalent to the 10-percent tax collected on fishing tackle each year is authorized to be appropriated to the Federal aid in fish restoration fund. These funds—which amounted to approximately $25 million in 1977—are apportioned among the States as compared to all States. Apportioned funds are used to carry out fish restoration projects with the States on a 75–25 matching fund basis. Also, State laws now require nonresident individuals desiring to fish within the State's waters to purchase a nonresident fishing license. The cost of nonresident licenses varies from State to State, but is considerably more than a resident license and is often prohibitive for those on limited incomes. This amendment would encourage elimination of the State nonresident license requirement as it relates to any individual 62 years of age or older.

It would do so by denying benefits under the Dingell-Johnson Act to any State which does not extend reciprocal fishing privileges to nonresident individuals who have attained age 62 and hold valid fishing licenses issued by the State of their residency.

The 1975 National Survey of Hunting, Fishing, and Wildlife-Associated Recreation, prepared by the U.S. Fish and Wildlife Service, provides a basis for some interesting and pertinent conclusions regarding the ultimate effect of this legislation. Today, there are approximately 3,990,000 people in our country who enjoy fishing and are age 62 or older. In 1975, at least 454,000 of these anglers fished out-of-State an average of 25 days each. Furthermore, it can be estimated that a minimum of $1,785,000 was spent on fishing tackle by this segment of our population during that year.

Through adoption of this amendment to the act, the amount of revenue derived from fishing tackle sales would be expected to increase by freeing dollars previously spent for nonresident licenses. A greater interest in out-of-State fishing opportunities would subsequently increase travel and related expenditures for food and lodging. This stimulated interest in fishing should also contribute to an economic surge in rural America. What this means is that my amendment, in the long run, might well provide more revenues to the States from increased fishing activity than they presently accrue from nonresident license fees imposed on the over 62 age group.

Most importantly, this legislation will extend to our senior citizens the courtesy opportunity of fishing, under a single license requirement, anywhere in this Nation during their golden years. I urge you to join me in support of this amendment to the act.●

A GRIM ANNIVERSARY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. HARRIS) is recognized for 5 minutes.

● Mr. HARRIS. Mr. Speaker, we must take note that tomorrow we commemorate the 1-year anniversary of Anatoli Scharansky's arrest in Moscow. Scharansky, a man whose only crimes are a desire to emigrate to Israel to join his wife and a history of helping other Soviet Jews and non-Jews who have been the victims of government oppression, has been held incommunicado for a full year in Moscow's famous Lefortovo Prison while awaiting trial on espionage charges.

As a member of the International Committee for the Release of Anatoli Scharansky, I will continue to protest his imprisonment, the denied visits from his family, and the services of a lawyer of his choice. It is my deepest hope that we will never again have to commemorate such a grim anniversary. We will continue our efforts until we can celebrate his release.●

STATEMENT OF CHAIRMAN AL ULLMAN WITH RESPECT TO THE RULE TO BE REQUESTED ON H.R. 11518, RELATING TO THE PUBLIC DEBT LIMITATION

The SPEAKER pro tempore. Under a previous order of the House, the gentlemen from Oregon (Mr. ULLMAN) is recognized for 5 minutes.

● Mr. ULLMAN. Mr. Speaker, on March 14, 1978, the Committee on Ways and Means ordered favorably reported to the House H.R. 11518, a bill relating to the public debt limitation. The bill would provide that the existing public debt limitation shall be continued until July 31, 1978.

I take this occasion to advise my Democratic colleagues in the House as to the nature of the rule that I will request for consideration of H.R. 11518 on the floor of the House. The Committee on Ways and Means specifically instructed me to request the Committee on Rules to grant a closed rule for consideration of this bill, waiving all necessary points of order, providing 1 hour of general debate to be equally divided, and one motion to re-

commit with or without instructions. We intend to file the committee report on Friday, March 17, and request to be heard before the Committee on Rules as expeditiously as possible.●

LEGISLATION TO EXTEND AMTRAK AUTHORIZATIONS OF APPROPRIATIONS FOR AN ADDITIONAL FISCAL YEAR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from West Virginia (Mr. STAGGERS) is recognized for 5 minutes.

● Mr. STAGGERS. Mr. Speaker, I rise to introduce a bill to extend the Amtrak authorizations of appropriations for an additional fiscal year, during which time the Congress and the administration will be engaged in a full-scale reexamination of Amtrak, and its system of routes and trains, and also the kind and quality of rail passenger services that are needed by the American people in the various States and regions of our Nation.

I should say, Mr. Speaker, that we plan hearings very soon on this legislation, so that the review will move forward promptly and yet result in a careful plan that takes maximum advantage of the benefits of passenger train service. Our efforts and our goal must be toward the continuing development of a rational as well as balanced national transportation system, and that is one that must include a quality rail passenger service. The people of this Nation demand no less.

I want to emphasize how important Amtrak is to America, and I think most Members realize this. Amtrak can be improved, and it should be. Amtrak needs to be kept a strong nationwide system, providing frequent service in the heavily populated areas and at the same time tying together the regions of this Nation so that we will have alternative means of intercity transportation and so that the American public will have a choice in their means of travel.

Our total transportation system needs to be looked at as a whole, so that we will be prepared for future changes in energy supplies and so that we will have flexibility as well as energy efficiency.

The legislation I am introducing today provides adequate funds to keep the present system in place and operating properly until the studies that are already underway can be completed properly and the proposals for changes be adequately considered by the public and the Congress. In terms of our total national expenditures for transportation, the sums are not large.

We must guard against making sudden arbitrary changes and against the premature dismantling of the system before we are fully convinced that the proposed changes are the correct ones and in the national interest. Reestablishment of passenger service on discontinued lines can be far more expensive than continuing service during the duration of the review process.

This proposed legislation, which I am pleased to introduce and sponsor, would set deadlines for the various steps of the route-review process and at the same time insure that the American public will be able to participate and be heard during the decisionmaking process. The States will be involved, and the workingman, and those involved in energy considerations, and the Postal Service.

Mr. Speaker, I think we are on the right track with this legislation, and as I introduce this bill I would like to urge every Member to take an active interest in this legislation as we move into hearings and committee consideration.●

THE FARMER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. BRINKLEY) is recognized for 5 minutes.

Mr. BRINKLEY. Mr. Speaker, a close friend of mine, Mr. Will Oubre of La Grange, Ga., has sent me a thoughtful column, "The Bishop's Corner," by William R. Cannon. It has a message for us if we only take the time to read it. The man or woman who will not read is as disadvantaged as the man or woman who cannot read. We should learn from history rather than repeating mistakes of the past. The article follows:

[From the Wesleyan Christian Advocate, Feb. 16, 1978]

THE BISHOP'S CORNER

(By William R. Cannon)

When the President of the United States delivered the State of the Union message to Congress, many, many farmers stood on the outside of the Capitol, braving the snow. They greeted the President on his arrival. Their presence was a symbol to the nation of their need for relief.

The time of the year and the nature of the gathering was reminiscent of the gathering of the Russian peasants before the Winter Palace of the Tsar in Saint Petersburg on the eve of the Russian Revolution. At that time, the peasants were loyal and dutiful citizens of "Mother" Russia. They came to ask the Tsar for relief from the poverty and deprivation that they were experiencing. They spoke of him as "the little Father" (distinguishing him in their minds from God, who was to them "the Big Father"). They were loyal subjects, conscientious church people, a population that called itself Christian.

Now look at them; and look at Russia. What was once a vast land fed by its peasant population must now import wheat, grain, and some other farm products, when it really has the ability to raise such produce better than any other land. Collective farming for the state has never worked. Farmers are an independent lot; they want to stand on their own.

The tragedy was that the Tsar did not heed their appeal. They came as petitioners. He treated them as criminals. He sent his Cossack guards out against them, as if those peasants had been a pack of mad dogs.

Fortunately, this is not the mood of our President and Congress. In his State of the Union message, the President acknowledged the dire plight of the farmers, and he made clear his concern.

I am not expert in finances or agriculture, so I cannot assess properly and constructively the merit of the specific demands the farmers are making. I do not understand clearly what is meant by "full parity." Therefore, I cannot approve or disapprove what the farmers are praying for the Congress and the President to do in their behalf. It could be that other legislative and economic means are better for the country and for them: I cannot say.

But this I do know. I am for the farmers. It is cruel and heartless for our society to sit back and see so many of them lose their property because it costs them more to raise their crops and feed their cattle than the earnings they make on what they sell. This is disgraceful.

Why should most of the profits on food go to the middlemen—the packers, the processors, and the grocers—rather than to the farmers who grow the crops and raise the livestock? It should not. Each of these others should make a reasonable amount for their services and attain a fair percentage on whatever investment they have in the process, but the bulk of the profit should accrue to the farmer who owns the land, buys the seeds and plants them, and does all the work in the long ordeal of making the crops. To use an analogy from industry, the farmer is the owner of the capital, and it is the capital that achieves the result.

How utterly devastating and self-defeating for the farmer to go to all this trouble and find in the end that his expenses have far exceeded his profits. Like the fishermen in the New Testament, he has toiled all night and caught nothing. If this is not corrected and corrected immediately, not only, then, is the farmer in jeopardy, but our whole society will be weighed in the balance and found wanting. What is happening to the farmer could be the first step toward revolution. The scene before the Capitol in Washington could be the prelude to national disaster.

Politicians ought to read a little history. At the same time, they ought to reflect on what they read. The Greeks experimented with democracy, but finally they failed at their experiment. Brasidas, speaking to his army of Lacedaemonians, as Thucydides recounts the incident, boasted that the many are governed by the few, and the few exercise government through superiority and strength. These middlemen, through labor organizations, lobbying in Congress, and other means, preserve guarantees on the high profits they are making on foodstuffs. They all enjoy the benefits of minimum wages: but the poor farmer is his own employer; he is forced to pay others minimum wages, but he cannot afford to pay himself. When he has paid all the others he finds nothing left for himself and his family. He doesn't have money for his taxes. He is on the verge of losing everything.

And when he does, the nation will lose its food supply. The nation will suffer as did Russia. The farmer must have help.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky (Mr. BRECKINRIDGE) is recognized for 5 minutes.

● Mr. BRECKINRIDGE. Mr. Speaker, I regret that I was not able to be present to cast my votes on rollcall No. 87, House Concurrent Resolution 464, approving an amendment to the District of Columbia Charter relating to initiative and referendum and rollcall No. 88, House Concurrent Resolution 471, approving an amendment to the District of Columbia Charter relating to the recall of elected officials. I attempted to be paired on these two votes, but was informed that there was not a pair available. If I had been able to vote on these two resolutions I would have voted "no." ●

THE PLIGHT OF THE MARYASIN FAMILY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. BRODHEAD) is recognized for 30 minutes.

● Mr. BRODHEAD. Mr. Speaker, I am pleased to begin today a "vigil for freedom" that my office will be coordinating with the Union of Councils for Soviet Jewry on behalf of Soviet Jewish families and individuals who are being detained in the U.S.S.R. as a result of the Soviet Government's repressive emigration policies. The vigil for freedom is a continuation of "Helsinki's Unfulfilled Promise" and the "Orphans of the Exodus" projects that were coordinated over the past 2 years by Congressmen EILBERG and DRINAN.

Over the next several months, Members will be rising to address the House concerning cases of Soviet Jews whose only crime is a desire to be reunited with their families.

In 1975, 35 nations signed the Helsinki Final Act, which committed the 35 signatory nations to pursue policies consistent with basic principles of human rights, including the reunification of divided families whose members live in different countries, religious freedom, minority rights, and free travel between countries.

Unfortunately, the Soviet Government has regarded the human rights provisions of the final act as empty promises. This is most apparent now in the Soviet Union's restrictive emigration policies. In a clampdown on Jewish emigration, the Soviet Government has drasticaly reduced the numbers of Jewish citizens permitted to leave Russia from over 35,000 in 1973 to about 1,100 a month through 1976. The mebers of an informal group in the U.S.S.R. established to monitor the Government's compliance with the Helsinki accords have been officialy and unofficially harassed or, like Anatoli Shcharansky, imprisoned for months without the rights of other Soviet citizens. Individuals wishing to emigrate often face long waits before receiving their papers, as well as repeated refusals, firings from employment, disruption of mail and telephone service, surveillance and many other forms of intimidation.

We who take freedom from such harassment for granted must do all we can to change these practices. It is my hope that, as a result of this vigil for freedom, more Members become aware of the Soviet Union's blatant violations of the human rights provisions of the Helsinki Final Act and the emigration problems faced by Soviet Jews.

Today, I would like to bring to the Members' attention the case of Mr. and Mrs. Alexander Maryasin and their daughter Faina, who live in Riga, Latvian S.S.R. Since 1973, the Maryasins have sought repeatedly to join their oldest daughter in Israel. Repeatedly, they have been refused permission to do so. No reasons for the refusals have ever been given.

Apparently because of his application for emigration papers, Alexander Maryasin lost his executive post at a Riga manufacturing plant. Also, his younger daughter was expelled from the university she was attending. Since then, the family has been jobless and has been forced to sell its possessions merely to exist. Letters I have written to Soviet Party Secretary Brezhnev and to other Russian officials on behalf of the Maryasins have gone unanswered.

The Maryasins, along with thousands of other Soviet Jews, have lost everything because of their desire to live in peace and freedom. It is my hope that this vigil for freedom will strengthen our resolve to assist them.●

AMENDMENTS TO H.R. 7700

(Mr. HANLEY asked and was given permission to revise and extend his remarks and to include extraneous matter.)

Mr. HANLEY. Mr. Speaker, I send to the desk amendments to H.R. 7700 which I ask to be printed and lie on the desk to be taken up when H.R. 7700 is brought up under a rule.

These amendments reflect the terms of an agreement which the chairman of our committee, Mr. NIX, the chairman of our postal personnel and modernization subcommittee, Mr. WILSON, and I have reached with the White House on H.R. 7700.

I wish to make it clear that although the White House is not in accord with all of the provisions of these amendments, Mr. Stuart Eizenstat, who met with Mr. WILSON and me last Monday, has withdrawn administration objections to consideration of H.R. 7700 on the floor of the House of Representatives if these amendments are proposed as a committee substitute.

The principal changes made by the amendments are: First, to reduce the authorization for a public service appropriation from an additional $1.7 billion to an additional $800 million for a 3-year period; second, to provide that there will be no congressional veto over proposed postal increases; and third, to provide that the President will appoint the Chairman of the Board of Governors of the Postal Service and the Postmaster General for a term of 4 years.

MILITARY COPRODUCTION AGREEMENTS AND MANUFACTURING LICENSES ARRANGEMENTS

(Mr. HAMILTON asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. HAMILTON. Mr. Speaker, I would like to bring to the attention of my colleagues correspondence I have had with the Departments of Defense and State concerning U.S. agreements with foreign nations for the manufacturing abroad of American military equipment. Three types of arrangements exist for such overseas production of American-originated equipment.

First, the Department of Defense oversees and administers over 20 coproduction programs, which are supported or facilitated by the U.S. Government. These agreements are listed in exhibits A and B to the attached letter from Department of Defense.

Second, the Department of State's Office of Munitions Control approves manufacturing licensing agreements, in connection with coproduction agreements between American commercial firms and foreign commercial firms or governments. Over 80 such licensing agreements exists as the attached correspondence with Department of State indicates.

Third, the Department of State approves manufacturing license agreements not connected to coproduction.

In the period 1974–77, the Department of State approved the issuance of over 600 manufacturing licensing agreements. Since the 1950's there has been a total of over 2,500 manufacturing license agreements approved, only some 80 of which are connected with Government-sponsored coproduction programs. The rest are agreements concluded directly between American companies and foreign governments or firms.

I believe this information will be useful to Members of Congress and others who are interested in and concerned about conventional arms transfers in general and the transfer of U.S. technology in particular.

The correspondence follows:

COMMITTEE ON INTERNATIONAL RELATIONS,
November 1, 1977.

Hon. HAROLD BROWN,
Secretary of Defense, Department of Defense, Washington, D.C.

DEAR MR. SECRETARY: According to a General Accounting Office report entitled "Two Coproduction Programs—F-5E Aircraft in Taiwan and M-16 Rifle in the Philippines" (June 6, 1977) (ID 76084) approximately $10 billion in coproduction agreements have been signed since coproduction started.

I would appreciate a list of all coproduction agreements concluded by the United States, including the following information: countries with which the agreements have been made; amounts of the agreements; dates of acceptance; duration and status of implementation of the projects; whether or not these projects involve export of high U.S. technology; whether they are undertaken under government-to-government (FMS), commercial, or mixed FMS-commercial mechanisms; and what percentage of each project is financed by MAP and/or FMS Financing funds.

In addition, I would appreciate information on proposed and potential coproduction arrangements which are currently under discussion in the executive branch.

Your cooperation in this matter is very welcome.

Sincerely yours,

LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East.

DEFENSE SECURITY ASSISTANCE AGENCY AND DEPUTY ASSISTANT SECRETARY (SECURITY ASSISTANCE), OASD/ISA,
Washington, D.C., December 9, 1977.

In reply refer to I–12945/77

Hon. LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, Committee on International Relations, Washington, D.C.

DEAR MR. CHAIRMAN: This is in further reply to your letter to Secretary Brown of 1 November in regard to coproduction programs.

At Exhibits A and B are lists of coproduction agreements containing the information

requested in your letter. In putting together this information we have used the official definition of coproduction as set out in Department of Defense Directive 2000.8 of 23 January 1974, "International Coproduction Projects and Agreements Between the United States and Other Countries or International Organizations." This definition reads:

The term "coproduction" as used herein encompasses any program wherein the US Government, under the aegis of an international diplomatic level or Ministry of Defense-to-Department of Defense agreement, either directly through the FMS program, or indirectly through specific licensing arrangements by designated commercial firms, enables an eligible foreign government, international organization or designated commercial producer to acquire the "know-how" to manufacture or assemble, repair, maintain and operate, in whole or part, a specific weapon, communication or support system, or an individual military item.

We have separated the list into Exhibits A and B to separate unclassified from classified information. Exhibit B is classified "Confidential". Under "Acceptance Date" you will find the date of the execution of a Memorandum of Understanding (MOU) or other Government-to-Government agreement.

At Exhibit C is a list of "proposed and potential coproduction arrangements" which are presently being discussed or negotiated within the DOD.

We have confined Exhibits A and B to current programs. Information on past programs now completed would require an extensive search of retired files by the military departments and components of OSD. However, if you desire this information we will initiate such a search. We suggest that a cut-off date be stipulated to assist us in setting the parameters for this inquiry.

Sincerely,

H. M. FISH,
Lieutenant General, USAF.

POTENTIAL COPRODUCTION ARRANGEMENTS

COUNTRY AND ITEM

Norway: Floating Bridge.
Norway: M109G Howitzer.
Switzerland: Dragon Missile System.
United Kingdom: Roof sight for TOW missile system.
Iran: 2.75 Inch Rocket.
Canada. Helicopter Recovery Assist, Secure and Traverse (RAST) System (Codevelopment).
Japan: RIM-7E Seasparrow.
Japan: F-15.
Netherlands: M110E2 Howitzer.
Iran: 214-Series Helicopter*.
United Kingdom: Copperhead (Cannon Launched Guided Projectile).
FRG: MOD FLIR (Modular Forward Looking Infrared System).

*214-Series Helicopter coproduction has been in progress since 1975 between Bell Helicopter Company and the Government of Iran. However, a Memorandum of Understanding is being prepared for USG and Iranian Government signatures for the follow-on program.

NATO: Patriot Missile.
NATO: SEA GNAT (currently in codevelopment, coproduction to follow).

COMMITTEE ON INTERNATIONAL RELATIONS,
December 28, 1977.

Mr. WILLIAM B. ROBINSON,
Director, Office of Munitions Control, Bureau of Politico-Military Affairs, Department of State, Washington, D.C.

DEAR MR. ROBINSON: The Subcommittee on Europe and the Middle East would like your office to prepare a list of all manufacturing license agreements issued by the Office of Munitions Control for co-production programs

currently in progress and under consideration.

Specifically, we would like to know, for each agreement, the country involved, the American and foreign firms involved, the date of issuance of the license, the duration of the program, the status of implementation of the program, the level of technology involved, the costs of the arrangement, and, if the agreement covers a component or components of an item or system, the name of the item or system of which the licensed component or components are a part.

Furthermore, I would like to know roughly how many requests for manufacturing licenses have been received over the last four years (on an annual basis for fiscal years 1974 through 1977) and how many of these requests (including percentages) have been granted.

I realize that the number of such licenses may be very great and that this information may take time to compile, but I believe that this material will be of interest to the Subcommittee, as I do not know of any document presently available to the Subcommittee that contains any of this information.

I appreciate your consideration of this letter. My subcommittee staff can be reached at 225–3345 should any clarification be needed concerning the information we seek.

With best wishes for 1978.

Sincerely yours,

LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East.

DEPARTMENT OF STATE,
Washington, D.C. February 17, 1978.

Hon. LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, Committee on International Relations, House of Representatives.

DEAR MR. CHAIRMAN: I am pleased to reply to your letter of December 28 addressed to Mr. William B. Robinson, Director, Office of Munitions Control, asking for a list of manufacturing license agreements approved in connection with coproduction programs; and for the number and disposition of manufacturing license applications received on an annual basis for 1974 through 1977.

Enclosed is a list of the manufacturing license agreements you requested. As you know, these agreements are approved in furtherance of the security and foreign policy of the United States. The costs and other financial arrangements between the American corporation and the foreign entity are not a consideration in our decision making procedure. This information is therefore not made available to us and I am unable to provide it to you.

With respect to your request for the number of agreements received during the period 1974 through 1977, there follows data contained in the files of our Office of Munitions Control—

(A) 1974—157 requests; 129 approvals; 28 disapproved, withdrawn at request of applicant or returned to applicant without action for administrative cause;

(B) 1975—168 requests; 141 approvals; 27 disapproved, withdrawn or returned without action;

(C) 1976—234 requests; 201 approvals; 33 disapproved, withdrawn or returned without action;

(D) 1977—229 requests; 155 approvals; 33 under consideration; 41 disapproved, withdrawn or returned without action.

Sincerely,

DOUGLAS J. BENNET, Jr.,
Assistant Secretary for Congressional Relations.

THE PROPOSED SALE OF F-5E AIRCRAFT TO EGYPT

(Mr. HAMILTON asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. HAMILTON. Mr. Speaker, I would like to bring to the attention of my colleagues a memorandum prepared by the American Israel Public Affairs Committee and released in February 1978, and a response to that memorandum, which I requested from the Department of State on February 15, 1978.

The proposed sale of F-5E aircraft to Egypt will produce considerable debate and controversy in Congress. I believe that the following information will be useful to Members of Congress and other persons interested in this issue.

The memorandum and the State Department comments follow:

COMMITTEE ON
INTERNATIONAL RELATIONS,
February 15, 1978.

Hon. CYRUS R. VANCE,
Secretary of State, Department of State, Washington, D.C.

DEAR MR. SECRETARY: Attached is a memorandum prepared by the American Israeli Public Affairs Committee relating to the proposed sale of F-5E aircraft to Egypt.

I would like the Department of State to prepare a detailed response to this memorandum and I would hope that the response would be in unclassified form.

With best regards.

LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East.

AMERICAN ISRAEL PUBLIC
AFFAIRS COMMITTEE,
Washington, D.C., February 1978.

MEMORANDUM

F-5E'S TO EGYPT

The Administration has announced its intention to sell Northrop F-5E Tiger II fighter-bombers to Egypt. This sale represents a major shift in U.S. arms transfer policy toward Egypt. Since 1955 it has been U.S. policy to refrain from providing major offensive weapons to Egypt. Neither American national interest nor Egypt's real needs will be served by such a sale. Moreover, such a sale could have an adverse impact on the current Middle East peace negotiations.

THE AIRCRAFT

The F-5E is an offensive, not defensive, weapon. Northrop Corporation, the plane's manufacturer, describes the plane as having "excellent combat agility. Accurate fire control system air-to-air and air-to-ground. Capable of carrying and delivering wide variety of stores."

Designed for maximum maneuverability, the F-5E is still capable of speeds in excess of Mach 1.5. As an interceptor and ground attack bomber, the plane carries two AIM 9 Sidewinder missiles, two 20mm cannons, radar for air-to-air search and range tracking, and nearly 7000 pounds of mixed ordnance—five times the load of the MiG-21. Its combat radius is equal to the Soviet MiG-21 but it is equipped with more advanced electronics and greater tactical flexibility. Newer models of the F-5E are equipped with in-flight refueling capability and have been redesigned to carry the deadly television-guided Maverick air-to-ground missile.

The F-5E is used by U.S. armed services to simulate the Soviet-built MiG-21 in mock dogfights. In recent fly-offs between the F-5E and the more advanced F-14 and F-15, U.S. authorities found that the F-5E surpassed all expectations. As reported in U.S. News and World Report (January 9, 1978), "The supposedly inferior F-5Es have fought superior F-14s and F-15s to a deadly draw."

The F-5E in Egyptian hands would, therefore, constitute a serious challenge to Israel's air force. Quoting U.S. military analysts, Drew Middleton wrote in the New York Times (April 3, 1977), that Israel's "absolute air supremacy would probably be unattainable during a new war because modern aircraft like the F-5E would be able to get through the Israeli ground and air defenses and cause considerable damage."

EGYPTIAN MILITARY STRENGTH

According to the authoritative International Institute for Strategic Studies, since 1974 Egyptian defense expenditures totalled over $20 billion—30 per cent more than Israel's expenditures over the same period. Contrary to claims put forth by Egypt's President Sadat and echoed by some Administration officials, Egypt received extensive resupply of weapons from the Soviet Union following the 1973 war, which continued through 1977. Since the War, Egypt has received 42 MiG-23 Flogger B and D fighter-bombers; 1000 tanks, including 600 advanced T-62s; 15 SCUD and 6 Frog ground-to-ground missile launchers; and hundreds of armored personnel carriers, self-propelled guns and artillery pieces. (IISS, London Economist)

As evidence of the continued Soviet supply, the Washington Post reported on February 9, 1975, that "The Soviet Union has resumed arms shipments to Egypt despite President Anwar Sadat's repeated denials of this . . . the deliveries are evidently part of the existing contract for arms." Reuters, on June 3, 1977, confirmed that "the deliveries, some of them being routed through Syrian ports, consisted of spare parts and equipment that had been repaired in the Soviet Union."

On June 15, 1977, the London Economist's confidential Foreign Report revealed that "Sadat has kept his army in a continuous series of maneuvers for months—at the price of revealing that, contrary to his public complaints, his armed forces are fully equipped with spare parts and dispose of sufficient supplies to wage an all-out war for three to four weeks."

But beyond Egypt's supplies from the Soviet Union, Egypt has a multitude of suppliers from which to choose, while Israel can only look to the United States for advanced military equipment. In recent years, Egypt has taken delivery on 38 French-made Mirage III D and E fighter bombers (purchased by Saudi Arabia) and has ordered 44 advanced Mirage F-1's. In early 1977, France and Egypt announced plans to establish a Mirage F-1 plant in Egypt, as part of the "Arab Military Industrial Organization." Egypt's initial order is believed to be as high as 200 F-1's. The F-1 Mirage is an advanced multi-purpose fighter-attack plane, with long range combat/patrol capability. The plane is rated in the same class as the new U.S.-made F-16; Spain recently chose the French F-1 over the F-16 for use by its air force.

In addition, Egypt has expressed interest in purchasing 200 advanced Jaguar fighter-bombers and 200 Hawker-Siddeley Hawk multi-purpose strike/trainer jets from Great Britain. The Hawk deal is believed to be close to completion. The Jaguar sale has been held off, reportedly because the British government decided introduction of the Jaguar into the region would upset the military balance. This British degree of responsibility is apparently lacking in the Administration's calculations.

The Peoples' Republic of China has reportedly supplied Egypt with at least 30 engines for its MiG-21's.

Moreover, Egypt can also rely on other Arab states to provide additional aircraft, as they did during the 1973 Yom Kippur War. According to published accounts, prior to, and during, the war, Egypt received 40 Mirage III's from Libya, a squadron of Hunter jets from Iraq, Lightning jets from Kuwait, and three squadrons of Algerian fighter-bombers. According to intelligence sources, Egypt also received the assistance of an undisclosed number of Pakistani pilots and of 20 North Korean pilots who flew base defense missions.

U.S. officials have now confirmed reports that Egyptian pilots have trained on Saudi F-5Es, in clear violation of U.S. law, and it must be anticipated that in the event of renewed hostilities, the 110 Saudi F-5Es, or a large portion of them, could be transferred to Egypt.

REWARDING EGYPT

It has been argued that the sale of F-5Es to Egypt is necessary to show U.S. support for President Sadat's recent peace initiative. Besides the fact that U.S. consideration of the sale precedes Sadat's trip to Jerusalem, there is questionable logic in the proposition that Egypt's search for peace requires rewards of arms. If the peace talks succeed, the need for arms would diminish; if the talks fail, it would be unwise for the United States to have fueled a dangerous arms race.

Egypt does not require the F-5E to demonstrate the value of its recent peace initiative or its gestures towards the United States. In the last two years, the United States has sold Egypt 20 C-130 transports, 12 Firebee aerial reconnaissance drones, six long-range photo-reconnaissance camera systems, and trucks and jeeps worth aproximately $350 million. In September 1977 the Administration agreed to provide Egypt with U.S. technology, expertise and licenses for the refurbishing of 200 Egyptian MiG-21 jets.

Egypt has received other significant benefits from the United States. As the single largest annual recipient of U.S. economic assistance in the world, Egypt has received more than $4 billion in aid since the Yom Kippur War. The U.S. Government has also been instrumental in encouraging millions of dollars in American investment and expanding purchases of Egyptian oil. In addition, the United States was instrumental in arranging the Sinai II Agreement through which Egypt received U.S. assistance in clearing the Suez Canal; the return of the Abu Rudeis oil fields with their $350 million annual output; and an early warning system in the Giddi Pass.

WHO THREATENS EGYPT?

Egypt has no genuine military need for the F-5Es. Egypt is at present in the midst of peace negotiations with Israel. In the event of a breakdown of talks, however, it must be emphasized that Israel has no military objective to gain in any attack against Egypt, and in the 30-year history of hostilities Israel never initiated any conflict.

Last year's hostilities between Egypt and Libya indicated clearly Egypt's ability to deal effectively with its unpredictable western neighbor. The fighting underscored Libya's inability to absorb the great quantities of arms the Soviet Union has lavished on Qaddafi. It must be noted that the Egyptian armed forces outnumber the Libyan forces by a ratio of 10:1. The small Libyan population precludes any substantive expansion of Libya's armed forces.

Furthermore, the mercurial nature of inter-Arab relations and continuing Pan-Arab antipathy for Israel serve as a reminder of the possibility of renewed Egyptian-Libyan relations and military cooperation in the event of Egyptian-Israeli hostilities. It is to be expected that much of Libya's vast arms arsenal would be placed at Egypt's disposal.

Administration officials have suggested that Egypt requires F-5Es to counter Soviet expansion in Ethiopia and northeast Africa.

It must be questioned, however, whether the United States seeks to encourage an expanded Egyptian military posture in the current conflict. Such an expanded role would undermine the basic U.S. goals of promoting regional stability and peace. In addition, unless Egypt intends to transfer the F-5Es to another country (in violation of U.S. law), the Horn of Africa conflict is well beyond the range of the F-5E: Eritrea is 500 miles from Egyptian territory; Ogaden is over 1000 miles away. Strategic Israeli targets, however, are easily within the combat radius of F-5Es.

THE SALE IS CONTRARY TO U.S. INTERESTS

The sale of F-5E fighter-bombers to Egypt contradicts established U.S. policies on regional military balance, regional interest, and arms control. The primary regional interest of the United States is, of course, the attainment of a lasting Arab-Israel peace. With the initiation of an offensive arms supply relationship between the United States and Egypt, the Arab states are likely to feel more confident about military "solutions" and be less receptive to negotiation and compromise. As for Israel, the sale of the F-5Es to Egypt will heighten Israeli insecurity during the current peace negotiations.

In the event of an Israeli-Egyptian conflict, the United States might find itself weighing requests from both Egypt and Israel for emergency resupply. American experiences in the Turkish-Greek wars and the Indian-Pakistani hostilities have demonstrated the no-win position inherent in arming both sides.

President Sadat's vulnerable position within the Arab world as well as his weak health are constant reminders of the unstable leadership and patterns of succession in Egypt. Egypt's economic needs today argue against the sale of the F-5E. Instead, Egypt's needs dictate development assistance—expenditures for tractors, not tanks; buses, not fighter-bombers. The Egyptian people suffer from terrible poverty and deteriorating social services. The efforts and resources of their government—as well as our own—should be directed toward improving their plight, not toward preparing for another war.

ARMS SHIPMENTS TO EGYPT SINCE THE YOM KIPPUR WAR

Despite claims to the contrary, Egypt has received large quantities of Soviet and French arms since the 1973 Yom Kippur War. Much of this has been replacement equipment for material lost in the fighting. New weapons systems not previously seen in Egypt have also been delivered.

The following figures are based upon the intelligence estimates of the authoritative International Institute of Strategic Studies, London, U.K. Known battlefield losses have also been taken into account.

Since the 1973 war, Egypt has received approximately:

650 T-62 main battle tanks (USSR).
400 T-54/55 medium battle tanks (USSR).
1,200 BTR-40 -50P, -60P and -152 armored personnel carriers (USSR).
75 SU-100 and JSU-152 self-propelled guns (USSR).
650 76mm, 100mm, 122mm, 130mm, 152mm and 180mm guns and howitzers (USSR).
24 SCUD ballistic missile launchers (USSR).
100 MiG-21 fighter/bombers (USSR).
25 Su-20 fighter/bombers (USSR).
24 MiG-23 fighter/bombers (USSR).
18 MiG-27 ground attack fighters (USSR).
38 Mirage IIIE fighter/bombers (France).
44 Mirage F-1 fighter/bombers (France).
4 C-130 transports (US).
2 EC-13OH Patrol planes (US).
Atoll air-to-air missiles (USSR).
30 SA-6 surface-to-air missile batteries (USSR).
10 Sea King helicopters (UK).
30 Commando helicopters (France).
42 Gazelle helicopters (France).
Anti-aircraft guns (USSR).
30 Otomat SSM boats [on order] (France).
Gun radars (USSR).
Early warning radars (USSR).
Anti-tank missiles (USSR and France).
Infantry equipment (USSR).
Night-fighting equipment (USSR).

Egypt received spare parts from the USSR through 1976. In addition, in early 1977, Egypt received 50 reconditioned MiG-21s from the USSR. Egypt is believed to have sufficient spare parts stockpiled to meet its needs for about the next two years. Syria, Libya and Iraq are all supplied by the USSR. Given past military cooperation between these states, many analysts believe that Egypt may be able to acquire necessary spare parts from these countries, plus possibly from Eastern Europe or other nations which use Soviet weapons. Instances of extensive covert military cooperation have occurred even during times of public disagreement between the Arab governments involved.

DEPARTMENT OF STATE,
Washington, D.C.

Hon. LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, Committee on International Relations, House of Representatives.

DEAR MR. HAMILTON: I am pleased to respond to your letter of February 15 addressed to Secretary Vance under cover of which you forwarded a memorandum prepared by the American Israeli Public Affairs Committee.

The referenced memorandum raised points relative to the proposed sale of F-5 aircraft to Egypt. Under cover of this letter, I am forwarding the Department's response to the memorandum.

Sincerely,

DOUGLAS J. BENNET, Jr.,
Assistant Secretary for Congressional Relations.

COMMENTS ON AIPAC'S MEMORANDUM RE PROPOSED SALE OF F-5 AIRCRAFT TO EGYPT

Response to a Request of Congressman Hamilton, Chairman, Subcommittee on Europe and the Middle East, Committee on International Relations

THE AIRCRAFT

AIPAC Memorandum

"The F-5E is an offensive, not defensive, weapon . . ."

Department of State Comments

Most modern fighter aircraft have both an offensive and a defensive capability. However, the design of a specific aircraft generally is dictated by its primary mission; the F-5 to be sold to Egypt has primarily a defensive role. These aircraft will not have an in-flight refueling capability, nor will they be configured to accept guided munitions such as "Maverick". Armed with two 20mm cannons and two AIM-9J ("Sidewinder") fair weather air-to-air missiles, the aircraft will be optimally suited for an air defense role. The plane's limited range, fire control system, maneuvering capabilities, and short-range radar are all designed to optimal use in close-in air-to-air combat. When configured to carry an external load of "iron bombs", the basic air-to-ground ordnance which could be used by this aircraft, performance capabilities are reduced. With a maximum load, combat radius would be limited to approximately 255 nautical miles, the aircraft could not be flown supersonically, and its manueverability would be severely restricted.

Operating as an air defense interceptor, the F-5 is less capable in terms of speed, radar detection ranges, and variety of air-to-air munitions than the fighter aircraft in the inventories of several of Egypt's neighbors. However, when operating in a ground-controlled-intercept mode—i.e., essentially when operating in Egyptian airspace—this plane has a good capability against intruders loaded with bombs. Without external radar control, the F-5 is a fair weather, daytime fighter; it carriers no all-weather missiles and has limited radar detection range.

The implication that the F-5 is the equal of the F-14 and F-15 in air combat is misleading. Both of the latter have vastly superior radar detection capabilities and all-weather missiles with ranges greatly in excess of counterpart capabilities of the F-5. Furthermore, both the F-14 and F-15 have a marked speed advantage over the F-5 and therefore could either overtake or evade the latter. Should an F-14 or F-15 become engaged in a close-in "dog fight" with the F-5, the odds of defeating the F-5 would be reduced but still strongly in favor of the more modern aircraft. Either of the more advanced aircraft would be able to take advantage of its inbuilt speed.

The statement that ". . . the F-5E would be able to get through the Israeli ground and air defenses and cause considerable damage . . ." disregards the capabilities of the Israeli air defense network, the F-5 mission profile, and the combat ability of Israeli pilots—among the most proficient in the world.

EGYPTIAN MILITARY STRENGTH

AIPAC memorandum

". . . Egypt received extensive resupply of weapons from the Soviet Union following the 1973 war which continued through 1977 . . ."

Department of State comments

It is impossible to reconcile the data attributed to the International Institute of Strategic Studies (IISS) and our best information concerning Soviet resupply of Egypt. We do not know if the IISS included equipment received immediately prior to or during the war; nor do we know whether the term "Soviet" includes resupply from other Warsaw Pact countries.

The Egyptian Government has acknowledged that a military supply relationship existed with the Soviet Union for some time following the October 1973 war. Based on our evaluation of all information available to us, we have concluded that virtually no new Soviet equipment has arrived in Egypt since mid-1975, although there have been a few deliveries of items being returned from the USSR after refurbishing.

IISS data included by AIPAC were compared with other information available to our government. We found a general discrepancy in that the IISS report shows higher Egyptian equipment inventories than we believe to be the case. For example, the AIPAC tabulation shows that Egypt received 400 T-54/55 medium battle tanks; USG sources indicate they received none during the post-October 1973 period. AIPAC contends that Egypt has received six times as many APC's as the USG believes likely, and more than three times the number of artillery pieces. Conversely, we believe that the Egyptians received two more MIG-23's than shown by AIPAC. The U.S. sold Egypt six C-130 aircraft (AIPAC shows four), but no EC-130H (sic) aircraft. Our best information indicates that no MIG-27 aircraft have been deployed outside the Warsaw Pact countries.

AIPAC Memorandum

". . . his (Sadat's) armed forces are fully equipped with spare parts and dispose of sufficient supplies to wage an allout war for three to four weeks. . . ."

Department of State Comment

Despite substantial reequipment of the Egyptian armed forces in the two years after the October 1973 war, Egyptian inventories

are still not up to pre-war levels. The army is in relatively better shape than the air force, although not all armored vehicles have been replaced. The air force's inventory is about 20 percent below its 1973 peak, and Egyptian air defense capabilities are well below 1973 levels.

High intensity combat operations reminiscent of those experienced in previous rounds of Arab-Israeli fighting quickly would deplete Egyptian stockpiles and severely strain logistics and maintenance systems. Knowledgeable observers frequently have reported that the material condition of Egyptian mechanized equipment is very poor, with a high level of inoperative military vehicles of all kinds. To stretch their supply of spare parts, the Egyptian armed forces have altered training practices to reduce wear and tear on equipment during maneuvers, have extended the periods between major overhauls of equipment, have resorted to extensive "cannibalization" to keep parts of equipment inventories operating, and otherwise have accepted implicit degradation of their combat capabilities. The flying rate within the air force has been severely curtailed.

AIPAC Memorandum

". . . Egypt has a multitude of suppliers from which to choose, while Israel can only look to the United States for advanced military equipment. . . ."

Department of State Comment

The assertion that Israel can look only to the United States for advanced military equipment is largely true. Nonetheless, some sales have been made, i.e., the 1974 Israeli purchase of three British submarines (these were delivered in 1977).

Subsequent to the Soviet-imposed embargo of shipments on military equipment to Egypt, the Sadat government has sought alternate sources of supply, principally in Western Europe. Unlike Israel, Egypt does not possess an indigenous armaments industry capable of producing sophisticated fighter aircraft. The Israeli-manufactured "Kfir" fighter is superior to the F–5 in terms of speed, range and payload capabilities.

Public sources reveal that the Government of Egypt recently has signed contracts with British firms for helicopters, antitank missiles, and perhaps fast patrol boats. Although there have been extended negotiations between France and Egypt relative to the purchase of Mirage F–1 aircraft, contracts have not been concluded in this regard. Furthermore, we are informed that there are no plans at present for Egyptian purchase of this plane. The Egyptian government's interest in purchasing military items from Italy, Spain, various Warsaw Pact nations, China and West Germany has met with only limited success.

AIPAC Memorandum

"The People's Republic of China has reportedly supplied Egypt with at least 30 engines for its MIG–21's."

Department of State Comment

The engines supplied by China were for Egypt's older MIG–17 aircraft.

REWARDING EGYPT

AIPAC Memorandum

". . . the U.S. has sold Egypt . . . 12 Firebee Aerial Reconnaissance Drones . . . and trucks and jeeps costing approximately $350 million. In September 1977 the Administration agreed to provide Egypt with U.S. technology, expertise and licenses for the refurbishing of 200 Egyptian MIG–21 jets . . ."

Department of State Comments

Although the Administration in October 1977 informed the Egyptian Government of our willingness to approve of the sale of aerial reconnaissance drones, the Egyptians have not yet made a decision on this matter. The statement that the U.S. has sold approximately $350 million worth of trucks and jeeps to Egypt presumably refers to a commercial arrangement for assembly of American Motors (AMC) civilian vehicles; in addition to their civilian uses, such vehicles could be used by the military, and the Egyptian armed forces do use some of these jeeps. The Sadat government requested USG assistance in developing a program designed to arrest deterioration of Egypt's MIG–21 fleet. We sought to be responsive by sanctioning participation by General Electric and Lockheed in developing such a program in conjunction with firms in third countries. We understand that the Egyptian Government has decided not to accept the proposals put forward by the consortia of which the American firms were a part. Consequently, the question of State Department approval of required licenses for technical services contracts has not arisen.

AIPAC Memorandum

". . . Egypt has received more than $4 billion in (U.S.) aid since the Yom Kippur War."

State Department Comment

In fiscal years 1974–1977 (i.e., since the Yom Kippur war), the USG has extended to Egypt approximately $2.3 billion in economic assistance. During fiscal year 1978, the figure will be $950 million. The total through the current fiscal year will be approximately $3.2 billion in commitments, including PL–480 programs. Disbursements to date have been substantially lower, since major amounts of this aid are for project assistance with long lead times.

WHO THREATENS EGYPT?

AIPAC Memorandum

". . . Egypt has no genuine military need for the F–5E's . . . Last year's hostilities between Egypt and Libya indicate clearly Egypt's ability to deal effectively with its unpredictable western neighbor . . . It is to be expected that much of Libya's vast arms arsenal would be placed at Egypt's disposal (in event of another Arab-Israeli war) . . ."

Department of State Comments

Egypt's security is affected directly by events in nearby African countries. Libyan and/or Soviet supported threats to friendly regimes are of particular concern. Current developments in the Chad are illustrative. Because the Egyptian economy is intrinsically dependent on the unimpeded flow of the Nile waters, any Egyptian government must be particularly sensitive to developments in coriparian states—an important factor in Egypt's present concern with the situation in the Horn.

The 1977 hostilities with Libya served to point up the continuing need for maintenance of a credible Egyptian military force. The fighting with Libya was too short in duration for observers to draw any firm conclusions; this was especially the case since Libya did not commit a large part of its armed forces to combat. It is also to be noted that Libya continues to increase its force levels.

It is true that several of the Arab states not adjacent to Israel nominally committed forces to assist Egypt during the October 1973 war. However, none of these forces arrived in time to be effectively used in combat (even though that war was longer than the two previous military conflicts between Israel and her Arab neighbors). Given the long-standing differences between Libya and Egypt, it is questionable that Libyan forces or equipment would be put at Egypt's disposal in time of war. Any transfer prior to an outbreak of hostilities would provide Israel with significant advance warning.

THE SALE IS CONTRARY TO U.S. INTERESTS

AIPAC Memorandum

". . . The sale of F–5E fighter bombers to Egypt contradicts established U.S. policies on regional balance . . . President Sadat's vulnerable position within the Arab world as well as his weak health are constant reminders of the unstable leadership and patterns of succession in Egypt. . ."

Department of State Comments

The proposed sale of 50 F–5E's to Egypt will not alter the basic military balance in the region. There is a consensus among military and intelligence analysts that the Israeli military capability will remain superior to that not only of Egypt but of the combined potential Arab forces for an indefinite period of time.

Although President Sadat has had some health problems, he has shown himself capable of leading his country through a difficult and prolonged period. Sadat has been in power since September 1970. Since 1952, Egypt has had only two presidents—a pattern of remarkable longevity in terms of leadership. The succession by Sadat following Nasser's death took place smoothly. President Sadat's present term of office expires in 1982.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. EVANS of Delaware) to revise and extend their remarks and include extraneous material:)

Mr. STEERS, for 5 minutes, today.
Mr. GRADISON, for 5 minutes, today.
Mr. KEMP, for 5 minutes, today.
Mr. STEIGER, for 10 minutes, today.
Mr. PURSELL, for 5 minutes, today.
Mr. EVANS of Delaware, for 5 minutes, today.

(The following Members (at the request of Mr. DODD) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. ADDABBO, for 30 minutes, today.
Mr. DODD, for 60 minutes, today.
Mr. BINGHAM, for 15 minutes, today.
Mr. LEGGETT, for 5 minutes, today.
Mr. HARRIS, for 5 minutes, today.
Mr. ULLMAN, for 5 minutes, today.
Mr. STAGGERS, for 5 minutes, today.
Mr. BRINKLEY, for 5 minutes, today.
Ms. HOLTZMAN, for 10 minutes, today.
Mr. BRECKINRIDGE, for 5 minutes, today.
Mr. BRODHEAD, for 30 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. MARLENEE, to revise and extend his remarks and to follow the remarks of Mr. RONCALIO.

Mr. HAMILTON, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,068.

Mr. HAMILTON, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $999.

(The following Members (at the request of Mr. EVANS of Delaware) and to include extraneous material:)

Mr. STEERS.
Mr. MICHEL in two instances.
Mr. DERWINSKI in two instances.

Mr. DORNAN.
Mr. MARLENEE.
Mr. MOORE.
Mr. LAGOMARSINO in two instances.
Mr. WAMPLER.
Mr. YOUNG of Florida.
Mr. EVANS of Delaware.
Mr. GILMAN in two instances.
(The following Members (at the request of Mr. DODD) and to include extraneous matter:)
Mr. EDGAR in four instances.
Mr. MAZZOLI.
Mr. YOUNG of Missouri.
Mr. BARNARD.
Mr. STUMP.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. DRINAN.
Mr. EILBERG in three instances.
Mr. WIRTH.
Mr. FISHER in two instances.
Mr. VANIK.
Mr. MCDONALD in two instances.
Mr. PEASE.
Mr. YATES.
Mr. HAMILTON.
Mr. PATTISON of New York in two instances.
Mr. STARK.
Mrs. SCHROEDER.
Mr. CONYERS.
Mr. WALGREN.
Mr. SANTINI.

ADJOURNMENT

Mr. DODD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 53 minutes p.m. under its previous order, the House adjourned until tomorrow, Wednesday, March 15, 1978, at 1 o'clock p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3553. A letter from the Acting Director, Office of Management and Budget, Executive Office of the President, transmitting proposed revisions to the budgets for fiscal years 1978 and 1979, pursuant to section 201(g) of the Budget and Accounting Act, 1921, as amended (88 Stat. 323) (H. Doc. No. 95–303); to the Committee on Appropriations and ordered to be printed.

3554. A letter from the Comptroller General of the United States, transmitting his review of the deferrals and revised deferrals of budget authority contained in the message from the President dated February 23, 1978 (H. Doc. No. 95–294), pursuant to section 1014 (b) and (c) of Public Law 93–344 (H. Doc. No. 95–304); to the Committee on Appropriations and ordered to be printed.

3555. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting notice of the location, nature, and estimated cost of various construction projects proposed to be undertaken by the Army National Guard and the Army Reserve, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

3556. A letter from the Comptroller General of the United States, transmitting his approval of the conceptual design for a financial management system for the government of the District of Columbia, pursuant to section 2(e)(4) of Public Law 94–399; to the Committee on the District of Columbia.

3557. A letter from the Chairman, National Labor Relations Board, transmitting the Board's 42d Annual Report, covering fiscal year 1977, pursuant to section 3(c) of the Labor Management Relations Act of 1947, as amended; to the Committee on Education and Labor.

3558. A letter from the Freedom of Information Officer, Pennsylvania Avenue Development Corporation, transmitting a report on the Corporation's activities under the Freedom of Information Act during calendar year 1977, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

3559. A letter from the Secretary, Railroad Retirement Board, transmitting a report on the Board's activities under the Freedom of Information Act during calendar year 1977, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

3560. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on political contributions made by Ambassador-designate Roger Kirk, and by members of his family, pursuant to section 6 of Public Law 93–126; to the Committee on International Relations.

3561. A letter from the Director, Defense Security Assistance Agency, transmitting the quarterly report on foreign military sales as of December 31, 1977, pursuant to section 36(a) of the Arms Export Control Act; to the Committee on International Relations.

3562. A letter from the Director, Defense Security Assistance Agency, transmitting the quarterly report on foreign military sales letters of offer as of December 31, 1977, pursuant to section 36(a) of the Arms Export Control Act; to the Committee on International Relations.

3563. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Canada (transmittal No. 78–16), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

3564. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense equipment to Germany (transmittal No. 78–18), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

3565. A letter from the Secretary of Transportation, transmitting a report covering calendar year 1977 on utilization of authority to designate and rent inadequate quarters, lease family housing and hire quarters at or near Coast Guard installations, pursuant to 14 U.S.C. 475(f); to the Committee on Merchant Marine and Fisheries.

3566. A letter from the Administrator of General Services, transmitting a prospectus proposing a succeeding lease for space presently occupied at 1201 E Street, NW., Washington, D.C., pursuant to section 7(a) of the Public Buildings Act of 1959, as amended; to the Committee on Public Works and Transportation.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. PERKINS: Committee of conference. Conference report on H.R. 5383 (Rept. No. 95–950). Ordered to be printed.

Mr. PERKINS: Committee on Education and Labor. H.R. 11274. A bill to amend title IV of the Higher Education Act of 1965 to increase the availability of assistance to middle-income students and to amend section 1208 of such act; with amendment (Rept. No. 95–951). Referred to the Committee of the Whole House on the State of the Union.

Mr. MOAKLEY: Committee on Rules. House Resolution 1074. Resolution providing for the consideration of H.R. 9518. A bill to amend the Shipping Act, 1916, to provide for a 3-year period, to reach a permanent solution of the rebating practices in the U.S. foreign trade. (Rept. No. 95–952). Referred to the House Calendar.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 3787. A bill to direct the Secretary of the Interior to purchase and hold certain lands in trust for the Zuni Indian Tribe of New Mexico; to confer jurisdiction on the Court of Claims with respect to land claims of such tribe; and to authorize such tribe to purchase and exchange lands in the States of New Mexico and Arizona; with amendment (Rept. No. 95–953). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 8099. A bill relating to the settlement between the United States and the Ak-Chin Indian community of certain water right claims of such community against the United States; with amendment (Rept. No. 95–954). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. Report on the effectiveness of the export promotion policies and programs of the Departments of Commerce and State; followup report (Rept. No. 95–955). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HARRIS: Committee on the Judiciary. H.R. 1751. A bill for the relief of Lucy Davao Jara Graham (Rept. No. 95–956). Referred to the Committee of the Whole House.

Mr. EILBERG: Committee on the Judiciary. H.R. 8192. A bill for the relief of Andrée McGiffin and Jean-Manuel Henry; with amendment (Rept. No. 95–957). Referred to the Committee of the Whole House.

Mr. EILBERG: Committee on the Judiciary. S. 833. An act for the relief of Ah Young Cho Kwak (Rept. No. 95–958). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ULLMAN:

H.R. 11518. A bill to extend the existing temporary debt limit; to the Committee on Ways and Means.

By Mr. AKAKA (for himself, Mr. DRINAN, Mrs. MEYNER, Mr. HAWKINS, Mr. BEARD of Rhode Island, Mr. NOLAN, Mr. MIKVA, Mr. ADDABBO, Mr. JEFFORDS, Mr. ST GERMAIN, Mr. PEPPER, Mr. RODINO, Mr. MITCHELL of Maryland, and Mr. STOKES):

H.R. 11519. A bill to amend the Education of the Handicapped Act; to the Committee on Education and Labor.

By Mr. AKAKA (for himself, Mr. MOAKLEY, Mr. LENT, Mr. WON PAT, Mr. BALDUS, Mr. RICHMOND, Mr. CLAY, Mr. BRODHEAD, Mr. EILBERG, Mr. D'AMOURS, Mr. KILDEE, Mr. HARRINGTON, Mr. BIAGGI, and Mr. ZEFERETTI):

H.R. 11520. A bill to amend the Education of the Handicapped Act; to the Committee on Education and Labor.

By Mr. ALLEN:

H.R. 11521. A bill to establish a National Contest for the Invention and Development of an Efficient and Cost-effective Electric

Energy Storage Facility, capable of storing such energy in huge quantities and over reasonable and needed periods of time, for future use, said contest to be conducted and supervised by the Tennessee Valley Authority, the winner to be awarded from the U.S. Treasury a $10 million prize, and for other purposes; jointly, to the Committees on Public Works and Transportation, and Science and Technology.

By Mr. BENNETT:

H.R. 11522. A bill to amend the act of June 27, 1960 (74 Stat. 220), as amended by the act of May 24, 1974 (88 Stat. 174, 176; 16 U.S.C. 469), relating to the preservation of historical and archeological data; to authorize appropriations under section 3(b) and 4(a) for fiscal years 1979 through 1983, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. PHILLIP BURTON (for himself, and Mr. BEARD of Rhode Island):

H.R. 11523. A bill to amend the Fair Labor Standards Act of 1938 to provide that blind persons may not be employed at less than the applicable minimum wage under that act; to the Committee on Education and Labor.

By Mr. ERTEL:

H.R. 11524. A bill to improve the criminal justice system by providing assistance to States, counties, and local governments for the construction, acquisition, and renovation of prisons; to the Committee on the Judiciary.

By Mr. FISHER:

H.R. 11525. A bill to amend title 4 of the United States Code with respect to the authority of States or political subdivisions thereof to impose taxes at civil airports owned by the United States; to the Committee on the Judiciary.

By Mr. FISHER (for himself and Mr. HARRIS):

H.R. 11526. A bill to change the name of the Dulles International Airport to the Washington International Airport, Dulles Terminal; to the Committee on Public Works and Transportation.

By Mr. HANNAFORD (for himself, Mr. PEPPER, Mr. ROYBAL, and Mr. BIAGGI):

H.R. 11527. A bill to amend the Older Americans Act of 1965 to provide that certain municipalities shall upon request be designated as planning and service areas, and for other purposes to the Committee on Education and Labor.

By Mr. KREBS (for himself and Mr. SISK):

H.R. 11528. A bill to authorize the Secretary of the Army to construct improvements on Redbank and Fancher Creeks, Calif., to the Committee on Public Works and Transportation.

By Mr. LEGGETT (for himself, Mr. MURPHY of New York, Mr. BIAGGI, and Ms. MIKULSKI):

H.R. 11529. A bill to amend the Dingell-Johnson Sport Fish Restoration Act in order to deny benefits under that act to any State which does not extend certain reciprocal fishing privileges to nonresident individuals who have attained age 62 and hold valid fishing licenses issued by the State of their residency; to the Committee on Merchant Marine and Fisheries.

By Mr. MONTGOMERY (for himself, Mr. ROBERTS, and Mr. HAMMERSCHMIDT):

H.R. 11530. A bill to amend title 38, United States Code, to increase the rate of compensation payable to veterans who have lost three extremities as the result of a service-connected disability; to the Committee on Veterans' Affairs.

H.R. 11531. A bill to amend title 38, United States Code, to increase the rates of dependency and indemnity compensation for parents, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. MOORHEAD of Pennsylvania (for himself, Mr. ASHLEY, Mr. BARNARD, Mr. BLANCHARD, Mr. FAUNTROY, Mr. LAFALCE, Mr. LUNDINE, Mr. PATTISON of New York, and Mr. VENTO):

H.R. 11532. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to provide that disability insurance benefits and the medicare program shall be financed from general revenues (pursuant to annual authorizations) rather than through the imposition of employment and self-employment taxes as at present, and to adjust the rates of such taxes (for purposes of financing the OASI program) accordingly; to the Committee on Ways and Means.

By Mr. PURSELL (for himself, Mr. BRADEMAS, Mr. QUIE, Mrs. CHISHOLM, Mr. PRESSLER, and Mr. KILDEE):

H.R. 11533. A bill to amend the Elementary and Secondary Education Act of 1965 to establish programs for special assistance to gifted and talented children, and for other purposes; to the Committee on Education and Labor.

By Mr. RISENHOOVER:

H.R. 11534. A bill to amend the Bank Holding Company Act of 1956 to give share holders the right to use cumulative voting in the elections of directors of bank holding companies; to the Committee on Banking, Finance and Urban Affairs.

By Mr. SEBELIUS (for himself, Mr. JENRETTE, Mr. SPENCE, Mr. HOLLAND, Mr. DAVIS, Mr. PRESSLER, Mr. MARLENEE, and Mr. JOHNSON of California):

H.R. 11535. A bill to provide wheat, feed grain, cotton and soybean producers the opportunity to receive parity prices for the 1978 crops; to the Committee on Agriculture.

By Mr. SOLARZ:

H.R. 11536. A bill to direct the National Institute of Education to develop curriculum concerning the destruction of the European Jewish community by Nazi Germany prior to and during World War II, for dissemination to elementary and secondary schools; to the Committee on Education and Labor.

H.R. 11537. A bill to amend title XVIII of the Social Security Act to include dental care, eye care, dentures, eyeglasses, and hearing aids among the benefits provided by the insurance program established by part B of such title, and for other purposes; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. STEED:

H.R. 11538. A bill to establish an Associate Administrator for Women's Business Enterprise within the Small Business Administration; to the Committee on Small Business.

By Mr. STEERS (for himself, Mr. LUKEN, and Mr. PEASE):

H.R. 11539. A bill to provide mandatory social security coverage for Members of Congress; to the Committee on Ways and Means.

By Mr. STOKES:

H.R. 11540. A bill to provide a special program for financial assistance to national community-based organizations of demonstrated effectiveness, in order to provide 1 million new jobs and job training opportunities, and for other purposes; jointly to the Committees on Education and Labor, and Ways and Means.

By Mr. BRADEMAS:

H.R. 11541. A bill to amend the National Foundation on the Arts and Humanities Act of 1965 to authorize the purchase and display of works of art, and for other purposes; to the Committee on Education and Labor.

By Mr. EVANS of Delaware:

H.R. 11542. A bill to continue the existing income tax treatment of nonqualified deferred compensation plans established by State and local governments and other employers; to the Committee on Ways and Means.

By Mr. HAMMERSCHMIDT:

H.R. 11543. A bill to amend title 38, United States Code, to provide that the disability compensation paid to a veteran with a service-connected disability rated 30 percent or more but less than total shall be increased by 10 percent when the veteran attains age 65; to the Committee on Veterans' Affairs.

H.R. 11544. A bill to amend title 38, United States Code, to increase the rates of vocational rehabilitation, educational assistance, and special training allowance paid to eligible veterans and persons, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. POAGE:

H.R. 11545. A bill to modify the method of determining quantitative limitations on the importation of cretain articles of meat and meat products, to apply quantitative limitations on the importation of certain additional articles of meat, meat products, and livestock and for other purposes; to the Committee on Ways and Means.

By Mr. SYMMS (for himself, Mr. CRANE, Mr. ASHBROOK, and Mr. MCDONALD):

H.R. 11546. A bill to prohibit the executive branch from engaging in activities to influence State legislatures with regard to the ratification of constitutional amendments; to the Committee on the Judiciary.

By Mr. TUCKER:

H.R. 11547. A bill to provide price and income protection for agricultural producers by assuring such producers a price for their agricultural commodities of not less than the cost of producing such commodities; to assure consumers an adequate supply of food and fiber at reasonable prices; and for other purposes; jointly, to the Committees on Agriculture, and Ways and Means.

By Mr. ZABLOCKI (for himself, Mr. FASCELL, Mr. DIGGS, Mr. FRASER, Mr. WOLFF, Mr. BINGHAM, Mr. SOLARZ, Mrs. MEYNER, Mr. STUDDS, Mr. BUCHANAN, and Mr. WINN):

H.R. 11548. A bill to establish a national policy for the application of science and technology to U.S. foreign policy; to the Committee on International Relations.

By Mr. NEAL (for himself, Mr. KASTEN, Mr. RICHMOND, Mr. VAN DEERLIN, Ms. SCHROEDER, and Mr. NIX):

H.R. 11549. A bill to establish a Solar Energy Development Bank to provide long-term low-interest loans for the purchase and installation of solar energy equipment in commercial and residential buildings in the United States; to the Committee on Banking, Finance and Urban Affairs.

By Mr. JEFFORDS (for himself, Mr. SIMON, and Mr. MIKVA):

H.R. 11550. A bill to authorize the Secretary of State to implement solar energy and other renewable energy projects in certain buildings owned by the United States in foreign countries; to the Committee on International Relations.

By Mr. BEDELL (for himself, Mr. OTTINGER, Mr. MAGUIRE, Mr. LONG of Maryland, Mr. BEILENSON, Ms. SCHROEDER, Mr. SEIBERLING, and Mr. SIMON):

H.R. 11551. A bill to provide for a solar and conservation loan program within the Small Business Administration; to the Committee on Small Business.

By Mr. JEFFORDS (for himself, Mr. GORE, Mr. BEILENSON, Mr. SEIBERLING, and Mr. SIMON):

H.R. 11552. A bill to direct the Secetary of Commerce to carry out a global market survey with respect to American-made solar energy technology; to the Committee on Interstate and Foreign Commerce.

By Mr. BRODHEAD:

H.J. Res. 790. Joint resolution to authorize and request the President to issue a proclamation designating April 18, 1978, as Education Day, U.S.A.; to the Committee on Post Office and Civil Service.

By Mr. RUDD (for himself, Mr. BROYHILL, Mr. BEVILL, Mr. CHARLES H. WILSON of California, Mr. BURKE of Florida, Mr. WYDLER, Mr. FREY, and Mr. HANSEN):

H.J. Res. 791. Joint resolution expressing the determination of the United States with respect to the situation in Cuba; to the Committee on International Relations.

By Mr. SEBELIUS:

H.J. Res. 792. Joint resolution to provide for the designation of the first Friday of March of each year as Teacher Day, U.S.A.; to the Committee on Post Office and Civil Service.

By Mr. CUNNINGHAM:

H.J. Res. 793. Joint resolution to authorize and request the President to issue a proclamation designating April 18, 1978, as Education Day, U.S.A.; to the Committee on Post Office and Civil Service.

By Mr. ANDERSON of California:

H. Con. Res. 507. Concurrent resolution relative to condemning acts of terrorism; to the Committee on International Relations.

By Mr. JEFFORDS (for himself and Mr. SIMON):

H. Con. Res. 508. Concurrent resolution expressing the sense of the Congress that the United Nations should convene a World Alternate Energy Conference having as its major purpose the establishment of an International Alternate Energy Commission to facilitate the transfer among countries of information relating to alternate energy sources and to otherwise encourage the use of alternate energy sources; to the Committee on International Relations.

By Mr. WRIGHT:

H. Con. Res. 509. Concurrent resolution condemning terrorist activities of the PLO; to the Committee on International Relations.

By Mr. RHODES (for himself, Mr. YATES, Mr. ADDABBO, Mr. ANDERSON of California, Mr. ANNUNZIO, Mr. ASPIN, Mr. BAFALIS, Mr. BAUCUS, Mr. BAUMAN, Mr. BEILENSON, Mr. BENJAMIN, Mr. BIAGGI, Mr. BINGHAM, Mr. BLANCHARD, Mr. BLOUIN, Mr. BOLAND, Mr. BOLLING, Mr. BONIOR, Mr. BOWEN, Mr. BRADEMAS, and Mr. BRODHEAD):

H. Con. Res. 510. Concurrent resolution condemning terrorist activities of the PLO; to the Committee on International Relations.

By Mr. YATES (for himself, Mr. BROWN of California, Mr. BURGENER, Mrs. BURKE of California, Mr. PHILLIP BURTON, Mr. JOHN L. BURTON, Mr. CAPUTO, Mr. CARR, Mr. CARTER, Mrs. CHISHOLM, Mr. DEL CLAWSON, Mr. COCHRAN of Mississippi, Mr. COHEN, Mr. COLLINS of Texas, Mr. CONABLE, Mr. CONTE, Mr. CORCORAN of Illinois, Mr. CORNELL, Mr. CORNWELL, Mr. CORRADA, Mr. COTTER, Mr. COUGHLIN, Mr. D'AMOURS, and Mr. DANIELSON):

H. Con. Res. 511. Concurrent resolution to condemning terrorist activities of the PLO; to the Committee on International Relations.

By Mr. BOLLING (for himself, Mr. DELANEY, Mr. DERRICK, Mr. DERWINSKI, Mr. DEVINE, Mr. DICKS, Mr. DODD, Mr. DOWNEY, Mr. DRINAN, Mr. DUNCAN of Tennessee, Mr. DUNCAN of Oregon, Mr. EARLY, Mr. EDGAR, Mr. EDWARDS of California, Mr. EILBERG, Mr. EMERY, Mr. EVANS of Colorado, Mr. EVANS of Delaware, Mr. FARY, Mr. FASCELL, Mr. FAUNTROY, Mrs. FENWICK, and Mr. FINDLEY):

H. Con. Res. 512. Concurrent resolution condemning terrorist activities of the PLO; to the Committee on International Relations.

By Mr. ALLEN of Tennessee (for himself, Mr. FISH, Mr. FISHER, Mr. GREEN, Mr. FITHIAN, Mr. FLORIO, Mr. FOLEY, Mr. FORSYTHE, Mr. FOUNTAIN, Mr. FRASER, Mr. FRENZEL, Mr. FUQUA, Mr. GAYDOS, Mr. GEPHARDT, Mr. GIAIMO, Mr. GIBBONS, Mr. GILMAN, Mr. GINN, Mr. GLICKMAN, Mr. GOODLING, Mr. GRASSLEY, Mr. GUDGER, and Mr. GUYER):

H. Con. Res. 513. Concurrent resolution condemning terrorist activities of the PLO; to the Committee on International Relations.

By Mr. YATES (for himself, Mr. HAGEDORN, Mr. HAMMERSCHMIDT, Mr. HANLEY, Mr. HANNAFORD, Mr. HARRINGTON, Mr. HAWKINS, Mrs. HECKLER, Mr. HEFNER, Mr. HEFTEL, Mr. HILLIS, Mr. HOLLENBECK, Mrs. HOLT, Ms. HOLTZMAN, Mr. HUCKABY, Mr. HUGHES, Mr. HYDE, Mr. JACOBS, Mr. JEFFORDS, Mr. JENRETTE, Mr. JOHNSON of California, Mr. JONES of Oklahoma, Mr. KASTEN, and Mr. KELLY):

H. Con. Res. 514. Concurrent resolution condemning terrorist activities of the PLO; to the Committee on International Relations.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

328. By the SPEAKER: Memorial of the Legislature of the Commonwealth of Virginia, relative to the economic problems of farmers; to the Committee on Agriculture.

329. Also, memorial of the Legislature of the Commonwealth of Virginia, relative to coverage afforded by Federal crop insurance programs; to the Committee on Agriculture.

330. Also, memorial of the Assembly of the State of California, relative to aviation regulatory reform; to the Committee on Public Works and Transportation.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. EDGAR:

H.R. 11553. A bill for the relief of Adela De La Paz Del Mundo and Franklin Miller, Jr.; to the Committee on the Judiciary.

By Mr. MAZZOLI:

H.R. 11554. A bill to quitclaim certain property in the city of Washington, District of Columbia, to the Little Sisters of the Poor; to the Committee on the District of Columbia.

By Mr. PEASE:

H.R. 11555. A bill for the relief of Sidney G. Kanouse; to the Committee on the Judiciary.

H. Res. 1077. Resolution to refer the bill for the relief of Sidney G. Kanouse to the Chief Commissioner of the Court of Claims; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 50

By Mr. YOUNG of Florida:

Page 67, line 13, insert "veterans," after "elderly".

Page 68, line 8, insert the following:

"(4) For purposes of this subsection, the term 'veteran' shall mean the same as defined in 38 U.S.C.A. § 101(2)."

Page 71, line 10, strike out "and" and insert immediately after such line the following new subparagraph:

"(G) proper attention to the employment status of recipients of Social Security benefits and other Federal government pension programs and the effects on their employment status caused by the statutory limitation on outside earned income;"

Page 71, line 11, redesignate subparagraph (G) as subparagraph (H).

H.R. 7700

By Mr. HANLEY:

On page 22, line 7, strike out all down through line 19 on page 53, and insert in lieu thereof the following:

That this Act may be cited as the "Postal Service Act of 1978".

CHANGING RATES AND FEES

SEC. 2. (a)(1) Section 3621 of title 39, United States Code, is amended to read as follows:

"§ 3621. Authority to fix rates and fees

"The Postal Rate Commission shall establish rates of postage and fees for postal services in accordance with this chapter. Postal rates and fees shall be reasonable, equitable, and sufficient to enable the Postal Service under honest, efficient, and economical management to maintain and continue the development of postal services of the kind and quality adapted to the needs of the United States. Postal rates and fees shall provide sufficient revenues so that the total estimated income and appropriations to the Postal Service will equal as nearly as practicable total estimated costs of the Postal Service. For purposes of this section, 'total estimated cost' includes—

"(1) operating expenses;

"(2) depreciation on capital facilities and equipment;

"(3) interest on debt and amortization of debt discount and expenses; and

"(4) a provision for contingencies, not to exceed 2 percent of an amount equal to the total of those items referred to in paragraph (1) through paragraph (3) of this section, for unforeseeable and uncontrollable occurrences;

but does not include a provision for repayment of past losses.".

(2) The item relating to section 3621 in the table of sections for subchapter II of chapter 36 of title 39, United States Code, is amended by striking out "classes" and inserting in lieu thereof "fees".

(b) Section 3622 of title 39, United States Code, is amended to read as follows:

"§ 3622. Rates and fees

"(a) The Postal Service shall propose rate schedules to the Postal Rate Commission recommending changes in a rate or rates of postage or in a fee or fees for postal services if the Postal Service determines that each such change would be in the public interest and in accordance with the policies of this title.

"(b)(1) Upon receiving any proposal from the Postal Service, the Commission shall make a decision on the request for changes in rates or fees in each class or subclass of mail or type of service in accordance with the policies of this title and the requirements of this subsection

"(2) Each class or subclass of mail or type of service shall bear those postal costs attributable to that class, subclass, or type. Attributable costs shall be those costs which vary with the volume of the class or subclass of mail or type of service over a period of not more than 3 years. If the Commission determines that attributable costs exceed 60 percent of total estimated costs, the attributable costs of each class, subclass, or type shall be reduced to an amount that is determined by multiplying the attributable costs of the class, subclass, or type by a fraction whose numerator is 60 and denominator is a whole number equal to the percentage of total estimated costs determined to be attributable. Revenues received from zone-rated parcels shall recover attributable costs determined under this section without regard to the provisions of the preceding sentence, plus a fair share of all other costs.

"(3) The remaining costs not attributed under paragraph (2) of this subsection shall be apportioned, after deducting an estimated amount for public service appropriations, among each class or subclass of mail or type of service as a revenue burden on the basis of—

"(A) the quality and character of the mail service provided to both the sender and the recipient, including collection, speed of transmission, privacy, and priority of handling and delivery;

"(B) the effect of the proposed rates on the general public, business mail users, and enterprises in the private sector of the economy engaged in the delivery of mail matter other than letters;

"(C) the available alternative means of sending and receiving letters and other mail matter at reasonable costs;

"(D) the educational, cultural, scientific, and informational benefit of the mail matter to the Nation; and

"(E) the relative demand for each class or subclass of mail or type of mail service.".

(c) Section 3626(a)(1) of title 39, United States Code, is amended by inserting before the semicolon at the end thereof a comma and the following: "as may be reduced under section 3622(b)(2) of this title".

(d) Section 3626(a)(2) of title 39, United States Code, is amended to read as follows:

"(2) the rates for mail matter under former sections 4359, 4421, 4422, and 4554(a) shall be equal, on and after the first day of the eighth year following the effective date of the first rate decision applicable to that class or kind, to the rates that would have been in effect for such mail if this subsection had not been enacted; except that revenues received from rates for not more than 250,000 pieces of each issue of a publication under former sections 4359, 4421, and 4422 which do not qualify to be mailed at a reduced per piece rate based on a 5-digit ZIP code sortation established pursuant to the proceedings in Postal Rate Commission Docket Numbered R77-1 shall not, on and after the first day of the eighth year following the effective date of the first rate decision applicable to that class or kind, exceed the postal costs attributable to mail of such class or kind (excluding all other costs of the Postal Service); the reduction authorized by this paragraph shall be applied by reducing the per piece charge otherwise applicable to not to exceed 250,000 pieces; and".

(e) Section 3683(a) of title 39, United States Code, is amended by inserting after "postage established" the following: "for the nonadvertising portions of mail matter described in former sections 4358, 4359, 4421, and 4422 of this title and".

AUTHORIZATION OF APPROPRIATIONS TO UNITED STATES POSTAL SERVICE

SEC. 3. (a) Section 2401(b)(1) of title 39, United States Code, is amended by striking out all beginning with the words "the following amounts:" and inserting in lieu thereof "for each of the fiscal years 1972 through 1984 the sum of $920,000,000.".

(b) Section 2401(d) of title 39, United States Code, is amended to read as follows:

"(d) There is authorized to be appropriated to the Postal Service for each of the fiscal years 1979, 1980, and 1981 the sum of $800,000,000.".

(c) Subsections "(e)" and "(f)" of section 2401 of title 39, United States Code, are repealed.

(d) Subsections "(g)", "(h)", and "(i)" of section 2401 of title 39, United States Code, are redesignated as subsections "(e)", "(f)", and "(g)".

(e) Section 2401(f) of title 39, United States Code, as redesignated by this Act, is amended by striking out the second sentence.

(f) Section 2401(g) of title 39, United States Code, as redesignated by this Act, is amended by striking out the numeral "10" and inserting in lieu thereof the numeral "7", and by striking out the words "subsection (b) and (d) of".

(g) Section 2401(b)(2) of title 39, United States Code, is amended by striking out "(G)".

POSTAL RATE COMMISSION BUDGETS

SEC. 4. Section 3604(d) of title 39, United States Code, is amended to read as follows:

"(d) The Commission annually shall prepare and submit to the President a budget of the expenses of the Commission, including expenses for facilities, supplies, compensation, and employee benefits. The President shall include the budget of the Commission, with his recommendations but without revision, as a separate item in the budget required by section 11 of title 31 to be transmitted to the Congress.".

SIZE AND WEIGHT LIMITS

SEC. 5. (a) Section 3682 of title 39, United States Code, is amended to read as follows:

"§ 3682. Size and weight limits

"(a) The maximum size of mail, other than letter mail, is 100 inches, in girth, and length combined, and the maximum weight is 70 pounds.

"(b) The Postal Service may establish size and weight limits for letter mail in the same manner prescribed for changes in the mail classification schedule under subchapter II of this chapter.".

(b) The amendment made by subsection (a) of this section is not effective until the zone rate for a parcel measuring over 84 inches in length and girth combined is at least equal to the minimum rate for a 25-pound parcel addressed to the same zone.

LEGAL REPRESENTATION

SEC. 6. (a) Section 409(d) of title 39, United States Code, is amended to read as follows:

"(d)(1) Except as provided in paragraph (2) of this subsection, the Attorney General shall furnish the Postal Service, under section 411 of this title, any legal representation the Postal Service may require. With the prior consent of the Attorney General, the Postal Service may represent itself through its attorneys or through attorneys whose services may be obtained by contract.

"(2) The Postal Service may represent itself without obtaining the consent of the Attorney General in litigation arising under chapter 36 of this title through its attorneys or through attorneys whose services are obtained by contract.".

(b)(1) Subchapter I of chapter 36 of title

39, United States Code, is amended by adding at the end thereof the following new section:

"§ 3605. Legal representation

"The Commission may represent itself without obtaining the consent of the Attorney General in litigation arising under chapter 36 of this title through its attorneys or through attorneys whose services are obtained by contract.".

(2) The table of sections for subchapter I of chapter 36 of title 39, United States Code, is amended by adding at the end thereof the following new item:

"3605. Legal representation.".

SEC. 7. (a) The first, second, and third sentences of section 202(a) of title 39, United States Code, are amended to read as follows:

"(a) The Board of Governors of the Postal Service shall be composed of 9 Governors appointed by the President, by and with the advice and consent of the Senate. Not more than 5 Governors may be adherents of the same political party. The President shall designate the Chairman from among the Governors serving on the Board."

(b) Section 202(c) of title 39, United States Code, is amended to read as follows:

"(c) The Governors are authorized and directed to establish procedures for the regular and continuing review of postal operations, finances, and practices. The Governors shall retain the services of such officers and employees as they deem necessary to carry out the purposes of this subsection, and the officers and employees so appointed shall have complete access to all postal data, information, and operations. Such officers and employees shall be responsible solely to the Governors, and may not be under any jurisdiction or control of the Postmaster General or the Postal Service. There is authorized to be appropriated such sums as may be necessary to carry out the purposes of this subsection.".

(c) Section 202(d) of title 39, United States Code, is amended to read as follows:

"(d) Vacancies in the Board, as long as there are sufficient members to form a quorum, shall not impair the powers of the Board under this title. The Board shall act upon majority vote of those members who are present, and any 6 members present shall constitute a quorum for the transaction of business by the Board. No officer or employee of the United States may serve concurrently as a Governor. A Governor may hold any other office or employment not inconsistent or in conflict with his duties, responsibilities, and powers as an officer of the Government of the United States in the Postal Service.".

ORGANIZATION OF POSTAL SERVICE; RATE, FEE, AND CLASSIFICATION DECISIONS OF POSTAL RATE COMMISSION

SEC. 8. (a) Section 203 of title 39, United States Code, is amended to read as follows:

"§ 203. Postmaster General

"The chief executive officer of the Postal Service is the Postmaster General, who shall be appointed by the President, by and with the advice and consent of the Senate, who shall serve for a term of 4 years, which shall coincide with the term of office of the President. A Postmaster General appointed to fill a vacancy shall serve for the remainder of the term to which his predecessor was appointed. A Postmaster General may continue to serve after his term expires until his successor has qualified.".

(b)(1) Sections "204", "205", "206", "207", and "208" of title 39, United States Code, are redesignated as sections '205", "206", "207", "208", and "209", respectively, and the following new section 204 shall be inserted immediately following section 203:

"§ 204. Deputy Postmaster General

The deputy chief executive officer of the Postal Service is the Deputy Postmaster General, who shall be appointed by, and serve at the pleasure of, the Postmaster General.".

(2) The table of sections for chapter 2 of title 39, United States Code, is amended to read as follows:

"Sec.
201. United States Postal Service.
202. Board of Governors.
203. Postmaster General.
204. Deputy Postmaster General.
205. Assistant Postmasters General; General Counsel; Judiciary Officer.
206. General authority of Postmaster General.
207. Advisory Council.
208. Seal.
209. Reservation of powers.".

(c)(1) Section 206 of title 39, United States Code, as redesignated by this Act, is amended to read as follows:

"§ 206. General authority of Postmaster General

"The Postmaster General shall direct and control the expenditures and review the practices and policies of the Postal Service and perform other functions and duties prescribed by this title.".

(d)(1) Section 208 of title 39, United States Code, as redesignated by this Act, is amended by striking out "Boar" and inserting in lieu thereof "Postmaster General".

(2)(A) Title 39, United States Code, is amended by striking out section 402.

(B) The table of sections for chapter 4 of title 39, United States Code, is amended by striking out the item relating to section 402.

(3) Section 1001(d) of title 39, United States Code, is amended by striking out "of the Board or".

(4) Section 1002(a) of title 39, United States Code, is amended by striking out "Governor or".

(5) Section 1011 of title 39, United States Code, is amended by striking out "Board" and inserting in lieu thereof "Postmaster General".

(6) Section 2402 of title 39, United States Code, is amended to read as follows:

"§ 2402. Annual report

"The Postmaster General shall submit to the President and to the Congress an annual report concerning the operations of the Postal Service under this title.".

(7)(A) Section 3623(a) of title 39, United States Code, is amended by striking out "make a recommended" and inserting in lieu thereof "render a".

(B) Section 3623(b) of title 39, United States Code, is amended—

(i) by striking out "submit" the first place it appears therein and inserting in lieu thereof "render";

(ii) by striking out "submit to the Governors" and inserting in lieu thereof "render"; and

(iii) by striking out "recommended".

(C) Section 3623(c) of title 39, United States Code, is amended by striking out "make a recommended" and inserting in lieu thereof "render a".

(8)(A) The heading for section 3624 of title 39, United States Code, is amended by striking out "Recommended decisions" and inserting in lieu thereof "Decisions".

(B) Section 3624(a) of title 39, United States Code, is amended by striking out "recommended" and inserting in lieu thereof "render".

(C) Section 3624(c)(1) of title 39, United States Code, is amended—

(i) by striking out "recommended" the first place it appears therein;

(ii) by striking out "transmit its recommended" and inserting in lieu thereof "render its"; and

(iii) by striking out "to the Governors under subsection (d) of this section".

(D) Section 3624(d) of title 39, United States Code, is amended to read as follows:

"(d) The Commission shall determine the date or dates on which the new rates, fees, mail classification schedule, and changes in the schedule shall become effective. The decisions of the Commission shall be final, subject to the provisions of subsection (e) of this section.".

(9)(A) Title 39, United States Code, is amended by striking out section 3625.

(B) The matter describing section 3624 and section 3625 in the table of sections for subchapter II of chapter 36 of title 39, United States Code, is amended to read as follows:

"3624. Decisions of Commission.
"3625. Repealed.".

(10)(A) The first sentence of section 3628 of title 39, United States Code, is amended—

(i) by striking out "decision of the Governors to approve, allow under protest, or modify the recommended"; and

(ii) by inserting "under section 3624(c) of this title" immediately after "Postal Rate Commission".

(B) The second sentence of section 3628 of title 39, United States Code, is amended by striking out "and the Governors".

(C) The last sentence of section 3628 of title 39, United States Code, is amended by striking out "or Governors".

(11)(A) Section 3641(a) of title 39, United States Code, is amended—

(i) by striking out "transmit a recommended" and inserting in lieu thereof "render a"; and

(ii) by striking out "to the Governors".

(B) Section 3641(d) of title 39, United States Code, is amended—

(i) by striking out "transmits its recommended" and inserting in lieu thereof "renders its";

(ii) by striking out "to the Governors under section 3624(d) of this title"; and

(iii) by striking out "Governors" and inserting in lieu thereof "Commission".

(C) The first sentence of section 3641(e) of title 39, United States Code, is amended—

(i) by striking out "transmit to the Governors" and inserting in lieu thereof "render a decision"; and

(ii) by striking out "recommended".

(D) The second sentence of section 3641(e) of title 39, United States Code, is amended by striking out "transmitted its recommended decision to the Governors" and inserting in lieu thereof "rendered its decision".

(12) Section 3684 of title 38, United States Code, is amended by striking out "Governors" and inserting in lieu thereof "Postmaster General".

(13) Section 5206(c) of title 39, United States Code, is amended by striking out "Board" each place it appears therein and inserting in lieu thereof "Postmaster General".

POST OFFICE CLOSINGS AND CONSOLIDATIONS

SEC. 8. (a) Section 404(b)(1) of the title 39, United States Code, is amended by adding at the end thereof the following new sentence: "The Postal Service shall conduct a hearing relating to such proposed closing or consolidation during such 60-day period in the area which would be affected by such proposed closing or consolidation.".

(b) Section 404(b)(2)(A) of title 39, United States Code, is amended by inserting after the word "consolidation" the words "including social effects."

SURPLUS AND EXCESS PROPERTY

SEC. 9. (a) Section 410(b)(4) of title 39, United States Code, is amended—

(1) by striking out "and" at the end of subparagraph (E);

(2) by redesignating subparagraph (F) as subparagraph (G); and

(3) by inserting after subparagraph (E) the following new paragraph:

"(F) chapter 10 (relating to management and disposal of Government property), ex-

cept that the provisions of such chapter shall apply only to property held by the Postal Service at the time of its establishment by section 201 of this title, as enacted by section 2 of the Act of August 12, 1970, Public Law 91-375; and".

(b) Section 401(5) of title 39, United States Code, is amended by inserting before "to acquire" the following: "subject to the provisions of section 410(b)(4)(F) of this title,".

REVIEW OF PROPOSED CAPITAL INVESTMENTS

SEC. 10. (a) Chapter 20 of title 39, United States Code, is amended by adding at the end thereof the following new section:

"§2011. Review of proposed capital investments

"(a) The Postal Service may not carry out any capital investment project having a total estimated cost which exceeds $9,000,000 unless the Postal Service, before commencing such project transmits a report to the Committee on Governmental Affairs of the Senate and the Committee on Post Office and Civil Service of the House of Representatives. Such report shall contain a detailed description of the project involved, together with a justification for such project.

"(b) The Committee on Governmental Affairs of the Senate and the Committee on Post Office and Civil Service of the House of Representatives, upon receiving any report from the Postal Service under subsection (a) of this section, shall review the project involved and conduct such hearings with respect to such project as each committee considers necessary. Each such committee shall transmit recommendations to the Postal Service with respect to such project no later than 4 months after receiving a report under subsection (a) of this section.

"(c) The Postal Service may not commence any capital investment project with respect to which a report has been transmitted by the Postal Service under subsection (a) of this section until the Postal Service has received recommendations with respect to such project from the Committee on Governmental Affairs of the Senate and the Committee on Post Office and Civil Service of the House of Representatives under subsection (b) of this section. The Postal Service shall take such recommedations into account in making its final determination with respect to carrying out the project involved.

"(d) For purposes of this section, the term 'capital investment project' means any project the cost of which is not properly chargeable, under generally accepted accounting principles, as an expense of operation and maintenance.".

(b) The table of sections for chapter 20 of title 39, United States Code, is amended by adding at the end thereof the following new item:

"2011. Review of proposed capital investments.".

TRANSPORTATION OF MAIL BY VESSEL

SEC. 11. (a) Section 5605 of title 39, United States Code, is amended to read as follows:

"§ 5605. Transportation of mail on United States vessels

"(a) The Postal Service shall contract for the use of vessels of United States registry to originate any international sea transportation of mail of the United States in any case in which the common carrier which operates or controls such vessel is engaged in the provision of regular transportation services to the destination specified by the Postal Service. The Postal Service shall not be required to enter into any such contract if no such vessels are available at the time the Postal Service seeks to arrange for the transportation of such mail.

"(b) Any rate charged for the sea transportation of mail of the United States under subsection (a) of this section shall comply with the provisions of the Shipping Act, 1916, as amended. Any such rate shall not be less than the sum of—

"(1) the fully distributed costs of common carriers; and

"(2) a fair and reasonable profit.

"(c) In any case in which 2 or more common carriers seek to enter into a contract offered by the Postal Service under subsection (a) of this section, the Postal Service shall award such contract by competitive bidding. The duration of any such contract may not exceed 1 year.

"(d) The Postal Service shall not give any preference to any common carrier upon the basis of length, height, or width of cargo containers. No advertisement or invitation to bid for the carriage of mail may specify carriage of mail in containers of any specified length, height, or width.

"(e) For purposes of this section, the term 'common carrier' means any common carrier, other than any ferry boat running on regular routes, engaged in the transportation by water of passengers or property between the United States (or any of its districts, territories, or possessions) and any foreign country, whether in the import or export trade, except that a cargo boat commonly referred to as an ocean tramp shall not be considered to be a common carrier.".

(b) The table of sections for chapter 56 of title 39, United States Code, is amended by striking out the item relating to section 5605 and inserting in lieu thereof the following new item:

"5605. Transportation of mail on United States vessels.".

RATES FOR BOOKS, FILMS, AND OTHER MATERIALS

SEC. 12. (a) Section 3683(b) of title 39, United States Code, is amended to read as follows:

"(b) Notwithstanding any other provision of this title, any—

"(1) book (including any book published or otherwise issued as a supplement to any other book) which—

"(A) consists exclusively of reading matter, scholarly bibliography, or reading matter with incidental blank spaces for notations; and

"(B) contains no advertising, other than incidental announcements of books;

"(2) 16 millimeter film, narrow-width film, film strips, transparencies for projection, slides, or microfilm;

"(3) sound recording;

"(4) museum materials, specimens, or collections;

"(5) scientific or mathematical kit, instrument, or other device;

"(6) teaching aid, guide, map, or other interpretative material for use in conjunction with any item specified in paragraph (1) through paragraph (5); and

"(7) catalog or similar publication which contains a listing of any item specified in paragraph (1) through paragraph (6);

may be mailed at the rates currently in effect for mail matter specified in former section 4554(b)(1) of this title in any case in which any such item is mailed to or from any institution, organization, or association specified in subparagraph (A) or subparagraph (B) of former section 4554(b)(1) of this title or to or from any school, college, university, or library.".

(b) The catchline for section 3683 of chapter 36 of title 39, United States Code, is amended to read as follows:

"§ 3683. Uniform rates for publications, films, and other materials".

(c) The table of sections for subchapter V of chapter 36 of title 30, United States Code, is amended by striking out the item relating to section 3683 and inserting in lieu thereof the following new item:

"3683. Uniform rates for publications, films, and other materials.".

SEC. 13. (a) Section 3661 of title 39, United States Code, is amended to read as follows:

"§ 3661. Changes in postal services

"(a) When the Postal Service determines that there should be a change in the level or types of postal services, and such a change would have nationwide or substantially nationwide impact, a detailed statement of the proposed change, including estimates of impact upon the public, business mail users, service levels, postal finances, and postal employment shall be submitted to the Congress in accordance with this section.

"(b) No proposed change in the level of postal services shall become effective unless during the period of the first 60 calendar days of continuous session of the Congress (after the date on which the Postal Service transmits to the House of Representatives and to the Senate a document setting forth the text of the detailed statement of the proposed change) neither House adopts a postal service resolution referred to in subsection (e)(2) of this section.

"(c) Any document described in subsection (b) of this section shall be immediately referred in the House of Representatives to the Committee on Post Office and Civil Service and in the Senate to the Committee on Government Affairs.

"(d) For purposes of subsection (b) of this section—

"(1) continuity of session is broken only by an adjournment of Congress sine die; and

"(2) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the comptuation of the 60-day period.

"(e)(1) The provisions of this section are enacted by the Congress—

"(A) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of postal service resolutions described in paragraph (2) of this subsection, and they supersede other rules only to the extent that they are inconsistent therewith; and

"(B) with full recognition of the constitutional right of either House to change the rules (so far as they relate to the procedure of that House) at any time, and in the same manner and to the same extent as in the case of any other rule of that House.

"(2) For purposes of this subsection, the term 'postal service resolution' refers to a joint resolution of either House of Congress—

"(A) the effect of which is to prohibit the change in the level or type of postal services described in the document which is transmitted to the Congress pursuant to subsection (b) of this section; and

"(B) which is reported from the Committee on Post Office and Civil Service of the House of Representatives or the Committee on Governmental Affairs of the Senate, not later than 45 days after the date on which the document described in subsection (b) of this section relating to such change is transmitted to the Congress.

"(3) Any resolution upon being reported shall immediately be placed on the appropriate calendar.

"(4)(A) A motion in the House of Representatives to proceed to the consideration of any postal service resolution shall be highly privileged and not debatable. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(B) Debate in the House of Representatives on any postal service resolution shall be limited to not more than 6 hours, which shall be divided equally between those favoring and those opposing the resolution. A motion further to limit debate shall not be debatable. It shall not be in order to

move to recommit any postal service resolution or to move to reconsider the vote by which any postal service resolution is agreed to or disagreed to.

"(C) Motions to postpone, made in the House of Representatives with respect to the consideration of any postal service resolution, and motions to proceed to the consideration of other business, shall be decided without debate.

"(D) All appeals from the decisions of the Chair relating to the application of the Rules of the House of Representatives to the procedure relating to any postal service resolution shall be decided without debate.

"(E) Except to the extent specifically provided in the preceding provisions of this subsection, consideration of any postal service resolution shall be governed by the Rules of the House of Representatives applicable to other bills and resolutions in similar circumstances.

"(f)(1) For the purpose of this section, a change in the level or types of postal services includes—

"(A) a change in the number of days each week mail is delivered over letter carrier, rural, and star routes;

"(B) a change in the number of days each week and hours each day post offices are open to the public to transact business;

"(C) an increase in the periods of time used as the standard for the timely delivery of mail matter as of September 1, 1977;

"(D) a change in the standards which would further restrict the eligibility to receive mail by letter carrier, rural, or star route delivery; and

"(E) changes in other nationwide or substantially nationwide levels and types of postal services which have been provided to the public generally.

"(2) For purposes of this section, a nationwide or substantially nationwide change in service includes any such change which would have effect in more than one geographic or administrative region established by the Postal Service.".

(b) The subchapter heading appearing immediately above section 3661 of title 39, United States Code, is amended to read as follows:

"SUBCHAPTER IV.—CHANGES IN POSTAL SERVICES AND RATE AND SERVICE COMPLAINTS".

(c) The catchline appearing at the beginning of chapter 36 of title 39, United States Code, is amended by striking out the matter relating to subchapter IV and inserting in lieu thereof the following:

"SUBCHAPTER IV.—CHANGES IN POSTAL SERVICES AND RATE AND SERVICE COMPLAINTS

"3661. Changes in postal services.
"3662. Rate and service complaints.".

SEC. 14. (a) Subchapter I of chapter 36 of title 39, United States Code, is amended by adding the following new section:

"§ 3606. Public disclosure of costs and subsidies

"(a) The Postal Rate Commission shall, by regulation, create procedures by which the public shall be apprised of the attributable cost and institutional cost of each class or subclass of mail or type of mail service, the costs actually paid by users and the subsidies which benefit such class or subclass of mail service.

"(b) For the purposes of this section—

"(1) 'attributable cost' means those costs which vary with the volume of the class or subclass of mail or type of mail service over a period of not more than 3 years;

"(2) 'institutional cost' means those costs apportioned by section 3622(b) of this title minus the proportionate share of such costs which are attributable costs apportioned under section 3622(b)(2) by operation of section 3622(b)(1); and

"(3) 'subsidies' means the attributable costs plus the institutional costs minus the actual rate or fee paid by the mailer, and may be further broken down by the Commission into subsidies paid by other mail classes and subsidies paid out of appropriations, whether statutorily or administratively assigned.

"(c) The information, provided under regulations of the Commission by this section, shall be posted in all post offices, shall be required as an appendix to the notices required under section 3685 of this title, and shall otherwise be made available to the public for examination. The information shall be stated in a manner which is readily understandable, including breakdowns in cents and fractions of cents as to the average costs and subsidies of individual pieces of mail within a class or subclass.".

(b) The table of sections for subchapter I of chapter 36 of title 39, United States Code, is amended by inserting at the end thereof the following new item:

"3606. Public disclosure of costs and subsidies.".

POSTAL EXECUTIVE SALARIES

SEC. 15. (a) Section 1003(a) of title 39, United States Code, is amended by striking out the third sentence and inserting in lieu thereof the following: "Except as provided in subsection (b) of this section, no officer or employee shall be paid compensation at a rate in excess of the maximum rate of basic pay then currently paid for GS–18 of the General Schedule of section 5332 of title 5.".

(b) Section 1003 of title 39, United States Code, is amended by redesignating subsection (b) as subsection (c), and by inserting after subsection (a) the following new subsection:

"(b) The maximum rate of compensation—

"(1) for the Postmaster General shall not exceed the rate of basic pay then currently in effect for level I of the Executive Schedule of section 5312 of title 5;

"(2) for the Deputy Postmaster General shall not exceed the rate of basic pay then currently in effect for level II of the Executive Schedule of section 5313 of title 5;

"(3) for not more than 6 Assistant Postmasters General, shall not exceed the rate of basic pay then currently in effect for level III of the Executive Schedule of section 5314 of title 5; and

"(4) for the General Counsel, for the Chief Postal Inspector, and for not more than 5 regional Postmasters General, shall not exceed the rate of basic pay then currently in effect for level IV of the Executive Schedule of section 5315 of title 5; and

"(5) for not more than 10 other positions (as determined by the Postmaster General) shall not exceed the rate of basic pay then currently in effect for level V of the Executive Schedule of section 5316 of title 5.".

(c)(1) Except as provided in paragraph (2) of this subsection, any officer or employee of the Postal Service serving on the date of the enactment of this Act whose rate of compensation would, but for this paragraph, be reduced by reason of the limitations contained in section 1003 (a) or (b) of title 39, United States Code, as amended by this Act, may continue to receive compensation at the rate in effect on such date so long as such officer or employee continues without a break in service of more than 3 days to perform the duties of the position occupied on such date.

(2) A person employed by contract under section 1001(c) of title 39, United States Code, whose compensation would otherwise be reduced by reason of section 1003 of title 39, United States Code, as amended by this Act, may continue to receive compensation at the rate prescribed in the contract until term of employment in the contract expires. No contract under such section 1001(c) may be made, extended, or renewed at a rate of compensation in excess of the rates of basic pay prescribed under section 1003 of title 39, as amended by this Act.

SEC. 16. Section 1001(b) of title 39, United States Code, is amended—

(1) by striking out "Officers" and inserting in lieu thereof the following: "(1) Subject to the provisions of paragraphs (2) and (3) of this subsection, officers"; and

(2) by adding at the end thereof the following new paragraphs:

"(2) In making any appointment to the position of postmaster at any post office, the Postal Service shall give preference to—

"(A) an eligible employee in the post office where the vacancy occurs who has resided within the delivery area of that post office, or within the city or town where the post office is located for not less than 1 year; or

"(B) an equally qualified individual who has resided within the delivery area of that post office, or within the city or town where the post office is located for not less than 1 year;

over any individual who has not resided within the delivery area of that post office, or the city or town where the post office is located, for at least 1 year.

"(3) The Postal Service shall publish in the Federal Register the qualifications for appointments under this subsection. Such qualifications shall not limit consideration to individuals who are employees of the Postal Service. The Postal Service shall provide adequate notice for a period of at least 30 days to postal patrons at the post office where a vacancy occurs that any individual may apply for the position of postmaster under this subsection, and such notice shall include basic requirements, qualification standards, and an explanation of selection procedures.".

RESEARCH AND DEVELOPMENT

SEC. 17. (a) Section 403(b) of title 39, United States Code, is amended by—

(1) striking out the period at the end of paragraph (3), and inserting in lieu thereof a semicolon; and

(2) adding the following new paragraph:

"(4) to develop and maintain a program of research and development to ensure a modern system of electronic and mechanical postal equipment and facilities. Beginning in fiscal year 1982, the annual expenditures of the research and development program shall be not less than one percent of total postal expenditures.".

(b) The Postal Service shall undertake a study of the feasibility and desirability of the Postal Service establishing a system for the electronic transmission of mail matter. The Postal Service shall report its findings and recommendations to the President and the Congress not later than December 31, 1979.

EFFECT ON COLLECTIVE BARGAINING AGREEMENTS

SEC. 18. Nothing in this Act, or in any amendment made by this Act, shall be construed to affect—

(1) any collective bargaining agreement entered into by the United States Postal Service which is in effect on the effective date of this Act;

(2) the authority of the United States Postal Service under chapter 12 of title 39, United States Code, to engage in collective bargaining with respect to any collective bargaining agreement into which the United States Postal Service may enter; or

(3) any obligations entered into by the Postal Service in any future collective bargaining agreement.

EFFECTIVE DATE

SEC. 19. The provisions of this Act, and the amendments made by this Act, shall take effect 90 days after the date of enactment of this Act.

Amend the title so as to read: "An Act to amend title 39, United States Code, to ensure the continuation of public services performed by the United States Postal Service, and for other purposes.".

EXTENSIONS OF REMARKS

AID TO CONSUMERS ADVOCATED

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. WIRTH. Mr. Speaker, during consideration of the proposed Office of Consumer Representation, I received many letters from people in business in opposition to the Office. While many of these people had legitimate complaints, the tone of many of the letters suggested that the interests of the business community are often at odds with the interests of consumers.

I continue to oppose this characterization. It seems to me that if someone in business is cutting corners, everyone suffers. Similarly, if businesses do right by consumers, all businessmen are better off. The quick-buck artist only blackens the name of the legitimate businessman, and causes a loss of consumer confidence. And in addition, unfair practices give them an unfair advantage over those who take their public responsibility seriously.

I recently received a description of internal policing by the HOW Corp. of Colorado, which is a subsidiary of the Colorado Association for Housing & Building. I have seen this group in action, and I am impressed. They have done a tremendous amount of good work—to benefit the consumer—without the cost and aggravation of a court settlement, a class action suit, or poor public relations. They have intervened in the name of the homebuilding industry in cases where they have not been forced to intervene, and they have accomplished two tasks simultaneously: They have protected the good name of homebuilders in Colorado, and they have restored the faith of many of the consumers in their sincerity.

At this point, Mr. Speaker, I ask unanimous consent that the text of the letter be inserted in the RECORD, in order that I might share my pleasant experiences with HOW:

HOME OWNERS WARRANTY
CORPORATION OF COLORADO,
Denver, Colo., February 28, 1978.

On October 21, 1976, Home Owners Warranty Corporation of Colorado was petitioned by 60 residents of the Meadows subdivision for assistance in resolving their problems with Westwood Development Corporation. The HOW Council responded with personal letters to every homeowner that listed their specific problems. The builder was contacted in an effort to clarify what was happening within this subdivision and the remedies he would use to resolve all legitimate complaints.

HOW suggested a personal visit to each homeowner by the builder. A HOW representative would accompany the builder on these visits to insure that all legitimate claims would be addressed by the builder. The HOW Council made the appointments with the homeowners with the assurance from the builder that he would attend these meetings. During the first day of meetings many problems seemed to be resolved through this communication system. The builder agreed to repair all legitimate items within a 30 day period.

The following day, the builder sent his secretary to the meeting to represent his interests. Again, communication was reestablished and promises were made for immediate repairs to take place In the subsequent days of meetings, the builder informed the HOW representative that he could no longer attend these meetings but he would repair all legitimate items noted by the HOW representative. This was accomplished by the HOW office and reports were sent to each homeowner involved and the builder during the second week of December, 1976.

The builder was given 30 days to resolve these problems by the HOW Council. During this time, the builder hired a warranty service man to resolve these problems. This person did a token amount of the work to be accomplished but the appearance of work being done was encouraging to all the homeowners and HOW. However, in the early weeks of January, 1977, it was apparent that all work had stopped. During this time frame, our attorneys attempted to establish a meeting to resolve the problems and to clarify Westwood's position. These requests were ignored by the builder and on February 1, 1977, he was terminated from our program. On February 10th, legal action was started against the builder by Home Owners Warranty Corporation of Colorado. On June 2, 1977, a judgment was rendered against the builder in favor of the HOW Corporation.

In February of 1977, the HOW Council sent arbitration forms to all of the involved parties. This action was taken to provide the homeowners relief under the terms of the insurance policy. Arbitration awards were issued in mid-March in favor of the homeowners which set the stage for the insurance company's involvement should the builder let them go into default, which he did. The builder closed his office and left town in the first week of February, 1977.

The HOW Council sent a certified letter to the builder's office and to the Secretary of State's office to forward to the builder, demanding that the arbitration awards be upheld or the claims would be turned over to the insurance underwriter. This demand was not met by the builder and consequently all claims were presented to American Bankers Insurance Company.

On May 11, 1977, all homeowners involved with HOW were notified that the insurance company would resolve their problems. As a means of expediting the adjusting aspect of the claim, the HOW representative was authorized to resolve all legitimate warranty items and contract for their repair. By June 1, 1977, all homeowners had been contacted by HOW and the repair contractor to itemize all repairs to be made by the insurance company.

HOW used Boyd Construction Company to handle all repairs to the homes. Initial work started in early June on the 53 homes ultimately involved. Work included exterior painting, drywall repairs, rebuilding walls, interior painting, yard regrading, linoleum repairs, carpet repairs and window repairs. The coordination and scheduling of the work was complex and was undertaken by Colorado HOW.

In addition there were numerous heating problems that had to be corrected such as; mismatched heating components, improper wiring of heating switches, faulty equipment, inadequate ductwork, etc. Homeowners Warranty employed Major Heating and Air Conditioning Company to resolve these problems.

The entire work phase took approximately 5 months to finish. In the end, each homeowner signed a release stating that all work had been accomplished to their satisfaction. The repair bill issued to the insurance company from Boyd Construction Company was close to $83,000. The Major Heating and Air Conditioning repair bill was in excess of $7,000. Local HOW Council costs were near $2,000, all directly related to repair costs. The total repair bill was near $92,000 to resolve the warranty problems in 53 homes.

The HOW Council made personal contact with each homeowner after the repairs were made to determine if they were satisfied with the results. In almost every instance homeowners stated they were very pleased with HOW's performance and relieved that they had insurance coverage to resolve their problems. In the few cases where people were not totally satisfied, their dis-satisfaction involved repairs that could not be covered under the HOW insurance policy. However regarding the repairs that were made in their homes, they were satisfied with HOW's performance.

In closing, I feel that this case shows that a problem of this magnitude can be resolved by the HOW program. It provides protection for homeowners whose builders may have gone out of business. It provides dispute handling mechanisms that help a builder and buyer resolve their problems. It also provides future protections against structural defects which has a special importance because of our Colorado soils problem.

Together with these protections, I feel it does show the consumer that an industry can react to it's own problems. I feel that this program and its protection offer the consumer reasonable assurance that he is not going to be "ripped-off" by the housing industry and its builders. This program while still in its infancy is proving that the housing industry can police itself and protect the consuming public at the same time.

LARRY SUMMERS,
Vice President.●

TAXING AUTHORITY AT NATIONAL AIRPORT

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. FISHER. Mr. Speaker, the only federally owned and operated commercial airports in the country, National and Dulles, are in my congressional district. The counties in which Dulles is located can collect more types of State and local taxes from the airport than can the county in which National is located. The bill I am introducing today would permit Virginia and Arlington County to levy the same taxes at National Airport that Virginia and Fairfax and Loudoun Counties can levy at Dulles International Airport.

The tax status of the two airports varies because they operate under different Federal legislation. In 1945, Congress and the Virginia general assembly approved a compact which granted the

Federal Government nearly exclusive jurisdiction over National Airport. But unlike other Federal reservations, National Airport is not covered under the Buck Act, which permits State and local governments to tax sales, motor fuels, gross receipts, and the like on Federal property. Congress did give Virginia and Arlington County some taxing power in 1970, primarily to collect State sales tax, for example, but still the power is not as broad as allowed by the Buck Act.

The legislation establishing Dulles International Airport did not include the same restrictions on taxing authority that apply to National. In addition to the taxes permitted under the Buck Act, local jurisdictions in which Dulles is located can and do tax the leasehold interests of the airlines, business licenses, personal property, and business personal property. My bill seeks to grant the same taxing authority over National as was approved by Congress for Dulles.

Of greatest significance is the section in the bill permitting Arlington County to collect property taxes. Business and personal property and the value of leasehold interests would be subject to this tax. Arlington County loses a significant amount of revenue by being denied the right to levy these taxes. A rough guess, extrapolated from the value of property and leasehold interests at Dulles, is that $200,000 could be collected annually. Since the property at National has never been assessed, no one knows for sure what the tax collections might be.

Arlington County is interested in gaining the authority to levy additional taxes at National Airport for several reasons. The county government incurs expenses because of the airport, without any compensating benefits. For example, the costs of the Metro stop at the airport are charged to Arlington County although generally it serves airplane travelers and is not particularly accessible to Arlington residents. The stop involved a one-time expense of over $1 million and the annual operating costs for the stop, which are changed to Arlington, are between $100,000 and $200,000. County roads and state highways leading to the airport receive heavy use from travelers to the airport. Also, any new construction in Arlington County which may affect radar or flight paths has to be coordinated with airport management. These are examples of direct costs which can be attributed to the presence of National Airport.

Arlington County and its citizens also bear the indirect but very burdensome costs of the air and noise pollution generated by the airport. Any new tax collections resulting from the bill I am introducing will be fair compensation for costs such as these.

Finally, the county sees no justification in having activities at the two Federal airports having different tax statuses.

This bill will not result in any additional Federal costs at National Airport. As at Dulles International Airport, or any other Federal reservation, taxes would not be imposed on Federal property or activities but only on those of private interests doing business there.

I hope that this long overdue equalization of the tax treatment of the two airports can be given expeditious and favorable consideration.●

MILITARY RETIRED INCOME EQUITY ACT

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mrs. SCHROEDER. Mr. Speaker, on Tuesday of last week I introduced H.R. 11354, the Military Retired Income Equity Act. At this time I would like to insert a section analysis of that bill that my colleagues may find of interest:

MILITARY RETIRED INCOME EQUITY ACT—BILL SUMMARY

The Military Retired Income Equity Act, or Military Former Spouse bill for short, amends Chapter 73 of title 10, of the United States Code, Sections 1447–1455, which deal with the Survivor Benefit Plan, and adds a new Subchapter III—"Former Spouse Annuity".

Subchapter III—Former Spouse Annuity

Section 1461—defines former spouse as a former wife or husband married to a military member for at least ten years. The ten year period for vesting matches recent changes made in the Social Security law.

Section 1462—Automatically entitles a former spouse married at least 10 years to a pro rata share of the retired pay of a member of the Armed Services. The exact amount of the annuity is a function of the number of years of marriage that overlap with credited years of military service of the service member and the total number of years the servicemember serves. At a maximum the annuity would be equal to 50 percent of the retired pay.

If the marriage lasted not less than 10 years then:

Annuity equals the number of years of marriage in which Members' service was credited for purpose of computing retired or retainer pay divided by total number of credited years of service of the member times 50 percent of the retirement or retainer pay.

Ex. 1 A couple is married for 10 years. Of those 10 years the Member is on active duty for 8 years which are credited toward retirement. The member eventually serves 20 years and retires. The spouse would thus be eligible for 8/20 times 50 percent of retired pay.

Ex. 2 A couple is married for 35 years. After the marriage the Member enters the Armed Forces and retires after 30 years. Subsequently there is a divorce. In this case the divorced spouse would be entitled to 35/30 times 50 percent. However, 50 percent is the maximum entitled annuity when the marriage exists throughout the period of service credited to the person for the purpose of computing retired or retainer pay.

Ex. 3 A couple is married 12 years and are divorced. Subsequent to the divorce one of the individuals joins the service, serves 20 years and retires. In this example the annuity would be 0/20 times 50 percent or $0. The spouse would receive nothing since he or she was not married to the servicemember during any years credited toward his retirement.

The annuity granted to the former spouse under the bill would commence when the member becomes entitled to retired or retainer pay, if the divorce preceded this date, or the first day of the month following a divorce, if the member is already collecting this pay.

The annuity is terminated if the former spouse dies or remarries before the age 60, the member dies and or the spouse becomes entitled to Survivors Benefits, or the member upon whose service the annuity is based returns to active duty.

Section 1463—provides that the member's retired pay be reduced by the amount of the former spouse's annuity. The importance of this section is that the reduction now takes place at the source of the payment avoiding often lengthly court fights where the obligated spouse refuses to pay court ordered divisions of retirement earnings.

The bill also amends Subchapter II of Chapter 73, Title 10 dealing with the Survivor Benefit Plan (SBP) entitling former spouses to a pro-rata share of survivors benefits. The SBP currently allows the servicemember at the time of his retirement to elect to have withheld a portion of his retired pay to fund an allotment that would be paid to his wife, dependent(s), or person with an insurable interest in the event of his or her death when retirement pay would normally cease. Survivor's benefits normally equal 55 percent of retired pay.

Section 1447—"Definitions"—paragraph 2 is amended by stating that the "base amount" on which survivors benefits are calculated is to be determined without consideration for any reductions made in retired pay through the payment of an annuity to a former spouse. A paragraph 6 is also added defining former spouse.

Section 1448—"Application of the Plan"—subsection (a) is amended making SBP applicable to persons with former spouses as well as those who are currently married and or have dependents. Under current law a former spouse is not entitled to survivors benefits.

Subsection (a) is further amended by making survivors benefits mandatory unless the member, his spouse, and his former spouse (if any) elect out of the plan. Currently the service member alone may elect not to participate in the program at the time of his or her retirement. Since many divorces precede retirement the member often has little or no incentive under current law to provide protection to a former spouse under the SBP plan.

Subsection (d) deals with members of the armed forces who die on active duty or who are qualified for retired pay but who have not started to collect it. This subsection is amended to entitle a former spouse to 55 percent of the annuity she would have been entitled to under section 1462 of subchapter III.

Section 1450—"Payment of annuity: beneficiaries"—subsection (a) clause (1) is amended making survivors benefits payable to former spouses. Survivors benefits payments to an eligible widow, widower, or former spouse are terminated if they remarry prior to age 60. If remarraige is terminated by death, annulment, or divorce, payment is resumed. However, if entitled to an annuity from a second marriage, he or she must elect which annuity to receive.

Section 1451—"Amount of Annuity"—subsection (a) is amended to provide that the survivors benefits payable to a widow or widower shall be reduced by the amount of any annuity payable to the former spouse.

The amount of survivors benefits payable to a former spouse is at a maximum 27½ percent of the members retired pay. The formula for calculating the exact amount to be awarded is the same as in Section 1462 of Subchapter III with the substitution of the 27½ percent for the 50 percent. The amount of survivors benefits awarded is effected by social security offset provisions. The annuity awarded to a widower or female former spouse with one dependent child is offset by the Social Security mothers benefit. When a widow, widower, or former

spouse reaches age 62 or there is no longer a dependent child, the monthly annuity shall be reduced by the amount of the Social Security benefits to which he or she is entitled.

Section 1452—"Reduction in retired or retainer pay" is amended by simply adding language recognizing the status of former spouses in appropriate places and by adding a new subsection (g) which provides that in the case where a former spouse is entitled to an annuity under section 1462, reductions for survivors benefits will be paid by both the retiree and the former spouse based on the ration by which retired pay is split.

Amendments become effective for those divorced and retired after enactment of this bill.●

NATIONAL LAWYERS GUILD STUDENT PROJECTS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. McDONALD. Mr. Speaker, the National Lawyers Guild (NLG) is the principal U.S. legal support group for terrorists in this country. The NLG has also provided logistical support for Soviet-backed terrorists in Europe, Latin America, the Middle East, and Asia. Last year the NLG sent two of its members, William Schaap and Ellen Ray, to serve as "observers" and ad hoc advisers at the trial of Baader-Meinhof terrorists in West Germany, after an earlier attempt to have four NLG activists—Peter Weiss, Bill Schaap, Margie Ratner, and William Kunstler—plus their front man, former U.S. Attorney General Ramsey Clark, formally join the terrorist defense was rejected by West German authorities.

The NLG has some 1,800 law student members and has developed a series of summer projects by which the student revolutionaries can use their legal training to advance revolutionary movements in the United States and overseas. This year there is particular emphasis by the NLG's leadership on placing its people in labor-related activities to back up efforts by U.S. revolutionary groups to co-opt several union efforts to organize in new areas and to further radicalize the leadership of certain "rank and file" movements.

A recent issue of the Information Digest, a newsletter analyzing U.S. political and social movements, has published an excellent article on some of these NLG student projects in the U.S. labor movement and on their work supporting economic warfare against South Africa in order to aid the Soviet-sponsored terrorist movements. I commend the article to the attention of my colleagues.

The article follows:

NLG SUMMER PROJECTS

In 1973, the National Lawyers Guild (NLG) began a "summer projects" program in which some 30 law students, under the direction of NLG attorneys, provided legal support to the United Farmworkers in California; to the American Indian Movement (AIM) in the Pacific Northwest; and to the Attica [prisoners] Legal Defense in upstate New York.

This year, claiming some 1,800 law student members (of a total membership of 4,500) in 63 active chapters, the NLG Summer Projects Committee, 1308 Broadway, Suite 704, Detroit, MI 48226 [313/963-0843], has developed fifteen projects for 1978. According to the NLG, these projects are "aimed at involving law students and legal workers in the ongoing work of important political struggles." The NLG continues:

"Although there is wide diversity among the projects, there are common purposes unifying them all. Of primary importance is the substantive legal and political support that will be provided by project members. The projects will also provide members with work experiences in alternative practice of law in a political context and the chance to work and share ideas with progressive legal people."

Funded by the NLG and the Law Students Civil Rights Research Council (LSCRRC), 52 Fairlie Street, Room 350, Atlanta, GA 30303, those taking part in the 1978 Summer Projects have been promised a minimum stipend of $1,000 and travel expenses "for those participants who could otherwise get there." As in previous years, student participants are being told to investigate the funding potential of their student bar associations and law school work-study programs.

A large proportion of the 1978 NLG Summer Projects are labor related and include:

The Brown Lung Project, organized by Candace Carraway, Brown Lung Legal Center, P.O. Box 10671, Raleigh, NC 27605 [919/833-6360]. This project is hoping to attract people with developed legal skills in the areas of workers' compensation and labor law, occupational safety and health regulations and "anti-corporate research." According to the NLG:

"* * * interns will be involved with the following general areas of work: (1) research on legal and medical-legal questions surrounding compensation, including legislative analysis; (2) corporate research on the textile industry, Liberty Mutual Cotton Incorporated, American Textile Manufacturers, connections with State Industrial Commission, doctors on 'expert panel' and so forth; (3) the decertification of the South Carolina OSHA program; (4) research on theories of liability outside the compensation statutes; (5) organizing and education with the Brown Lung groups, including training chapter members in paralegal skills."

Teamsters for a Democratic Union (TDU). The NLG's involvement with the TDU is being organized by Ted Meckler, 33 Public Square, Suite 210, Cleveland, OH 44113 [216/241-5151]. The NLG describes TDU as:

"* * * an organization of rank and file Teamster members dedicated to reforming their union so that it might better serve their membership.

"Since the fall of 1976, TDU's membership across the country grown to over 2,000 members and has emerged as an important power in several locals. TDU goals include better conditions and better representation for members on the job, in their jurisdictions, and at the national level, pension reform, and the right to vote for International officers."

Over the past two years, NLG lawyers have defended TDU members against expulsion from the union and against alleged wrongful dismissal by employers. They have defeated injunctions against "wildcat" strikes and have represented the TDU before the National Labor Relations Board (NLRB).

At this time, Meckler reports that he has only sufficient funding for two interns who are to work on two pending law suits and on the production of a handbook on union activist rights.

Texas Farm Workers (TFW). According to project organizer Alan Vomocka, 4803 Montrose, Suite 11, Houston, TX 77006, the TFW was founded in 1975 and is an independent labor union representing farmworkers living and working primarily in the Lower Rio Grande Valley in Texas and the surrounding area.

In a recent interview, Vomocka said that the TFW project is a combination of legal and community organizing, and that the parameters of the project are dependent upon what happens in the Rio Grande Valley between now and May. He said that the goals of the TFW are to build an effective union for farmworkers in Texas and to make the union a vehicle for improving the total lives of its members. He stated that 3,500 persons have signed TFW authorization cards and a number of strikes have been mounted as the union moves closer to winning contracts with growers. In addition to its organizing efforts, the TFW is working legislatively and through direct appeals to obtain political and monetary support.

The NLG project interns will participate in all phases of TFW activity. A TFW legal support office is being established in the Valley to handle criminal defense and lawsuits growing out of the TFW's activities. Also, research leading to litigation based on local labor laws and immigration law will be done. Vomocka explained that this segment of the project is involved with getting visa permits for temporary workers brought in during the harvest period at lower rates of pay.

It is interesting to note that Vomocka was most concerned with "objective conditions" in the area holding that "undocumented workers," as he termed illegal aliens, should be allowed to organize on the grounds that "as they entered the U.S. illegally and were hired illegally, it is not legally impossible for them to unionize."

Immigration Projects. The NLG's concern with "undocumented workers" is reflected by their Willamette Valley Immigration Project, the Red River Valley Project, and the Oficina Legal del Pueblo Unido of the Lower Rio Grande Valley.

Phil Hornick of the Willamette Valley project in an interview last week made it plain that the NLG's long range goal was to "expose the repressive and blatantly illegal activities of the Immigration and Naturalization Service through test cases and appeals." He said, "INS relies on terrorizing people through their ignorance. INS acts as a check on farmworkers militancy and prevents workers from supporting the struggles of their coworkers for decent wages and decent working conditions."

Southern Africa Project. Associated with the NLG International Committee, the Southern Africa Project is being organized by Emily DeFalla, 819 Eddy Street, San Francisco, CA 94109 [415/771-6174] who is a member of the Southern Africa Subcommittee.

According to the NLG, "The goal of the Southern Africa [Sub] Committee is to educate Guild members around the current political situation in Southern Africa and to guide the Guild into participating in ongoing campaigns to end U.S. involvement with the racist and repressive regimes there."

The project is to produce a resource booklet on Southern Africa which will include a political analysis of the current situation and a listing of ongoing efforts—legal and direct action—toward influencing the situation there. The major goal of the booklet will be to provide an in-depth assessment of current legal-political campaigns to end U.S. involvement in southern Africa, such as the campaign against U.S. investments, and will include such items as sample legal pleadings and copies of the relevant statutes.

According to coordinator DeFalla, the interns will compile and analyze information on activities such as the campaigns to boycott sales of the Krugerrand, the campaign to stop investments in southern African companies, and medical relief work. A second but major aspect will be organizing anti-South African projects among bar associations, stu-

dent bar associations and other legal groups. This project is working closely with the National Conference of Black Lawyers (NCBL) and the American Committee on Africa (ACOA).

Other projects planned for the summer of 1978 are:

Affirmative Action Summer Project II—[Coordinator: Jack Hartog], c/o NLG D.C. Chapter, 509 C Street, N.E., Washington, D.C. 20002 [202/547-0880].

Oficina Legal Del Pueblo Unido—[Coordinators: Jim Harrington and Tony Gomez], P.O. Box 1493, San Juan, TX 78889 [512/787-8171].

Menominee Legal Defense/Offense Committee—[Organizer: Phyllis Girouard], P.O. Box 431, Keshena, WI 54135 [715/799-3667].

Gay Parent Project—[Coordinators: Nancy Shilepsky and Holly Ladd], 134 Cushing Avenue, Dorchester, MA 02125 [617/282-1778].

Red River Valley Project—[Coordinator: Tom Barrett], Migrant Legal Services, 370 Selby Avenue, St. Paul, MN 55102 [612/222-5863].

Seattle Unemployment Representation Clinic—[Coordinator: Molly Cohan], 1205 Smith Tower, Seattle, WA 98104 [206/622-5845].

Willamette Valley Immigration Project—[Organizers: Larry Kleinman and Phil Hornick], 519 S.W. 3rd St., Room 418, Portland, OR 97704 [503/222-3906].

ACORM—[Coordinators: Steve Bachman and Andy Weltchek], 628 Barrone, New Orleans, LA 70113 [501/376-7781].

Yurok Project—[Coordinator: Murray MacNeil], 1505 J St., Eureka, CA 95501 [707/445-2566], or P.O. Box 366, Hooper, CA 95546.

Denver Police Crimes Project—[Coordinator: Jay Breese], 1100 Cherokee St., Denver, CO 80204 [303/893-5471].

National Office Collective—[Coordinator: Betty St. Clair], 853 Broadway, Room 1705, New York, NY 10003 [212/260-1360].

NOTE: Reports on these projects will be appearing in future issues of the ID.●

THE VOICE OF AMERICA

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. MICHEL. Mr. Speaker, James Reston, columnist of the New York Times, recently wrote the following about the official international broadcasting service of the U.S. Government, the Voice of America:

This may seem like an extreme statement, but for detailed accounts of the world news, I believe there is nothing on the commercial networks of the United States that equals (the Voice of America's) performance.

That is high praise indeed coming from such a distinguished columnist. But I do not believe it is exaggerated or extreme. The Voice of America, contrary to the view of its uninformed critics, is not a blatantly propagandistic cold-war relic, but a low-key, intelligent, persuasive, and informative broadcasting service, highly esteemed and widely listened to by the influential audiences of many nations throughout the world.

I am glad to have the opportunity to pay tribute to this great organization by placing in the RECORD at this point, "The Voice of America", by James Reston, from the New York Times, March 12, 1978:

THE VOICE OF AMERICA

(By James Reston)

DAMASCUS, SYRIA, March 11.—In the struggle over the Middle East, Washington's official overseas radio service, the Voice of America, is in the center of a ceaseless propaganda battle. And since its work is now under review and even attack by some members of Congress, a report from the field may be in order.

In the last three months, I have listened carefully to its English language broadcasts in such diverse places as Japan, Australia, Tahiti, West Germany, Yugoslavia, Italy, Egypt, Jordan, and here in Syria. This may seem an extreme statement, but for detailed accounts of the world's news, I believe there is nothing on the commercial networks of the United States that equals its performance.

The Voice may not be quite as effective in the Middle East as the BBC, which produces a clearer signal from the island of Cyprus than the Voice does from its relay transmitter on the island of Rhodes off the coast of Turkey, but it has more reporters in more places than the BBC, and like the BBC, it has learned over the years that the best propaganda is an honest account of the facts.

Two technical improvements have increased its authority: New, modern transmitters, carefully placed in strategic places around the world, have extended its reach, and new shortwave radio receiving sets, comparatively inexpensive and no bigger or heavier than an average paperback book, are now coming on the market from Japan and reducing those hideous squeaks and howls that discouraged shortwave reception in the past.

Moscow Radio has held its own and more in the technical broadcast race. It comes over every shortwave channel loud and clear, from more transmitters and with more programs, but it has two problems. This propaganda battle is not directed primarily at the general public, but at the educated elites, and one of the most important facts of international life today is that English has established itself as the language of the modern intellectual and commercial world. Even here in Syria, which was dominated by France for many years, English is clearly the second language of the people who influence public opinion.

The Soviet broadcasters have another problem. They don't broadcast news to the elites who listen and think, but beam outrageous propaganda at the boobs, who don't listen. Soviet Ambassador Anatoly Dobrynin, who is so genial in his arguments for détente and a reduction of tensions between Washington and Moscow, should listen sometime to this intellectual garbage coming out of Moscow. The way they muck-rake America, night and day, is an international scandal, and fortunately, the more they spread it, the less it is likely to be believed.

Maybe when they talk to Africa in the dialects—and they are talking to Africa these days as if it were the dominant center of world politics—they are believable, but when they are talking to opinion-makers in English, they claim to have the answer to all the problems of countries whose names they can't even pronounce.

The Voice of America is quite different. It is very cool. It says here is the news, and even Walter Cronkite wouldn't be ashamed to read it. The coal strike in the United States is reported in detail, including the threat of the miners to defy President Carter and the Taft-Hartley Act. The decline of the dollar on the money markets of the world, and the latest rise in food prices are reported, along with the new technical and scientific inventions in the United States.

Anybody who has been listening here to the Voice of America in Damascus in the last few days knows all about the forthcoming meeting of President Carter and Prime Minister Begin of Israel at the White House, and the debate in America about what the President should say to him.

The press is censored here, but people know by radio about the latest news out of Paris on the French elections, the efforts to reach a compromise in the war between Ethiopia and Somalia, and what Ian Smith said about going to a conference to reach a final settlement in Rhodesia. And they hear the latest song hits out of Broadway and Hollywood, not only from the Voice of America, but from Radio Moscow, which has learned that most people are more interested in America music than news from anywhere.

The Voice of America performs another service. In the last generation, with the development of large multinational corporations, tens of thousands of young American executives have gone abroad with the educated wives and children, not only in commerce but in the official foreign service. The Voice is a link to home for these people, particularly the wives, who are having trouble finding independent jobs and lives abroad.

It is a costly service, which is what worries the Congress. It is an honest service, reporting our national failures as well as our virtues, which also troubles those who want it to produce nothing but propaganda. But heard over here, a long way from home, it seems worth the money and even makes you proud.●

NITRITE IN MEAT CURING: RISKS AND BENEFITS—PART VI

HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. WAMPLER. Mr. Speaker, since March 7, I have daily presented to the House what I consider important scientific and technical information against proposed action by Ms. Carol Foreman, Assistant Secretary of Agriculture for Food and Consumer Services, to ban the use of nitrites and nitrates in curing bacon and other processed meats.

The last chapter of the Council for Agricultural Science and Technology (CAST) Report deals with the consequences of unavailability of nitrite for meat preservation.

The fifth chapter of the CAST report follows:

CHAPTER 5.—POSSIBLE CONSEQUENCES OF UNAVAILABILITY OF NITRITE FOR MEAT PRESERVATION

ECONOMIC CONSEQUENCES

Discontinuing the use of nitrite in meat processing would have a profound effect on products offered to consumers. Most of the seasonal, regional, and ethnic variation in the meat we eat comes from our heritage of processing traditions. Most of the pork produced is cured with nitrite—60 percent based on evidence in Table 2. which applies to federally inspected meat. The proportion is lower in processed poultry and beef, but is still significant. Discontinuing use of nitrite would cause some products to disappear, while others would lose much of their traditional flavor and color. As pointed out by the Food and Drug Administration (1972), "Without nitrite, bacon is salt pork, frankfurters are bratwurst (fresh uncured sausage) and ham is salty warmed-over roast pork. . . ."

The value of product variety or of possible

loss of individual consumer products cannot be assessed with great accuracy. Although many products would be affected if nitrite use were banned in meat processing, the economic implications for bacon are discussed here as an example because of the special concerns surrounding this particular product. About one-sixth of the hog carcass goes into bacon.

TABLE 2.—MEAT PROCESSED IN THE UNITED STATES IN 1975 (UNPUBLISHED USDA ANALYSIS)

Item	Thousands of pounds of carcass weight				
	Beef	Pork	Other	Edible offal	Pork containing nitrite
Placed in cure:					
Beef	290, 413				
Pork		3, 364, 040			3, 364, 040
Other			8, 996		
Smoked and/or dried:

Total production	23, 976, 000	11, 503, 000	1, 285, 000		
Processed as a percent of production	33. 38	74. 13	43. 81		60. 10

In 1977, consumers purchased about 1.7 billion pounds of bacon. With prices in the vicinity of $1.60 per pound, bacon was about a $2.7 billion industry in 1977. This is indicated by the area enclosed by the large rectangle in Figure 1. If bacon were taken off the market, consumers could not buy the $2.7 billion worth of bacon, but they could take the same money into the market and buy other products of equivalent value. We know, however, that some consumers value products above current market prices because they continue buying when prices rise. This reservoir of value consumers receive above the price they pay for products is called "consumer surplus" and is represented by the area under the demand curve but above the price quantity rectangle.[2]

Studies of bacon demand give an elasticity coefficient of about −0.6 (Duewer, undated) which implies a particular slope of the demand curve at the intersection of current price and quantity. It is likely that the demand structure curves up to the left as quantities decline, as shown by the broken curved line in Figure 1. Although we have no studies of the upper reaches of the demand schedule, we obtain a conservative estimate of the consumer surplus by extending leftward to the price axis a straight line with the slope indicated by the elasticity coefficient (−0.6) at the intersection of the current price and quantity. This procedure produces a triangle lying directly above the large rectangle in Figure 1. The area of the triangle corresponds to a $2.25 billion level of surplus value consumers receive above what they pay for bacon. This conservative estimate is probably as close as we can come to identifying the economic value to consumers of this one product.[3] Although the $2.7 billion spent for bacon could be spent for something else, the $2.25 billion reservoir of value would be permanently lost if bacon were unavailable.

In addition to the consumer's loss, losses would be incurred by farmers and the processing industry. About 45 percent of the $2.7 billion income from the bacon industry goes to farmers. Since the parts of the hog carcass going into bacon would find their way into other products, the farmers would not lose this entire amount but only about $700 million.[4] This loss of demand would be permanent, however. The processing industry would lose the $1.5 billion market entirely. Plants and people would have nothing to do. Some other higher value consumer products might emerge in the future, but many firms currently specialized to processed meat products (as we now know them) would very likely go bankrupt. Large diversified firms would not fare so badly.

The magnitudes of the losses to consumers, farmers, and the food industry in this one product would be multiplied several times if nitrite were discontinued in all processed meats. The magnitudes would be several billion dollars in each sector, and much of the cultural heritage expressed in food habits would be lost The hog/pork sector would be most affected. With the disappearance of much of the market for specialized processed products—bacon, hams, picnics, and some sausages, hog prices and production would go down. In addition to a long-term loss to farmers, the economy would lose certain medical products which are by-products of the hog/pork industry. These include heparin (used for preventing blood clots), insulin (used to treat diabetes), ACTH (used to treat arthritis), thyroxin (used for thyroid disease), and several others.

Economic values cannot easily be placed on the several consequences, including the loss of product variation, medical by-products, and the impact on the structure of the food industry. Conservative estimates put the total loss in billions. Those most affected would be consumers. The disruption of a complex industry is also a major consideration.

POLITICAL CONSEQUENCES

A number of the substances withdrawn from the food supply have been additives only recently coming into use and serving minor functions for which several alternatives were available. Withdrawal of those substances—such as Red No. 2 and cyclamates—have had little effect on product variety available to consumers. Despite industry complaints, there has been general popular support for these initiatives.

The implications of withdrawal of nitrite would be very different. The entree of a good many American meals is a consequence of the long tradition of successful use of nitrite in the preservation of our meat supply. As is true of other substances that have been withdrawn, the magnitude of the hazard to health is not discernible by the general public. Unlike previous actions to withdraw substances used by the public, however, the effect of withdrawal of nitrite on product availability and quality would be directly observable by consumers.

Although food business leaders and some lobbyists make an early entry into the debate about regulatory matters of this sort, many consumers are as yet unaware of the possible withdrawal or its consequences. Moreover, it is not feasible for consumers in general to make an active response to proposed changes in the many consumer goods available in the market place. Nevertheless, withdrawal of nitrite would assuredly incite among consumers a widespread political reaction commensurate with the profound economic losses associated with the withdrawal. Withdrawal of this substance without a careful and publicly convincing weighing of consequences could injure regulatory credibility sufficiently to make adoption of future proposals of significance to food safety more difficult to achieve.

PUBLIC HEALTH AND OTHER CONSEQUENCES

Withdrawal of nitrite would reduce the formation of nitrosamines in bacon and would reduce the exposure of the population to one suspected cause of cancer. Because

[2] A discussion of this concept and a good bibliography are given in the paper by Mann (1977).

[3] It is conceivable that products which might replace bacon and use the pork belly would also have consumer surplus values—which gain should be balanced against the identified loss. Such preferences and consumer values would have to be built up over time and would probably cost society (and consumers) large sums in advertising. The more immediate expectation is for the bellies to go into products with more elastic demand (a flatter demand curve with less consumer surplus) and probably to lower their value, both in terms of nutrition and consumer preference.

Figure No. 1 not included.

[4] This estimate uses unpublished calculations developed with the help of meat industry economists.

there is currently no evidence that nitrosamines have produced cancer in humans in the United States, the public would have no way of evaluating the degree or amount of benefit associated with the proposed withdrawal of nitrite. On the other hand, since nitrite is used as a significant part of the current program for controlling food-borne disease, its withdrawal would increase certain health hazards, in particular the risk of botulism and other types of food poisoning. Botulism can usually be traced to the source, and the consequences of the decision that precipitated the additional deaths would hence be publicly evident because there are so few deaths from this cause at present. As indicated in Chapter 3, there were only 5 U.S. deaths from botulism in 1976, all traced to fish.

The alternative meat products that would emerge in the absence of nitrite or other means of preservation would have decreased shelf life. These products, as well as posing health hazards, would have a greater tendency toward unpleasant tastes and ordors from rancidity.

Meat could be preserved by use of more salt. If the use of salt were increased to levels necessary for preservation, however, the resultant increased intake of salt would increase the risk of circulatory disorders that are aggravated by high-salt diets.

Freezing, a valuable alternative means of preservation, is already used to some extent. Although industry could accommodate the additional burden of freezing products that are now cured and only refrigerated, freezing would increase the cost of our food supply in terms of both dollars and energy use.

Drying, another alternative, is appropriate for some types of products that are more or less dried, but drying would not be suitable in general because it would severely alter the characteristics of the products. Although radiation has not yet been approved by the Food and Drug Administration as a means of meat preservation, it appears to be a valuable potential supplement to curing but not a substitute for it because cured and radiation-sterilized products do not taste the same.●

THE BUDGET DEFICIT

HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. VANIK. Mr. Speaker, yesterday the administration disclosed that the 1978 budget deficit will be $53 billion and not the $61.8 billion deficit predicted last January or the $60 billion deficit predicted last month.

As recently as February 27, 1978, the Treasury officials requested an extension of the debt ceiling to $781 billion for 1978 and to $871 billion for fiscal 1979.

The news that the 1978 deficit will be $8.8 billion less than Government estimates of only several weeks ago is shocking good news.

However, I am also shocked that Congress did not have this vital information before it considered debt ceiling legislation last week. There is a wide credibility gap on the availability of public information.

As a legislator, I feel insulted to learn about a $8.8 billion error in the 1978 budget deficit estimate. Those in Government who erred in advising the Congress should not be permitted to repeat their mistake.

It is high time that the Congress have its own computer system to provide instant information on Government receipts, Government expenditures and the status of the Federal deficit and debt on a daily basis.●

HEW STERILIZATION REGULATIONS

HON. ROBERT A. YOUNG

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. YOUNG of Missouri. Mr. Speaker, in December, the Department of Health, Education, and Welfare proposed new regulations on Government-funded sterilizations. The public comment period on these proposals will end this week.

I am entering in the RECORD the testimony presented to HEW by Allan Chase, the noted author and lecturer. Mr. Chase has displayed considerable knowledge of the issue of sterilization abuse through various articles and his book, "The Legacy of Malthus." His testimony on these proposals should be useful to my colleagues in judging the final regulations:

HEW STERILIZATION REGULATIONS

(By Allan Chase)

Most of the proposed regulations are light years ahead of all previous HEW guidelines. The anonymous physicians, lawyers and other HEW staff professionals who helped prepare them deserve the thanks of the nation.

The proposed new 30-day waiting period between the patient's consent to be sterilized and the time of surgery—taken from the paradigmatic New York City hospital and municipal laws—offers far more realistic protection against sterilization abuse than does the present HEW-mandated 72-hour waiting period

The unconscionable practice of eliciting a woman's consent to be sterilized after she is admitted to a hospital for childbirth, or is in labor, or under sedation for labor pains, will—under the new regulations—be expressly prohibited These practices are now among the most common forms of sterilization abuse—particularly in women who because of educational or linguistic deficits, or cultural differences, cannot under these stressed conditions always understand what is being proposed to them.

The funding of hysterectomies for the primary purpose of sterilization is expressly forbidden under the new regulations. This is a long overdue medical and ethical reform.

The 1974 court-ordered moratorium of federal funding of sterilizations of adolescents and children—yes, children—under age 21 is made permanent in the new regulations.

However, the other equally significant 1974 moratorium, on the government funding of sterilization to all mentally incompetent people, is now jeopardized by the new HEW proposal to consider "alternatives" that would justify the sterilization of mentally incompetent people, on the scientifically absurd supposition that people who are mentally incompetent in terms of learning and earning might nevertheless have the mental competence to make medically informed decisions about irreversible sterilizing operations.

There are many sound reasons why these alternatives should not even be considered. One of them was offered on March 30, 1905 by the Governor of Pennsylvania, Samuel W. Pennypacker, in his message vetoing Senate Bill No. 35, which called for the state sterilization of patients in state mental hospitals. Wrote Governor Pennypacker:

"To permit such an operation would be to inflict cruelty upon a helpless class in the community which the state has undertaken to protect."

Other American governors, in subsequent veto messages, raised similar objections. For example, Nebraska's Governor, John H. Moorehead, vetoed a 1913 eugenic sterilization bill on the grounds that "to prevent the procreation of certain classes of criminals and feeble-minded (mentally retarded) and other defectives" resident in state institutions was "more in keeping with the pagan age than with the teachings of Christianity. . . . Mutilating the human body, either as a punishment for crime or as a preventive thereof, is drastic in the extreme and there is grave doubt in my mind if it does not violate Section 9, Article 1, of the Bill of Rights, which prohibits cruel and unusual punishment."

Governor Moorehead's veto message lives as a stark reminder that the world sterilization movement was started in 1891 by Francis Galton, father of the pseudoscientific cult of eugenics. The eugenicists, and the legislators who accepted eugenics propaganda as scientific facts, claimed that mental retardation (then called feeblemindedness) was the chief cause of most crimes, and that epilepsy was the major cause of most crimes of violence. Since eugenics held that both mental retardation and epilepsy were hereditary, and therefore genetically transmissible to one's offspring, the forced sterilization of people with both conditions was seen as the only way to fight crime in the streets.

Today, we know that neither mental retardation nor epilepsy are either hereditary or causes of crime. By the definition of the American Association on Mental Deficiency, adapted in 1959, "Mental retardation refers to the subaverage general intellectual functioning *which originated during the developmental period* and is associated with impairment in adaptive behavior." As Harvey A. Stevens, director of the State of Wisconsin Bureau for Mental Retardation, observed in 1974: "The (AAMD) definition recognized that mental retardation is now viewed as a *reversible* condition. This is a departure from the classical and historical concept of 'once mentally retarded always mentally retarded' "

The eugenic sterilization laws passed between 1907 and 1939 in 30 states and Puerto Rico were, in the spirit of Galton and the American eugenicists, designed to punish the poor for suffering from the mental and physiological pathologies of poverty. The HEW 1974 moratorium on further federal funding of the essentially punitive sterilization of mentally incompetent individuals mandated an end to much of this eugenic aggression on the gonads of the poor. It should now be followed by the U.S. Supreme Court's ruling that the many still-in-force state eugenic sterilization laws are unconstitutional—and not by even considering the restoration of the barbaric eugenic ritual of sterilizing mental retardates.

The weakest portion of the new regulations are those dealing with the realities of informed consent, and the monitoring and enforcement of the new regulations.

Under the effective New York City laws and regulations, which call for non-physician as well as physician-counseling of putative sterilization patients, professionally trained sterilization counselors have at least 30 days to make certain that patients understand the risks and benefits of sterilizing operations. Not only do surgeons lack the time required

to properly counsel sterilization patients, but they are also not trained in the special different cultures, that such pre-surgery counseling demands. Even English-speaking poor people are, culturally, often radically different than surgeons.

Phyllis Paxton, R.N., M.N., probably our leading authority on sterilization counseling, recently observed: "When sterilization counseling is done only by the physician who performs the operations the results will be no different than they are today." That is, we would still be confronted with the absence of truly informed consent in most federally-funded sterilizations. Uninformed consent is more than deceit: sterilization of the uninformed or misinformed is, of course, coerced or forced sterilization.

It is time to make informed consent a reality, rather than an empty phrase, by incorporating into the new regulations the requirement for meaningful sterilization counseling, by counseling professsionals. This would not eliminate the equally important need for physician-counseling, but it would make it more comprehensible to the average HEW funded sterilization patient.

In regard to monitoring and enforcement, the new regulations say nothing substantially different than the present regulations. The lack of proper monitoring and enforcement has led to the notoriously universal non-compliance with present regulations. The continued absence of realistic, properly staffed and funded mechanisms for both the monitoring and enforcement of the fine new regulations will guarantee the continuation of one of the most pernicious forms of sterilization abuses; the widespread flouting of the HEW regulations written to prevent them.

Serious enforcement of the new regulations will cost a great deal of money. Fortunately, under the new guidelines, which would end the present HEW-funding of hysterectomies for the purpose of sterilization, the government would save at least $90 million per year if this new regulation is seriously enforced. It would cost far less than even one year of these savings in tax dollars to fund at least ten years of effective monitoring and enforcement of the new regulations.

One final observation: irreversible surgical sterilization is rarely ever, a medically *necessary* operation. According to Joseph E. Davies, M.D., Past President of the Association for Voluntary Sterilization, Inc., "there are really no medical indications for sterilization." (Personal Communication, November 30, 1977). Other physicians consider coronary and other underlying conditions that would endanger the life of a woman to be medical grounds for therapeutic abortion and sterilization.

Nor is sterilization at all necessary for population control. Between 1820 and 1976, the U.S. live birth rate has dropped from an estimated 55.2 per 1000 population to a verified 14.8 in 1975. Between 1880 and 1936, the live birth rate fell from 39.8 to 18.4. These great declines in live births all occurred when such contraceptives as were available were far less effective than our present array of non-surgical contraceptive technologies, and long before the post-World War II mass hysteria about population bombs gave the hitherto frankly punitive sterilizing operations of the poor their new facade of respectability.

Neither our modern contraceptives, nor sterilizing operations, were able to prevent the predictable and contiguous post-World War II and post-Korean War spurt in starting delayed families, which caused a slight but exceedingly temporary increase in our live birth rates. Neither contraceptives nor sterilizations were the principal causes of the subsequent equally predictable long-range precipitous decline in the U.S. live birth and fertility rates, which started around 1957 and have led to our present all-time low and zero population growth levels.

Irreversible surgical sterilization is neither a demographic nor a family-planning necessity. Sterilization might well be perceived by many people as being more convenient, and therefore more desirable for themselves than reversible and non-surgical techniques of contraception. Convenience and sexual pleasure, however, are not quite the same as social, medical and personal fertility-control imperatives. Nor is surgery for sterilization quite as free from immediate and long-term postoperative risks as most sterilization zealots would like to believe.

Where federally-funded sterilizing operations are concerned, this is a time for prudence, based on the truly informed consent of putative sterilizers, and not for the present rush to what are only too often coerced sterilizations. Poverty is not a crime of individuals against society, and does not call for such punishments as sterilization abuse of poor individuals by an affluent society. The fact the people are medically indigent does not make their human and legal rights any less absolute than those enjoyed by people who can afford private medical care.●

"ONE HUMANITY" IS THEME FOR PHILADELPHIA PROGRAM

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. EILBERG. Mr. Speaker, on Monday, March 13 some 60 seventh graders from Philadelphia's archdiocesan schools and public schools joined with Mayor Frank L. Rizzo in the first of a series of programs entitled "One Humanity."

Sponsored by the Philadelphia Commission on Human Relations, the unique program ultimately will involve students in 12,000 classrooms across the city.

At the city hall ceremony, Commission Chairman Clarence Farmer welcomed the youngsters and introduced the mayor. Mr. Rizzo then read from the text of a special "One Humanity" scroll:

All people everywhere are brothers and sisters. We are all members of one human family. We all need food, clothing, and shelter. We all have feelings. We all need love, friendship and the respect of others. And we all understand that the only way that we can have these things for ourselves is for us to help to give them to others.

Our City . . . our Nation . . . the world belong to each one of us. The only way we can make our city, our Nation, and the world better is for us to make ourselves into the best people that we can—caring people, educated people, hardworking people. This is what we must do to help others. This is what we must do to help ourselves.

Following the reading, the youngsters signed the scroll to demonstrate their understanding that all people are part of a single human family. They each received a handshake from the mayor, along with a "One Humanity" lapel pin.

This program is the kickoff for a series of events leading up to Human Rights Day, March 30, when, in classrooms around the city, teachers will read aloud from the "One Humanity" scroll, and will display the scroll.

School participation has been arranged through Philadelphia School Board President Arthur Thomas, and Superintendents Michael Marcase and Monsignor Francis B. Schulte.

Another Human Rights Day observance on March 30 will see a noontime luncheon and the awarding of certificates by the Human Rights Commission to 20 Philadelphians whose volunteer work helped improve harmony among Philadelphia's religious, ethnic, and racial groups.●

GOLD CONTRACTS—USEFUL FOR DOCTORS?

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. McDONALD. Mr. Speaker, Prof. Hans Sennholz wrote a very thought provoking article on the possible future use of gold for doctors and others that appeared in Private Practice magazine for January 1978. In this article he discusses how and why various people may turn to gold to offset the ravages of inflation and paper money. Certainly history is on his side. The more some of the so-called financial wizards here in Washington try to make gold go away, the more substantial a role it appears to play. I commend the article to the attention of my colleagues:

GOLD CONTRACTS USEFUL FOR DOCTORS?

Most economic legislation limits individual freedom and increases government power. National Health Insurance is just one example. But once in a while the opposite is true.

On Friday, October 28, 1977, President Carter signed such a bill. It stated that the joint resolution of June 5, 1933, which forbade gold ownership and gold-clause contracts, shall not apply to obligations entered into after the date of enactment. The individual freedom to buy and own gold was restored on January 1, 1975. Now Americans can again enter enforceable contracts calling for payment in gold or dollars payable in gold.

US Treasury officials are quick to say that this step further "demonetizes" gold and makes it just another commodity.

There are others, however, who sense that the implications of this new freedom are much broader than government officials are admitting. They think it might give birth to a new gold standard and restore integrity to the dollar.

We agree, provided gold clauses begin to be widely used. A wide use of gold in contracts would greatly advance the importance of gold. It could conceivably lead to a rush to gold, which could force the monetary authorities to halt the depreciation of the dollar.

What are the chances of such a wide use?

CREDITORS WANT GOLD, DEBTORS FEAR IT

In American loan markets, the prospects for a return of the gold contract are slim. Certainly, all creditors who are aware of the redistributive effects of inflation, the losses suffered by creditors and the gains reaped by debtors, would like to write a gold clause into their contracts, i.e., a provision calling for payment in a stipulated quantity of gold or a stipulated number of dollars at the option of the creditor. The bond or mortgage holder, the owner of a life insurance policy

or pension fund would love to see his claim based solidly on gold.

Under present conditions debtors, however, could not be expected to enter such contracts. The inflation that is ravaging the U.S. dollar is likely to increase the dollar price of gold, which would induce creditors to demand payment in gold, or a dollar amount based on the rising price of gold. A $15,000 mortgage loan with a gold clause stipulating payment of 100 ounces of gold could quickly become a $30,000 mortgage if gold rises from $150 to $300 per ounce. Who would take such risks if mortgage money is still available at nine percent without a gold clause?

American financial institutions, especially commercial banks and savings and loan institutions, are captives of government regulations. Government monetary authorities do not want gold to replace the U.S. paper dollar. Therefore, institutional lenders seeking borrowers will continue to make paper dollar loans. In fact, since government regulation and legislation make it difficult for them to hedge against inflation by investing in real estate, business property, and other real goods, they have no choice but to make paper dollar loans. They do this at interest rates that may not even cover the depreciation losses. In short, as long as financial institutions continue to serve the capital market with paper money loans, and do so at bargain rates of interest, borrowers will shun any and all loans with a gold clause.

Even if American banks were free to write gold contracts, probably not many would. A single bank competing with many others could not go it alone, if it wanted to stay in the banking business. If one out of four banks in my city were to insist on a gold clause, the borrowers would patronize the other banks only. Competition would force the gold-clause bank to fall in line with the others.

In general, financial institutions acting as creditors may favor the gold clause. As debtors of their depositors, however, they could not possibly enter into gold contracts without the gold protection as creditors. The same is true with every individual. As a college professor I would love to have my pension anchored in gold; as a mortgagor of my home, I would run a mile to get away from a gold clause—unless my college salary were based on gold. And the college trustees cannot write salary and pension contracts in gold—unless tuition and other college income are based on gold. As a landlord I cannot submit to a gold contract when I borrow the capital for the purchase of an apartment house—unless all rents are paid in gold. And even if I were able to find tenants willing to sign such leases, I would be afraid of future rent control which could supersede the gold contracts.

GOVERNMENTS PREFER FIAT MONEY

Government can, and will, subvert the popularity of gold clauses through income taxation. The $15,000 loan that is payable in gold now worth $30,000 is yielding a $15,000 profit, in the eyes of the Internal Revenue Service. But what is the use of a gold clause if its protection is abridged by an income tax on the paper dollar difference, which in reality constitutes no income at all, but merely a return of the original capital?

All such considerations are based on the assumption that the American capital market continues to function satisfactorily with paper money. But in the coming years of double-digit inflation, capital markets may languish and ultimately disintegrate in a flood of government money. When creditors finally refuse to make paper money loans because inflation is inflicting unbearable losses, will gold then shine again as the only money that can restore the capital markets? The answer is yes—provided government steps out of the way, the financial institutions then hovering on the brink of bankruptcy are set free from all contractual restrictions, the IRS is restrained from swinging its tax ax, and the price wage, and rent controllers are sent into permanent retirement. Without such a restoration of freedom, the role of gold as a medium of exchange in capital transactions may be disappointingly small.

This is not to deny that gold may play a growing role in the coming years of rampant inflation. A government that is resorting to massive deficit spending and currency inflation may, in desperation, apply comprehensive price and wage controls, which inexorably cause shortages. At that time, gold and silver coins may reappear as the only honest money in exchange for goods and services. In black markets, especially, gold and silver will function as the primary money.

HEDGING IS EXPENSIVE

It is conceivable that desperate borrowers may then consent to gold contracts. But to guard against soaring dollar obligations based on a given quantity of gold, such borrowers would be well advised to hedge against the soaring dollar price of gold. They would need to safeguard their interests through purchases of gold in the futures market. But with rapidly depreciating paper money, such contracts would be very expensive, in fact, too expensive to justify many loan transactions. Even today, a one-year gold clause loan would cost the hedger $13.40 per ounce of gold, which is the difference between today's spot price of gold ($163) and the futures price ($176.40) one year from today. To prepare for gold payment one year hence, the borrower would need to purchase a cover now, costing him a premium of 8.2 percent in addition to the interest on the loan and the margin he would have to meet. During rampant inflation, interest rates would soar as would the premium of future gold over present gold and the margin requirement. In short, a gold clause, even with the proper safeguards of hedging, would be very expensive to borrowers.

Fifteen years ago the French government offered a bond that was pegged to the price of gold. The interest rate was very low, but the gold price rose so much in the intervening years that the government is now paying a multiple of what it originally raised. As a result, the French never issued another gold-pegged bond.

THE WORLD NEEDS HONEST MONEY

And yet, we believe in the future of gold as the only honest money. For 2,500 years it has been man's most reliable money, and will return triumphant after the present rash of government fiat money has come to an end. It may not return to Americans first; we face too many institutional obstacles and the U.S. dollar is still functioning, despite inflation. But gold may soon make its appearance in international transactions that are free of U.S. government control. If the oil countries were to demand a gold clause in their contracts with industrial countries, the situation would be quite different.

This may not happen, but we do know that the age of deficit spending and currency depreciation will come to an end. When it finally does, man's money of the ages, gold, will play a vital part. When all other protection is wanting, it will afford new hope and a new foundation. It is honest money, which is the best money.●

SELF-SERVING HYPOCRITICAL STUPIDITY

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. MICHEL. Mr. Speaker, I think we would all agree that David Broder of the Washington Post, James R. Dickenson of the Washington Star, and Aldo Beckman of the Chicago Tribune are three of the most distinguished and respected political reporters in the Nation. When these three agree, it is worthwhile for all of us to listen to what they have to say.

It so happens that Broder, Dickenson, and Beckman have written columns condemning the majority's attempt to change the rules of the game by amending the Federal Election Campaign Act.

Dickenson, not noted for overstatement and universally respected for his insight into political questions refers to the "egregiously self-serving, hypocritical stupidity of the House Democrats attempt to cut back the amount of money the political parties can contribute to the House of Representatives races." That has a nice ring to it, do you not think? After such eloquence anything I might say would be anticlimactic.

At this point I want to insert in the RECORD: "Changing the Rules in Mid-Game" by James Dickenson, Washington Star, March 13, 1978; "Changing the Rules or Stacking the Deck," by Dave Broder, Washington Post, March 8, 1978; and "This Bill Confuses Everyone," by Aldo Beckman, Chicago Tribune, March 12, 1978:

[From the Washington Star, Mar. 13, 1978]

CHANGING THE RULES IN MID-GAME

(By James R. Dickenson)

It is almost inevitable in politics that a landslide victory for a presidential candidate guarantees him a swift journey down the road to disaster.

We all remember what happened to Richard Nixon after his 1972 landslide. Lyndon Johnson parlayed his victory in 1964 into disaster in Vietnam and Franklin Roosevelt was sufficiently emboldened by his 1936 landslide to try to pack the U.S. Supreme Court, which resulted in his worst political humiliation.

The same rule must apply to parties that win overwhelming legislative margins. It does if the Democrats who hold 2 to 1 margins in both houses of Congress are any example.

There have been few matches lately for the egregiously self-serving, hypocritical stupidity of the House Demorcats' attempt to cut back the amount of money the political parties can contribute to House of Representatives races.

It ought to outrage everybody because it is such a blatant attempt to change the rules of a game the Democrats are losing while it's still going on. It calls to mind the late Hubert Humphrey's challenge of George McGovern's narrow victory in the 1972 California presidential primary.

That was the last time the California primary was winner-take-all, before the Democratic party's reform rules abolished winner-take-all. Having run hard to win that big bloc of delegates, Humphrey then challenged the outcome on the grounds that it

violated the intention of the proposed reforms.

The gross unfairness of that was outrageous and so is this. The Republicans have raised $6.2 million for their congressional war chest compared to only $1.5 million by the Democrats.

So, without warning or public hearings the Democratic House leadership last week sprung their bill, which would cut the total amount the national parties and the congressional campaign committees could donate to their candidates in primary and general elections from $32,300 to $7,500.

The Democrats ought to be wondering instead why they aren't raising as much money. The Republicans accused them of trying to "buy out the two major political parties" and of being "hogs."

The point is well taken. The Republicans are at a 147 to 288 disadvantage in the House and on the short end of a 38 to 62 split in the U.S. Senate. The Democrats occupy the White House, have 37 governorships and control both houses of the state legislatures in 35 states.

This apparently isn't good enough for a man as partisan as House Speaker Tip O'Neill, who reportedly is livid over Republican victories in four special House elections this year. He and whoever cooked up this bill ought to be ashamed of themselves instead.

They ought to be ashamed of their hypocrisy, too. They contend that this move and their attempt to pass public financing for congressional elections is aimed at cutting the influence of big special interest money in politics.

In 1976 the Republicans got $3.1 million from business contributors compared to $2.6 million for Democrats. The Democrats got $3 million from labor organizations, however, compared to only $39,816 for Republicans.

In the first 10 months of 1977 special interest political action committees gave $1.5 million to House Democrats compared to $549,814 for Republicans. So who's kidding whom?

The Republicans are divided on public financing, which puts lids on spending and on private contributions, which in presidential elections are matched by federal funds.

Most believe that challengers need to spend more to offset the incumbents' advantages. Some, however, think Republican challengers need matching funds to be credible.

Regardless of who's right, the decline of the Republican Party is discouraging to people who believe in the two-party system. The GOP should be encouraged, not mugged and stomped when it's down.

The House Democrats did more than just possibly harm the prospects for public financing by antagonizing Republicans whose votes are necessary. They demonstrated the danger of a party that has an overhwelming majority.

[From the Washington Post, Mar. 8, 1978]

CHANGING THE RULES—OR STACKING THE DECK?

(By David S. Broder)

From the time we were kids, playing "Kick the Can" in the alley behind the Yentzers' house, all of us knew that the one thing you couldn't get away with was changing the rules in the middle of the game. Anybody who tried was likely to get punched.

Politicians, somehow, seem to have missed that lesson when they were growing up—at least a lot of Democrats did. When they want to change the rules in the middle of the game, they call it reform. Sometimes it is, and sometimes it ain't. That's why life is more complicated, and generally less satisfying, in the adult world of politics than in the world we knew as kids.

Take, for example, some rule-changing under discussion this week in the campaign-financing laws and delegate-selection procedures.

Democrats on the House Administration Committee have come up with a plan to cut back, by 75 percent, the amount of money a national political party may put into the campaigns of its House candidates. The Campaign Finance Act amendments they have drafted, to take effect this year, would effectively reduce that ceiling on spending and contributions from about $32,000 to $7,500 per district.

The rationale for this bit of rule-changing is to cut down on excessive spending, of the kind Democrats say characterized the past year's special House elections, where Republicans generally invested more than the Democrats and won four of the six previously Democratic seats.

But that is a fairly thin disguise for a change really designed to minimize the advantage the Republicans have gained by the effectiveness of their fund-raising during the past year of sloth at the Democratic National Committee. The bald Democratic plot is to counter the Republicans' 4-to-1 edge in campaign funds by quartering the contribution ceilings. Let the Republicans sit on their money—that seems to be the Democratic attitude.

The effect of this rule change, if it passes (which seems unlikely), would be to reduce still further the ability of national parties to play a significant role in congressional campaigns, and to make reelection even more secure than it already is for incumbents. On those grounds, as well as the kids' instinct for fair play, this "reform" seems highly dubious.

But the case is not so clear, at least to me, on the changes in 1980 Democratic delegate-selection rules, which will be up for discussion when the party's executive committee meets here March 16.

Those changes, recommended by a commission headed by Michigan Democratic Chairman Morley Winograd, have been denounced by some in the party on the grounds that they are designed solely to insure President Carter against successful challenge for renomination, by "closing down" the open system that he exploited in gaining nomination as an "outsider" in 1976.

One of the rule changes clearly would have that effect, by extending the filing deadline, now as little as 30 days before the primary in some states, to at least 55 days before the primary.

There seems little justification for the national party's intruding on the states so egregiously just to reduce the possibility of last-minute candidates.

But the other changes—which have drawn more complaint of White House deck-stacking—seem to me quite defensible, whether they work to Carter's benefit in 1980 or not.

One would reduce the primary-election season to 13 weeks. Another would increase, by small, gradual steps, through the season, the share of the vote a candidate would have to win to gain a portion of the delegates. A third change—perhaps the most important—would expand the convention's size by 10 percent to provide that many more voting-delegate spots for elected and party officials, regardless of their presidential candidate preference.

It is the last provision that is most obnoxious to those who think the convention should reflect nothing but the popularity scores of the presidential hopefuls as recorded in the primaries and caucuses of that particular election year.

But those who understand that a political party is a continuing institution—with a legitimacy beyond that of a particular presidential coterie—will welcome a scheme that allows those with responsible positions in that party a voice in the convention hall.

Frankly, I know no reason to assume today that other elected Democratic officials are likely to prefer Carter to his possible challengers in 1980. But whether they do or not, their views are worthy of being weighed—and counted—when that decision is made.

So in this case, the rule-changing seems to me as justified as it is unjustified in the case of the campaign-finance-law "reforms."

It was a lot simpler—and a lot more fun—when the game was "Kick the Can" rather than "Pick the President and Congress."

[From the Chicago Tribune, Mar. 12, 1978]

THIS BILL CONFUSES EVERYONE

(By Aldo Beckman)

WASHINGTON.—Some Democrats are almost as confused as Republicans are angry over what Speaker Thomas P. [Tip] O'Neill [D., Mass.] is up to with his outrageous bill that would redesign the whole structure of campaign financing.

If it were a fair bill, and even its supporters have avoided that adjective, the steamroller tactics being employed to push it to the House floor seem almost designed to create opposition. Efforts to hold public hearings were denied and O'Neill says he wants it on the House floor for final action by March 20.

It would drastically change financing techniques in the middle of the campaign year. "It's like changing the rules at halftime," complained Rep. Robert Michel [R., Peoria], the House Republican whip.

The proposed legislation would reduce from $50,000 to $15,000 the amount of money that the national campaign committees could donate to a candidate for the House of Representatives.

And since the Republican National Committee and the House and Senate Republican campaign committees have a total of $8.2 million on hand to help candidates this year, contrasted with $867,000 in the coffers of their Democratic counterparts, the Republicans are shouting to anyone who will listen that it's dirty pool and a prime example of the arrogance of the majority.

Without question, the proposal would cripple challengers to incumbent congressmen and there are only 147 Republicans in the 453-member House.

O'Neill and Rep. Frank Thompson [D., N.J.], the chairman of the House committee that is expected to clear the bill shortly, have contributed to the Republican hysteria by their public remarks. O'Neill suggested that four recent Republican victories in special House elections were a factor in the introduction of the bill. He said that from a partisan view, he thought it was a fine bill, and all of the votes in Thompson's committee have split along party lines.

The whole thing is being engineered in the name of campaign finance reform. But Republicans argue they have taken a new tack from their old practice of hitting "fat cats" for funds. They have been concentrating on the small donor and their average donation has been $25. Only 12 percent of the contributors over the last two years have given more than $500, they contend.

The chances of the legislation getting through the Senate and passed into law probably is remote, at best, but Republicans are using it to whip Democrats with charges they are trying to assure their rule forever and are against the two-party system.

Even the "outraged" Republicans in private concede they don't think the bill will get through the House and the Senate. Almost nobody believes that O'Neill is serious in his efforts. And some nervous Democrats

are curious about why he is allowing himself to be painted for so long as an unreasonable, dictatorial speaker, trying to trample the rights of a weak minority.

The most popular notion is that O'Neill is building a strategy to persuade Republicans to support public financing of House races, long supported by some Democrats, but not enough to pass it without help from Republican legislators.

Under that scenario, O'Neill would push ahead and, just before certain passage on the House floor, offer Republicans a chance to get out from under the heavy yoke of the bill by substituting a public finance bill. Then, according to that scenario, Republicans faced with no other way to finance their campaigns, would give in and support public financing.

The problem with that scenario is that Republicans might be so confident they can stop the bill in the Senate that they would turn down the offer.

If the push for the bill is some kind of Machiavellian scheme by O'Neill to get some other legislation passed into law, he may have created a monster with his plot. Republicans think they have a campaign issue of misuse of power that could more than compensate for any loss in funds.●

HEARINGS GO TO THE PEOPLE

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. EDGAR. Mr. Speaker, on Friday, March 3, the Select Committee on Aging held field hearings in my district to gather testimony regarding the Older Americans Act. In my view, these hearings were quite productive. I believe it is always important for committees of this body to travel to local communities throughout the country to talk to men and women who do not always have the opportunity to come to Washington to testify. For the next few days I plan to introduce into the RECORD the testimony we received. The sixth section follows:

TRANSPORTATION SERVICE

(By Wilhelmina Miller, Darby Township Senior Center)

Darby Township has been made eligible, through UMTA (Urban Mass Transit Association), for a 12-passenger van with a lift which will provide aid for those individuals in wheelchairs. We are very grateful for all those people involved in getting us this van and wish to thank them very much. However, we feel that other bodies that are publicly funded should also be made eligible for such a van. As it stands now, they are not eligible, which does not constitute the idea that they are not in need of this facility. The centers which are now out of eligibility range are:

Riverview Center, Upper Darby, Watkins House, Chester Senior Center, Lamokin Village Senior Center, Towers I & II.

These new vehicles are quite desperately needed in all centers, in order to adequately provide for senior citizens.

One of the greatest means of transportation comes through the vehicles provided by the County. When they break down, senior citizens are more or less forced to remain in their homes, isolated and perhaps missing necessary medical appointments. Even if one is available, the accessibility into the vehicle can be rather difficult. A good portion of its users are in some way physically disabled and in need of some kind of help getting aboard. This new van with its lift will greatly aid these individuals.

As a result of its size, the 12-passenger van can be maneuvered in and out of streets with greater control, an asset to both driver and rider, alike. Icy streets with poorly parked cars can be more easily driven around, picking up people that could not have been reached with a larger van.

We feel the transportation service given us will help to improve our conditions of getting people to and from our center, and also feel that public-body centers should also be allowed to enjoy such a benefit.●

LEGISLATION TO IMPROVE THE DELIVERY OF SOCIAL SERVICES TO NEEDY SENIOR CITIZENS

HON. MARK W. HANNAFORD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. HANNAFORD. Mr. Speaker, today with the cosponsorship of our distinguished colleagues CLAUDE PEPPER, chairman of the Select Committee on Aging; EDWARD R. ROYBAL, chairman of the Select Committee's Housing and Consumer Interests Subcommittee, and MARIO BIAGGI, chairman of the Select Committee's Federal, State, and Community Services Subcommittee, I am introducing legislation to improve the delivery of social services to millions of needy senior citizens. Specifically, my bill amends title 3 of the Older Americans Act of 1965 to give units of general purpose local government—which includes cities—having a total population of 200,000 or more or containing 15 percent or more of the State's elderly population the option of being designated as an Area Agency on Aging (AAA). If the State denies the local government unit this designation, a public hearing may be requested. And if the State's decision is not reversed after such hearings, then the local government would be able to follow an appeals process with the Commissioner of the Administration on Aging.

Mr. Speaker, earlier amendments to title 3 of the act have considerably strengthened and improved the planning and delivery of various social services to older Americans. As set forth in the act, the purpose of title 3 is to—

Foster the development of comprehensive and coordinated service systems to serve older persons. . . .

The AAA is responsible for developing the framework for the planning and delivery of services. It is responsible for innovative and cooperative approaches to serving the Nation's elderly population. An effective AAA must pool resources from public and private agencies, promote existing local services, and maximize their effectiveness. A Triple-A must also monitor the changing needs of the elderly and mobilize existing resources to develop new service programs or to expand what is currently available.

Mr. Speaker, today there are almost 600 Area Agencies on Aging throughout the Nation. Included among these Triple-A's, which are primarily counties or multicounty agencies, are 14 cities. These 14 city Triple-A's are:

Alexandria, Va.; Baltimore, Md.; Boston, Mass.; Chicago, Ill.; Houston, Tex.; Lincoln, Nebr.; Los Angeles, Calif.; New York, N.Y.; Portland, Oreg.; St. Louis, Mo.; San Francisco, Calif.; San Juan, P.R.; Seattle, Wash.; Washington, D.C.

The significance of my legislation, Mr. Speaker, is that it draws attention to the cities. Cities that are capable of being Area Agencies on Aging, cities having a record of innovative and successful programs to care for their elderly populations. As statistics reveal, most AAA's are counties or multicounty agencies. But many cities are taking increasingly active roles in operating viable senior citizen programs. Designating such cities as AAA's strengthens the intent of the act to provide local assistance for the Nation's elderly. Currently, about 75 percent of all seniors live in urban areas—we are talking about almost 23 million senior citizens. Where cities are capable of serving as Triple-A's, therefore, the elderly can be assured of services that better meet their needs. For example, it may mean a reduction in traveling time for seniors to use certain facilities, closer attention to specific needs, and less bureaucratic redtape for seniors requesting assistance. Mr. Speaker, I also believe that a city Triple-A can effectively create a sense of belonging among its elderly citizens, helping them to lead independent and satisfying lives.

The city of Long Beach in my 34th District of California is an excellent example of a city which has taken the initiative to institute various senior citizen programs. It has and continues to do an outstanding job of assessing needs and striving to provide a truly comprehensive and coordinated system of services.

Mr. Speaker, let me offer a closer look at the accomplishments of Long Beach. First, it is a city with a population of 342,000. It has an elderly population numbering about 80,000, which is 23 percent of the city's total population. There are only a few cities in the Nation with an elderly population exceeding 20 percent. At this time, the city is part of the Los Angeles County planning and service area. While the city has 14 percent of the elderly population in Los Angeles County, it receives only 7 percent of the county's AAA funds. Moreover, about 20 percent of the city's elderly live at or below the poverty line.

The city of Long Beach has been involved in an ambitious program of senior citizen assistance. In 1976, the city established a department of human resources to:

First. Integrate basic human resource services into one comprehensive system.

Second. Promote delivery of social services.

Third. Eliminate a duplication of effort in human resource services.

Fourth. Create jobs for low-income, minority, and other disadvantaged individuals; and

Fifth. Provide maximum citizen and

service provider participation in planning an effective and comprehensive service system.

In addition, the city has coordinated a major project to establish a geriatric health care delivery system. This effort has involved numerous community leaders, public and private organizations, service clubs, local hospitals, and the community programs division of the Ethel Percy Andrus Gerontology Center of the University of Southern California. The city's geriatric health care system will centralize both the assessment of seniors' needs and the dissemination of information on available services. Furthermore, the system will offer a wide range of services stressing preventative care and giving the elderly more flexibility in solving their problems.

Long Beach has taken a lead in encouraging citizen participation. With respect to its elderly, the city has in operation a senior citizen advisory commission, a task force on the frail elderly, a consumer task force for a geriatric health care delivery system, as well as informal monthly meetings of city agencies providing services to the elderly.

Mr. Speaker, it is my hope that my colleagues will take an active interest in my legislation as the Select Education Subcommittee, chaired by our distinguished colleague JOHN BRADEMAS, undertakes consideration of amendments to the Older Americans Act. I insert the text of my legislation in the RECORD at this point:

H.R. —

A bill to amend the Older Americans Act of 1965 to provide that certain municipalities shall upon request be designated as planning and service areas, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 304(a)(1)(E) of the Older Americans Act of 1965 (42 U.S.C. 3024(a)(1)(E)) is amended by striking out "aged sixty or over of fifty thousand or more" and inserting in lieu thereof "of $200,000 or more" and by striking out "except that the State may" and inserting in lieu thereof "however, the State may in addition".

(b) Section 304(a) of the Older Americans Act of 1965 (42 U.S.C. 3024(a)) is amended by adding at the end thereof the following new sentences: "In any case in which a unit of general purpose local government is not upon request designated as a service and planning area under paragraph (1)(E), the State agency involved shall, upon request by such local government, conduct a public hearing within 60 days to review the decision of such State agency not to designate such local government as a planning and service area. If such State agency does not reverse its decision within 30 days after the conclusion of such public hearing, such local government may request the Commissioner on Aging to conduct a review of the decision of such State agency."

SEC. 2. Section 304 of the Older Americans Act of 1965 (42 U.S.C. 3024) is amended by adding at the end thereof the following new subsection:

"(e) The Commissioner shall take such action as he considers necessary to encourage States to designate as an area agency any unit of general purpose local government which has a population of 200,000 or more or which contains 15 percent or more of the State's population aged 60 or over."

SEC. 3. Section 304(c)(4) of the Older Americans Act of 1965 (42 U.S.C. 3024(c)(4)) is amended—

(1) in subparagraph (D) thereof, by striking out "and" at the end thereof;

(2) in subparagraph (E) thereof, by striking out the period at the end thereof and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new subparagraph:

"(F) transfer funds [, on a proportionate basis,] directly to any unit of general purpose local government which contains 20 percent or more of the population aged 60 or over of the planning and service area."

SEC. 4. Section 304 of the Older Americans Act of 1965, as amended in section 2, is further amended by adding at the end thereof the following new subsection:

"(f) Each State shall distribute any allotment of funds received by such State under this title for any fiscal year to each area agency in an amount which bears the same ratio to the total allotment received by such State for such fiscal year as the number of persons aged 60 or over residing in the planning and service area involved bears to the total number of such persons residing in such State."●

HUMAN RIGHTS DAY IN NORTHERN IRELAND—RESOLUTION ADVANCES IN NEW YORK LEGISLATURE

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. BIAGGI. Mr. Speaker, as chairman of the Ad Hoc Congressional Committee for Irish Affairs I am pleased to announce to my colleagues that the New York State Senate has passed a resolution calling on Governor Carey to declare March 17 as "Human Rights Day in Northern Ireland."

This is a most significant demonstration of the concern with which Americans view the continuing conflict in Northern Ireland and its consequences on the Catholic minority. As the resolution points out, the European Commission on Human Rights has convicted Britain of inhumane treatment of political prisoners in Ireland, charges to which Britain admitted its guilt in February of 1977. Earlier this year, the European Court of Human Rights cited Britain again for similar violations.

For this Nation to overlook ongoing violations in Ireland makes us susceptible to being selective in our pursuit of a foreign policy based on adherence to human rights. These violations pose a serious obstacle to any progress which might be made toward peace. They must be stopped, this is the desire of the people of Northern Ireland, it is also the desire of the New York State Senate.

I wish to give special praise to the author of this resolution, Senator Linda Winikow of the 38th district. She has demonstrated outstanding leadership in the senate and is especially effective in serving her constituents. This resolution is a reflection of her commitment and compassion for ridding Northern Ireland of the human tragedy which continues today.

The text of senate resolution 105 follows:

Whereas, The people of the United States have historically supported the cause of human rights in all nations of the world; and

Whereas, The continued partition of the Irish nation has been marked by years of violations and denial of those human rights to a religious minority in Northern Ireland; and

Whereas, The European Commission of Human Rights has confirmed the charges of inhumane treatment of incarcerated persons by representatives of the United Kingdom; and

Whereas, Concerned Americans have repeatedly demanded action by the United States to persuade the United Kingdom to cease such inhumane practices; and

Whereas, This Legislative Body has recorded its opposition to such degrading treatment of prisoners of the United Kingdom; now, therefore, be it

Resolved, That this Legislative Body memorializes its opposition to the violations of the basic concepts of human rights as practiced by the United Kingdom in Northern Ireland; and be it further

Resolved, That this Legislative Body memorializes the Governor of the State of New York, the Honorable Hugh L. Carey, to declare March seventeenth, nineteen hundred seventy-eight, as "Human Rights Day in Northern Ireland" in the State of New York as a testimony of this State's support for the minority in that area; and be it further

Resolved, That a copy of this resolution, suitably engrossed, be transmitted to Honorable Hugh L. Carey, Governor.●

HONOR BEING OFFERED POLITICIAN

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. PATTERSON of California. Mr. Speaker, on Friday, March 17, Mr. Bruce Lee will be honored by the Democratic Party of Orange County, Calif. Bruce, who lives in Fullerton, is being honored for his unselfish contributions to our Nation's political tradition of participatory democracy.

Bruce is a citizen of the American community, not just a member. He sits on the Democratic National Committee and the California Democratic Executive Committee. He worked as a volunteer in President John F. Kennedy's campaign in 1960, and was also a volunteer in the campaigns of California Governors Jerry Brown and his father, Pat Brown.

Bruce's community involvement is not limited exclusively to politics. He also represents the interests of thousands of American working men and women in his role as assistant regional director for the Western region of the United Auto Workers Union. His dedication to the interests of American working men and women is unwavering and without question. Truly, Bruce is a man of destiny and great fortitude.

Mr. Speaker, I am proud to be among those Orange County Democrats who will be honoring Bruce Lee on March 17. His contributions to the political process

and the American labor movement have been commendable. Indeed, our Nation would be much the better were it for more active participants in the democratic process like Bruce Lee.●

PUPIL-RUN LUNCH PROGRAM

HON. EDWARD W. PATTISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. PATTISON of New York. Mr. Speaker, creativity, self-reliance, and education should be inter-related. More often than not, however, school systems reinforce the traditional and avoid the innovative. The following New York Times article illustrates how one school administrator, Gerald L. Blair, of New Lebanon, N.Y., found an original and truly educational solution to his school's problem.

PUPIL-RUN LUNCH PROGRAM OFFERS PLENTY OF FOOD FOR THOUGHT

(By Frank J. Prial)

NEW LEBANON, N.Y.—Jerry Blair has a dream. He dreams of a totally self-sufficient public school, a school run by students and faculty members, free from the interference and pressures of government; a school that would impose no tax burden on the community and where children would play a central role in their own education by helping to pay for it.

Mr. Blair—Gerald L. Blair—the 36-year-old principal of New Lebanon Central School, has made at least a part of that dream come true.

He came to this semi-rural community halfway between Pittsfield, Mass., and Albany, as principal of the combined junior and senior high school in 1970. The following year local taxpayers defeated a proposed school budget and the state put the minuscule school system—the high school and one elementary school—on an austerity budget: no sports, no library books and, among other things, no lunch program.

Without local financing for the lunch program there could be no Federal subsidy, and as long as anyone could remember the program had existed in part on the Federal money. But Jerry Blair had another idea—perhaps there was no need for the subsidy.

"A REWARDING EXPERIENCE"

"It took me a few months to work it out," he said the other day while snow fell outside his cramped little office. "I thought that if we could do it ourselves we would eliminate all the paperwork, all the hassle and all the interference that goes with outside assistance. At the same time we could give the kids a unique and rewarding experience."

Mr. Blair and a home-economics teacher who has since moved away each put up $200 to buy soup, meat and crackers to start the experiment. Students were recruited to cook and serve, and prices were set slightly higher than they had been under the federally supported system.

"It was an instant success," Mr. Blair said. "We made a profit from the start and I had my $200 back in four weeks."

Seven years later, the program pays for all the food used, has bought modern cooking equipment for the school and pays the wages of two women who assist the students, one at the high school and one at the elementary school in West Lebanon, where the same daily meal also is served.

Under the present program students pay for their meals, usually around 75 cents. "No one gets anything for nothing," Mr. Blair said. "I don't care if his father is a millionaire or dirt-poor. Anyone who can't afford a meal can work for it. One morning's work in the kitchen equals a free meal. But they have to work to get the meal, and the work comes first."

Only one parent has ever complained. "A woman told me her son was entitled to a free meal," Mr. Blair said. "She told me she had her rights. I told her 'You may have all the rights in the world, lady, but not under our program.' Her kid worked for his lunch."

One day recently the menu at the New Lebanon Central School included two soups—minestrone and chicken gumbo; hot meatball and peanut butter and jelly sandwiches; juice, cider, fruit cocktail, homemade chocolate pudding and apples. The receipts that day were $163.50, all of which went back into the fund for more supplies and wages for the two assistants.

"We use only the best materials," said Jacqueline Zaremba, who has worked with the program since 1973. "If we make chocolate-chip cookies, we make them from scratch."

NOT ALWAYS BY THE BOOK

Since students run the program, the menu is based on what they like to eat. And it does not always include vegetables or other things that dietitians consider part of a balanced meal.

"A school should not be responsible for a child's main meal," Mr. Blair said. "We're not in the business of getting them to like codfish casserole."

For most students who work in the lunch program it is part of a credit course called Commercial Cooking. Several who have completed the course have gone on to jobs in restaurants and hotels or to technical schools specializing in cooking and food service. One young man who put in his time in the school cafeteria is scheduled to begin a year in France next fall as an apprentice in a Paris restaurant.

Two or three times a year the students put on a banquet. "It's their own idea," Mr. Blair said. "They cook beautiful meals, put out tableclothes and eat by candlelight. They even dress up for the occasion."

Educators who have heard about the New Lebanon experiment call regularly to inquire about it. "They are interested," Mr. Blair said, "but they are so used to old ways, to being covered by the bureaucracy, that it makes them nervous. 'It would never work for us' is what they usually say. Well, it will work. It works for the school and it works for the kids."

But what about the bureaucracy? Have they accepted this unorthodox program? Mr. Blair said: "The Department of Education auditors almost went bananas when they came here and saw what we were doing. They couldn't figure out how to audit us.

"So they told us we had to go to the public around here and get their approval—which of course, we already had. We put it to a vote anyway and it got overwhelmingly approved again.

"It's very simple. If you can show people that what you're doing is getting results and not costing anyone a nickel, they'll let you do whatever you want." ●

DULLES IS WASHINGTON'S INTERNATIONAL AIRPORT

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. FISHER. Mr. Speaker, the Dulles International Airport Development Commission, established by the Commonwealth of Virginia to promote the airport and represent its interests, has brought to my attention the fact that the name of the airport does not give an indication of its location. The commission has recommended that the name of the airport be changed to Washington International Airport, Dulles Terminal.

In order to give an opportunity for public discussion of this proposal, I am introducing a bill that would change the name of the airport according to the commission's recommendation. I am proud to have this vital airport located in the district which I represent and am pleased to seek ways to help the airport grow and develop. The consideration of an appropriate designation for this facility is one aspect of the development effort.●

HUMPHREY-HAWKINS BILL: A NECESSARY AND MODERATE APPROACH TO REDUCING UNEMPLOYMENT AND INFLATION

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. STEERS. Mr. Speaker, "full employment" has become a rallying cry across the country as more and more Americans realize they do not have to settle for unemployment. The figures may vary—and frighten us in their ability to jump so high—but the fact remains that too, too many Americans are out of work. They are not, however, without hope, and many of them see their future in H.R. 50, the Humphrey-Hawkins bill, also known as the Full Employment and Balanced Growth Act of 1978.

Millions of Americas are reported to have participated in last fall's Full Employment Week, held September 4–10. The grassroots effort reached 300 cities and towns in the largest display yet of discontent. And it was no wonder. Just before the week of activity, the Bureau of Labor Statistics had reported the overall jobless rate rose from 6.9 percent to 7.1 percent in August, a jump partially attributed to a sharp increase in minority unemployment, particularly among black workers. Even the more recent figures—for February 1978—are discouraging: 6.1 percent unemployment overall (seasonally adjusted), 11.8 percent for blacks, 17.4 percent for youths (16–19 years old), and 38 percent for black youths. In fact, fully half the total number of jobless Americans are teenagers. This group is estimated to be as high as 3.5 million people, but even this figure fails to include the young people who have become fed up with jobhunting and are no longer counted as unemployed.

Unemployment brings with it a sense of personal unworthiness, but the consequences to the community can be just as devastating. First, of course, there is the scourge of crime—a problem no longer confined to urban ghettos but rapidly spreading to suburban-rural settings, such as Montgomery County, Md., which I represent. The economic effects of unemployment, furthermore, have a

tendency to mushroom into a dangerous cycle—a lack of income often forces our Nation's youth into substandard housing and an inability to pay for necessary schooling; their low self-esteem and frustration can lead to increased use of hard drugs and to excessive drinking; the presence of drug addiction and alcoholism can only feed back into the original problem of inadequate education and housing; and all of these factors combine to lead to an increase in crime.

In an effort to try to block this vicious circle, I was one of the original sponsors of H.R. 1731, the Comprehensive Youth Employment Act. I was extremely pleased last August when President Carter signed into law H.R. 6138 (Youth Employment and Training Act), a similar bill that included many of the provisions of H.R. 1731.

An additional problem—inflation—has accompanied unemployment in the minds and pockets of many Americans in recent years. Annually, the rate of inflation in the last 5 years has varied between 4.9 percent and 12.2 percent, and consumer prices are expected to increase at a rate of about 6 percent annually through 1983.

These statistics pose a serious challenge to the American policymaker as well as the average citizen. Widely differing suggestions have been offered, and disagreement has overwhelmed people as they seek a solution to the Nation's ills. The late Senator from Minnesota, Mr. Hubert H. Humphrey, and my distinguished colleague from California, Mr. AUGUSTUS F. HAWKINS, spent a great deal of their valuable time and energy on a bill whose time has finally come. The bill, offered in similar versions in both the 93d and 94th Congresses, is here again, in the 95th Congress. It has undergone considerable revision in the direction of moderation, and I look upon it as a reasonable answer to our need for an economic plan without subjecting us to excessive Government control or interference.

The bill is the culmination of years of effort to develop legislation for achieving a full employment economy by expanding on the goals enumerated in the Employment Act of 1946. The bill's current version would "translate into practical reality the right of all Americans able, willing, and seeking to work to full opportunity for useful paid employment at fair rates of compensation." To achieve this overall objective, the act advocates the creation and maintenance of an economic environment that promotes balanced growth and maintains full production, full purchasing power and other essential priority purposes. In addition, it would establish an interim 5-year goal of 3 percent unemployment for adult Americans (20 years old and over), and an overall rate of 4 percent (for those 16 and over). To achieve these goals, the act would direct the Federal Government—including the President, the Federal Reserve Board, and Congress—to design and coordinate economic policies and programs via short- and medium-term plans to insure full employment and balanced growth.

In general, the revised version of the act, as favored by President Carter, would establish a commitment of the Federal Government to achieve full employment and simultaneously achieve reasonable price stability. To this end, a framework for economic policy decisions would be established; the administration would transmit to the Congress its goals for employment, unemployment, production, and income over a 5-year period. Congress would be responsible for considering these goals and establishing its own goals.

The objectives of the bill would be sought, but the President would have the right to recommend modifications in the third year and any year thereafter. Any changes would still be subject to the same congressional review and public inspection as were the original goals and timetables.

A variety of weapons would be recognized in the fight against unemployment, including special government efforts, but the primary emphasis would be placed on expanding job opportunities in the private sector. The bill would maintain trends in the ratio of private employment of civilians versus public employment, giving first priority to expansion of private jobs through the policies made available through the act.

Although a section dealing with last-resort jobs remain, it is stipulated that the programs under CETA and other employment and training projects are to be expanded before new programs can be established. Any new programs requiring authorization could not be implemented for at least 2 years after enactment of the measure.

Finally, the bill would recognize that the achievement of full employment and price stability requires the use of monetary and fiscal policies, together with structural measures designed to improve the functioning of the Nation's labor and capital markets—"not through government planning or control of private production, wages, and prices," according to President Carter.

Many observers have criticized portions of the bill, but I believe the revised version takes these criticisms into account. Of primary concern to me was the question of price stability and inflation. I was pleased to note that, as a result of the Wright amendment (which the House passed March 9, 1978), a section of the bill now reads:

> The President must initiate specific policies to reduce the rate of inflation, and with respect to such policies he shall make recommendations to the Congress where necessary and include recommendations within the Economic Report where practicable.

The bill, as amended, then specifically mentions several anti-inflation policies, such as voluntary arrangements between labor and management, removal of excessive Federal paperwork and regulations, and stronger antitrust standards.

Supporters of the bill have been persuasive in showing that the measure would not be inflationary. Indeed, most evidence supports the view that, as the economy approaches full capacity, increases in productivity result so that unit costs drop. In addition, the bill's proponents argue that there is no direct correlation between inflation and unemployment. Unemployed individuals would no longer be receiving some form of income maintenance but would now be engaged in productive work, increasing supply and reducing inflationary pressures on prices. Supporters also point out that, with full employment, increased tax revenues from earned wages and salaries would reduce the Federal budget deficit.

The unemployment question is most complex and disturbing, with many facets to be considered. More importantly, it affects a massive number of people. Hence, we cannot accept continuation of high unemployment rates. This bill, by requiring the President and the Federal Reserve Board to report each year to Congress on how their programs will lead to full employment by 1983, will create a commitment that must be taken seriously.●

RESEARCH WITH ANIMALS—PART II

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. DRINAN. Mr. Speaker, as prime sponsor of H.R. 10484, a bill which seeks to lessen the suffering of animals by promoting the development of alternative research methods, I commend to my colleagues part II of a fine series of articles from the Christian Science Monitor of March 8, 9, and 10, by Monitor staff correspondent, David F. Salisbury.

Part II, "Animals in the Laboratory: A Necessary Cruelty?" appears below. Part III, which includes a number of important recommendations for individuals, Government and the scientific community, will follow:

ANIMALS IN THE LABORATORY: A NECESSARY CRUELTY?

(By David F. Salisbury)

Roger Ulrich once was the kind of research scientist some antivivisectionists consider the "enemy."

As a psychological researcher at Western Michigan University, Dr. Ulrich studied the relationship of pain to aggression. He put pairs of mice together and administered electric shocks of varying intensities. He determined levels of pain most likely to make the mice fight.

Since then, however, he has closed his animal laboratory and stopped "torturing animals." He finds it a repugnant and socially irrelevant practice.

His experience and his present views lend credence to the antivivisectionist argument that psychological research has veered off onto a strange, even sadistic tangent.

Stress testing is the euphemism which scientists use to describe the type of animal experimentation which is the current fashion. In essence, this involves the deliberate administration of pain in the effort to study animal behavior.

"It is simply driving animals crazy," charges Eleanor Seiling of United Action for Animals. It involves a state of mind which Dr. Michael Fox of the Humane Society of the U.S. castigates as "pathogenic."

HUMANITARIAN MOTIVE

Yet, as Dr. Ulrich's account demonstrates, the motivation of psychological researchers is humanitarian.

"I was coming out of a heavy behaviorist background," Dr. Ulrich recalls. Convinced that people were "laying too much pain on their neighbors" and fairly sure that this

pain was contributing to the excess aggressiveness of U.S. society, the young scientist sought validation in the laboratory as he was taught.

"I ended up doing some things to animals that really made me sick. But I rationalized it. I thought science could do anything, that it could help us solve our social problems," he says.

Dr. Ulrich is no longer convinced that the results of these experiments justify the discomfort experienced by the animals. Although he does not believe his laboratory work was totally wasted, he doesn't feel it has the generality he once thought it did.

Testimony such as that of Dr. Ulrich makes it impossible to dismiss questions of the relevance of current psychological research out of hand. Thus it serves to illustrate the most emotional and far-reaching controversy involved in the clash between antivivisectionists and animal researchers.

Scientists agree that animals should be handled humanely when they are the subject of an experiment. Here the disagreement between antivivisectionists and animal researchers involves differences in opinion on what constitutes humane care and how it should be guaranteed. Because so much of psychobiological research involves the deliberate administration of pain, however, it raises a second and more serious issue: To what extent does the search for scientific knowledge justify painful animal experimentation?

Researchers argue that it is proper to conduct painful experiments for the purpose of basic research—that is, research that has no immediate practical application. Thus, draft principles for the care and use of animals being considered by the American Psychological Association stipulate that "a procedure subjecting animals to discomfort shall be used only when an alternative procedure is unavailable and the goal is fully justified by its prospective scientific or applied value."

Animal welfare groups see "stress testing" as perhaps the ultimate illustration of how scientists use freedom of inquiry as a shield to allow curiosity a free rein.

YARDSTICK OF RELEVANCE

The yardstick of real investigation is relevance, they argue. And they see no relevance in attempts to create psychotic monkeys by keeping them in complete solitude from early infancy or in what scientists have managed to teach pigeons by starving and shocking them.

Many agree with Rachel Carson who said: "The essence of life is lived in freedom. Any concept of biology is not only sterile and profitless, it is distorted and untrue if it puts its primary focus on unnatural conditions rather than on those vast forces not of man's making that shape and channel the nature and direction of life."

But psychological researchers argue that stress testing is essential in the study of behavior. They realize that animals are extremely complex. They put animals under extreme conditions so that unwanted influences will not intrude. A starving pigeon, they reason, will not let irrelevant matters interfere with its attempts to get food.

As a result "some of the research proposals in behavioral psychology make you feel like tearing your hair out," acknowledges W. Jean Dodd. As vice-president of the Institute of Laboratory Animal Resources, Dr. Dodd sits on a number of scientific review boards. She says psychologists seem to be obsessed with "stress testing."

Dr. Fred Stollnitz, head of the psychobiology office at the National Science Foundation, admits that the applicability of behaviorist research to humans is no longer as clear as was thought a few years ago. Instead, he insists the link is proving to be "less direct and more sophisticated."

To illustrate his point, the NSF scientist cites a class of experiments called "taste aversion" studies. In these studies various animal species are given different types of cues along with poisoned food. In this fashion, it has been determined that rats easily associate taste but not aural cues with poisoning, and that pigeons quickly draw the connection between food coloration and poison.

These experiments, explains Dr. Stollnitz, contributed to the work which Paul Rosen of the University of Pennsylvania was doing on how rodents acquire their food habits. From this research, he developed the general insight that there are certain classes of stimuli which animals associate with each other more naturally than others. This, in turn, led him to develop a pictorial alphabet which is helping ghetto children learn to read more easily.

"It is true that many of the 'profound statements' which have come out of psychological research are things that we already more or less know," says Dr. Stollnitz. "But we do not know in advance what will be borne out by experiment and what will not."

According to evolutionary theory, human behavior patterns and mental abilities are more elaborate than those of other mammals but closely akin. Therefore the study of the neurology and behavior of animals should give basic insights into the human condition, psychologists reason. This enables them to argue with B. F. Skinner that this research can help man "control his own destiny, because he knows what must be done and how to do it."

It is an argument which Dr. Ulrich no longer believes. As he told a symposium on aggression that the urban environment, he now realizes that "our social problems are not going to be forthcoming via our scientifically based behavioral engineering technology. The scientists and technologists such as myself [have] too many of the problems that we [are] trying to solve in others. . . . We [are] our own greatest problem."

Stress testing—done to simplify complicated animal behavior—is also criticized as creating artificial environments where animals behave unnaturally, and so its results cannot be generalized to normal situations with any confidence.

"A horse kicked me the other day," says Dr. Ulrich. "Despite all my research I don't have the slightest idea why. There are times when I don't think I know the first thing about aggression despite 10 years of laboratory studies."

OTHER PROBLEMS AS WELL

The current laboratory approach generates other types of problems as well. A recent paper by D. Mitchell and others of the University of Washington, for instance, found that laboratory strains of rats are "neophobic," that is, they tend to avoid new things of any type.

Experiments which use avoidance as a measure of adverse conditioning should therefore be viewed with suspicion, the scientists say.

Robert A. Hinde of Cambridge University has been even more emphatic about making superficial comparisons between animal and human behavior. The fact that behavior is formed by multiple influences and is characterized by adaptation and constant variation raises doubt that psychology can use animal models, he argues. This is especially true where a researcher has isolated a particular fragment of behavior which interests him and does not examine the total situation, Dr. Hinde believes.

Partly because of problems of this sort, a new discipline—ethology—was born. Ethologists put primary emphasis on studying animal behavior in natural settings. The study of chimpanzees in the wild by Jane Goodall is an example of this approach. It is noteworthy that she has found some major differences between behavior of chimpanzees in the wild and in the laboratory.

A EUROPEAN DISCIPLINE

Since its founding by German naturalist Konrad Lorenz, however, ethology has remained primarily a European discipline. U.S. animal researchers have been reluctant to leave their comfortable laboratories to study animals on their own ground—a much more difficult and time-consuming process.

The prevalence of stress testing may relate to what is perceived as ingrained attitudes within the psychological research community.

"Scientists are forced into a narrow track," explains Dr. Ulrich. "After their dissertation and first paper, all the reinforcement is to continue in the same vein. You have to decide whether you are going to conform or be a maverick. If you decide to be a maverick, then you have difficulty getting your papers published."

Novel theories or practices which challenge current orthodoxy tend to be viewed with suspicion, sometimes hostility—and often take time to be accepted. This is illustrated in the case of David A. Goodman, who developed a way to study one aspect of animal behavior more precisely and humanely. Dr. Goodman estimates it will be 1984 before the experiment he performed is repeated.

A psychobiologist at the Newport Neuroscience Center, he developed a method to "map" the behavior of the mud puppy—the simplest animal with a brain organized similar to that of mammals. It represents one of the alternatives to "stress testing" which are being largely overlooked.

The chain of events which led to this work began when he tried to duplicate the experiment of a colleague who claimed to have shown that amphetamines enhance learning in infant rats.

Dr. Goodman was unable to reproduce the reported results. The baby rats kept dying on him. In the process he came to doubt the validity of this type of experiment in general. He realized how little is known about the total behavior of these animals. Without such in-depth knowledge, he reasoned, it is impossible to know for certain what effects drugs were really having.

So he decided to conduct an in-depth study with the mud puppy.

The beginning of this experiment was inauspicious. The day after the necessary sensors were implanted in a mud puppy's body, the researchers would return to find their subject dead. "It never occurred to us that they were dying because they were in excruciating pain," recalls Dr. Goodman.

CHANCE OCCURRENCE

Finally, one animal managed to pull the probes out of its body. The freed electrodes dangled in the water of the aquarium and to the scientists' surprise gave fairly good readings. Impurities in the water kept them electrically connected to the submerged amphibian, he realized.

The aquarium was rebuilt with remote sensors in the sides. The animal was free to move around. All the scientists had to do to record the mud puppy's heart and gill-beating rate, muscle tension, and body movement was to "punch in" the animal's position in the aquarium on a control board.

With this technique perfected, Dr. Goodman then presented test animals with two types of stimuli—overhead shadows and vibrations. It took more than 10,000 repetitions of these stimuli before the mud puppy's responses were totally cataloged.

From this work, Dr. Goodman was able to infer three states of consciousness in the salamander: quiet, waiting, and active. When combined with knowledge of past stimuli, these states enabled him to predict what the mud puppy's response to either shadow or vibration would be.

"After doing this experiment, I could never use vivisection," says the scientist. He came to know the mud puppy too well and appreciate its complex, even intelligent behavior.

"Behavior mapping" experiments of this sort have been tried only a handful of times, he says.

Whereas psychological researchers such as Dr. Stollnitz justify stress testing as a means to the end of solving various social problems, antivivisectionists and some scientists such as Dr. Ulrich criticize this as Machiavellian, self-fulfilling, and doomed to failure.

What is needed to solve social problems, they argue, is a transcendant ethic—reverence for all life. They see cruelty to animals, children, other people as all one—no matter how it is rationalized. The best way to use animals to help humans is to teach us to love, they argue. This, too, is the conclusion Dr. Ulrich has reached. He now runs a preschool program which takes city children out into the country, introduces them to nature, and teaches them to appreciate animals.

Next: Animal rights vs. consumer protection.●

SELECT COMMITTEE ON AGING

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. EDGAR. Mr. Speaker, on Friday, March 3, the Select Committee on Aging held field hearings in my district to gather testimony regarding the Older Americans Act. In my view, these hearings were quite productive. I believe it is always important for committees of this body to travel to local communities throughout the country to talk to men and women who do not always have the opportunity to come to Washington to testify. For the next few days I plan to introduce into the RECORD the testimony we received. The fifth section follows:

SELECT COMMITTEE ON AGING

TRANSPORTATION

Mr. Chairman and Members of the Committee: One of the primary needs of Senior Citizens in this society is mobility. Due to failing physical skills and limited incomes, a great many of the elderly do not have access to a car or other means of transportation enjoyed by others. Lack of transportation denies the older person even the simple necessities, such as visiting the doctor, and shopping for food. The present demand for urban mass transit is ill balanced. We need suburban mass transit. Regardless of income, all older persons have needs due to their years, physical condition, and decreasing energy quotients. Need is the basic factor. We strongly believe, therefore, that sepcial needs of older persons must be taken into account in the design and operation of transportation systems. To this end, the Delaware County Council of Organizations of Senior Citizens offer the following suggestions:

1. The needs of the elderly should be met through integration into a system which serves the needs of the entire community. Although the primary goal we're striving for is adequate transportation for the elderly, we firmly believe that Senior Citizens should enter into every aspect of community life. Improved transportation will benefit every citizen.

2. Standard transit vehicles and facilities should be made physically accessible to elderly and handicapped individuals. Buses should be re-designed to permit easy ingress and egress. Examples: lower steps, adequate lighting, padded stanchions, wide aisles, handles on doors, hydraulic lifts, etc. Such innovations would permit and encourage Senior Citizens to use public transportation.

3. In the County of Delaware, many areas are without public transportation. Based on the 1970 census, 2,800 of our Senior Citizens are being denied any form of transportation. Special subsystems should be made available at reasonable cost to those who cannot make use of the general transportation system.

4. Many of our elderly people do not own automobiles. Those who do will not, or cannot drive, because of fear of traffic or physical conditions. Demand activated transportation subsystems (escort or portal to portal service) should be developed for the elderly who are feeble or handicapped.

5. First priority should be given to the development and improvements of public transportation systems. We have in mind special routes from poor neighborhoods and rural areas to shopping centers, business and medical facilities, special routes taking commuters to and from work, specialized charter service throughout the state, free parking at major points near cities, so that drivers can catch a bus and avoid driving into the central business district, placing bus and trolley schedules in public buildings, listing downtown stops and interchanges, and issuing discount books to encourage more people to use public transportation.

6. Federal funding should be used to develop and operate special transportation subsystems, with emphasis on non-urban areas. In the County of Delaware, rural areas are practically isolated from cities and urban areas. It is also extremely difficult to get from one point in the county to another, due to lack of transportation. We strongly recommend that cross-town bussing be instituted, and feeder lines, using minibuses, be established from rural areas to urban and shopping centers, and to medical facilities.

7. We recommend that the "Interstate Commerce Act" be amended, so as to permit transportation companies, subject thereto, to grant reduced fares to the elderly and handicapped. We have in mind inter and intra-state, as well as municipal and other common carriers.

8. That highway trust funds be utilized to develop, construct and operate public transportation systems.

9. If the projected increase in the price of gasoline takes place, or an energy crisis develops, the number of cars now using our highways will sharply decline. We respectfully point out to this Committee that building new highways for fewer cars to use is not the best policy. As an alternative, we recommend that a viable integrated mass transit system be instituted. It will not only serve the needs of older citizens, but the entire populace as well, and would be a prime factor in national security in the event that an acute military situation would arise, depriving the United States of a major portion of fossil energy.

10. The viability of mass transportation would be greatly enhanced, if the suburban, rural and urban areas were integrated instead of the present haphazard lines. Schedules should be revised so that proper connections can be made. Bus routes should be set up to serve the greatest number of citizens. Bus terminals should be established, into which all lines would feed.

One final comment: It seems the trend of transit systems today is not to serve the public, who is footing the bill, but to lose as little money as possible. To accomplish this goal, service is curtailed, routes cancelled, and the public suffers. This Committee can render a valuable service by reversing this trend.

We appreciate the opportunity to appear before you today.

Respectfully,

WILLIAM BUSBY,
Legislative Chairman.●

ELIZABETH AND DAVID DODSON GRAY URGE AUDIENCE TO LOOK TO NEW AGE

HON. EDWARD W. PATTISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. PATTISON of New York. Mr. Speaker, the Congressional Clearinghouse on the Future has begun its 1978 "Dialogues on America's Future" series, and just before the President's state of the Union address, over 50 of our colleagues heard Elizabeth and David Dodson Gray. The Grays, codirectors of the Bolton Institute, are active futurists. Ms. Gray is on the board of the U.S. Association of the Club of Rome and Mr. Gray is president of the Massachusetts Tomorrow program.

Their provocative discussion about growth grew out of their book, "Growth And Its Implications for the Future," and I am pleased to insert into the RECORD a transcript of their remarks to our group:

THE HUMAN SIDE OF SLOWING GROWTH

DAVID DODSON GRAY: I would like to begin with a brief summary of our work on growth. We are confronted with interlocking problems which grow at exponential rates in our social and natural systems. None of these problems are easily solvable by themselves. We have an energy problem, a resources problem an environment problem and a soaring population problem. All of these problems put together and the limits in each of them are leading to a situation in which we are overdriving our headlights. We dimly perceive the limits ahead as we soar merrily along.

If we look ahead 25 or 50 years and imagine where society will be when our children are our age, we see a very different society. Liz and I believe that it will be a society in growth will have substantially slowed from what we have seen to date. As a result, we look at the future in terms of growth slowing.

Tonight, we want to explore the human reactions to slowing growth. As growth slows, we are seeing a loss of jobs and, as a result, a loss of an important center of meaning in our lives. We are seeing a loss of purchasing power, because as things become scarce, their prices increase. The sense of loss we share is called inflation. There is also a loss of confidence as growth slows. There is a sense that the society, the system, is not working as it used to work.

All of these experiences taken together give us an experience of loss and also an experience of importance. In personal terms, we call the experience a grieving process. Elizabeth Kubler-Ross, in her work with dying people and their families, and Robert Lifton's work with survivors of Hiroshima and Vietnam form the basis of my understanding of this process.

The grieving process involves a succession of coping mechanisms. These are the ways in which we protect our essential selves and our essential institutions when we are confronted with something difficult to assimilate and respond to.

FIVE COPING MECHANISMS

There are five of these successive coping mechanisms. The first is denial and shock. We put a barrier between ourselves and what is happening to us. The energy crisis is an example. As soon as the gas lines disappeared, the problem was explained as a conspiracy of the oil companies.

The second stage is anger. This is found

acutely among Harvard and Sloan Business School of Management students because they went there to make their millions but it now looks like the door has been closed to that future. In the 60s, anger was acted out in violence. In the 70s, it has been turned inward as depression. Anger is a way to reach for potency and control—if we get angry enough something will happen. Blaming and scapegoating go along with anger. Your constituents threaten to remove you from office unless you get things fixed. They tend to say that you are to blame for the problems.

The third stage of coping is the bargaining stage. This stage represents a looking forward and coming to grips with the new reality. We set deadlines in this process. We look for benefits with rewards for good behavior, such as rewards for energy conservation. We try to make amends while there is still time. As we bargain, we want people to think well of us and the leadership we took in the transition.

Next is the coping mechanism characterized by profound depression. It is a deep sadness that our good golden growth years are moving beyond us. Yet, we recognize that there are new opportunities. It is a time of heightened valuing of being in social solidarity and connectedness. When we feel that people care, that people appreciate us, it makes sadness tolerable.

The fifth and final copying mechanism is acceptance—a separation and letting go of the past and an attempt to build the new. We get a sense of dignity when we realize that we will go on living, that we can do it, that we are somebody.

POLICY IMPLICATIONS

What can be done in the policy arena if institutional behavior is reflecting these phases? We can set up monitoring programs to help us live with denial and get us used to listening to the news of what is really happening. Congressional hearings could be used to explore problems in depth rather than as a forum for solutions.

We need to listen to the angry voices—the farmers, the women, the minorities—and give them real support. We also need to look for compensatory potency experiences. People can be given more power, control and choice over small things in their lives and jobs even though large trends cannot be changed.

Liz and I believe that growth as we have experienced it cannot continue. But we can manage the transition. We can choose to keep some things in our lives while accepting the change in other areas. Slowed growth is not the end. We think it is the new beginning.

EXPERIENCING THE MID-LIFE PASSAGE

ELIZABETH DODSON GRAY: I want to take off from David's ideas about society's coping mechanism and share with you my sense that we are at a mid-life passage. I am using as my base the work of Gail Sheehy in "Passages."

In mid-life when something dies and we continue to live, life goes on, but a sense of life's meaning and one's identity change. Part of what is happening to us now is that our basic sexual roles and identities are changing, too. The traditional male role has been to produce and be successful in order to prove his masculinity. The female role has been to consume and maintain that which is produced. We cannot have a production society unless there are people to consume and maintain what is produced. As growth slows, we need fewer goods produced because consumption is down. As a result, we undergo an identity crisis.

We can be survivors and build new identities. If we have spent the past 100 years building a beautiful vase and suddenly that vase is broken, we must pick up the pieces and build again. But this time, we will need to build another shape—a globe or an obelisk, perhaps—with as much care as we built the vase. But we cannot rebuild the vase. We must go on to something else. In America, we have begun to question the idea of unending affluence. Erich Fromm states that we must shift from an identity based upon "having" to one based on "being." Individuals are participating in such experiences as Transcendental Meditation, encounter groups, therapy of all kinds, wholistic health, etc. We are reaching out to one another as we relax and enjoy a different rhythm. Your meeting here tonight is an example of community building in an institution. The 94th and 95th caucuses which have just been meeting together are another example of this. Because we have spent little time together, our relationships are thin. Some of us have begun to want more depth in our relationships and are making ways to find this satisfaction.

I think we are very lonely in America, though we are rich in gadgetry. Let me tell you a story. An American couple, anthropologists, went to a primitive village to study the ways of the people living there. They had been there for some time, and the American woman had joined the women of the village each day at the watering place to collect her household water and wash her clothes. After she had been there for some time, one of the native women asked her, "Tell me. How do you get your water in America?" The anthropologist, feeling very superior and advanced, said proudly, "When I want water, I just go to my kitchen, turn the spigots at the sink, and out comes water from the faucet." She finished with a flourish and looked around at the village women who were listening. They were not impressed, and the one who had asked the question, said sadly, "It must be very lonely for you." Any woman who has spent those child rearing years in America suburbia knows just how lonely it is.

As we enlarge ourselves, become more in touch with nature, expand our experiences of what it is to be in community, I think our need for materialistic things will decline. And we will be freed from the traditional roles of producer and consumer.

POLICY IMPLICATIONS

What can you do to encourage and support these changes? In the first place, you can sponsor celebrations and festivals. It was reported that on July 4, 1976, the New York City hospital emergency room did not report any cases. It was the first time in the hospital's history that 24 hours passed without somebody coming into the emergency room. People were having too much fun to hurt each other that day.

In the second place, you can support families and explore ways to keep people and communities together. Supporting super highways that split up neighborhoods is not what I would call supportive action. We are seeing a tremendous growth in single parent homes. I think they would be supported and affirmed.

In the third place, you can subsidize culture and the arts. This is the one area of our lives that we all share together, and that is essential to our well-being. What would our lives be without music, and what a resource is a symphony or a music school.

In the fourth place, you could support groups that sponsor workshops on the difficult task of rebuilding one's life and rebuilding identities. Many of us have had severe crises in recent years, and we could use some support as we struggle to identify our new roles. New technologies of self-realization also need support.

Finally, you can support communities such as Reston which are trying to establish new models for neighborhoods. The revitalization of our cities and the building of communities could do much to help us feel more connected in this time of rapid change and transition.

All of these suggestions I have made could help us maintain the morale of individuals and allow us to move through this transition stage with much less pain.

QUESTIONS AND ANSWERS

Q. What is the relationship between growth and democracy? Can you have a democracy in a no-growth mode?

A. It is true, that since Jefferson's time, growth and democracy have gone together. But democracy is a system where people want a say in their destiny. We believe that Americans want to have more input in the decision making process which decides whether we move toward more growth or sustained growth. We don't think democracy and no-growth are incompatible, but our argument is that citizens need to have more of a say in the direction.

Q. What do you think about the impact of television? Many of our experiences are that it is having a negative influence.

A. Television acts as a mirror on our world. It provides myths and images for us. We believe that people are smart enough not to see everything on TV as fact. I think that many of us tune out commercials most of the time. We just don't listen to them anymore. TV serves an important function of showing us ourselves and giving us archtypes to respond to. And we trust that people can discriminate the good from the bad of TV.

Q. We are in a period of transition regarding oil and fossil fuels, but I am not sure that I agree with you that we are into a death transition. Do you believe that the American dream is dead?

A. As we have known the American dream, it is dead or dying. We are giving up the type of growth we had since World War II and we are moving into a different lifestyle. We are not dying so much as we are revising the American dream.

Q. All of your examples of changes in society were compared to those stages of individual experiences of death. I don't agree that the crisis in society is akin to death. We do not have limits to growth so much as we have limits to the rate of growth. Would you care to comment?

A. We are not saying that society is dying. We are saying that during this transition, we will undergo a sense of loss and impotence and that some of the feelings we experience will be similar to those described by Kubler-Ross.

Q. We, many of us anyway, were elected out of this anger you talk about. And we in this room understand the need to look at the future implications of our actions. But more needs to be done. The message needs to be spread on the Hill. The Futures Clearinghouse and concerned Members should work on strategies to get the message of sustained growth to those who are not here. I don't know how we do that, but your coming is part of our need. Thank you.●

PERSONAL EXPLANATION

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. MAZZOLI. Mr. Speaker, due to responsibilities in my district, I was absent on Friday, March 10, 1978.

Had I been present, I would have voted "yes" on rollcall No. 129 to rescind certain budget authority contained in the message of the President of January 27, 1978.●

STATEMENT ON SOCIAL SECURITY BILL

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. MOORHEAD of Pennsylvania. Mr. Speaker, I am pleased to introduce on behalf of myself and eight members of the Subcommittee on Economic Stabilization of the Banking Committee a companion bill to that introduced originally by Mr. MIKVA and others, to amend the Social Security Act to provide for general revenue financing of the disability and medicare parts of social security. The chief purpose of this bill, of course, is to head off the major impending increase in the social security payroll tax and to reduce that tax.

It might be asked why members of this particular subcommittee should interest themselves, in that capacity, in the payroll tax. The answer is that an important part of our responsibility is oversight over all aspects of the Nation's serious and continuing inflation problem, and we have become increasingly aware that the rising payroll tax is now a significant factor in pushing up the general price level. This awareness of a neglected aspect of the payroll tax problem—which arises from the employer share of the tax—is in addition to our concern, shared by all Members of the House, at the impact of the payroll tax increases that lie ahead on working people of all income classes.

For a long time it was thought that the payroll tax paid by employers was either absorbed out of profits or shifted backward to the worker in the form of smaller wage increases. But now economists, basing their views on evidence from the real world of commerce, are increasingly aware that the employer share of the payroll tax is in fact largely shifted forward to the consumer in the form of higher prices. A rise in the payroll tax, quite understandably, is treated much like a wage increase—as an addition to total costs. It is not relevant to say that it can be deducted from the corporate income tax because the same is true of a wage increase. Both can be deducted, but in practice both are a part of total labor costs and enter into the determination of prices charged. This did not matter much when the payroll tax was small, but under the bill we passed last year, it will soon surpass 6 percent of total payroll. Although President Carter signed the 1977 social security bill and praised it, his economic report 2 months later explicitly mentioned higher payroll taxes as an important element in the continuing upward pressure on prices.

Arthur Okun, a former chairman of the President's Council of Economic Advisers, told a Senate committee hearing last month:

> You should recognize that the half of the payroll tax levied on employers is basically a hidden Federal sales tax on consumers.

In summary, then, the payroll tax—unlike the income tax—directly worsens inflation. By raising the cost of labor, it also worsens the unemployment problem. The higher payroll taxes that lie ahead are a very serious obstacle to a well-functioning noninflationary economy.

However, the legitimate question arises: Where are the general revenues to come from to pay for these large expenses that we propose to remove from the social security payroll tax? The Mikva approach, which we are supporting, would shift more than $30 billion, or about one-third, of social security outlays to general revenue financing. The same effects in reducing the payroll tax would be achieved by the admirable bill introduced by the gentleman from Massachusetts (Mr. BURKE) which would simply finance one-third of the entire social security program from general revenue without distinguishing among the three main components. Both approaches would achieve the same anti-inflation purpose. But to repeat, where are the general revenues to come from, given a large existing budget deficit?

Mr. Speaker, that question is not as perplexing as it seems at first glance. The answer to it lies in the Nation's fiscal outlook and the long-term fiscal program of President Carter.

Perhaps the least noticed, and yet most important, aspect of the President's program is his determination to restrain total Federal outlays in such fashion as gradually to reduce them to a total of no more than 21 percent of the gross national product compared to 22.6 percent now. His budget for fiscal 1979—even though the outlay total of $500 billion seems huge—starts us on that road. We will get there in a couple of years if similar restraint is exercised in subsequent budgets.

But meanwhile, revenues continue to grow rapidly, even after allowing for the tax reduction that will be enacted this year. Alas, this in part is due to inflation itself. Regardless of the cause, the huge revenue growth is there. And the consequence is clear, as stated by the President himself in his economic report last month:

> Success in keeping a firm rein on spending will permit further tax reductions in years to come.

The more detailed report of the Council of Economic Advisers, noting the basic policy of reducing the share of Federal outlays in GNP, goes on to say:

> If the course of Federal spending is determined by these principles, tax reductions then become an important device for maintaining a stable rate of growth in the private sector.

What we are suggesting, Mr. Speaker, is quite simple: It is that the next tax reduction, which will surely be forthcoming if the President's basic spending course is adhered to by him and by Congress, be a payroll tax cut rather than another income tax cut. That is the true meaning of shifting a portion of social security to general revenue financing. Instead of cutting income taxes next time, we cut the payroll tax.

That is the longer run rationale for this bill. But in fact we do not have to wait until 1979 or 1980 to begin the process. We can begin now, by the simple device of making a part of this year's suggested net reduction of $25 billion in income taxes a reduction of payroll taxes. I am informed that we could head off the 1979 social security increases and roll back the tax rate to 5.85 percent—from 6.05 percent this year—at a cost of some $6 billion. Some of our colleagues in the Ways and Means Committee are thinking precisely along those lines. We would forgo some of the income tax reduction in order to make the first breakthrough in reducing the payroll tax. This would be done with no change in any social security benefits and would therefore imply general revenue financing to the extent that payroll taxes are reduced.

It is important to note that for purposes of stimulus of the economy—to combat the stag part of our problem of stagflation—a payroll tax reduction serves the same purpose as an income tax reduction. It directly increases purchasing power. Either can do the job, but payroll tax reduction has the added merit of combating the flation part of the problem as well.

I am personally not troubled by the implications of general revenue financing for the entitlement of the millions of working people to their full array of social security benefits, including medicare and disability. This is a contractual obligation of the Government that will not be changed lightly, regardless of the means of financing. Medicare might change if we come to a system of national health insurance, but it would not change because of a shift to general revenue financing. For those who fear that a shift to general revenues necessarily would lead to a "means test" for these benefits, I would cite the present long-standing programs of service-connected disability compensation for veterans and black lung benefits for coal miners. Both are financed from general revenues but both are full-fledged entitlement programs with no means test and no suggestion that there should be a means test. The same would apply to medicare and disability benefits under social security.

I have already explained the great merit for our whole economy, as well as for individuals who bear the burden of the payroll tax, or a partial shift to general revenue financing as proposed in the Mikva bill which we are co-sponsoring. And I have explained that the revenues will be there to finance it, with the timing to be determined as events unfold. We could even make a beginning this year. We need only focus our attention on the possibility of payroll tax reduction as an alternative to some part of present and future income tax reduction. That would be good fiscal policy, good social policy, and good economic policy.●

ZOLLIE FRANK

HON. SIDNEY R. YATES

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. YATES. Mr. Speaker, I have just been informed that a good friend of mine. Mr. Zollie Frank, has been inducted into the Automotive Hall of Fame in Michigan, an honor which has been bestowed upon very few automobile

dealers. It is a tribute to Zollie Frank's long years of honorable dealing in the automobile business. He has built his Chevrolet dealership into one of the most successful in the United States.

Mr. Frank does not limit his activities solely to his business. He has long been an active participant and contributor to Chicago's charitable and civic causes. Deservedly, he enjoys a fine reputation for being an outstanding public minded citizen.●

OLDER AMERICANS ACT

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. EDGAR. Mr. Speaker, on Friday, March 3, the Select Committee on Aging held field hearings in my district to gather testimony regarding the Older Americans Act. In my view, these hearings were quite productive. I believe it is always important for committees of this body to travel to local communities throughout the country to talk to men and women who do not always have the opportunity to come to Washington to testify. For the next few days I plan to introduce into the RECORD the testimony we received. The fourth section follows:

OLDER AMERICANS ACT

(By James S. Fritz)

INTRODUCTION

My name is James S. Fritz and I am a Senior Planner for Transit with the Delaware County Planning Department and Project Coordinator of the Delaware County Para Transit Coordinating Committee. Since neither of these positions entail working with specific provisions of the Older Americans Act, I will not address specific provisions here today. Rather, I will talk generally about problems I have confronted in para transit planning in Delaware County. Unless otherwise specified, ideas and proposals presented in this testimony are consistent with findings of the Delaware County Special Transportation Needs Study completed in September, 1977.

MASS TRANSIT IN DELAWARE COUNTY

According to the 1970 U.S. Census approximately 60,000 persons over 65 years of age reside in Delaware County. Approximately 10,000 or 17 percent of these persons have mobility limitations ranging from "having trouble getting around alone" to "confined to home." Many of the persons over 65 in Delaware County live in areas generally well-served by regularly scheduled public, mass transit. An estimated 80 percent of persons over 62 years of age reside within four blocks of mass transit in Delaware County. There are some problems with this measure inasmuch as four blocks may be a bit formidable for some persons. Also, this measure does not take into account frequency of service and hours of operation. What I want to convey here is that there is probably good reason to believe that fewer elderly persons are well served by mass transit than the service area analysis would suggest and, although we have no estimate of the number of seniors presently receiving para transit services, I believe that for many this is the only transportation service available for their many specialized needs.

Often nutrition sites, senior centers, medical and shopping facilities and other trip generator sites are not conveniently accessed by mass transit. In these cases para transit becomes the order of the day. Mass and para transit serve different functions, markets, and purposes. Para transit is an individualized, short-haul, flexible route, demand responsive, door-through-door service. Mass transit is not designed to serve and cannot serve this type of market. Recognizing the complementary association between mass and para transit, more emphasis needs to be given to this fact when services are planned and programs developed. Specifically, a better feeder-service network needs to be developed using para transit as a supplement to mass transit.

If mass and para transit are not well coordinated, a duplication of service results implying waste of scarce and costly resources.

PARA TRANSIT PROBLEM AREAS

Another source of duplication in the effort to serve the elderly is the absence of coordination in both the planning and operation of para transit services themselves. The recent direction of Federal legislation has been to require coordination among para transit operators who are recipients of Federal funds. There is still a great deal of room for improvement, while the supply of automobiles, vans, mini-buses, and buses available to social service agencies continues to increase at a rapid rate.

Transportation is central to social service delivery. It is required both to take services to the client and to take the client to central service delivery sites. These transportation services have been a costly (and occasionally strangling) line item in the typical social service agency budget. Although transportation is seldom the core service of the agency, it is a supportive service which is so indispensable that, without it, core services simply could not be delivered. In fact, the cost of transportation services can be more than the cost of the core service itself.

To be sure, some progress has been made. In the early days of the anti-poverty programs of the Kennedy-Johnson years, nearly every Federal program allocated funds for transportation services. Recipient agencies were responsible for designing and operating their own transportation services and many agencies put in for money to buy their own vehicles.

With better federal management of programs has come better management of transportation related costs. Section 16(b)(2) of the Urban Mass Transportation Act of 1964, as amended, provides funds for non-profit agencies serving the handicapped and elderly. Though this legislation may not go far enough, at the very least it brings many of the budget allocation decisions together under one roof in the Federal government. There still is much room for improvement.

For one, Section 16(b)(2) does not cover operating and maintenance costs and, for another, there are still many Federal dollars expended for para transit which are not channelled through UMTA or any other single Federal agency. Such an entity could be designated as the core para transit agency through which all para transit projects were programmed, funded, operated and monitored. There should be such an agency, at least serving as a clearinghouse (if not a disburser of funds) for all para transit expenditures. New Federal legislation such as amendments to the Older Americans Act should require (at least encourage) coordination among grant recipients. Moreover, legislators should consider creating the necessary controls to centrally manage the entire range of Federally funded para transit services.

Several footnotes need to be added. First, whatever controls are mandated by new legislation the effect should be to improve the delivery of service, to make it available to more persons and to decrease the paperwork burden to operating agencies.

Ideally, unification of para transit programs would mean less costly bookkeeping and report writing by reducing the number of Federal agencies involved. The quality of service and the coverage are benefits which should result from reduction of waste, costly duplication of service and more streamlined reporting procedures.

Improving coordination and communication among service providers also has the effect of increasing the visibility of service gaps. Identifying service gaps as a preliminary step in improving coverage is facilitated by common performance reporting procedures. Closely related to coverage is the question of eligibility. This is a condition of service which should be studied carefully before final verdicts are issued. Specifically, age and trip purpose criteria should be reexamined with an eye toward the full range of client needs.

Specifically, transportation should not be limited to shopping, medical and nutrition trips. Trips to other transportation resources such as rail stations, bus and trolley stops and taxi stands should be provided at least on an equipment availability basis. Leisure and special purpose travel should also be allowable. Trips to parks, lectures, libraries, museums, movies, demonstrations,, concerts blood pressure check, mass innoculation, voter registration and polling sites are not now provided to older persons by any agency in Delaware County on an organized County-wide basis.

Recreation and leisure is much too important to aging persons to be left to chance or supplication. Probably out of all of the types of trips made by seniors, mass transit provides least effective service to sites such as those listed above. Often these sites are located outside older, built up, commercial areas where mass transit tends to be most effective and where dependency on park transit most incident.

TAXICABS AS A RESOURCE

Taxicabs are a ubiquitous and valuable para transit resource. In the past, high fares, taxi companies' unwillingness, and insensitivity of drivers have made this alternative quite unattractive. However, this image has begun to change and in some places "dial-a-ride" projects have been successfully implemented. New legislation should recognize this trend and give agencies on aging the encouragement, guidance, flexibility, and independence required to enter into negotiations and contractual arrangements with taxi companies when such covenants can be cost effective with no deterioration in the quality of service.

CONCLUSION

The emphasis of my testimony has been on coordination, communication and cooperation among various kinds of providers of transportation services to elderly Americans. These various levels of service providers must work together to create an organized, comprehensive and efficient network. Operators of mass transit, para transit, and taxicabs must receive encouragement and the necessary mandate from Federal, local and State governments to change age-old institutional and legal barriers that have hampered the coming of low-cost, efficient, readily available para transit for all persons who find themselves dependent on such transportation because of location, income level, physical or mental infirmity, or age.●

TRIBUTE TO BAPTIST LAYMAN'S MOVEMENT

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. STARK. Mr. Speaker, I would like to take this opportunity to pay tribute

to the California State Baptist Convention Layman's Movement.

This is an organization dedicated to the principles of Christian fellowship. Their concerns for the welfare of others, both spiritual and temporal, are a living testament to their faith.

The convention, 260 churches strong, has donated thousands of dollars in scholarships to deserving youth throughout California. They have a camp and are ministering to the needs of their young people through the Young People's Convention.

The California State Baptist Convention Layman's Movement understands the brotherhood of man. Their good works help remind us that "no man goes his way alone" as long as there are fellowships of caring people such as the layman's movement.●

TRANSPORTING THE HANDICAPPED: DO WE DARE TO BE RATIONAL?

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. EDGAR. Mr. Speaker, Federal law requires the accessibility of public facilities to elderly and handicapped persons. A debate is underway on how this mandate should apply to federally assisted public transportation systems.

Should all existing public transportation, from rail to bus, be upgraded to provide for wheelchair accessibility? Many Members of Congress would be prompted to answer yes because the proposition sounds good. It is humanitarian.

Robert B. Johnston, general manager of south Jersey's famous Lindenwold transit line, argues that wheelchair-bound passengers cannot be accommodated by most existing public transportation systems. He argues for special door-to-door transportation services for the handicapped. His views on this issue are provocative and I commend the following "white paper" to the attention of my colleagues.

E & H TRANSPORTATION SAFETY ISSUES PAPER

Federal legislation and regulations have mandated that nonambulatory, wheelchair-utilizing handicapped not be denied access to urban mass transportation facilities and services. While laudatory achievements from the perspective of guaranteeing and protecting the civil rights of the handicapped, these rulings are appearing increasingly deficient in two different, significant perspectives. They have done little to promise or provide an increase in the real mobility of wheelchair-handicapped persons. And their implementation raises the spectre of a degraded level of mass transit system safety for both the handicapped and non-handicapped user.

The term "mass transit" accurately describes the *raison d'etre* for most of the bus and rail systems in our Nation's cities and metropolitan areas. They were created to move large numbers of people, safely, simultaneously, and as rapidly and efficiently as possible. To change this role, by fiat, to one of providing mixed mass *and* specialized service utilizing common facilities and fixed-route vehicles gives rise to a premonition of safety problems. These problem areas are outlined below, from five major perspectives.

THE HANDICAPPED USER

A mass transit system, rail or bus, presents a hostile environment to the handicapped user. Such a system is operated on a schedule. A schedule conveys the image and importance of covering a given distance in a given period of time to both operator and user. This in turn conveys the message of haste in entering a transit system, passing through any terminal or station facilities provided, and in boarding and exiting vehicles. Indeed, casual observation of any transit system at any time of day or night reveals this to be the fact. A person in a wheelchair is incapable of haste, and runs the risk of personal injury if he tries to hurry. And hurrying commuters or housewives returning home from shopping trips are notoriously unsympathetic to anyone or anything that gets in their way. As proof, try negotiating a transit system at rush hour burdened with two suitcases.

In attempting to plan and provide for the safe transportation of the wheelchair-using handicapped, the transit operator is immediately confronted with the issue of what are his physical conditions that must be taken into account. In the regular provision of service there is a well-recognized "average" that applies to the physical characteristics and conditions of the user. There is no such "average" as applied to the wheelchair handicapped. The more active, mobile, and physically capable members of this group eschew even the provision of seat belts and wheelchair securement devices, while many others are unable to move about without direct, personal assistance. One can readily perceive the dilemma in trying to plan and provide a fixed-route, mass transit, "common carrier" service that will be equally safe for all degrees of the wheelchair handicapped, as well as the non-handicapped majority of users.

Crowding, a common, everyday condition on our Nation's transit system, is bane to the wheelchair user. A situation which is at best uncomfortable and annoying to a non-handicapped person able to "ebb and flow" with the crowd, poses a direct threat to the physical and emotional well-being of a person in a wheelchair. There is nothing sinister implied here, just a recognition of reality. As the person in the wheelchair would be invisible to most of the crowd, normal crowd dynamics would force those standing or moving next to the wheelchair ever closer in upon it, and its occupant.

The wheelchair itself poses a threat to its occupant and a safety problem to the transit operator. There is no standard design for wheelchairs. Thus not only do they vary in overall dimensions and means of operation and control (often based upon the physical requirements of their users), but in structural integrity. The ability to design vehicular-mounted wheelchair securement devices that will assure a uniform and adequate degree of safety for all wheelchairs is thus made suspect. Equally important is the lack of ability of all wheelchairs to withstand stresses uniformly. This stress factor cannot be overlooked. Rapid acceleration and deceleration forces are present or potentially present, in all fixed-route, "common carrier", urban mass transportation systems. It is demonstrable that some wheelchairs will collapse when subjected to these forces and stresses while held in a securement device. If unsecured, these same forces will impel a wheelchair like an uncontrolled projectile, unless its occupant has a secure handhold external to the wheelchair and is strong enough to maintain it.

Finally, the security of a wheelchair-handicapped person in a typical big city mass transit system environment would be substantially less than that of a non-handicapped individual. Whether on a street corner awaiting a bus or in a rail station or subway concourse, the person in a wheelchair presents a ready target to the would-be mugger This is not because our transit systems are basically unsecured and havens for criminals. Rather it is simply recognition of the fact that handicapped individuals traveling alone and moving slowly are more susceptible to personal attacks than the nonhandicapped. And recognition of the fact that, reprehensible though they be, individuals or gangs will commit such attacks regardless of the quality of the security provided by transit and local police.

THE NONHANDICAPPED USERS

It is well-recognized that each mode of fixed-route, mass transit transportation possesses distinct attributes. These attributes tend to encourage or discourage transit usage, dependent, of course, upon the availability and quality of alternative transportation. Thus buses provide a comfortable mode of travel, provided almost all riders have seats. Trains provide generally more and wider, more comfortable seats and wider aisles, thus permitting even a reasonable number of standees to travel comfortably.

It is also obvious that the greater the number of seated passengers in any mode, the greater will be their safety. The safest load is a seated load and safety degrades as the number of standees increases. Indeed, in some transport modes no standees are permitted, for example, in airplanes. And while standees are a fact of life in all urban transport systems, especially during rush hours, a universal goal is to minimize their numbers.

To provide for the safe transport of the wheelchair handicapped in any mode of fixed-route, urban mass transportation unavoidably involves an accentuation of its most negative attributes. In buses, seats must be removed and/or narrowed to provide a location or two for the wheelchair and the necessary securement devices, and a sufficiently wide aisle and area for the wheelchair to negotiate. In trains, similar modifications would be required; also, end doors in many rail cars would have to be widened and a means developed to bridge the gap between cars to permit the passage of wheelchairs from car to car.

The net result of these modifications is that fewer and less comfortable seats will be available for the non-handicapped regardless of whether or not *any* wheelchair handicapped are transported. Ergo an immediate degradation of safety in two ways: more standees and more crowding. The decreased safety may not always be perceivable to the user, but the decreased comfort and increased annoyance are. The consequences may even more subtly adversely impact upon the user's safety.

Statistically, urban rail and bus mass transit are the safest modes of urban transportation, with the automobile the least-safe. Thus increased safey should be a major inducement to encourage people to become and remain mass transit users. Unfortunately, most motorists perceive themselves to be quite safe behind the wheel. Thus the comfort and convenience of the mass transit mode is perceptually of more significance to the user than safety. Hence the decreased comfort and increased annoyance cited above would tend to encourage commuters to return to or remain in their autos, thereby exposing them to greater risk of death or injury.

The inherent danger in mixing specialized transport with mass transit becomes clearer when one realizes the number of ways in which a non-handicapped user of such "mixed" service could suffer personal in-

jury as a direct consequence. Even with no one in a wheelchair aboard a mass transit, fixed-route vehicle, requisite securement devices will provide protuberances upon which standees can stumble or be pushed or fall against. Where these protuberances can be covered by a fold-down seat, operation of the mechanism is both a temptation and a threat to the safety of the non-handicapped user, especially if the vehicle is moving or crowded.

Place a person in a wheelchair aboard the vehicle, and the wheelchair itself becomes a potential clothes-tearer, shin-scraper, stumbling block, uncontrolled projectile (see above), or worse. Many transit systems bar large or bulky objects from being brought aboard their vehicles because of the threat to safety. Yet existing and pending Federal legislation and regulations ignore this recognized hazard by mandating wheelchair accessibility for fixed-route, "common carrier", mass transit system bus and rail vehicles.

Not to be overlooked is the potential for decreased safety when wheelchairs are introduced into the environment of a mass transit rail or bus terminal or station. The threat to the physical and emotional well-being of the handicapped user, cited above, applies equally as well to that of the non-handicapped user. The potential for the wheelchair to exacerbate normal crowding is especially acute at boarding platforms or areas, and in the fare-collection areas of rail stations. There, retrofit of existing stations to accommodate wheelchairs will often mean a reduction in the overall number of fare gates or turnstiles usable by the general public. At best, this will lead to longer queues behind the available barriers. At worst, it could lead to totally clogged fare-collection areas, with moving escalators relentlessly bringing more people with nowhere to go. Again, no wheelchair need even be present for this scenario to occur. Again, the intent is not to cry "wolf," but to be realistic. Indeed, the threat of what has been described may preclude some stations on existing systems from ever being made accessible.

EMERGENCIES

When a wheelchair is introduced into a mass transit system environment, common, everyday operating irregularities have the potential of becoming emergencies. And emergencies have the potential of becoming tragedies. These potentials are real. They stem from the fact that Congress and the Administration, in their rush to mandate wheelchair accessibility to fixed-route, urban mass transportation systems, completely avoided one question: What happens to the wheelchair handicapped aboard a standard mass transit vehicle disabled or stalled between stops or stations? In bus systems, perhaps the greatest likelihood of trouble would occur where limited-access busways or bus-only lanes were being employed, especially where they would be traversing elevated, underground, or depressed highway sections. Of equal potential for trouble would be any tunnel facilities, especially those shared with mixed vehicular traffic. However, regardless of the type of roadway, one must recall the documented cases of bus fires in which the vehicles were entirely engulfed in flames within a matter of minutes, leaving their non-handicapped riders barely enough time to escape safely. The issue in all these situations is how to get persons evacuated, quickly and safely. Can it be done with a person in a wheelchair? Without jeopardizing the safety of non-handicapped riders? Relatively few fixed-route buses are currently wheelchair-accessible. Should they be made accessible until these questions can be answered?

The potential for rail systems is even more deadly, given their peculiar characteristics and the fact that legislators and bureaucrats have already written them off as "accessible, no problems."

Their peculiar characteristics include extremely high load factors per employee (indeed, several systems employ one-man train operation, with passenger loads in excess of 1,000 per train); exclusive rights-of-way; electrically energized contact rails paralleling the guideway; dimly lit tunnels (primarily in older systems or segments thereof); absence of walkways or walkways wide enough for wheelchairs along any section of guideway; and extensive utilization of underground, elevated, and depressed guideways generally less accessible to emergency equipment and personnel than comparable highway sections.

While rail vehicles, it is true, generally have side doorways wide enough to permit access by wheelchair, vehicular problems do exist, which, like those cited immediately above, were overlooked by the Federal rulemakers. The first problem in many cases is found right at the doorway: a horizontal or vertical gap between car and platform edge too big to be safely negotiated by a wheelchair; any attempt would create an immediate emergency. Inside the vehicle one notices that it was not designed to carry wheelchairs; no dedicated areas or securement devices are provided (or mandated), yet they should be if safety is to be assured (although to provide them would create additional problems). Next, one notices that aisles may be only barely wide enough to permit a wheelchair (and a wheelchair only) to use them, even though use is almost inevitable given the likelihood of the occurrence of one of the most common of rail transit problems: failure of one of the two, bi-parting, side door leaves, making the opening too small for the wheelchair. Finally one notices that in vehicles equipped with end doors, the doorways are generally too narrow for a wheelchair to pass through, and the horizontal gap between the cars too wide for it to cross. When one recalls that the standard operating procedure for emergency evacuation of passengers on many rail systems is from vehicle to vehicle through the end doors and into a relief train or onto the guideway, the real potential for tragedy becomes clear. What would happen with a wheelchair blocking an aisle or an end door? Who would be responsible for evacuating the wheelchair-handicapped individual (with only one or two employees on the entire train)?

Obviously rail transit system environments are the result of designing for the average, non-handicapped person. Is it safe or judicious or proper to require the mixing of non-handicapped and severely handicapped individuals into such an environment?

A final emergency-related issue to ponder: Is it fair to regular fixed-route mass transit systems employes to expose them to increased risk in emergencies by giving them the responsibility for evacuating wheeelchair-handicapped persons? It is one thing for employes to assist in evacuating trapped or injured passengers. It is quite another to place the quivalent of an injured passenger in the care of employes to begin with. For like it or not, this issue requires recognition of the fact that wheelchair-handicapped persons require specialized service, handling, and attention to assure their transportation safety, and the non-degradation of safety for mass transit riders.

OPERATIONS AND NEW TECHNOLOGY

At the outset, the importance of time and being "on time" in the provision of standard, fixed-route mass transit system service was discussed, principally from the users' perspective. Being "on time" is even more important to the operator. The ability to adhere to schedule has a direct bearing on both winning and holding patronage, and in the number of vehicles required for service. Patronage and fleet size in turn equate with revenues and expenses. Thus management is desirous for its operating crews to get "over the road", and with this incentive and human nature being what it is, the crews generally do their best to comply.

Enter the wheelchair. Just one wheelchair-handicapped person boarding or alighting at one stop has the potential for increasing vehicle dwell time eight fold (from 15 seconds to two minutes). At once the attempt begins to "make up lost time." Starts and stops become quicker, door operation get sloppy, signals and traffic lights are "second-guessed," and even attitude toward and relationships with passengers change (especially if they begin griping about "being late"). In short, safety has degraded, for all concerned. And remember that speed of the trip is one of the primary factors in selection of a transportation mode. If trip-time lengthens, those riders who can may go back to their autos. We've discussed the negative effect that has on their safety.

Related to operations is the effect of introducing new technology into mass transit systems. Historically, every time new technology is introduced, "bugs" come with it. This is true regardless of whether the technology is "evolutionary" or "revolutionary", and whether it's for a rail mode or a bus mode. Generally, however, the more "revolutionary" a new technology, the more "bugs" come with it.

Now all this is changed. With the strokes of pens and the clatter of printing presses, "Washington" has declared that on and after a certain date, all transit vehicles and facilities will be wheelchair accessible. Thus newly designed wheelchair lifts and ramps, Transbuses, fare collection equipment, and gap-closers, and related gadgets that haven't even been designed (or thought of) yet will all work to flawless perfection from "day one". Poppycock!

The more likely scenario is that lifts and ramps will collapse under load, fail to work at all, or catapult wheelchair and occupant into a snow drift, or the arms of glowing Legislators and Administration types. Likewise a goodly percentage of the rest of the gadgetry will malfunction, and Transbus may not make it out of the garage.

Humor aside, there will be dire safety consequences if handicapped accessibility technology is introduced without proper and thorough research, development, and testing. Even then, problems must be anticipated, and programs in place to train employes in the proper operation and maintenance of the equipment, and the handicapped and non-handicapped (where appropriate) in its use.

CLAIMS AND STANDARDS OF CARE

What will claims experience be as the wheelchair handicapped begin to utilize fixed-route, "common carrier", mass transit systems? Without substantial modifications to vehicles and facilities to take into account their specialized safety needs and requirements (which has not been envisioned in the legislation and regulations), claims experience could well be bad. And even before the fact, what will happen to the cost and availability of insurance for rail transit systems? In line with recent trends, the answer is almost obvious.

Let's now go to court. How will judge and jury define the "standard of care" a transit system must provide its patrons, in light of the carriage of wheelchair handicapped? Could the courts require special training for all operating personnel? Would the courts insist that an attendant be provided for each wheelchair-handicapped person transported aboard a mass transit vehicle not equipped with a wheelchair-securement device, or not having other safety appliances or modifica-

tions? Only time will tell, but the distinct possibility is there.

CONCLUSION

We've tried to be realistic in presenting and discussing the safety-related issues in the transport of wheelchair-handicapped persons by fixed-route, "common carrier", mass transit systems.

In summary, the wheelchair handicapped are not a segment of the urban transportation market that standard mass transit systems can safely or satisfactorily accommodate.

From the perspective of safety alone, the wheelchair handicapped can only be safely and satisfactorily served by a specialized, door-to-door urban transportation network.

By honestly recognizing the realities of urban transportation, specialized systems of transport for our severely ambulatory-impaired citizens can be implemented that will provide them with increased mobility at lower cost and greatest safety and security, and which can be operated most safely and cost-efficiently.

Such a specialized system is already largely in place, requiring for implementation only elimination of institutional, political, and/or bureaucratic barriers, coordination, and, in some cases, subsidization. It is composed of extant specialized transportation and taxi fleets. Do we dare to be rational?●

GEORGETOWN CSIS—MOTHBALLING THE MAGINOT LINE

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. DORNAN. Mr. Speaker, certainly one of the most ridiculed and fortunately forlorn concepts to be swept into history's proverbial dustbin is the mentality of the maginot line. It is less a plan than a state of mind in which foreign policy-makers become paralyzed from the neck up. They stubbornly hold to one preplanned set of policy assumptions to the total exclusion of all others.

In the military defense plans placed into effect by France between World War I and II, concrete fortifications were erected as the promised prevention against a direct attack across Alsace and Lorraine. They eventually fell, as did the provincial mentality led to them. Since then, we have learned, in General Patton's words, that "* * * Fixed fortifications are monuments to the stupidity of man."

Today, there is a new maginot line. But rather than hundreds of miles of concrete gun emplacements, America's maginot line is the blocks of bureaucratic offices which constitute our State Department. It is the inflexible, unimaginative and unchanging policies ascribed to post-World War II foreign policy-makers.

In recent years, though, one so-called Washington think tank has become the predominant alternative to this post-war, PT-109 liberal mindset within State Department circles. As more opinion leaders inside and on the outside of Government look to it as the major formulator of a conservative response to the liberal foreign policy program, it has become renown. It is the Georgetown University Center for Strategic and International Studies.

I had the pleasure of spending time with the center's director of studies, Dr. Ray Cline, overseas last January. His own leadership in the foreign policy field exemplifies the caliber of people connected with the center. It is perhaps as ironic as it is flattering to the Georgetown CSIS that a recent article in the liberal bimonthly, the New Republic, celebrated the center's stature and influence. I am delighted to request its addition to the CONGRESSIONAL RECORD, and I commend it to the attention of my colleagues.

HOME FOR HARDLINERS

(By Morton Kondracke)

Who makes American foreign policy? In the dear, dead days from World War II to Vietnam, when the President knew best, when politics stopped at the water's edge and when Americans understood the lesson of Munich, we all know who made policy: a tight, exclusive elite establishment of Ivy Leaguers. Wall Street lawyers, foundation executives and, later, professors—WASPs and, later, Jews and Catholics—who hashed things out privately at the Council on Foreign Relations in New York and promulgated their consensus in Foreign Affairs. Every four or eight years, when administrations changed, a new group left the lucrative life in New York—later the less lucrative life in Cambridge—for "public service" in the executive branch in Washington, trading places with those who had been there previously. Whether Republican or Democrat, members of this establishment tended to share the same world view—that American interests were under Communist challenge everywhere and had to be resisted everywhere.

In form, the classic Stimson-Acheson-Dulles-McCloy-Bundy-Rusk-Rogers (later, Kissinger) tradition lives on today in Cyrus Vance, the Wall Streeter turned Secretary of State. But other things have changed. The Council on Foreign Relations, Foreign Affairs, New York, Cambridge, even the executive branch, have waned as loci of foreign policy-making. Washington is increasingly the place where policy is shaped, as well as executed, partially because Congress has demanded a role in it. In the executive branch, this is the era of the Trilateral Commission—the vehicle of Zbigniew Brzezinski and David Rockefeller for breaking out of the tight New York-Cambridge axis and bringing Europeans, Japanese, Members of Congress and governors of Georgia into the American consensus-making process. Vance, Treasury Secretary Michael Blumenthal, Defense Secretary Harold Brown, UN Ambassador Andrew Young and other top officials, not to mention the President, are all former associates of the Commission. For additional ideas to fuel and personnel to fill the Carter administration, the Trilateral in-group also looked to Washington-based organizations such as the Brookings Institution, the Carnegie Endowment and its publication, Foreign Policy.

The Trilateral administration at the outset, departed in important ways from the old New York-Cambridge worldview. President Carter disclaimed any "inordinate fear of Communism," decided to withdraw ground troops from Korea, opposed continued white rule in Southern Africa, pooh-poohed Communist inroads in Western Europe and penetrations in black Africa, moved to improve relations with Cuba, Vietnam and China, agreed to "give up" the Panama Canal and began making other countries' internal human rights policies a determining factor in relations with the United States. Either in conception or execution, these departures have come under concerted attack. The administration has shown repeated signs of reversing itself, or faltering, or both. Something close to a majority of the American people wonders whether the Trilateral bunch has any idea what it is doing.

Of all the sources of criticism of Carter foreign policy, probably the single most consistently trenchant and influential is a Washington think tank associated with Georgetown University, the Center for Strategic and International Studies. It is the place that Henry Kissinger chose as his academic base, instead of Columbia, Pennsylvania or Yale, but Kissinger's decision did not establish the Center's quality or its prestige. Rather, it confirmed the former and enhanced the latter. For 15 years, CSIS has been producing important ideas, analyses and policy alternatives. It was first among the think tanks to spot the energy crisis, the depth of the Sino-Soviet split and the importance of the Persian Gulf to the United States. Over the years, it has developed close ties in Congress and with important scholars and political leaders abroad. One of Kissinger's functions is to draw in top world business leaders. The CSIS's budget has grown fivefold in the last 10 years, and the Center has just established Washington Review, a quarterly whose editor wants it to rival Foreign Affairs and Foreign Policy as the nation's foremost journal of global policy debate. If the Trilateral administration should flop, it could be succeeded by one strongly influenced by Georgetown—headed, say, by a mainstream Republican or, perhaps, by a Democrat such as Senator Daniel Patrick Moynihan.

At the Center's offices in downtown Washington, most of its executives and staff members deny that CSIS has any partisan or ideological tilt. They claim it is objective, diverse, realistic and centrist. "We are not a government-in-exile," said the Center's strategic studies director, Ray Cline. "We are an open university for policy-makers, a school for governments." Institutionally and officially, this may be true, but scholars at the Center have individual views which, taken as a whole, come out distinctly—and brilliantly—hard-line. Cline, former deputy director of CIA, started the campaign that eventually stopped the Carter administration's rush to normalize relations with China. Another CSIS PhD, Roger Fontaine, is the leading intellectual critic of Carter's Panama Canal treaties. The executive editor of Washington Review, Michael Ledeen, a frequent contributor to TNR and Commentary, has urged administration opposition to Eurocommunism, as has Kissinger, who has been downplaying his former ardent advocacy of detente with the Soviet Union. Kissinger and other CSIS figures have criticized Carter policies in the Middle East and Soviet inroads in Africa. They have advocated the B-1 bomber and opposed early Carter efforts to deny breeder reactors to the world. CSIS associate Edward Luttwak, another frequent Commentary contributor, is a leading critic of United States arms control and strategic weapons policies.

In its influence on American foreign policy, the Center may be centrist, but that is only so because American opinion has shifted. It has shifted, in the opinion of one CSIC scholar, "because of the incompetence of the Carter administration and what the Russians have been doing." CSIS did not influence the country's change of mood, he said, but CSIS has become influential as a result of this change and because "of our intellectual superiority and the collapse of the other side." According to Cline, CSIS is "conservative," but not right-wing. "It is conservative in the sense of being dedicated to the preservation of American values. I am concerned lest we move too far away from the experience and wisdom that came from World War II and the following wars, and retreat into innocence and a figurative isolationism." There seems little danger of that, however. What seems more to be hap-

pening is the formation of a new hardline consensus in the country, and Georgetown is in the intellectual vanguard of it.

The Center is the creation and principal life's work of David M. Abshire, a tall, gentle-spoken West Point graduate and combat veteran who left the Army to get his PhD in international relations at Georgetown in 1959. He is a Republican who worked in his 30s for the House GOP policy committee and for the American Enterprise Institute, the conservative think tank. In 1962, he succeeded in convincing AEI's President, William Baroody Sr., and four foundations to put up money for a new strategic studies center vaguely modeled on the Institute for Strategic Studies in London. Simultaneously, he got Georgetown University to sponsor it and retired Admiral Arleigh Burke to be its chairman. The Burke-AEI connections have given CSIS a right-wing reputation ever since its founding, but Abshire maintains it has been consistently dedicated to considering diverse points of view. In contrast to other think tanks started in the 1960s, liberal or conservative, Georgetown was founded under rules that it would accept no CIA or Defense Department funding and would do no classified research. Abshire contends the best way to influence highest-level policymakers and the public—as opposed to bureaucrats—is by publishing in the open.

Until recently, the Center accepted no government funding whatever, but lately it has accepted small grants from the Environmental Protection Agency and the arms control agency. It has no endowment, and therefore has to raise its budget as it goes along, by proposing studies that seem relevant to foundations and corporations. The Center's original budget was $120,000 a year. It was $500,000 in 1969 and currently is $2.4 million. Two thirds of this money comes from foundations—including Ford, Rockefeller, Mellon, Crown, Lilly and Sarah Scaife—and one third from corporations. Atlantic-Richfield, headed by Renaissance oilman Robert O. Anderson, was the biggest corporate donor last year.

In the 1960s, and even today, "strategic studies" had and has a distinctly military connotation, whereas the Center always has been more dedicated to studying global grand strategy—international maneuver based on military and economic power, geography, alliances and political decisions. In 1966, Abshire convinced the late Philip Mosely, probably the country's most distinguished Russia scholar, to organize an international network of front-rank academics to advise the Center about what problems it ought to be studying. That is regarded as a key moment in the Center's history, and it was marked by a name change to make it clear the Center did "international" as well as "strategic" studies. Mosely's International Research Council, which assembles annually at a travel cost of $25,000, now is headed by Professor Walter Laqueur, a brilliant and witty Middle East expert, onetime Kissinger critic and, lately, author of books on guerrilla warfare and terrorism. Laqueur also edits the Center's "Washington Papers" series, which turns out 10 short paperback books per year by experts on various international topics. The books frequently become standard handy reference on the state of affairs in, say, India, Saudi Arabia, international broadcasting or nuclear strategy.

To Abshire and others at the Center, CSIS's purpose is "to stay ahead of the game" in foreign policy—to anticipate issues that will be of vital concern to policymakers and produce research on them. There is a definite sense of competition among think tanks to be ahead of one another in defining the issues of the future. Abshire says that CSIS was first—in a 1966 study headed by former Defense Secretary Neil McElroy—to predict that the Johnson administration's methods of financing the Vietnam war would lead to disastrous inflation, which it did. He implies that other CSIS assessments were critical of military and political decision-making during the war. But this did not prevent Abshire himself from joining the Nixon administration as assistant secretary of state for congressional relations and from serving as a principal defender of administration war policy and war powers under assaults from Capitol Hill.

Abshire emerged from administration service in 1973 with his honorable reputation intact and seemingly without having made mortal enemies anywhere in Washington. He says he also emerged convinced that Congress was bent on decisive involvement in foreign policy. He set the Center to work both studying the phenomenon and getting in tune with it. Now, CSIS's professional thinkers hold regular briefings for members of Congress and staff groups. A Center advisory board contains a number of members of Congress, including Senator Hubert Humphrey before his death, and the chairmen of the House International Relations Committee, the House Ways and Means Committee and the Joint Economic Committee. Unlike the Trilateral Commission, CSIS seems not to have made any effort to collect future presidential hopefuls onto the board. If a Georgetown Center administration ever comes to power, it will be by CSIS's ability to anticipate issues, and not by an arbitrary gamble on politicians' fortunes.

CSIS's most successful anticipation of a coming hot issue was about energy. In the spring of 1973, Abshire hired Jack Bridges, a staff member of the Joint Atomic Energy Committee. Bridges briefed no less than 80 senators and half the members of the House that an energy crisis was at hand—all before the Yom Kippur war broke out that October. The Center produced a movie in an effort to convince the public, as well. Energy continues to be CSIS's largest area of interest, including a $700,000 project that has brought industry and environmental groups together in an unprecedented effort to develop an agreed national coal policy. The project is intended to prevent coal exploitation from falling victim to the same crippling political and environmental controversies that have plagued development of nuclear power.

A kind of entrepreneurship develops in think-tankery—the more foresight an institution shows on policy issues, the more interest and money it can attract, the better to hire brains and improve its foresight. CSIS has pioneered inquiry on issues such as weapons standardization in NATO, human rights (in 1973) and reorganization of USIA; and it has gained the wherewithal to sponsor several major international meetings a year including a Quadrangular Conference (going the Trilateralists one better) that brings together government leaders, scholars and legislators from Europe, Japan, the United States, Canada and also the third world, to discuss economics and other issues.

Credit for the Center's development, say his subordinates, goes entirely to Abshire. "He's a deceptive Southerner," said one of them. "He does not come on like an intellectual. He is not, in fact, an original philosopher, but he knows what's good and who's good. He knows all the best brains in the world." Another colleague said, "He has perfect political instinct. You bring him an idea and he'll instantly understand all the political implications of it. If it's a project for the Center, he'll automatically know who will be interested in it and who might fund it."

It was Abshire, at the urging of Peter F. Krogh, dean of Georgetown's foreign service school, who talked to Kissinger about joining the Center. Conversations began six months before Kissinger left the government, at a time when it appeared Kissinger was thinking about locating in New York. Kissinger decided he also wanted a Washington base, to be close to current foreign policy-making. Student and faculty discord at Columbia dissuaded him from accepting an offer there, and accepting attractive offers from Yale or Pennsylvania, he decided, would have forced him to travel between three different cities to get his work done. He is also said to have been surprised at the Georgetown Center's range of activities and personnel.

Kissinger's new colleagues include some strong onetime critics, including Cline and Luttwak—the latter, a former protege of James Schlesinger, who was a Center associate before he became Carter's energy chief. The staff also includes William Hyland, a former National Security Council aide who is helping Kissinger with his memoirs and helping Cline with Soviet studies; former Pentagon official Amos A. Jordan Jr., who is in charge of natural resource studies, former State Department cultural chief John Richardson Jr., head of studies of international communications and human rights, and Michael Samuels, former ambassador to Sierra Leone, now in charge of third-world studies. Kissinger is attached to a major new project on the future of business, originally launched with a $250,000 grant from Mobil.

Georgetown pays Kissinger $35,000 to be a CSIS counselor and to teach seminars to students. He also gets an unmarked, well-guarded suite of offices in the CSIS complex and help in paying for his staff. Kissinger also has an office in New York from which he conducts his commercial enterprises, including lucrative consultantships to NBC, the Chase Manhattan Bank and Goldman Sachs, the investment house. Kissinger thus shuttles back and forth between the old center of foreign policy making in America and the new one. With a fine sense of where power is shifting, it is not surprising that Henry Kissinger settled in the Georgetown Center.●

PHILADELPHIA HOSTS PREMIERE OF STRUGGLE FOR LIFE

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. EILBERG. Mr. Speaker, this week the city of Philadelphia is proud to host the American debut of a highly unique art experience to commemorate the 30th anniversary of the State of Israel.

"The Struggle for Life" is on exhibit in the Philadelphia Civic Center, with admission free to the public. Created by I.M. Goodovitch, the work is 11 feet high, and 36 feet round. It is a walk-through sculpture, and is experienced by the viewer through sight, hearing, and thought.

The structure includes several priceless objects, all originals, which mark the history of the Jewish people, the State of Israel, and their struggle for life.

The objects include the license plate on the Mercedes sedan used during the raid on Entebbe; an Israeli flag made by Israeli soldiers from scraps of their clothing in 1973 while prisoners in Egypt; many archeological finds dating from the biblical times of Abraham; a map detailing the Sinai campaign, drawn by Moshe Dayan on a napkin in a cafe; and the map which Israeli Prime Minister Menachem Begin brought to the U.S. in his first meeting with President Carter.

"The Struggle for Life," Mr. Speaker,

is in Philadelphia with an exhibit of contemporary Israeli art in the Civic Center Museum. The display is part of the cultural exchange between the city and its sister city of Tel Aviv.●

SAUDI OIL PRODUCTION IN THE FUTURE

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. HAMILTON. Mr. Speaker, I would like to bring to my colleagues' attention some correspondence I have had with the Department of Energy about future production potential in Saudi Arabia.

The basis of my concern and my letter to Secretary Schlesinger of February 14, 1978, was a February 8, 1978, New York Times article which said that the United States and the Arabian American Oil Co. (ARAMCO) operating in Saudi Arabia were at odds about oil production potential in Saudi Arabia and a series of management issues in Saudi Arabia.

The Department of Energy, in its reply, does not comment on ARAMCO managment but does indicate that plans have been drafted for Saudi production to increase to 14 million barrels of oil a day by the mid-1980's. The Saudis and ARAMCO say that it will take $22 billion in investment by the Saudis to accomplish this goal of a more than 50 percent increase in production and that there is now considerable debate in Saudi Arabia over what the level of production should be, many Saudis arguing that they are producing too much now.

This issue is a matter of vital interest to the United States for the immediate future until we are able to diversify our energy requirements and find alternative sources. If these figures of production and investment needs are accurate, it will be an important task of the United States over the next several months, first, to persuade the Saudis that production will need to rise and, second, to urge them to make the necessary investment to be able to raise production.

The New York Times article and the comments by the Department of Energy follow:

DEPARTMENT OF ENERGY,
Washington, D.C., March 2, 1978.

Hon. LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, Committee on International Relations, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: The Secretary asked me to respond to your letter of February 14 in which you request the Secretary's views on the New York Times article by Seymour Hersh and the Department's present estimates of Saudi Arabia's production potential over the next several years.

The February 8 New York Times article by Seymour Hersh gives the impression that there is a sharp dispute between the Department of Energy and the Arabian American Oil Company (ARAMCO) over Saudi Arabia's long-term production potential. This concern was one factor behind the Secretary's Middle East trip. Our main concern is to determine what level of Saudi output we can expect in the years ahead in the light of conflicting capacity estimates.

The Saudi Government and ARAMCO have announced plans to install surface production facilities with a maximum capacity of 14 million barrels per day (MMB/D) in 1983–1985. The company has also proposed that Saudi Arabia spend $22 billion in the next 3 years to accomplish this and other development goals. This is an enormous investment by any criteria. It is designed to end the wasteful practice of gas flaring and to provide new water sources to improve reservoir pressure.

Based on these proposals and on his discussions with officials in Saudi Arabia, the Secretary indicated in his recent press conference that we expect Saudi Arabia to be producing around 12 MMB/D on a sustained basis in the mid-1980's. The difference between the planned 14 MMB/D capacity and the 12 MMB/D production reflects operational flexibility required for such routine matters as shut-downs of selected production facilities for maintenance purposes, occasional backlogs at port loading facilities, and the like.

The dispute over future Saudi productive potential to which Mr. Hersh refers in his article is doubtless real. It results from an honest difference of opinion over which constitutes sound and prudent reservoir management practices. Certain Saudi officials are apparently convinced that the country's oil fields have been produced at too high a rate.

We understand that the Saudi Petroleum Ministry has hired independent consultants to advise them on the appropriate levels of future production from Saudi oil fields. If the results of those studies are made public, we will analyze the implications for the world and U.S. oil markets.

I hope this information is responsive to your inquiry.

Sincerely,

WALTER J. MCDONALD,
Principal Deputy Assistant Secretary for International Affairs.

FEBRUARY 14, 1978.

Hon. JAMES R. SCHLESINGER,
Secretary of Energy, Department of Energy, The White House, Washington, D.C.

DEAR MR. SECRETARY: I enclose for your comments an article which recently appeared in the New York Times regarding oil production in Saudi Arabia and the performance of the Arabian American Oil Company.

I would appreciate your detailed comments on the accuracy of this article, the points made about Aramco and the production figures mentioned and your analysis and present estimates of what production levels Saudi Arabia can achieve over the next several years.

I would appreciate an early reply to this inquiry.

Sincerely yours,

LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East.

[From the New York Times, Feb. 8, 1978]

WHITE HOUSE AND ARAMCO AT ODDS ON OIL

(By Seymour M. Hersh)

A deepening dispute over the condition of Saudi Arabia's rich oil fields has developed between the Carter Administration and the four American oil companies whose privately owned Arabian American Oil Company produces virtually all the oil there.

A number of senior Administration officials, in interviews in the past month, have said there is evidence that poor management and overproduction by Aramco, as the American company is known, have helped create various technical problems. Those problems may make it more difficult for Saudi Arabia, which contains 25 percent of the world's known oil reserves, to increase production by the early- and mid-1980s to meet the expected growth in world demand.

Senior officials of Aramco and its four parent companies—the Exxon Corporation, the Mobil Corporation, Texaco Inc. and the Standard Oil Company of California—have denied the existence of any serious technical problems in the Saudi oilfields. They also denied allegations of mismanagement.

BILLIONS IN REPAIRS NEEDED

Nonetheless, three Government agencies—the Central Intelligence Agency, the Department of Energy, and the General Accounting Office—have independently concluded within the past few months that the Saudis will need to make extensive equipment purchases and also revamp the fields—at a cost of billions of dollars—if higher productivity is to be reached in the near future.

The interwoven issues of Saudi oil production, United States policy, and the role of the oil companies will be investigated by Congress this year. Late last month, the Senate Foreign Relations Subcommittee on Foreign Economic Policy, which is headed by Senator Frank Church, Democrat of Idaho, formally authorized staff members to begin an inquiry into, as a spokesman put it, "the allegations that there are serious production problems in Saudi Arabia."

The Saudi Government, which now owns 60 percent of Aramco, currently has ordered an 8.5 million barrel-a-day ceiling on oil production, a level of output that fulfills the currently laggard world demand for oil. Some Government oil experts now believe that Aramco cannot sustain—that is, operate for six months or more—a production rate very much higher.

MAJOR PROBLEMS SEEN

In interviews, the Government's oil experts listed the following as among the more important problems they contend are being encountered in the Saudi fields:

Poor management. Saudi oil officials recently told one group of American experts that they have reason to believe that Aramco has produced oil from three of the major reservoirs—responsible for 90 percent and more of the total Arabian oil output—at levels that were too high. As a result, the three reservoirs are said to have "matured" too early, leading to technical problems and requiring far more complicated oil recovery methods.

In addition, the Saudis have indicated that they were upset upon discovering after a fire last May that hundreds of millions of dollars worth of pipeline had been allowed to become extensively corroded by Aramco management, which did not have—in the Saudis' eyes—adequate pipeline inspection and field maintenance programs.

Reservoir pressure drops. Over the years, as Aramco pumped huge volumes of oil out of the Saudi fields, the company has had to install elaborate equipment to pump in replacement water to keep the oil under sufficient pressure for an uninterrupted flow. Despite that effort, which involves injecting enough water to replace millions of barrels of oil a day, Saudi officials have said that pressure is dwindling—and the oil thus more difficult to extract—in three of the country's major oil fields.

Water encroachment. According to one Federal agency, more than 325 of the roughly 850 oil-producing wells in the country have been shut down—more than half of them because the replacement water pumped in to maintain reservoir pressure began showing up with the oil. Aramco officials have confirmed that there now are no facilities in Saudi Arabia for separating the oil from the water, a common oil recovery technique elsewhere in the world.

Two former senior Aramco officials acknowledged in interviews that the company had experienced major problems with reservoir pressure, water encroachment and pipeline corrosion.

PROBLEMS CALLED MANAGEABLE

The two, both knowledgeable about oil engineering separately estimated that it would take Aramco four to five years to improve and increase facilities to the point where a daily output of 14 million barrels could be sustained.

Both men characterized the Saudi problems as serious, but manageable. "This isn't a trip to the moon, you know," one said. "There's nothing technically impossible."

Traditionally, Aramco has simply been able to drill a well and collect the oil as it flowed up under pressure. As the fields matured, the need arose to pump in water—obtained by tapping subterranean pools of salt water—to maintain the field pressure. There is need now not only for equipment to separate the salt water from the oil, but also for disposing of the salt that is beginning to be pumped up with the oil.

The use of such devices is known as secondary recovery.

OILMEN BELITTLE CHARGES

In interviews, officials of Aramco companies belittled the American Government's concern over oilfield conditions in Saudi Arabia and characterized the problems there as routine.

William P. Tavoulareas, president of Mobil, laughed when informed of the Government's assessments. "We're getting a 10-cent mechanical problem mixed up with a million-dollar operation," he said.

Another senior Mobil official, Walter E. MacDonald, who is a member of Aramco, executive committee, also emphatically denied the existence of serious problems in Saudi Arabia.

Some Government officials contend that the Aramco companies should strongly urge the Saudis to undertake major capital improvements immediately. Aramco is known to have recommended such an undertaking for the Saudi fields, but Mr. Tavoulareas said that the companies' influence on future Saudi production was limited.

"The level of production in the last analysis is going to be set by the Saudi Government," he said, "after they've taken all their problems into consideration."

For his part, Mr. Tavoulareas listed the Saudi problems as "their own needs; how long they want their oil reserves to last; balance of payments; world political conditions, and some of the technical problems we've been talking about."

PRACTICES "FIRST-CLASS"

Similarly, J. J. Kelberer, chairman of the board at Aramco, said in a letter to The Times last December that, "Aramco follows first-class oilfield practices in all its operations." Mr. Kelberer was replying to an article on the Carter Administration's expressed concern about possible technical difficulties and mismanagement in the Saudi fields.

A number of oil executives also said in interviews that the Aramco companies lacked any influence over present and future Saudi production.

"To the extent that the Saudis want to limit production," said one senior oil company official who asked not to be quoted by name, "that's up to the United States Government to make an argument and for them [the Saudis] to consider."

IT'S "JUST POLITICS"

Another senior official added, "The main problem is just politics. What governs oil output in Arabia is politics."

Complicating the dispute is the fact that many oil company officials believe that the Carter Administration is seeking to encourage published accounts of doubts about the future Saudi oil production potential in order to encourage domestic support for the Administration's stalled energy programs in Congress.

On the other hand, those in Government raised the possibility that the Saudi Government is delaying construction programs in an effort to enhance its leverage in world politics, and to ensure the future value of its oil reserves—particularly if a world shortage develops in the 1980's.

Told of the companies' assertions that they lacked influence with the Saudis, a senior intelligence analyst for the Carter Administration reacted angrily. He sharply disputed the companies' contention that any delay in increasing Saudi oil production was merely a political matter. And he criticized the companies for failing to provide the Government with any detailed information about the actual condition of the Saudi oilfields.

"The problem is classic," the analyst said. "The people in the Government who need the information to make decisions don't have access" to technical data from the oil companies about the conditions of the oilfields. "And in what they do tell you," he added, "you catch them in so much dissembling."

"The historic position of the oil companies is that you must do the Arabs bidding in the Middle East—or else something will happen to your oil," the intelligence official said.

"There are some people," he said, "who believe there's no connection between the two."

C.I.A. ESTIMATES MODIFIED

In recent months, officials said, the Central Intelligence Agency has modified its view on how great an output the Saudis could potentially sustain. Last year, the C.I.A. publicly estimated that Saudi Arabia was capable of increasing its output to 16 million barrels a day by the mid-1980's, a total the C.I.A. predicted would nevertheless fall short of meeting worldwide demand.

More recently, however, in a little-noted development, the intelligence agency publicly expressed skepticism about the ability of Aramco to step up and sustain production, for at least six months, at levels much above the current 8.5 million barrels daily ceiling.

In the Jan. 11 edition of its unclassified "International Energy Biweekly Statistical Review," a compilation of energy data intended for Carter Administration officials, the C.I.A. included a footnote:

"There is some question about Saudi Arabian productive capacity. During the first half of 1977 Saudi production averaged 9.4 million barrels daily, a rate that was clearly not sustainable."

In addition, the C.I.A. on Jan. 11 reduced its estimate of daily Saudi capacity from 10.5 million barrels a day, the figure that C.I.A. statistical summaries carried at the end of last year, to 8.8 million barrels a day. Agency officials said that the reduction reflected some doubt concerning Saudi technology.

"In any event," the C.I.A. report said, "Aramco operates under an annual ceiling of 8.5 million barrels a day. Included in this overall ceiling are technical restrictions imposed by the Saudi Arabian Government on individual crude streams (Arab Light) and fields (Berri.) In 1977, as a result of the OPEC dispute, this ceiling was temporarily removed."

SCHLESINGER ESTIMATES

In a news conference last month, James R. Schlesinger, Secretary of Energy, who visited Saudi Arabia last month with a team of specialists, warned that the Saudi Government was planning to increase its production facilities on an "exceedingly cautious and prudent" basis over the next six or seven years. By that time, he added, daily production would be increased to a sustained level of about 12 million barrels.

"If there is to be more production," Mr. Schlesinger said, "there would have to be expansion of investment activities. There are no current plans for such expansion."

It could not be determined precisely what was learned during the Schlesinger visit, but Government officials said that the Energy Department team was far more pessimistic upon its return to the United States than it had been prior to the trip.

PESSIMISM AT THE G.A.O.

The most pessimistic Government report is now in the process of being prepared by General Accounting Office's division of energy and minerals, which recently sent a team into Saudi Arabia.

In a draft technical report, prepared by Phillip R. Woodside, the division's assistant director, that draws heavily on extensive interviews with Sheik Ahmed Zaki Yamani, Saudi Arabia's oil minister, the G.A.D. had concluded that "for engineering and technical reasons," oil production in Saudi Arabia will never exceed 14 million barrels a day.

As a result, Mr. Woodside wrote, "major world-wide economic and political instability can be expected sometime in the period 1983–84."

Sources said that the G.A.O. team was told by Sheik Yamani that three fields were damaged because of overproduction, including two areas of the Ghawar reservoir, the world's richest and largest. Sheik Yamani was said to have told the G.A.O. Investigators that he has ordered cutbacks in production in those fields, pending a series of reservoir pressure tests to be completed sometime later this year by a British consulting firm.

In addition, the Sheik reportedly said that many oil-producing wells in Ghawar and elsewhere have been shut in because of water encroachment. The Ghawar field alone produces nearly 60 percent of the total Saudi output and the fields depicted by Mr. Yamani as damaged by overproduction are responsible for more than 90 percent of the current production.

In his final report, Mr. Woodside is expected to state that more than 325 wells have been shut down in recent years, more than half of them due to water encroachment, out of the more than 850 producing wells in Saudi Arabia. As many as 47 oil-producing wells were closed just in one high-yield field, Sufaniya, Mr. Yamani is reported to have said.

YAMANI CHARGES OVERPRODUCTION

Sheik Yamani also was said to have told the G.A.O. that he has concluded that Ghawar and other significant fields were produced at levels above the maximum rate of efficiency by the Aramco engineers, creating both low reservoir pressure and the water encroachment problems.

The Saudis recently have begun expressing doubts about the overall management and technical abilities of Aramco and recent visitors there have been told by Sheik Yamani that his ministry plans to—as one Government official recalled it—"monitor oil production much more closely."

The Sheik did order a team of experts into Aramco after a major fire last May at the Abqaiq refinery. One official said that Mr. Yamani later told him that one possible cause of the fire, which affected production for more than two months, could have been the extensive corrosion of oilfield pipelines, a problem that he blamed on neglect of proper maintenance. A $300 million pipe replacement program was necessary, Mr. Yamani was quoted as saying.●

ATTORNEY GENERAL ENDORSES H.R. 50

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. CONYERS. Mr. Speaker, in a recent letter to Attorney General Griffin Bell, I solicited his views on and support for the Humphrey-Hawkins Full Em-

ployment and Balanced Growth Act (H.R. 50). As the chief administrator of the Nation's law enforcement program and a jurist with a distinguished record in criminal and civil jurisdictions, Mr. Bell's views on the need for full employment legislation, in relation to the problems of crime, are of signal importance. The Attorney General's response is fully supportive of H.R. 50 and I commend it to the attention of my colleagues.

OFFICE OF THE ATTORNEY GENERAL,
Washington, D.C., March 14, 1978.

Hon. JOHN CONYERS, Jr.,
Chairman, Subcommittee on Crime, Committee on the Judiciary, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: In response to your letter of March 1, I am taking this opportunity to convey my views on the Humphrey-Hawkins bill, the Full Employment and Balanced Growth Act of 1978 (H.R. 50).

As you know, the Administration strongly supports and endorses this proposed legislation. It should be the policy of this Government that all Americans who are willing, able and seeking to work should have the opportunity for useful and productive employment at equitable wages.

Further, because of the positive correlation your Subcommittee has demonstrated between crime and economic criminal activity and unemployment or underemployment, it is my view that earnest efforts toward the goals of the Humphrey-Hawkins bill alleviate some of the considerable pressure on this Nation's criminal justice system. I urge, therefore, the continued support and efforts of you and your colleagues in Congress toward the enactment of this legislation.

Also at this time, I want to commend the Subcommittee on Crime for its excellent and extensive work on the relationship of unemployment and crime. Thank you for the opportunity to share my views regarding this matter.

Sincerely,

GRIFFIN B. BELL,
Attorney General.

I.R.A. FAR FROM BROKEN, MOUNTS A NEW CAMPAIGN

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. BROWN of California. Mr. Speaker, we are approaching a day that is a focal point for Irish pride. But as we mark this day with green beer and celebration in this country we should remember the red blood and destruction that has marked the last 9 years of Northern Ireland's existence. We should reflect on a generation of children for whom armed soldiers and terrorism have become commonplace. This generation of children have been wrenched from childhood by one of the most perverse forms of adult behavior, warfare.

I have not taken sides in this struggle but have confined my actions to supporting efforts to promote peace in Northern Ireland. To that end, I hope that my colleagues will read the following article and reflect upon the situation in Northern Ireland today. Money and moral support for either side in this struggle insures another generation of children being taught by their elders that murder, bombings, and terrorism are normal responses to problems.

I.R.A. MOUNTS A NEW CAMPAIGN

(By Roy Reed, Special to The New York Times)

BELFAST, NORTHERN IRELAND.—Britain is grappling with an embarrassing paradox in its Northern Ireland problem. The harder it attacks the anti-British terrorists, the tougher they become.

Near Christmastime, the British quietly began saying that they thought they had defeated the Provisional Irish Republican Army, the chief remaining terrorist group in Northern Ireland. Then the Provisionals found a new source of arms and started a new campaign of shooting, burning and bombing—an efficient, nerve-shattering campaign that demonstrated how far they were from being disorganized and broken.

Four persons were killed in one week recently, and although the I.R.A. has said * * * taken responsibility for only two of the killings, it is being widely blamed for the other two as well.

The Provisionals have burned and bombed more than $50 million worth of property in the last three months. The British Government, which makes good on terrorist losses, will pick up the bill.

DECLINING SUPPORT

In the face of increased military pressure and in spite of declining support in war-weary Roman Catholic communities, the Irish Republican Army has proved once more that it can strike almost at will.

"Defeat of the I.R.A. is wishful thinking," a middle-aged Catholic priest said the other day. I don't believe a body of armed citizens can be defeated in these circumstances."

The men of violence once tended to drift away after a few years of "troubles." But now, after nine years of killing and the maturing of an entire generation, the Irish Republican Army seems to have become a permanent terrorist force, a small but deadly fact of life in the Catholic slums of industrial Ulster.

Its enemies in the British Army and the police concede that it is tightly organized with small, secure cells that make the leaders almost impossible to trap.

KEEPS FINDING NEW ARMS

It has shown repeatedly that it has the imagination and skill to turn up new sources of arms and explosives, not matter how often the old sources are blocked.

Most important for the future, it continues to tap the bottomless pool of anger among Irish nationalists, those who, no matter how their numbers swell or shrink, never forget their bitterness at the British presence on this island. That anger is most inflammable among the young.

Some critics say the I.R.A. has become a children's army. They say that so many of its regulars are in prison that it has to turn to teen-agers to carry its bombs and its newly acquired American-made machine guns. The youngsters, they say, are manipulated by a little band of experienced "godfathers" who make the plans but never risk their own lives.

Friends of the Irish Republican Army deny that. But they acknowledge that as always they are working to draw vigorous young people to their cause.

INTERVIEWED IN DUBLIN

Recently in a room in Dublin, a group of men who are knowledgeable about the Provisional I.R.A. and the republican movement gathered for an interview with The New York Times.

The leader was Ruairi O'Bradaigh, the president of Sinn Fein, the legal political wing of the provisional movement. Sinn Fein operates in both the Republic of Ireland and the six counties of Northern Ireland. Its chief aim is British withdrawal from the island.

Among the others were Joe Cahill, who has served time in prison for actions against the British, and a young Belfast leader named Ted Howell. Mr. Cahill is now a vice president of Sinn Fein. Mr. Howell is in charge of foreign affairs for the party.

The Provisionals attracted the more militaristic members after a split in the I.R.A. some years ago. The Officials, as the other group is called, tend to be Marxist. They have been only peripherally involved in the violence.

"WAR IS GOING WELL"

"The war is going well," Mr. O'Bradaigh, a genial, middle-aged man, said. "People have come through a rough decade. They've suffered a lot. But now they're coming out of their corner again. They've been clobbered by a superior force, but they're not beaten."

They said Sinn Fein was trying to strengthen its political side so it would be ready to pursue its long-term aims when the war ended. Those aims include a federal system of government with Ulster as one of the republic's provinces and reforms such as the breakup of large estates and land redistribution.

There has been speculation that the Provisionals are split by a hawks-doves debate, with older men in the Republic favoring a shift from violence to politics and younger men in Belfast insisting on continuing the fight. Some believe the hawks are in the ascendancy, as evidenced by the renewed campaign here this winter. The men in Dublin simply chuckled at the speculation.

Mr. Howell, a long-bearded man with the look and language of a professor, talked of Britain's efforts to isolate the Provisional movement from the Catholic community. He noted that 1,500 men and women had been imprisoned for terrorist offenses in Britain, Northern Ireland and the Republic.

"The Brits have been unsuccessful because the people identify with the republican movement," he said. "People have been imprisoned, but they continue to work for the movement. The only way they can stop us is to lock us all up."

The British authorities, while not ready to agree with Mr. Howell, are increasingly frustrated as they try to root out the Irish Republican Army.

The British Army and the Royal Ulster Constabulary have recently renewed their efforts to destroy what they see as the group's political infrastructure. The I.R.A. and Sinn Fein operate several "advice centers," offices where people can seek help on problems with housing, health and other matters. They also run newspapers, youth clubs and, like their protestant counterparts, illegal drinking places called shebeens.

The police have cracked down on shebeens. Community workers among troops and policemen are trying to overturn the republican influence in youth clubs and advice centers. Troops recently raided the republican newspaper and information office here and picked up 17 persons for questioning.

AUTHORITIES SEEK SUPPORT

In addition to raiding offices, chasing gunmen and defusing bombs the authorities have also started a campaign that is reminiscent of the United States effort in Vietnam to "win the hearts and minds of the people."

Both the soldiers and the police, the latter mostly Ulster Protestants, have put community workers into the tough neighborhoods to try to persuade people to accept the Government's law-and-order forces.

Some of this effort has been successful. Ordinary policemen now patrol many Catholic areas where only soldiers dared go a year ago. But they patrol mainly in armored vehicles, and the soldiers are never far away.

The British Army reports that it is slowly gaining trust in Catholic areas. A few soldiers received presents from Catholic residents at Christmas. More important, army intelligence is getting more tips on the iden-

tities and hiding places of young I.R.A. members.

People who see the Catholic slum residents every day say many are tired of the violence and no longer see any point in it. But there is also an old feeling that it might be a mistake to get rid of the Irish Republican Army, for defenders just might be needed again to fight off Protestant rowdies and vigilantes. Protestant terrorists have been relatively inactive since last spring, but no one believes they have been converted to pacifism.

Several public figures recently have condemned the I.R.A. for having lured young people into its ranks and having sent them to do the dirty work. Every week's court calendar lists teen-agers being tried for terrorism.

Police figures indicate that while no greater numbers of young people seem to be joining the terrorists, a larger proportion of the serious acts are being carried out by them. In 1974, for example, 11 terrorists killings and attempted killings were charged to people under 18 years of age. The number last year was 43.

"Godfathers" Criticized

The latest voice raised against the "godfathers" was that of a teacher and politician in southern Armagh County, an I.R.A. stronghold. Seamus Mallon, chairman of the constituency representatives of the predominantly Catholic Social Democratic and Labor Party, said the "godfathers" were cowards who used naive youngsters and then let them take the punishment.

He said in an interview later that his public stand had produced threats against him. He said he had spoken out because five students from his school had been charged with murder and arson. All were under 17 and two were 15.

"One of the most alarming things is that these are not the type who were going into the I.R.A. three or four years ago," he said. "A substantial number now are clever kids, university potential. In the past, they tended to be emotionally committed. Now, some are more ideologically committed."

They will probably be even more committed after a few years in Long Kesh Prison here. Long Kesh, has been a kind of institution of higher learning for guerrillas since the turn of the century. The place has been filled for the last several years, and many inmates are completing their sentences. Every month a few more graduates go back into action.●

TERRORISM

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. BIAGGI. Mr. Speaker, the scourge of terrorism continues to threaten the world community.

Palestinian terrorists slaughter 37 Israelis.

Belfast bomb kills 12.

Florida train wreck and leakage of deadly gas ruled sabotage.

South Moluccan terrorists hold 72 hostages.

Prominent police commissioner assassinated in northern Italy.

These stories have emblazoned front pages of newspapers in recent weeks, reading like a veritable litany of lunacy.

Is it enough to merely express appropriate levels of shock and outrage over these heinous acts? Can we be tepid about the senseless loss of innocent men, women, and children? The United States must exert its influence and power to eradicate the menace of terrorism. We should demand that all nations punish those found guilty of terrorist acts with the strongest measures at their disposal. Terrorism is a form of crime which can be prevented if there are sufficient deterrents available.

The President has committed himself to stressing human rights in foreign policy. Terrorism represents the height of human rights' deprivation. Therefore, the President must make a reduction of terrorism a fundamental goal of his administration's policy.●

NEW DISCOVERY OF THREAT TO HUMAN LIFE

HON. RON MARLENEE

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. MARLENEE. Mr. Speaker, a new threat to the lives of Americans living in the plains and mountain States of our Nation has been discovered. This threat calls for quick action by this body to avert a tragedy, and also affords us the opportunity to right a previous wrong.

Montana Farm Bureau Federation President Bernard Harkness has brought to my attention the recent discovery of a new animal parasite which may be transmitted from coyotes to humans. The veterinary research laboratory of Montana State University has traced the cycle of a small tapeworm (Echinococcus Multilocularis) from the intestines of coyotes and foxes to streams and rivers utilized by animals and man.

If ingested by humans, the larval form grows unchecked in the liver. It eventually replaces the liver cell structure, causing a slow and painful death.

In light of this new development, I must urge my colleagues to consider that the time has come to reintroduce the use of the poison known as "1080." This poison was used extensively by woolgrowers in Montana for years before it was banned by an agency of the Nixon administration early in this decade.

Since that time, the sheep population of Montana has been cut by more than half, as sheepmen find themselves unable to cope with preying bands of coyotes which destroy their sheep. For years, appeals by me and by my colleagues in the Montana delegation, urging reinstatement of 1080, have fallen on deaf ears.

Without 1080, the coyote population has increased well beyond the proper proportions of the coyote's place in the ecological structure. The sheep population of Montana has been cut by more than half during this decade. Hundreds of woolgrowers in my State have either been forced to file for bankruptcy or simply given up. And now the increased bands of coyotes threaten human lives.

We need quick action to alleviate this serious condition.●

TWO TEXANS DEVELOP NEW SELF-DIALYSIS SYSTEM

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. PICKLE. Mr. Speaker, last fall the House of Representatives passed H.R. 8423, a bill that would reduce Government costs for the medicare renal disease program. The bill, which is now before the Senate Finance Committee, provides incentives for the use of lower cost self-dialysis, particularly home dialysis, as an alternative to high-cost institutional dialysis. Not only would this reduce the costs of the medicare program but it would also help patients to lead more normal lives and be at home with their families.

At the time that the Ways and Means Committee reported the bill, we were hoping that the present annual expense for in-center dialysis of about $25,000 per patient could be reduced to about $14,000 or $15,000 per patient.

But now I am very pleased and proud to learn that two of my constituents in Austin, Tex., have gone a step further and developed a new type of self-administered dialysis system that would not require the expensive dialysis machines. Dr. Robert P. Popovich, professor of biomedical engineering at the University of Texas, and Dr. Jack Moncrief, codirector of transplant and hemodialysis at the Austin Diagnostic Clinic, have developed a system which is presently being tested that could possibly lower the annual costs to about $8,000 per patient. Perhaps the most remarkable aspect of the new system is that it can be self-administered without assistance and without machines.

If this new system can be perfected and approved for general use, it would be an amazing breakthrough in our battle to deal with renal disease.

I have known Dr. Moncrief for many years and I am well aware of his dedicated work at the Austin Diagnostic Center. I commend him and Dr. Popovich for this contribution to medical technology and hope that their work in this area will continue.

Mr. Speaker, I would also like to insert a recent article from Medical World News magazine about this development:

SELF-DIALYSIS AT HOME SANS MACHINE

BETHESDA, MD.—A new type of self-administered peritoneal dialysis system that frees kidney patients entirely from dependence on a machine has been tested clinically for almost three years, with promising results, on 35 patients at three North American centers. Called chronic ambulatory peritoneal dialysis (CAPD), the concept was developed by Drs. Robert P. Popovich, professor of biomedical engineering at the University of Texas in Austin, and Jack W. Moncrief, co-director of transplant and hemodialysis at the Austin Diagnostic Clinic.

Experience with the Texas group's new system was also reported at a dialysis conference here by Drs. Karl D. Nolph, chairman of nephrology at the University of Missouri in Columbia, and Dimitrios G.

Oreopoulos of Toronto (Canada) Western Hospital.

The system, as described by Dr. Popovich, involves the implantation of an indwelling catheter to provide access to the peritoneum. The patient himself connects a two-liter bottle of dialysate to the catheter and pours the fluid into his peritoneal cavity. Four hours later he drains it out and replaces it with two liters more.

This is done five times a day; the fifth time the dialysate stays in for eight hours, allowing time for sleep.

"The system has many advantages," Dr. Moncrief told MWN. "For one thing, dialysis proceeds 24 hours a day for seven days a week. This avoids the need for the high-clearance systems that are necessary in treating patients on intermittent dialysis."

Dr. Oreopoulos notes, "There's no need for restricting fluids or diet. And with this system we don't have the same fluctuations in blood chemistry that we see in intermittent hemodialysis or conventional peritoneal dialysis. This way removal of material is slow, but it's even."

Among the other advantages cited by the investigators: anticoagulants are unnecessary, there is no need for access to blood vessels, and blood pressure appears better controlled. In Toronto Dr. Oreopoulos uses plastic bags for the dialysate. After pouring the liquid, the patient rolls up the empty bag and puts it into his belt, using the same bag to drain the fluid out later. This avoids the problem of connecting and disconnecting the catheter at each exchange—always an infection hazard. The Toronto investigator has had only one instance of peritoneal infection in 32 patient-months' experience, whereas the Texas and Missouri groups have encountered one infection every five or six patient-months using glass bottles.

Dr. Moncrief strongly prefers using plastic bags to bottles but points out the FDA has not yet approved plastic dialysate bags. "The problem is that FDA requires a guarantee that the dialysate is sterile. While we haven't had any problem with sterility, it's difficult to guarantee."

CAPD is considerably cheaper than in-center dialysis or even conventional home dialysis, Dr. Moncrief noted. The yearly tab for in-center dialysis is about $25,000 a patient; home dialysis runs about $14,000 to $15,000. "We calculate that CAPD should cost only about $8,000 a patient each year." Part of the reason is that the system does away completely with the patient's need for any assistance.

Dr. Popovich warns that CAPD is not yet ready for wide use. "It's a radical departure from existing procedures. It's a low-clearance system and it has not been medically proved that such a clearance system will maintain a patient."

The Texas system "sounds very interesting" to Dr. Norman Lasker, professor of medicine at Jefferson Medical College in Philadelphia. He says he has had about 120 patients on home peritoneal dialysis since 1963 (MWN, Jan. 28, '72, p. 17).

Dr. Lasker deplores the increased cost of dialysate, which is sold to hospitals at a discount patients can't get. He believes costs started to soar after dialysis began to be covered by Medicare.●

INFLATION MUST BE FOUGHT

HON. DOUG BARNARD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. BARNARD. Mr. SPEAKER, although the subject of inflation is discussed daily in Congress, I think we may sometimes lose sight of its long-range deleterious effects.

Inflation is more than steadily rising prices. It is a steady deterioration in the stability of the U.S. dollar. It can lead to a collapse of the free enterprise system, a reliance on wage and price controls, or massive recession.

Yesterday, the Director of the Council on Wage and Price Stability issued a warning that the administration needs to tighten up on its anti-inflation efforts.

This responsibility rests equally with us.

In yesterday's Wall Street Journal, Prof. Paul McCracken painted a lurid picture of our inflation rate and its potential for economic disaster. He was specific rather than general, and I am inserting his article and recommendations in the RECORD at this point:

INFLATION MUST BE FOUGHT

While coal and the Canal have dominated demands for top-level attention, inflation remains the more fundamental problem for public policy. For if the rate of inflation that has prevailed thus far in this decade continues three more years, the 1970s will miss by a little less than one year a doubling of the price level. If so, they will have the distinction of having produced the most serious decennial erosion in the purchasing power of the dollar during the last 100 years with one exception—the 1910 to 1920 period that included the World War I price explosion. Even the 72 percent rise in the price level from 1940 to 1950, a period which included World War II, is below the 89 percent decade rate that has prevailed thus far in the 1970s.

Stale as the subject may sound, it is important that the rate of inflation be worked lower during 1978, and with enough improvement so that by the end of the year it is visible to the naked eye and generally recognized by the citizenry.

A KEY CURRENCY NEEDED

It is important for international reasons. Quarrels among governments in Europe, Japan, and this country about the dollar have been distinguished for a high degree of parochiality on all sides, but a floating-rate international monetary system does still seem to need a key currency. And it would all work better if the economy of that key currency (the dollar) were having a discernibly lower rate of inflation than that in other major industrial economies. The basic solution to the international dollar problem is not some complex scheme for funding or support but clear evidence that holding dollars is a particularly good way to safeguard purchasing power. Until that condition is met, the world economy will remain in a disturbed and disorderly state.

There is, however, another reason for the urgency of progress this year against inflation. It is quite simply that if the rate of inflation is not reduced this year, it is very apt to be accelerating. If that were to occur, the probability would be high for a baleful future combination of drifting into wage and price controls and a recession as the brakes ultimately had to be applied.

Yet it is equally clear that unless there is a stronger commitment to actions that would be effective rather than cosmetic in 1978 we will probably see this acceleration in the rate of inflation, an acceleration that would continue to pick up speed into 1979 and 1980. Next year will be an active one for collective bargaining, with average wage increases pushed up in any case by a disproportionate incidence of front-loaded, first-year wage adjustments. If these 1979 wage negotiations must also take place against a backdrop of a rising rate of inflation in 1978, the basic packages will themselves be larger, and the economy will be set on a three-year path of more rapid wage-cost inflation.

What would be some elements of a program that would represent a serious commitment to start the downward trend in the rate of inflation? The first requirement is a set of demand management policies (monetary and fiscal policies) consistent with a slowly declining rate of expansion in the nominal or dollar volume of economic activity. From 1976 to 1977 this increase was just under 11%. The target for this year (1977 to 1978) should be moderately less—say, perhaps a percentage point less. The announcement of such a target would warn those making wage and price decisions that top-side disciplinary pressures on the wage-price level would be present, and the implementation of these moderately less expansive budget and Federal Reserve policies would assure that this discipline would be felt.

The President in his messages has given precisely the opposite signal. His targeted rate of growth in the dollar volume of business activity for 1978 is higher than for 1977, and higher yet for 1979. To his credit he has also projected the price-level implications—a rising rate of inflation in 1978 and 1979 (as measured by the GNP price index). This is notification that there is no real commitment to a lower rate of inflation and that top-side discipline on the wage-price level will be retreating. This is a strategy for accelerating inflation, and we should not be surprised if it occurs.

Second, the administration in 1978 should commit itself to a target that by the end of 1978 its own actions, having a direct and explicit impact on prices and costs, will this year have a favorable effect on the cost-price level of, say, a full percentage point. Arthur Okun, former Chairman of the Council of Economic Advisers, has suggested that cost-raising actions of government in 1977 might well have the effect of making the price level 1½ percent higher by the end of this year. Let government, as perhaps its part in the voluntary restraint commended to business and unions, commit itself to the target of having its own actions this year "price out" at a 1 percent lowering of the cost-price level.

With salaries and wages for a substantial proportion of the labor force adjusted *de jure* or *de facto* for changes in the price level, such a 1 percent turnabout could have magnified favorable effects as these escalator adjustments themselves become smaller. This would help convert what has been a rising spiral into a declining one.

Third, we must face the fact that the economy is no longer delivering the 2½ percent per year increases in productivity that for decades seemed to come along as naturally as the passing years. This was, of course, the basis of the so-called improvement factor in wage contracts that has come to be taken as almost our economic birthright. The logic was simple and unassailable. If efficiency or productivity or real output per man hour is rising at 2½ percent per year, wages could rise 2½ percent per year without an increase in labor costs per unit of output.

The trouble is that the basic trend for measured productivity or efficiency in the U.S. economy is now rising at the rate of only about 1½ percent per year. For some time it has been assumed that these subnormal gains in output per man hour were simply reflecting the reduced efficiency that might be expected with relatively low operating rates prevailing in most industries. Even with an adjustment for this, as the Council of Economic Advisers points out in its annual report, it now looks as if for the better part of a decade productivity has been rising at about 1½ percent per year.

The ritual of putting a 2½ percent, so-called improvement factor into wage and salary contracts is, therefore, now simply

building another percentage point of inflation into the process.

SLUGGISH ALL AROUND

This deterioration in productivity gains deserves far more attention than it has been receiving, and it probably reflects many things. In real terms last year, research and development expenditures were roughly 13 percent below their peak in 1968. Indeed our 1977 research and development outlays would have had to be 50 percent larger to account for the same share of GNP as a decade earlier. The processes that generate new products and new technology have simply been at a more arthritic pace. Capital formation has also been sluggish, and a rising proportion of what has been put in place has been for such purposes as meeting environmental and safety regulations that do not improve measured productivity. Moreover, a sluggish pace of capital formation means a sluggish rate of introduction of the new and most advanced technology that is being generated.

While such social objectives as a cleaner and safer environment are worthy in themselves, the political process has tended to charge ahead oblivious to warnings that there would be costs and that requirements were being pushed to the point where costs would exceed the benefits.

The costs have now come due—one of them being a slower rate of improvement in measured productivity. The improvement factor in wage contracts must, therefore, be reduced to 1½ percent if this provision is not to produce some combination of more inflation and more unemployment. And senior government officials should be quite plain-spoken about this fact of life.

The most fundamental requirement, however, is a convincing commitment by government that it really is determined to work down the rate of inflation. There was a time when governments could plead that such really effective action would produce political disaster. Denis Healey, the redoubtable U.K. Chancellor of the Exchequer, was also offered a generous supply of such nervous predictions. He persisted with a tough policy, brought the rate of inflation down to the single digit zone, and may also have saved his government at the next election. There might still be time in the United States for such economic and even political therapy by November 1980.

THE SOVIETS ARE BACKING, FINANCING, AND EQUIPPING PLO AND OTHER TERRORIST TRAINING AND ATTACKS, SUCH AS THE ONE IN ISRAEL THIS PAST WEEKEND

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. KEMP. Mr. Speaker, on January 12, the Associated Press reported that former Secretary of State Henry A. Kissinger had said that the Soviet Union—

Is at least indirectly financing some of the terrorist training going on in Libya and Lebanon.

Many of these terrorists are being trained in camps in Libya and Lebanon by organizations that themselves are financed by the Soviet Union.

Somebody is clearly financing the training and the organization, and some of it is clearly coming from the Communist world.

While previous accounts had pointed to oil-rich Libya as a staging ground for terrorists and had noted that some violent Palestinian elements are trained in and make their forays from Lebanon, this was the first firm suggestion by a prominent Western figure, a specialist in foreign policy, that the terrorists have a common money base in the Soviet Union and the Eastern European bloc.

No formal protest was made by the United States to the Soviet Union. No one rose in indignation in the United Nations Security Council. No great protests went up in Western Europe or the United States.

Nothing happened, in fact, until 48 hours ago, when we learned to what the Soviets' backing, financing, and equipping of these terrorists had led to—once again. I refer of course, to the PLO terrorists killing nearly 40 people in Israel this past weekend and wounded dozens more with Soviet-built and supplied arms.

We cannot let ourselves be deterred from our quest for peace, in the Middle East and throughout the world. But it is time the Carter administration, this Congress, and Government, and the peace-loving peoples of all nations realize once and for all what the true intentions of the Soviet Union are—intentions shown quite clearly by their actions, intentions they try to obscure by their empty, meaningless verbiage, by their lies.

Can a government, like that in Moscow, which seeks actively and constantly to undermine peace, to create rifts and tensions and then exploit them for what they regard as their inevitable claim to dominate and control the future, be trusted to abide by the terms of a new strategic arms limitation treaty—SALT II? Or a more extensive nuclear test ban? Or a treaty for limiting foreign arms sales?

I suggest the answer to those questions can be found in what happened this past weekend.●

B–1 BOMBER IS ESSENTIAL

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues the following editorial by Messrs. Evans and Novak. The editorial deals with the potential vulnerability of the cruise missile to the Soviet's new SA–10 and presents just one more good reason why the B–1 bomber is essential to U.S. defense interests.

The editorial follows:

DOES RUSSIA'S SA–10 ECLIPSE THE CRUISE MISSILE?

Surprising new intelligence that the Soviet Union has started actual deployment of a lethal new air-defense system raises agonizing new questions about President Carter's decision to scrap the B–1 bomber and use the cruise missile as a substitute.

This alarming news about the SA–10 was contained in a top-secret briefing given to Gen. David C. Jones, Air Force chief of staff, on January 26. The newest Soviet ground-to-air missile travels at five times the speed of sound and can accelerate up to 100 times the force of gravity.

The unexpected appearance of the SA–10 in actual operational deployment far ahead of schedule deepens the debate over strategic arms. Originally designed to defend against intercontinental ballistic missiles, the SA–10 is now viewed by military strategists as a grave threat to the new U.S. cruise missile. That causes new doubts about Carter's reliance on the cruise to follow the present B–52 bomber.

The SA–10's threat to the cruise missile is both highly technical and in some dispute inside the Pentagon. Stripped to its essence, the threat centers on the SA–10's extraordinary power to accelerate in seconds up to five times the speed of sound. That could be fast enough to reach and destroy incoming cruise missiles flying below the speed of sound even though it is at such low altitude as to be visible to ground radar only briefly.

Secretary of Defense Harold Brown testified behind closed doors to Congress last September that the SA–10 might be nearing deployment. In fact, the first hard intelligence was then becoming available that deployment could come in a matter of weeks (probably near the Baltic coastline). Obviously, deployment of a few initial SA–10 launchers has not the slightest immediate effect on the U.S. cruise missile, which is itself far from operational.

The problem is not today but the early 1980s. Defense officials freely admit that the present-day U.S. cruise missile could become dangerously vulnerable to Soviet air defenses by 1985 and beyond. That is because of Moscow's ability to pinpoint unlimited funds on specific military goals, such as defending new offensive weapons.

But the Pentagon's Defense Science Board concludes that the cruise missile of 1985 will be superior to the present version and that offensive technology can always stay ahead of defensive technology. Thus, the board claims, the U.S. cruise of 1985 will defeat the expected Soviet anticruise defense system.

It is precisely such logic—based on assumptions that the Soviets operate in predictable fashion—that so frightens the president's defense critics. The astonishing speed-up in deployment of the SA–10 is major new ammunition for these critics.

Official defense doctrine placed the full operational capability of the SA–10 sometime in the early 1980s. But that projection antedated Carter's decision to dump the B–1 and make the cruise missile the principal "penetration" weapon for strategic purposes.

The American cruise has both terrified Moscow and galvanized Soviet defense planners into extraordinary accomplishments. That has demolished comfortable assumptions by U.S. defense planners of a free ride for the cruise until the mid-1980s, at which time new-model cruise missiles could carry radar-deflecting countermeasures as part of their payload and defeat the SA–10.

Persistent U.S. understimates of Soviet technological breakthroughs have plagued the West ever since World War II. As one generation of weapons succeeds another, this country makes the same incorrect conclusions time after time.

The new intelligence discovery that the SA–10 is in active deployment will have immediate impact on Capitol Hill. A powerful case now can be made that the cruise missile, good as it may be, must not be allowed to bear the full burden of this nation's future needs for a "penetration" bomber.

Accordingly, the vote in the House (scheduled for next week) on keeping the vestige of the B–1 bomber program alive is almost certain to go against the president's desire

to kill the program once and for all. Likewise, new research-and-development money for a lighter, long-range substitute—the F-111H—will also find a more receptive congressional audience.

Civilian officials at the Pentagon still claim the cruise missile will always keep ahead of developing Soviet defenses against it. Doubters of that benign theory have new ammunition in the latest intelligence about the SA-10, and they intend to exploit it.●

FEDERAL EMPLOYEES' COMPENSATION PROGRAM

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. PEASE. Mr. Speaker, I recently introduced legislation to make improvements in the Federal employees' compensation program.

Congress bears a good deal of responsibility for current problems in this program. In 1974, rather than come to grips with the cause of delays in claims processing, legislators resorted to the "quick-fix" to alleviate delays in benefit payments. As a result, the backlog of claims increased and program costs has soared.

A recent editorial in the Baltimore Sun (February 25, 1978) called attention to some of the problem areas that H.R. 11133 is intended to address. I commend it to my colleagues' attention:

[From the Baltimore Sun, Feb. 28, 1978]

THE PAMPERED CIVIL SERVANT

Congress's effort to improve the handling of federal workers' claims for injury compensation has turned into a caricature of bureaucratic paralysis and malingering federal employees. The supposed cure only invited abuse while exacerbating the problems it was to correct. Stephen E. Nordlinger's recent series in *The Sun* recounts how government employee unions complained five years ago that delays in processing injury compensation claims were inflicting hardship upon many. The claims staff was too small and inadequately trained. So Congress treated the symptoms of the problem, not the cause.

Instead of moving to expedite claims processing, Congress decreed that an employee could collect his paycheck for 45 days while he waited. It also eliminated a requirement that three days of sick leave be used before a claim was filed and made it easier to obtain medical certification for injuries. Taken together, all this only encouraged injury claims. Many employees saw an opportunity for a 45 day vacation.

The result: The number of injury cases rose from 145,000 in 1975 to 207,000 last year. The cost soared from about $225 million to $775 million. The backlog of cases quadrupled to 100,000. So those genuinely needing relief find they still face long waits for claims processing after the 45 day grace period. Meantime, federal officials say, one-quarter to one-half of those filing claims are abusing the system.

The Labor Department's answer is to do what should have been done in the first place: expand the claims staff and train it sufficiently. But more is required, a congressional effort to provide adequately and promptly for employees injured on the job without spending millions on those with minor or non-existent injuries who are able to work. Representative Donald J. Pease (D., Ohio) has introduced a bill that would remove from the law the incentives for abuse. But he is a voice in the congressional wilderness. Only the faceless taxpayer has a real financial stake in controlling this growing problem. But his interests often are overlooked by a Congress too attentive to the 2.8 million federal workers and their unions.●

JOBS FOR VETERANS AND THE ELDERLY

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. YOUNG of Florida. Mr. Speaker, I submit two amendments to H.R. 50 which I feel will accomplish a great deal toward insuring that two of the most promising sources of able and willing workers—veterans and the elderly—are better able to seek and find gainful employment.

The first amendment would specifically include veterans in the labor forces named in section 104 of the bill. Many veterans are finding it difficult to enter the job market after serving in defense of their country. Because of the unusual set of circumstances surrounding their efforts to obtain work in the private sector, I want to insure that these deserving citizens get the attention that other labor force groups are to receive under the bill.

While the elderly are already mentioned in the bill as a labor force to receive attention, many of our citizens over the age of 55 are unemployed because they fear they would lose part of their social security benefits or other Federal Government pension payments because of the statutory limitation placed on outside earned income. There have been several bills introduced which would eliminate the limitation completely, but all that has been accomplished so far is to have the limit raised periodically. An amendment to H.R. 50 cannot eliminate the limitation, but would insure that the President's Economic Report would give proper attention to the employment of these individuals and how their employment/nonemployment status is affected by the income limitation.

There are many jobs available that would be suitable for elderly citizens who are not able to work a full 40-hour week. I think that attention should be given to this and any kind of employment available to insure older Americans they can work without fear of losing part of their monthly benefits. It is becoming increasingly harder for these recipients to get by on their fixed incomes. If more of them could work without losing their benefits, they would be increasing their income, paying taxes on their wages and spending more on goods and services that in turn would create jobs.

This amendment would require that the Economic Report give proper attention to this situation. Because this report will serve as the basis of programs to be implemented to achieve full employment, I feel that this is an important subject to be considered as part of the overall employment and growth picture.

I urge my colleagues in the House to support our veterans and elderly citizens by voting in favor of the following amendments which will be offered for consideration on Wednesday:

Amendment to H.R. 50 offered by Mr. YOUNG of Florida:

Page 67, line 13, insert "veterans," after "elderly".

Page 68, line 8, insert the following:

"(4) For purposes of this subsection, the term 'veteran' shall mean the same as defined in 38 U.S.C.A. § 101 (2)."

Amendment to H.R. 50 offered by Mr. YOUNG of Florida:

Page 71, line 10, strike out "and" and insert immediately after such line the following new subparagraph:

"(G) proper attention to the employment status of recipients of Social Security benefits and other Federal government pension programs and the effects on their employment status caused by the statutory limitation on outside earned income;"

Page 71, line 11, redesignate subparagraph (G) as subparagraph (H).●

LATEST OUTRAGE BY TERRORISTS IN ISRAEL

HON. ROBERT N. C. NIX

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. NIX. Mr. Speaker, it is with sick horror that I read news accounts this weekend of the brutal murder of 37 Israeli civilians. News pictures of a burned out tour bus and the funeral for a 5-year-old girl clarify with a blinding light the barbarism of the terrorists.

I have spoken before to the House about the nature of the threat to world order that terrorists pose. There is no cause that justifies cold-blooded killing for space in the world's media.

This mentally ill act was performed by creatures whose hatred of peace and whose love of disorder is such that they can only be logically seeking extermination of either their own people or the people of Israel.

These acts come from a feeling of self hatred, which one is tempted to say is deserved in the case of these Palestinian terrorists.

At the same time, we cannot be blind to the deliberate and cold support for this barbarism by a government such as Libya.

Every nation of the world in its own self interest can no more rationally support terrorism than any government can support piracy.

It is on this very issue of terrorism that the civilized nations of the world are divided from those controlled by gangster governments.

This is the issue that the United Nations should take up, if that organization is to have any meaning in the future.

I believe that these tragic events demonstrate the difficulty of Israel in being pressed to give up territory in return for promises of peace.

I believe the Government of Israel has an obligation to its own people and to the world at large to take a great deal of time in considering concessions. It has to be painfully obvious at the same time to the rest of the world that Israel cannot depend on anyone else to protect its citizens from being murdered.

Wars can come in a day; however, peace takes awhile longer. . . .●

IT'S TIME TO "BEEF UP" THE FED

HON. W. HENSON MOORE

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. MOORE. Mr. Speaker, several days ago, I wrote to President Carter requesting him to carefully consider the background of the next individual he appoints to fill the upcoming vacancy on the Federal Reserve Board of Governors, which will be created when Arthur Burns leaves at the end of this month. Specifically, I urged him to consider selecting a person who has a background in or some exposure to agriculture. A close reading of the United States Code reveals that the President is directed to consider appointments to the Board of persons representing financial, industrial, commercial, and agricultural interests. As I am sure you may guess by now, not one of the present members has a background in agriculture, or can boast of any agricultural ties that might give him expertise to help formulate Federal Reserve policy that could assist farmers with their economic problems. All of the other interests are presently represented on the Board. Therefore, we should all urge President Carter to make his next appointment a person who will represent farmer concerns. No one disputes the economic plight of agriculture today or its importance to our economy, especially in our balance of trade, yet this economic backbone of our Nation is deprived of a representative to this major financial policymaking body.

We should heed the old saying, "As agriculture, so goes the nation," and give the farm community a voice on this Board—strengthening of this weak link could lead to the improved financial stability of the United States as a whole. The administration has done little to aid agriculture so far, but this appointment would be a step in the right direction to reverse this inaction.

The text of my letter is as follows:

MARCH 8, 1978.

Hon. JIMMY CARTER,
President of the United States, The White House, Washington, D.C.

DEAR MR. PRESIDENT: As I know you are aware, U.S. farmers and our nation's agricultural economy are suffering from the worst farm depression since the 1930's. Congress will hopefully act soon to try and lessen this economic plight, but I am a firm believer in a multiplicity of solutions and would like to urge you to consider action within your authority as President.

It has been brought to my attention that even with the approval of Mr. G. William Miller to fill a vacancy on the Federal Reserve Board, another vacancy will occur when Arthur Burns leaves at the end of this month. Since you will fill this vacancy expeditiously, I hope, everyone concerned about the future of American agriculture would applaud your decision to appoint someone to the Board who has an agricultural background. In fact, Section 241 of Title 12 of the U.S. Code states in part: "In selecting the members of the Board, . . ., the President shall have due regard to a fair representation of the financial, agricultural, industrial, and commercial interests, and geographical divisions of the country."

From an examination of the backgrounds of the current members of the Board, it is apparent that not one member has any sort of background in agricultural matters. It is also apparent that the other three interests are well represented—there is no need to appoint another person from these areas. A closer look at the Board members will reveal that only one member now serving originally comes from a section of our country which is even close to a major agricultural region. Certainly, you will have to agree that an imbalance exists—in contradiction to the spirit of the law—and should be corrected.

Mr. President, those of us who feel a strong commitment to farming and agriculture would feel your Administration more receptive to farm problems if we knew that the major financial entity of the government involved with private financial sources could point to a member with agricultural ties. Our general economy is directly affected by the stability of our agricultural economic picture, and the input from a Federal Reserve Board member reflecting agricultural views would assuredly help to strengthen our overall financial policy.

I would appreciate receiving any reaction you might have to this proposal, or any comments you could make relating to consideration of this request. If I can be of any further assistance in this matter, please do not hesitate to contact me.

With kindest personal regards, I remain

Sincerely yours,

W. HENSON MOORE,
Member of Congress.●

DENOUNCING TERRORISM

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. GILMAN. Mr. Speaker, today I am joining the distinguished majority leader of the House (Mr. WRIGHT), the distinguished minority leader (Mr. RHODES), and many other concerned colleagues in introducing a resolution which "strongly condemns and denounces the PLO for its brutal and vicious attack upon unarmed, innocent men, women, and children in Israel on March 11, 1978."

Hopefully, the widespread bipartisan support that this resolution has gained will signal, in a crystal clear manner, to the PLO and other organizations, and to individuals who employ cold-blooded murder as a means to attain their political ambitions, that the United States will not take lightly the brazen, calculated execution of innocent men, women, and children.

According to recent newspaper accounts of the utterly reprehensible attack—the most savage, worst attack in the last 30 years within Israeli borders—Al Fatah, the main guerilla group under the umbrella of the Palestine Liberation Organization, indicated in a statement in which it claimed responsibility for the murders, that similar raids would be launched against the people of Israel, and that this clearly stated campaign of terrorism does not represent a change in policy but only illuminates the fact that its guerillas were now better trained and better equipped. The weekend raid, PLO spokesmen asserted, is a response to what is seen as Israeli intransigence in the current peace talks with President Anwar el-Sadat of Egypt.

I need remind few that the leader of the PLO is Yassir Arafat; the same Yassir Arafat who appeared before the United Nations—the symbol of the international community's desire to seek peaceful resolution of conflict—with a gun holstered to his waist. It is the same Yassir Arafat who, in a January 5, 1978, meeting with several members of a congressional delegation, insisted, when asked whether the PLO resorted to a policy of terrorism, that the PLO does not engage in terrorism, "definitely not." His position and his implied intentions left little doubt that the PLO had renounced terrorism as an instrument to carry out its policy.

Arafat's January 5 statement, when linked with the PLO terrorism of March 11, can only lead to the following conclusions: Arafat's word is meaningless and/or, he has little control over the organization he heads. Whatever conclusion, both, or some combination of the two, that one accepts, the meaning is clear: Israel's refusal to negotiate with the PLO as a representative of the Palestinian people, or to accept the signature or word of Arafat on any negotiated agreement, is not Israeli intransigence, but a firm recognition by Israel of PLO treachery. Referring to the PLO raid, Israel's Defense Minister Ezer Weizman succinctly stated:

This is what can happen when certain close areas will be, or can be, controlled by the Palestinian Liberation Organization.

Mr. Speaker, terrorism explodes within the civilized international body politic with a primitive, animalistic fury; it knows no reason. it recognizes no compassion. A recent Library of Congress study outlining a chronology of terrorist acts between 1969 and 1978 fills 27 pages; and I fear that without swift action by our Nation, in concert with needed efforts by other countries. the catalog of terrorist atrocities will continue to lengthen. The following is a listing of some of the more heinous incidents; terrorist strikes clearly revealing the utter contempt and disregard for the sanctity of human life:

CHRONOLOGY OF TERRORISM

December 18, 1977—The editor, Al Ahram, of Egypt's most important newspaper was killed by Palestinian terrorists in the lobby of the Nicosia Hilton Hotel, in Cyprus. The two terrorists then took 18 of the 30 hostages originally seized to the airport at Larnaca. Nine hours after the killing at the

hotel, the two terrorists, along with 11 captives, a crew of four, and two PLO negotiators, took off in a Cyprus Airways jet for an unknown destination.

February 19, 1978—Egyptian commandos stormed the Cyprus Airways jetliner at Larnaca airport in an effort to rescue the 15 hostages being held by Arab terrorists. Cypriot National Guard forces engaged in a gun battle with the Egyptian troops, leaving 15 Egyptians dead, 15 wounded, and the remaining commandos taken into custody. [The Cypriot government indicated that the Egyptian troops had landed without permission.] During the melee, the two terrorists surrendered and the 15 hostages were released.

February 20, 1978—Cyprus refused to extradite to Egypt the two terrorists who killed an Egyptian newspaper editor and held 15 hostages aboard a plane. The terrorists, who identified themselves as Palestinians, were reported to have told their hostages: "Everyone who went to Israel with Sadat will die, including Sadat." The pair was arraigned in a Nicosia court on a charge of premeditated murder.

May 23, 1977—Groups of South Moluccans seized an elementary school and hijacked a train in northern Holland. Five terrorists were reported to be holding 106 children and 5 teachers in the school while 5 hijackers were holding 56 hostages aboard the train.

May 26, 1977—The 106 children held hostage by the South Moluccans in the Netherlands were released; 4 teachers remained captive.

May 13, 1977—The White House released a letter denying political asylum to two Lithuanian men who killed an Aeroflot stewardess in 1970 while hijacking a plane from the Soviet Union to Turkey. The two, who had been in Turkey (see 06/30/76 entry), and fled to Venezuela, entered the United States illegally and are now the subjects of deportation hearings.

May 8, 1977—A U.S. national attempting to hijack a Northwest Orient Airlines jumbo jet with 261 persons after it left Tokyo bound for Honolulu was subdued by a crew member. The hijacker who demanded to go to Moscow was injured in the head with a fire ax. No other injuries were reported.

In a letter and other materials to Senator Jacob Javits, the Department of State accused Libya, Iraq, Southern Yemen, and Somalia of actively supporting terrorist groups, and warned that there was every indication that international terrorism is on the increase and that the U.S. will have to prepare to deal with further attacks on American citizens and installations abroad, including those of American companies.

June 27, 1976—An Air France jetliner with more than 250 people aboard, including at least nine Americans and about 80 Israelis, was hijacked by six armed persons shortly after it took off from Athens. After refueling at Benghazi, Libya, the plane landed at Kampala, Uganda. There the hijackers negotiated with authorities, including Ugandan President Idi Amin, for release of 53 prisoners held by five governments (West Germany, Israel, Switzerland, France, and Kenya).

July 4, 1976—An Israeli commando unit landed at Entebbe Airport in Uganda and flew back to Israel, via Nairobi, Kenya, with the 103 persons remaining as hostages of 7 pro-Palestinian hijackers. According to press accounts, the 7 terrorists, 3 hostages, and 20 Ugandan soldiers were killed.

June 30, 1976—It was announced that U.S. officials has refused political asylum to two Lithuanians who in 1970 hijacked a Soviet airliner to Turkey. The refusal, based on the U.S. policy of opposition to international hijacking, was made after the U.S. ambassador in Turkey received assurance that Turkey would not send the two back to the Soviet Union where they faced almost certain execution. The two had been found guilty of manslaughter under Turkish law and had been freed from prison under a general amnesty in 1974. Since then, they had lived in a camp for displaced persons.

March 5, 1975—At least 18 persons died in a shoot-out at a Tel Aviv hotel: eight civilian hostages (seven of them tourists from Europe and Africa), seven of the eight Palestinian terrorists, and three Israeli soldiers. The Palestinian commandos landed a boat in Tel Aviv and shot their way to the small four-story hotel, grabbing 10 hostages along the way. After several hours of shooting the guerillas asked for release of 10 Palestinian prisoners and the Greek Catholic Archbishop of Jerusalem. The Israelis responded by attacking the hotel.

May 18, 1974—Three terrorists reportedly representing the Popular Democratic Front for the Liberation of Palestine attacked the Israeli village of Maalot and seized the high school. At least 25 Israelis were killed and 70 wounded, almost all school children.

September 5, 1972—During Olympic games in Munich, Black September attack on Israeli athletes and subsequent German police ambush resulted in death of 11 Israelis, 5 terrorists, and 1 policeman.

Mr. Speaker, the twisted minds conceiving of such acts of terrorism have no compunction for targeting the innocent as victims of their unconscionable acts.

Our Nation, other nations, and the whole of the civilized international community has wrestled with the problem of terrorism. The United Nations made several first steps to convene assemblies to address the problem, and recently passed important resolutions condemning the hijacking of aircraft and the taking of innocent hostages—which underscored international revulsion toward terrorism. The problem of terrorism, however, must stay glued to the UN agenda, and it must command the serious attention of all member-states. For, as a recent New York Times editorial asserts:

International efforts to combat terrorism . . . must go further until all doors are closed against terror.

I am hopeful that there will be early congressional consideration of legislation directed against terrorism. One such measure, which I initially introduced in August 1976, is, I believe, a comprehensive measure urging the President to take action against nations aiding terrorists and to seek stronger international sanctions against such nations and to strive for conclusion of a effective international convention against terrorism. Moreover, the resolutions calls for extensive UN study of terrorism so that all countries may know the sources and causes of, and the best strategy to be employed to combat international terrorism.

The heinous deeds of terrorists demand strong international condemnation. I believe that the groundswell of support in Congress for the resolution denouncing the PLO's criminal action against Israel last weekend conveys the outrage and unmitigated contempt Congress feels toward the terrorist act of this weekend. Moreover, this resolution puts Congress squarely on record in support of the peaceful initiatives undertaken by Israel and Egypt to resolve the centuries' old conflict plaguing the troubled Middle East.●

MY RESPONSIBILITY TO AMERICA

HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. SANTINI. Mr. Speaker, each year the Veterans of Foreign Wars of the United States conducts a Voice of Democracy Speech Contest involving more than 250,000 secondary school students throughout the country.

The theme of this year's contest was "My Reponsibility to America."

Contest winners from each State are brought back to Washington, D.C., for the finals of the competition, with the five top contestants receiving scholarships ranging from $1,500 to $10,000.

Nevada's representative in the finals was Mr. Bernd Klaus Estabrook. A resident of Minden, Nev., Bernd is editor of his school newspaper, president of the Honor Society and a representative on the student council.

Mr. Speaker, I would like to share Mr. Estabrook's inspiring and thought-provoking remarks.

His message should make all of us think of "our responsibility to America."

MY RESPONSIBILITY TO AMERICA

(By Bernd Klaus Estabrook)

It is a time of wars and rumors of wars, of distress and discontent, of wealth and abject poverty—it is our time. The world and its peoples move toward an unknown future, their struggles rise violently across continents, shake the farthest reaches of the globe—such is our world. We search, we probe, we experiment, we examine the very foundations of our society, seeking the essence of the American heritage. We find casual acceptance of this heritage impossible, for change and challenge have been the pillars of our strength. We have questioned time-honored beliefs, disputed traditional principles, delved deep into our creed—for to find our convictions sound and strong is to bring life and vigor to them, to enhance the strength and solidarity of what we hold true. To examine what we hold dearest in these troubled times is to awaken dying flames, to lend an indomitable spirit to those famous principles which will strengthen us in the future as they have in the past. It is our time, time to define our responsibility to our ideas and to our country, time to drink deeply of our spiritual reservoir, time to challenge totalitarianism and intolerance, to say to the dehumanizing forces sweeping the globe, "This far and no further!"

Where shall we begin? What shall we do or say to fill this vast nation with the desire to live to its highest, to rise from apathy and strive for excellence? What shall we do to make this nation a personal commitment, to act in the fullest measure we can to realize that commitment? The answer lies in the individual, in his response to humanity, in his commitment to the ideals that formed this nation. He, the individual, is the lifeblood of democracy, the integral part of our system that makes it live and grow, that makes it differ from the lifeless structure that is democracy without responsibility. He, the individual, lends our democracy its strength in the knowledge of his own worth, of the importance of his decisions and opinions, of his understanding of fragile yet priceless human qualities. He, the individual, knows the tyranny of the dictator is matched only by the tyranny of the mob he watches,

and speaks, and listens and moves to understand the world around him. He feels deeply his responsibility to his world, to his country, to his very home and works with that knowledge in all that he does. He, the individual holds the final and most important commitment to this nation. We climb or fall, succeed or fail with each and every individual, and our destinies are linked together by that one word—responsibility.

Our President, our congressmen, governors and all our leaders are men with which we have vested with great power and solemn responsibility. They are men we see daily, acting on our behalf with all the foibles and failings of men everywhere. I see responsibility here as they sign bills and draft laws, debate issues and resolve disputes, many of them standing as examples to us all in their tenacious hold upon integrity. We see them and acknowledge their importance.

Yet behind the public world, behind the world that concerns great decisions, I see responsibility too. I see responsibility in men and women who have held to their principles throughout their lives with little or no recognition or praise, men and women who have spun the basic fabric of this nation, men and women of whom Jefferson once said, "I am not among those who fear the people. They . . . are our dependance for continued freedom." They have made our nation what is is; without them our leaders would be helpless. Together we can meet any trial with strength born of individuals united in that one word—responsibility.

What is my responsibility to America? It is not represented by any one word or idea; perhaps it is not possible to put it into words in its entirety. But in my deepest understanding I know what it is. I know what it means to me, why it is important to me, and what I can do about it, for my responsibility to America is my responsibility to myself. It is my commitment to my country as she is, not as I wish her to be or as my prejudice sees her. It is my pledge to look upon her clearly and thoughtfully, to feel her woes and triumphs and to work with this in mind towards what America might be. My country asks of me but one thing—she calls from history and homeland to see, to perceive again, ever to understand. Let us heed her call and embark anew on the American adventure, with the strength of two hundred years behind and limitless prospects before.●

ORME DAM

HON. BOB STUMP

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. STUMP. Mr. Speaker, I have written President Carter requesting him to reinstate Orme Dam as an integral part of the Central Arizona project. As you are aware, Phoenix, Ariz., last week endured the worst flood disaster since 1941. Not only was this the worst disaster in 27 years, but it was the second major flood in the past 6 years.

I feel strongly that much of the damage to property and loss of human life would have been prevented had the Bureau of Reclamation been allowed to build Orme Dam and Reservoir.

In 1977 President Carter appointed a task force that recommended the cancellation of Orme Dam from the Central Arizona project. He followed their recommendation and deleted Orme Dam from his budget.

Every study by the U.S. Army Corps of Engineers, the Bureau of Reclamation, and Arizona's water experts have reached the same conclusion: Orme Dam and Reservoir would be the most operational and cost-effective structure for the Central Arizona project water regulation and flood control for the Phoenix metropolitan area.

The population of Maricopa County Board of Supervisors which represents 60 percent of the State of Arizona has submitted the following resolution in support of building Orme Dam:

RESOLUTION

The Board of Supervisors convened in the Supervisors' Auditorium at 205 West Jefferson Street, Phoenix, Arizona, on March 6, 1978, with a quorum present, adopted the following resolution on motion made by Henry H. Haws, Member:

Whereas, the Colorado River Basin Project Act of September 30, 1968 (Public Law 90–537) authorized the Secretary of the Interior, acting through the Bureau of Reclamation, to construct, operate and maintain the Central Arizona Project and Congress to appropriate funds for that purpose, and

Whereas, pursuant to this Act, the construction of Orme Dam and Reservoir, or suitable alternative, are authorized features of the Central Arizona Project, and

Whereas, the primary purposes of Orme Dam and Reservoir are to provide regulatory storage for Central Arizona Project aqueduct operations and flood control for downstream areas along the Salt and Gila Rivers. Other purposes include water conservation, hydroelectric power generation, recreation, fish and wildlife enhancement, and sediment control, and

Whereas, even though existing reservoirs on the Salt and Verde Rivers were extremely low, disastrous flooding occurred on the Salt and Verde Rivers from March 1 through March 6, 1978.

Now, therefore, be it resolved by the Board of Supervisors of Maricopa County, Arizona, that they recognize that adequate means of flood control cannot be provided along the Salt River Valley in Maricopa County without the construction of a flood control reservoir below the confluence of the Salt and Verde Rivers. Orme Dam and Reservoir, as proposed by the U.S. Department of the Interior, Bureau of Reclamation, for the Central Arizona Project, would provide adequate flood control measures.

Be it further resolved that this resolution be entered in the Minutes of the Board of Supervisors of Maricopa County, Arizona, and that certified copies be mailed to the Arizona Congressional Delegation to urge them to obtain Congressional support for the construction of Orme Dam.

Dated this 10th day of March, 1978.●

SOME ENERGY ISSUES: OBSERVATIONS FROM THE SIDELINES

HON. DOUGLAS WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. WALGREN. Mr. Speaker, recently one of my constituents, Dr. Jiri Nehnevajsa, director of the Urban Research Center of the University of Pittsburgh, delivered an address to the energy task force of the university. In this address, he focuses on the realities of the current energy problems, possible future societal and political implications of these problems, and courses of action open to a university in response to this situation.

This address is quite lengthy. I am including in the RECORD only portions of Dr. Nehnevajsa's remarks:

SOME ENERGY ISSUES: OBSERVATIONS FROM THE SIDELINES

(By Jiri Nehnevajsa)

I.

My remarks are organized along four dimensions. First, I will sketch out my own interpretation of the dynamics of the world energy situation. Second, I will briefly address a few of the main socio-political and economic implications of the major likely transformations of the world environment. Third, I will deal with the nature and character of institutional responses to the current and nascent states of affairs as they are centered around the key energy issues. And finally, I propose to make a few more concrete suggestions as to how the particular institutional strengths of a university may be harnessed with a view to impacting both public policy and public response so as to convert the grave risks of the coming decades into opportunities.

II.

Perhaps I may begin with a few major premises. I do this with some reluctance. You are fully familiar, I am sure, with what I am about to say. Indeed, you have expertise that far exceeds mine. Yet, I must proceed as if this weren't quite the case so that we can share a common reference frame in which our conceptualizations are anchored.

1. If current patterns of energy production and consumption continue without significant shifts, the demand will begin outpacing the supply as soon as the mid-1980's and almost certainly in the 1990's.

The key constraint, of course, is petroleum and the reality of the energy-intensive petroleum-based civilization of our times.

The forces which drive the system toward its undesirable future include population growth, further urbanization with its energy-demanding life patterns, and needs for industrialization—especially throughout the Third World nations.

2. The basic conclusion is rather insensitive to the costs of energy as much as a factor of 1.5 and even larger increases of costs will have, at best, a delaying effect on the underlying trend.

3. Even major measures of energy conservation without changes in basic energy systems and energy uses amount to relatively short-run fixes only. They have, however, the effect of buying, as it were, some time in which to phase into alternative systems and alternative life patterns.

Measures of conservation, in fact, impact the rate of growth in demand and stretch the dwindling resources but do not yield zero-growth or negative growth outcomes.

4. The energy problem, in this form, is truly a global problem; nothing perhaps, that is no other major secular dynamic, can dramatize more the necessity for systems thinking in a genuinely worldwide framework or bring home more the need for the "spaceship earth" conceptualization of both problems and solutions.

It is not, to stress, an American problem to which there are American solutions; it is only to a limited extent a problem for which American technical know-how may have some global legacy and thus a degree, even a significant one, of technology transfer value.

5. Though the globality of the problem would be difficult to deny, and the need for a global perspective is therefore altogether essential, it does in no way follow that the same solutions are likely to be applicable on a world-wide scale. Indeed potential solutions will most likely require differentiation among

the world's regions, among the countries of the regions and even within the countries themselves.

Energy-wealthy nations face a significantly different situation from energy-poor nations. Some of the major resource rich countries can absorb the resulting revenues in their own developmental process or in their patterns of foreign aid. Other resource rich countries find it much more difficult to invest the wealth which keeps accumulating in face of high, and rising, economic returns from the productive perusal of these resources. Different solutions, indeed, apply to countries with high energy consumption than are applicable to lower energy consumers. While even conservation may induce important redistribution of the global energy wealth if the high technology societies can save energy, increased rate of energy use rather than conservation looms essential for the future needs of the developing nations of the world.

6. Furthermore, the temporal dimensions of the problem, availability of plausible solutions and their policy implementation is highly variegated.

Thus short-run, middle-range and long-range fixes are clearly not quite the same; nor do they have the same optimal phasing for the different parts of the world; nor do they lead necessarily to the same resultant configuration of alternative energy systems at some definable and reasonably predictable future time.

7. Whatever else may be said about the relevant time horizon, it is also true that significant changes are characterized by a relatively long lead time, a gestation period of perhaps at least one decade, and more likely of a quarter of a century or so.

Hence, even major policy innovations which would begin to be implemented now, let us say in early 1978, will not reach their maturation in terms of realized, both intended and unintended, effects before the end of the next decade, and perhaps not before 1995.

8. Thus, there exists a compelling need to act now so that we may reap the benefits of prudent choices a decade or more later. But this need is, indeed, counterbalanced by the very uncertainties with which the future is intrinsically fraught, by the limitations of our understanding of the intricate nexus of cause-effect relations, by the availability of appropriate off-the-shelf or predictably emergent technologies, and by the capacity of political and social institutions of societies to arrive at decisions, to accept the risks of mistaken choices, to establish ways to monitor the societal transformations to be aware of such mistakes, and to have the wisdom to change policies the practical trajectories of which may prove or may appear to have been mistaken.

All this, in turn, induces politically-grounded preferences for short-run fixes or, at best, for middle-range ones with the consequences that the limited expertise and the policy making resolve both tend to be disproportionately allocated to the more acute problems of today and to those with a short-time horizon. In final analysis, such built-in tendencies coupled with the rather strong inertia of human institutions and their functioning lead to more neglect of longer range thinking, of basic research, of long range perspectives than is either necessary or prudent.

With these thoughts as a kind of backdrop, let me now briefly reflect on some of the energy issues more specifically. The conclusions I reach are, of course, not definitive in any manner. Most involve highly technical, and often unresolved, controversies. Yet, whatever I may argue represents my own assessment of the situation and my own evaluation as of the waning days of 1977.

(Here follows (Sections III–IX) an extensive discussion of current supply and demand situations of a wide variety of energy sources.)

X.

In face of the rather predictable bleak futures of curent energy systems coupled with the many uncertainties which surround the futherance, phasing and implementation of alternatives, several important societal reverberations can be expected. Some appear almost certain as direct outgrowths of the energy problems. Others, perhaps, are less predictable but rather troublesome so that they cannot be ignored as plausible aspects of the total evolving process of change.

1. The emergence of the petroleum-based civilization has led to significant redistribution in national power, and has induced new relations of dependence.

2. The dependence of oil-poor on oil-wealthy nations will tend to keep increasing for the remainder of the petroleum age, and tensions born out of such unilateral dependent relations are likely to grow.

3. Fundamental power redistribution, and still another pattern of dependencies and interdependencies, can be anticipated in conjunction with the development of viable alternative energy systems and with their increasing proliferation.

4. In any event, of course, these subtle or even dramatic shifts over the coming decades cannot but have a destabilizing effect on the international environment. For some time to come, the world is likely to be a more, rather than a less, dangerous place.

This means, however, also that diversion of limited manpower and fiscal resources into national security and national defense systems is likely to continue and actually grow.

5. As a by-product of the almost certain expansion of nuclear energy, it would be very surprising if there were no further proliferation of nuclear weaponry, if there were no acts of terrorism directed at nuclear power plants, or if there were no acts by non-state adversaries to acquire and build a small, but impressive, arsenal of nuclear devices in the kiloton ranges.

6. Energy costs followed by energy shortfalls without adequate provisions for alternative systems will significantly impact the food production system of the world, especially in the energy-intensive and food surplus producing agricultures of the developed nations. Coupled with population growth, energy shortages and food shortages present a potentially extremely explosive situation apart from the built-in differential distribution of massive suffering.

7. The aspirations of many developing nations have been only recently fully legitimized. They remain largely unfulfilled. Many are tied, of necessity, to the mobilization for greater productivity of agriculture and toward industrialization. Much of socio-economic development is thus dependent on a reliable, large and growing supply of energy. The leaders and people of many a nation may find themselves unable to fulfill their aspirations, and they are not likely to simply sit idly by while some of the high technologies continue using so much energy that only a small fraction of it would be sufficient to insure the growing needs of the Third World.

8. Concerns over energy are likely to have an increasing effect on national defense capabilities, so that strategic and doctrinal changes of the coming decades are likely to reflect increasingly the close, and uncomfortable, tie-in between energy and international security.

9. Anticipatable, if gradual, shifts in the way we move people, goods, and materials are likely to lead to profound alterations in transportation systems, with particularly pronounced effects on civil aviation and the automobile industries, as well as in all production and service sectors linked to transportation. Changes in the labor market, in employment and employability patterns, in turn, cannot but have problematic effects upon the tenuous stabilities of labor-management relations, on the labor movement in general as well as on needs for, and costs of, appropriate responsive welfare systems.

10. In all, and especially in America, Western Europe and Japan, the future is one of profound changes in life styles. Thus, problems at the inter-nation and global level are compounded by the destabilizing effects which persistent stresses of life change present to individuals, families and communities.

11. If suburbanization characterized our country for the past several decades, it would not be surprising if the 1980's witnesses a gradual, and growing, drift of the population back into the central cities. The costs of transportation alone may provide enough of an inducement. This could prove somewhat beneficial to the weak tax base of most cities, and could herald a significant revival of city life; but it also implies deterioration of many suburban areas and profound economic dislocation of the business and service infrastructures which have grown up in response to the population movement.

12. We should not be too surprised to find migration patterns from less to more hospitable climates. In our own country, this would imply a possible trend toward migration from the North to the South.

These, I think, are some of the examples of major changes in the socio-political arena of the coming twenty or so years. For the most part, they present a problematic, if not actually unappealing, picture. The problems would be further compounded if we were to consider more systematically the effects of energy shortfalls on industrial production, the impact of lowered industrial production, the impact of lowered industrial productivity on overall employment, the effects of lowered employment on the nation's revenues on one hand and on costs of the welfare system on the other hand.

But, of course, I cannot dwell on all of these, and many other, ramifications of the disquieting energy equation at this time. Suffice it to say that the problems are so many, so serious, and so compelling, that to deal with them with some chance of success will require a truly coordinated and sustained effort of the best minds, a genuine demand for excellence, a great deal of compassion, a great willingness to accept risks, a major reinvigoration of the willingness to be accountable for both good and poor choices, and a commitment to human destiny and to mankind's future.

Perhaps, indeed, the very existence of the energy problem and of its crisis ramifications in future years might be conducive to the restoration and reaffirmation of important values, to the redefinition of life's meaning, to the redesign of structures in which existence of highest quality can blossom, and to a deeper sense of global togetherness. If so, the difficulties of the coming decades and all their reverberations may prove to be a blessing in disguise.

XI.

In this broad context, what might I consider to be an appropriate class of "institutional responses?" Indeed, the notion of an "institutional response" implies a commitment of an organization as an organization rather than the mere existence of scattered, uncoordinated, piecemeal approaches of many individuals in the organization. Yet, at the same time, an appropriate "institutional response" does include the provision for incentives, support systems and an appropriate environment in which such individualized strivings can also continue and flourish with perhaps only a minimum of coordination so that the various undertakings do not quite obviously run at cross-purposes, keep competing for the same lim-

ited resources within or outside of the university. This alone is a major and difficult task.

But there is, indeed, much more to my image of an "institutional response."

First, there is a need for a manifest organizational commitment to the problem of energy. But such a commitment, in my view, cannot occur as simply another one of the many diverse commitments to which universities tend to pay lipservice. It requires the rethinking of our academic and research priorities, and a clear decision as to the several major themes to which we are dedicated as a university while fostering a climate of diversity in the efforts of all other faculty members.

Second, there is a need to keep sensitizing the university community to insure that the magnitude of our vision and of our objectives must reflect, or be isomorphic to, the magnitude of the problem and its evolving dynamics. Hence, even if our pedagogical or research endeavor must, of necessity, subserve only limited objectives at any given time, the scope of our aspirations and of our vision places such limited activities systematically into its appropriate global and temporal perspective.

Third, there is a need to allocate a significant and concentrated amount of time to an effective and coordinated group of scientists to develop an appropriate program of research and pedagogy, to pursue it as teams and subteams—both as willing collaborators and as gentle competitors.

Fourth, there is a need to insist on, demand and expect excellence and only excellence—especially in a domain of a major new university commitment and one which is so closely linked to both civilizational and human survival. Thus, university politics, school and departmental politics, personality power plays will prove self-defeating if we are serious about our resolve to tackle this most complex web of issues and their systemic reverberations.

Fifth, there is an urgent need to liberate scientists and engineers to pursue science and engineering rather than research sales or public relations. The waste of precious manpower in activities for which the individuals were not trained and which most neither enjoy nor do particularly well is staggering and, if it were added up across the nation, it would amount to hundreds of man years.

Sixth, there is an urgent need to recognize that real solutions require long leadtimes and that they more often come in the way of basic research than through any other knowledge production dynamic.

Thus, the pursuit of targets of opportunity or the pedagogical and research undertakings responsive to the already recognized expediencies may remain necessary if only due to fiscal constraints; but this must not divert all, or even most, of the most precious human resources at our disposal into efforts which are at best of short-range value and often amount to no more than a glorified version of muddling through.

Finally, let me articulate a few more concrete suggestions as to what might be done.

1. I think we need to establish a thorough inventory of all ongoing and past research and teaching programs as well as research and teaching plans over at least the next two years. I believe that we must assess the genuine expertise that might be available as our strategic resource. I think that such an inventory must have built-in provisions for real-time updating, and it must be available as a resource to users within the university and outside of it.

2. I am convinced that we need to establish a task force of experts who could spend their full time for a defined, if limited, period of time to think through, formulate and justify a programmatic approach to the energy issues.

I am certain that such an organizational thrust would prove particularly workable if there were actual target dates specified, if there were full accountability for performance, and a full expectation and demand for performance excellence.

3. I suggest that, given such a programmatic development, an appropriate cooperative group of experts be established, whether as an Institute or a Center or a Club, to initiate and carry out the implementation of the program as well as those changes in it which time will prove prudent to make.

4. I suggest that such a group of scientists ought to immediately establish cooperative relations with colleagues in other universities both in America and abroad so that our own experts' limitations, cultural blinders and other constraints can be mitigated by flexible but formal relationships with those others, American and foreign, whose competencies may augment or complement our own.

5. I believe that serious thought should be given to appropriate formal cooperation of experts from industry including, indeed, the probably superbly abundant opportunities to tap the experts among those senior citizens who, while in retirement, yearn to utilize their established knowledge and insight in a meaningful manner.

6. I believe that we must, with other universities, through the National Academy of Sciences and through the various scientific and professional associations, become a powerful lobby to sharply increase the flow of funds into basic research, indeed, not only in the energy and energy-related fields but in all science.

7. Since we are located in Pittsburgh and since Pittsburgh has been one of the world's major industrial centers, it is especially desirable to incorporate into our programmatic thrust as integral dimensions the energy systems impacts in industry, particularly steel and, by definition, on labor and the labor movement.

8. We must undertake a very serious assessment of the best ways by which we can impact our students and the larger community as educators.

This includes the need to help in the process of value clarification, that is, in the process by which we can all meaningfully appraise and reappraise life priorities and acquire a disciplined and critical capacity to adjust our life styles, not dramatically but in a step-by-step manner, to a future different from today or from the recent past.

Along these lines, we need to develop specialized expertise for knowledge translation and dissemination so that we do not allow cheap imagery of panaceas, or else nightmarish portraits of the coming doomsday, dominate public sentiment and thinking while scientists keep producing more balanced analyses but communicate only to other scientists and to occasionally literate bureaucracies outside of the invisible colleges. It is much less important that we give degrees in energy and energy-related fields or offer this many courses and seminars than it is to insure the highest quality of the substance of whatever we offer, and that this quality dimension includes the transmission of knowledge not only at the highest specialized technical level but also of the moral, cultural, social and esthetic underpinnings which are inextricably linked to all energy systems as both causes and consequences, as facilitators and constraints, as sources of well being as well as suffering, as conditions of human exitence to which all technologies are—or ought to be—but servants.●

A NATIONAL FIRE ACADEMY IS NEEDED

HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. EVANS of Delaware. Mr. Speaker, I generally take this floor to argue for greater fiscal responsibility in our Government. Today, however, I want to express my deep dismay over the administration's decision to eliminate funding in the fiscal year 1979 budget for the National Fire Academy.

This decision by the Office of Management and Budget, if allowed to stand by the Congress, would be a serious setback to the congressionally mandated effort, as stated in the Federal Fire Prevention and Control Act of 1974, "to advance the professional development of fire service personnel and of other persons engaged in fire prevention and control activities."

For many years, fire service personnel across the country urged the creation of a National Fire Service Academy, which would bring together persons from across the country to learn the latest techniques on how to fight and prevent against fire. Patterned after the highly successful FBI Academy, the new facility will develop programs and training packages which can be disseminated to fire service personnel in their own communities.

With the passage of the 1974 act, the fire service thought that the National Fire Academy was only a few short steps from reality. An exhaustive site selection process was carried out, and Marjorie Webster Junior College in the District of Columbia was chosen as the location of the academy and other National Fire Prevention and Control Administration activities. Congress then appropriated $2,850,000 to purchase the site and conduct detailed architectural studies to determine more precise renovation requirements.

Now, however, after the exhaustive site selection process and the appropriation of the first $2.8 million, OMB has decided that the whole project needs "reassessing." Mr. Speaker, I find OMB's reluctance on this project unbelievable. According to them, NFPCA should undertake a study to reassess the need for a central academy facility. In my opinion, this action flies directly in the face of clear congressional intent on this matter.

We do not need any more studies. What we need is a National Fire Academy—and right now.

I sincerely hope that the appropriate committees of Congress will restore the necessary $6 million to fund the new academy. Any efforts toward that goal will have my full support. To do otherwise would be pennywise and dollar foolish.

It is past time to make the National Fire Academy a reality.●

THE 75TH DIAMOND JUBILEE OF OXNARD COUNCIL NO. 750, KNIGHTS OF COLUMBUS

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues the 75th Diamond Jubilee of the Oxnard Council, No. 750, of the Knights of Columbus.

This council, founded by a few great men in 1903, has grown to a membership in excess of 600. It is the third oldest in the State of California, has the largest membership in the State, and has been involved in the ecumenical movement since 1903.

A newspaper from 1903 described the beginnings of the Oxnard Council in this way:

> The Knights of Columbus dignitaries from Los Angeles and San Francisco detrained, were met by the local delegation and marched to the Masonic Temple where they were instituted, initiated, and installed.

Later, when the 1952 earthquake made the Masonic Temple unsafe, the Knights offered their hall, and the Masons began to meet at the Knights of Columbus hall (a drape was pulled over the picture of the Pope during their meetings).

The Oxnard Council has been active throughout its history in many causes, not all church related, in the community, charity, and youth. The list of accomplishments which follows barely scratches the surface of the tremendous amount of outstanding work done by the council.

It was the first council in California to own its own hall, erected in 1904. It has been frequently acknowledged as "Best Council in State." It has worked with the local Masonic organization since the council's inception. It assisted in the building of the original St. John's Hospital in Oxnard. It assisted in the building of the Santa Clara Church both physically and financially in the building of Saint Anthony's Church and School in Oxnard. It has sponsored a Boy Scout troop since 1903. It has for some time cosponsored and conducted an annual punt, pass, and kick contest for boys and girls between the ages of 8 and 13 in all schools. It conducts the annual Knights of Columbus free throw contest for boys and girls between the ages of 8 and 13. It provides, cooks, and serves, a barbeque for inmates of the local California Youth Facility twice annually. It makes an annual trip to the Rancho Nazareth Orphanage in Tecate, Mexico, taking food, clothing, bedding, tools, toys, and other supplies. For years it has supported the Rancho San Antonio Boys Town (Boys Town of the West). It conducts a quarterly blood drive. It holds an annual civic night banquet when it honors those who serve in news media, city, county, State, Federal, and military roles. It participates in an annual Christmas parade by entering a large float, and its float has been the top winner in the parade the past 4 out of 5 years. It sponsors persons for the Special Olympics for Youth. It annually honors at a dinner the city, county, and State law enforcement and firefighter agencies and gives a trophy to the "Rookie of the Year," who is chosen by the agencies. It provides toys and holds a Christmas party for the first and second grade children at the Our Lady of Guadalupe School in Oxnard. It presents three college scholarships annually to students at Santa Clara High School. It conducts an annual fund drive for Catholic Social Services, a United Fund agency. Many times it assists both physically and financially those of its members who are in need, often anonymously. Its pet project is support of the Santa Clara High School.

This long list of achievements by the Oxnard Council of the Knights of Columbus is representative of the great work the council has done throughout my district to help people in all walks of life. Therefore, Mr. Speaker, I would like to express the gratitude at this time of the nearly 450,000 citizens of my district and the many others who have been served since 1903 by this magnificent organization.●

SENATE—*Wednesday, March 15, 1978*

(Legislative day of Monday, February 6, 1978)

The Senate met at 11 a.m., on the expiration of the recess, in executive session, and was called to order by Hon. ALAN CRANSTON, a Senator from the State of California.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Let us pray.

God be merciful unto us, and bless us; and cause His face to shine upon us; that Thy way may be known upon earth, Thy saving health among all nations. —Psalms 67: 1, 2.

Our Father God, may the Psalmist's prayer be our prayer as we reverently pause to open our hearts to Thee. May our fervent prayer and our diligent work avail much for Thy kingdom. Deliver us from ignorance, and weakness, and cowardice. Preserve us from compounding the evils we find in the world. Bless us only in what is right; correct and chasten us when we are wrong. Shape our lives for Thy kingdom.

We pray for all in the service of this Nation, the President, his counselors, the Congress, the judiciary, the diplomats, the Armed Forces, and all those whose work is hidden from public gaze that this new day may bring new insights and new achievements for peace and justice in the world.

We pray in His name, who is King of Kings and Lord of Lords. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 15, 1978.

To the Senate:

Under the provisions of rule I, section 3 of the Standing Rules of the Senate, I hereby appoint the Honorable ALAN CRANSTON, a Senator from the State of California, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. CRANSTON thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I ask that the time that was allotted to Mr. LEAHY under the order be under my control.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. ROBERT C. BYRD. Mr. President, as in legislative session, I ask unanimous consent that the Subcommittee on Federal Spending Practices and Open Government of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Friday, March 17, to hold hearings in Pittsburgh on amendments to the Buy America Act.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

NOMINATIONS

Mr. ROBERT C. BYRD. Mr. President, there are various nominations, I believe, that have been cleared for action at this time. I ask unanimous consent that the Senate proceed to consider the nominations on the Executive Calendar for not to exceed 2 minutes, beginning with the nominations under new reports.

Mr. BAKER. Mr. President, reserving the right to object, and I shall not object, I advise the majority leader that the items under new reports on page 2 and continuing on pages 3, 4, and 5, including nominations placed on the Secretary's desk, are cleared on our calendar. We have no objection to their consideration and disposition at this time.

The ACTING PRESIDENT pro tempore. Without objection, the clerk will state the nominations.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations be considered and confirmed en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered en bloc and confirmed en bloc.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to move to reconsider en bloc the vote by which the nominations were confirmed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I make that motion.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nominations.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(All nominations confirmed today are printed at the end of the Senate proceedings.)

ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, I ask the distinguished minority leader if he has any desire for any time at the moment. I have Mr. LEAHY's remaining time under my control. I shall be glad to yield it to anyone.

Mr. BAKER. I have no need for the time. I do have a request, though, from the distinguished Senator from Massachusetts (Mr. BROOKE) for 30 minutes today following the distinguished Senator from Oklahoma (Mr. BARTLETT). I ask the distinguished majority leader if it is possible to arrange that at this time.

Mr. ROBERT C. BYRD. Mr. President, I shall discuss that with the distinguished minority leader. At the moment, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

TREATY CONCERNING THE PERMANENT NEUTRALITY AND OPERATION ON THE PANAMA CANAL

Mr. ROBERT C. BYRD. Mr. President, may we now go to the treaty?

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of the resolution of ratification.

Mr. ROBERT C. BYRD. Mr. President, I yield back my time under Mr. Leahy's order.

Mr. BAKER. Mr. President, I have a requirement for time by the distinguished Senator from California for 1 minute.

RESOLUTION OF RATIFICATION

The ACTING PRESIDENT pro tempore. The clerk will state the resolution.

The assistant legislative clerk read as follows:

Calendar Order No. 1 Executive N, 95th Congress, 1st Session, treaty concerning the permanent neutrality and operation of the Panama Canal; Resolution of Ratification:

Resolved (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal, together with the Annexes and Protocol relating thereto, done at Washington on September 7, 1977 (Executive N, Ninety-fifth Congress, first session), subject to certain amendments.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I may be given control of the time that was allotted to Mr. FORD under the order entered yesterday.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I yield to the distinguished minority leader 3 minutes.

Mr. BAKER. Mr. President, I thank the distinguished majority leader. I yield to the distinguished Senator from California (Mr. HAYAKAWA).

(Mr. HAYAKAWA's remarks made at this point are printed later in today's RECORD.)

UNANIMOUS-CONSENT AGREEMENT—ORDER OF PROCEDURE TODAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Mr. RIEGLE be recognized for not to exceed 15 minutes following my relinquishing the floor under the time which I now control, and that Mr. LONG be recognized to follow Mr. RIEGLE for not to exceed 15 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Then, following Mr. LONG, Mr. ORRIN HATCH be recognized under the order of yesterday for not to exceed 45 minutes between them; that they be followed by Mr. BARTLETT, which I think is in conformance with the order, for not to exceed 30 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. That Mr. BARTLETT be followed by Mr. BROOKE for not to exceed 30 minutes; that Mr. BROOKE be followed by Mr. LONG for not to exceed 30 minutes.

In any event that Mr. LONG be recognized for not to exceed 30 minutes, and if he is unable to be on the floor at that point, for not to exceed 30 minutes at some point between 3 and 4 o'clock p.m. today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT—ORDER OF PROCEDURE TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent—Senators may want to listen to this request carefully—that tomorrow afternoon at 3:30 p.m. the majority leader be recognized for not to exceed 15 minutes, to be followed by the minority leader for not to exceed 15 minutes.

Mr. ALLEN. I would object to that one and ask that you possibly allow the Senator from Alabama to have 15 minutes prior to the remarks of the two leaders.

Mr. ROBERT C. BYRD. Yes, I include that in my request, Mr. President, that immediately before I speak, the distinguished Senator from Alabama be recognized for not to exceed 15 minutes.

Mr. GRIFFIN. Reserving the right to object, I do not know which other Senators might also feel they should be allowed to speak, but obviously the majority leader and the minority leader are both on the same side of the issue and presumably occupying and taking the last half hour.

I want to be kind to the leadership, of course, but how about the other side on this issue?

Mr. ROBERT C. BYRD. Well, the distinguished Senator from Alabama will be speaking just prior to the two leaders. If the distinguished Senator from Michigan would like 15 minutes also prior to the Senator from Alabama, that would give both sides equal time.

Mr. ALLEN. Mr. President, is it possible to intersperse the speeches by the opposition rather than have both opposition speeches followed by both pro speeches?

Might I follow the distinguished minority leader and then the distinguished Senator from Michigan follow me, and then the other way around. The distinguished majority leader would also have an opportunity to debate.

Mr. BAKER. I wonder if the majority leader would yield?

Mr. ROBERT C. BYRD. Yes, I yield.

Mr. BAKER. Before that, I might say to the distinguished Senator from Michigan that there is certainly no effort to cut out opposition, which is the reason just a moment ago I advised him that this request was going to be made and addressed his attention to it.

Mr. GRIFFIN. Apparently the leaders are going to take the last half hour.

Mr. BAKER. What I was about to say is, I know of no reason why the opponents to the treaty might not also have 30 minutes just before. I think that is where we are.

Now, my suggestion might be that we simply allocate the last hour to the proponents and the opponents and divide it up as we see fit.

Mr. GRIFFIN. That is a good idea.

Mr. ROBERT C. BYRD. Mr. President, I withdraw my request and ask unanimous consent that beginning at 3 p.m. tomorrow there be 1 hour of debate on the treaty and that that hour be equally divided between Mr. CHURCH and Mr. LAXALT, with the further proviso that if an amendment is pending—Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the rollcall be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that tomorrow at 3 o'clock p.m. there be 1 hour of debate on the treaties, to be equally divided between Mr. CHURCH and Mr. LAXALT, with the understanding that if an amendment is pending at the hour of 3 o'clock p.m., the hour of debate will begin, notwithstanding and that of necessity would result in the vote on the then pending amendment beginning at the hour of 4 o'clock p.m.

Also, it would mean that I want to include in the request that if a rollcall vote should be in progress at the hour of 3 o'clock p.m., that the remaining time following the conclusion of the vote at 4 o'clock to be equally divided between Mr. LAXALT and Mr. CHURCH.

Mr. BAKER. Mr. President——

Mr. ROBERT C. BYRD. There is one other possible problem, that being if a quorum is in progress and there should be an objection to calling it off——

Mr. BAKER. Mr. President, reserving the right to object, would it then be the opinion of the majority leader under this formulation that if a vote was in progress, the time consumed after 3 o'clock to complete the rollcall would diminish the hour available for debate equally divided by that much?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. And by the same token, if a quorum call was in progress and there was an objection to vitiating the order for the quorum call that the time consumed after 3 o'clock to make a quorum would also be deducted from the hour provided?

Mr. ROBERT C. BYRD. Yes. I think that would have to be the general understanding.

The ACTING PRESIDENT pro tempore. Is there objection?

Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank Mr. RIEGLE for his patience in waiting.

I yield back any remainder of time I may have.

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Michigan (Mr. RIEGLE) is recognized for not to exceed 15 minutes.

Mr. RIEGLE. I thank the Chair, and I thank the majority leader for his courtesies.

Mr. President, like each Member of the Senate I have been carefully weighing the two proposed Panama Canal treaties. In the process of my analysis I visited Panama in November of 1977 and spent 4 days inspecting the canal, talking with United States and Panamanian Government officials there, and traveling and holding various meetings throughout the country. These sessions included some 6 hours of intense, private discussion with General Torrijos and the top leadership in the Government of Panama. I also spent several hours in secret briefings with the top U.S. military command based in Panama.

In addition, I have carefully studied the testimony presented to the Senate for and against the treaties, and I have drawn upon my 11 years of experience in Congress and my service during that time on committees directly responsible for American foreign policy. This process has taken several months.

The present situation concerning the Panama Canal is very complex—and there are no simple answers as to how best to deal with the status of the canal now and in the future. Current public opinion polls show that the American people are divided on the canal issue, with the nationwide Gallup poll of January showing 45 percent in favor, 42 percent opposed, and 13 percent undecided.

As we know, while the United States built the Panama Canal, we have been operating it on the basis of a permanent lease arrangement with Panama first negotiated in 1903. We may also know that the country of Panama had just been created in 1903—with the direct involvement of the United States—and the original treaties were strongly slanted our way due to Panama's weakness at that time and our great strength. Over the 75 years since, the United States has had virtually a free hand in controlling the canal and largely dominated the relationship between our two countries. Clearly, there have been enormous benefits to the United States over the 75 years, and it is my own view that the Panama Canal investment has paid off very handsomely for the United States.

While the canal continues as a vital world waterway, its strategic value to the United States has undergone considerable change over the past 75 years. Today, for example, ships from Japan, Liberia, Greece, Nicaragua, and England ship more tonnage through the canal than does the United States. Approximately 12 percent of the U.S. seaborne commerce goes through the canal. Most countries in Latin America send a much larger percentage of their commerce through the canal. Also, as the size of ships has increased, our largest military ships and the supertankers which carry oil from Alaska are too big to fit through the canal.

Due to this increasing international character of the canal and its use, it is appropriate that the world as a whole shoulder more of the responsibility for seeing to the future neutrality and security of the canal. While the United States will continue to carry the strategic military burden for the active defense of the canal, if it is directly threatened—if the weight of world opinion united in insisting upon the secure and neutral use of the canal, then more of the burden of securing the future of the canal will be borne by the world community which is deriving an increasing benefit from the canal.

It is my judgment that the original treaty arrangement is hopelessly out of date—and is a cause of increasing awkwardness and difficulty in terms of our relationship with Panama and other South American countries. After lengthy study, I believe that our strategic interests require new treaties which guarantee the unrestricted use of the canal by the United States and all other nations—and first-priority use by the United States in time of emergency.

As we know, there are presently two treaties before the U.S. Senate that are the product of nearly 10 years of negotiation between the United States and Panama. These two new treaties would replace the old relationship: the first treaty deals with the time period from now through the year 1999; and the second treaty deals with the situation beyond the year 2000.

Treaties by their very nature are not perfect documents. They represent the best possible attempt by two countries to strike an accord that is fair, and in the strategic interests of both parties.

The first treaty provides for joint management of the canal by both countries from now until the year 2000. It creates a nine-person canal management group called the Panama Canal Commission, composed of five Americans and four Panamanians—with the Administrator to be an American until 1990, and the Deputy Administrator being a Panamanian. From 1990 to the year 2000, the roles are reversed with a Panamanian becoming the Administrator.

During this 22-year period, until the year 2000, the new treaties give the United States the right to operate and run the canal—and to maintain our present military bases in Panama and our armed forces there. The United States and Panama are required by the new treaties to protect and defend the canal against any and all threats. At the present time, some 80 percent of the jobs required to operate the Panama Canal are held by Panamanians. The 22-year transition period until the year 2000 would gradually shift full operational control to Panama.

Panama would assume civilian jurisdiction to the 10-mile-wide Canal Zone and would undertake to provide the municipal services in that area which the United States now provides. Certain property in the Canal Zone would be transferred to Panama and new financial arrangements instituted, where Panama would begin to receive a larger share (some $55 million annually) of the toll revenues earned from international shipping passing through the canal. These are the major provisions, although there are several other provisions that are consistent with the items I have just outlined.

The second treaty establishes the arrangements for the permanent neutrality of the canal beyond the year 2000. At that time, Panama assumes the full operational management for the canal, and assures the neutrality of the canal for the use by all nations of the world. The Senate has amended this treaty—and with my vote, I might say—to make clear that the United States is free to take whatever military action may be required to protect the canal and maintain its neutrality beyond the year 2000. Further, the amendment we have added guarantees that at times of war or emergency, U.S. ships will go to the head of the line and have priority use of the canal.

These then are the essential facts about these treaties. They have properly caused wide national debate—and sharp

differences of opinion exist. This issue has split the conservatives in the United States, with such leading conservatives as former President Ford, newspaper columnist William Buckley, retired actor John Wayne, California Senator S. I. HAYAKAWA, and Senate Republican leader HOWARD BAKER, all supporting the ratification of the treaties. While there are differences of opinion among retired military personnel, Gen. Maxwell Taylor, Gen. William Westmoreland, Admiral Zumwalt, General Norstead, General Ridgeway, and Gen. Lucius Clay, among others, are also publicly supporting the treaties.

Also, our present Chairman of the Joint Chiefs of Staff, Gen. George Brown, is strongly supporting the treaties as being in the best strategic military interests of the United States. He has also expressed these same strong feelings to me in private conversation, as did General McAuliffe, our top military leader in Panama responsible for defending the canal.

Incidentally, there is one key military fact that we should acknowledge. The canal itself is actually formed by a great man-made lake through which the ships must travel after leaving either of the two oceans and traveling through the locks. This large lake is created by a big dam named the Gaton Dam. If that dam were destroyed by a missile or some other attack, the lake would vanish and the canal would be effectively destroyed. Once a new dam were built, it would take 3 years of rainfall to refill the lake and get the canal back in operation. So as you can see, it is extremely vulnerable to attack if a determined enemy force wanted to put the canal out of operation.

My best judgment is that the new treaties do serve the present and long run strategic interests of the United States, and I will vote to ratify them. That does not make them perfect documents—or eliminate future risks. Any course of action carries risks—but I think the greatest risks to the United States would occur if the treaties were defeated.

Today, after 75 years of the United States living and working in Panama, we have a positive relationship between our two countries and with the people of Panama. The people of Panama feel as if their national future and identity depends upon them gradually assuming the control of the canal, which cuts their country in half. I think we Americans can understand how we would feel if our Nation were cut in half by a canal, and with a 10-mile zone totally controlled by a foreign government. We would not like it—and, in fact, would not tolerate it.

Despite our enormous military power, the key to a civilized world in the future depends upon working out problems between countries without having to resort to war.

The various countries in South America are in transition and are struggling to establish their own future. This ranges from the disturbing case of Cuba and its Communist dictatorship of the Left, to disturbing right-wing dictatorships, such as we see in Chile, Argentina, Brazil, and other places. I believe we need to foster policies and feelings that can give democratic principles a greater chance to succeed—and avoid these dictatorships of the extreme left or extreme right.

As far as the current government of Panama is concerned, it is not the brutal kind of dictatorship we see elsewhere in South America—including countries which the United States strongly supports. Amnesty International, a worldwide group that documents and exposes the worst human rights abuse, does not list Panama among the 116 counties that have the worst records. And of course no one can foresee what kind of government Panama will have in the year 2000, when the United States would finally turn over control of the canal.

Panama is a poor country with great problems of unemployment. Uncertainty about the status of the canal has effectively blocked any significant inflow of foreign capital and investment that Panama needs to develop itself. Once the status of the canal is resolved, foreign investment will again occur in Panama, and Panama will have a chance to develop a positive future for its people. Panama today is highly Americanized. Most of its doctors, lawyers, engineers, and other educated professionals have been trained in the United States, and have strong positive feelings toward our country. In fact, our relationship is so close that they use American money as their national currency, the only nation in the world which does so.

Taking a forward step in partnership with Panama is a sign of strength by the United States—it shows the strength of our ideals and feelings about each country's desire for national integrity and independence. It would show we respect the deep nationalistic aspirations of the countries of South America—and I believe it will greatly increase our influence in this vital region here in our own hemisphere.

We cannot try to hold on to the old notions of "might makes right" that dominated our foreign policy activity in South America 75 years ago. We live in a new age and must learn and apply a new kind of leadership. It must be a leadership of reason and military strength—where we remain strong in character as well as in force of arms.

In the end, other nations will have to want to follow our example if we are to exercise leadership in the world. We have seen in our own lifetimes that the power of an idea or belief can be greater than the power of a gun. We cannot impose our will on others, in their own country, at the point of a gun. This is a timeless lesson that our own forefathers taught England back in 1776—and that we must not forget today when Americans constitute some 4 percent of the world's population.

Our future in this hemisphere lies much more in reason than in military power—more in partnership than in domination by the United States—more in friendship than in hard feelings and antagonism.

If we are to have a chance for a civilized world in the future, then we must take wise and careful civilizing steps that elevate the human values and principles that our Nation has struggled to establish at home and throughout the world. It is hard to take these civilizing steps. Part of us, quite understandably, wants to hold on to comfortable old practices that worked decades ago in a world setting that has since disappeared.

Time and events have moved on and we must move with them. These treaties are as dramatic a breakthrough in 1978 terms, as the engineering breakthrough of building the canal was in 1903. The Panama treaties makes sense for the United States, for Panama, and for the free world, and it is on this basis that I will vote for ratification.

Mr. ROBERT C. BYRD. Mr. President, will the Senator from Louisiana yield so that I may make a unanimous-consent request, without the time being charged against him?

Mr. LONG. I yield.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a vote occur today at 3 p.m. in relation to the reservation offered by Mr. NUNN and other Senators; that if a motion to table is made and rejected, the vote immediately recur on the amendment of Mr. NUNN, up or down.

The PRESIDING OFFICER (Mr. PAUL G. HATFIELD). Is there objection?

Mr. ALLEN. Mr. President, reserving the right to object, I believe we can beat that time. I believe it will not take nearly that length of time.

Frankly, I am interested in seeing that all the reservations do come to a vote prior to 4 o'clock, so that we can have a final vote. I would plan to speak about 20 minutes on the Nunn resolution, and I believe we can come to a vote long before 3 o'clock and move to another reservation.

Mr. ROBERT C. BYRD. Mr. President, I call Senators' attention, if I may, to the fact that under the orders previously entered Senators will be speaking until 2:30 p.m. today.

Mr. ALLEN. Yes.

Mr. ROBERT C. BYRD. That will only leave 30 minutes.

Mr. ALLEN. Yes. But the Senator from Alabama is not one of those scheduled to speak under special orders. I believe some of these special orders have been vacated. I notice Mr. FORD had 15 minutes. Is that time still available to him?

Mr. ROBERT C. BYRD. No. The Senator from West Virginia has calculated that time.

Mr. ALLEN. OK.

Mr. ROBERT C. BYRD. If all orders entered into are completed it will be 2:30 p.m. today before those orders are completed. That will leave only 30 minutes for discussion of the Nunn reservation.

Mr. ALLEN. I believe we can come to an early vote.

Mr. ROBERT C. BYRD. The Senator would object to the request?

Mr. ALLEN. At this time I would, yes.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. CRANSTON. Mr. President, will the Senator from Louisiana yield for a

unanimous-consent request without losing his right to the floor?

Mr. LONG. I yield.

Mr. CRANSTON. Mr. President, I ask unanimous consent that, following disposition of the pending Nunn amendment and any motion relating thereto, the Senate proceed to consideration of the amendment offered by the distinguished Senator from West Virginia, Senator RANDOLPH, relating to the cemetery issue. That is a very important matter that we must be sure to deal with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order, the Senator from Louisiana (Mr. LONG) is recognized for not to exceed 30 minutes.

UNDERSTANDING NO. 14

Mr. LONG. Mr. President, I send to the desk an understanding and ask that it be stated.

Mr. ALLEN. Mr. President, is not the Nunn reservation the pending business?

Mr. ROBERT C. BYRD. The Senator merely asked that it be stated. He is not asking that the Nunn reservation be set aside.

Mr. ALLEN. Very well.

The understanding is as follows:

Strike out the period at the end of the resolution of ratification and insert in lieu thereof a comma and the following: "subject to the following understanding:

"Paragraph 1(c) of Article III of the Treaty shall be construed as requiring, before any adjustment in tolls for use of the Canal, that the effects of any such toll adjustment on the trade patterns of the two Parties shall be given full consideration, including consideration of the following factors:

"(1) the costs of operating and maintaining the Panama Canal;

"(2) the competitive position of the use of the Canal in relation to other means of transportation;

"(3) the interests of both Parties in maintaining their domestic fleets;

"(4) the impact of such an adjustment on the various geographical areas of each of the two Parties; and

"(5) the interest of both Parties in maximizing their international commerce.

The United States and the Republic of Panama shall cooperate in exchanging information necessary for the consideration of such factors.".

Mr. LONG. Mr. President, I do not care to upset the procedure of the Senate.

This amendment I have is one seeking to assure the least increase in the amount of tolls after the year 2000.

It may be that my colleague, Mr. JOHNSTON, might wish to join as a cosponsor on this amendment. If so, I will be happy to have him join me on this.

Mr. JOHNSTON. Mr. President, if my colleague will yield, I do wish to be associated as a cosponsor on that understanding.

Mr. LONG. Mr. President, I so ask unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, if it is not possible to vote on this prior to taking up the other amendments, it is perfectly all right with me.

I know of no opposition to the amendment. But I wish to inquire whether we could get unanimous consent to vote on it during the next half-hour. If not, I will be glad to simply leave it there and let it be voted on when its turn comes.

Mr. ROBERT C. BYRD. Mr. President, if I may respond to the distinguished Senator, orders have already been entered for recognition of Senators to make speeches up to about 2:30 p.m. today. It may be better not to schedule a vote at this point.

Mr. LONG. That being the case, Mr. President, I will ask that the Senator from West Virginia (Mr. RANDOLPH) be added as a cosponsor to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I propose the following understanding to the resolution of ratification of the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal relating to the adjustment of tolls.

During the course of the Senate's debate on the Neutrality Treaty, many of my colleagues have expressed a concern about the economic effects imposed on the United States by the obligations incorporated in these treaties. Some Senators, including those who favor, oppose, or are undecided on the issue of ratification, share a concern about the escalating tolls which will inevitably result if these treaties are ratified.

Any exorbitant toll increase without sufficient consideration given to trade ramifications may cause severe economic dislocations in this country.

Under the proposed treaty arrangement, between the effective date of the treaty until the year 2000, tolls will be set by the Panama Canal Commission. The Commission is to be composed of five United States and four Panamanian citizens. Under the proposed draft implementing legislation relating to the Panama Canal treaties, the U.S. citizens are to be appointed by the President and will serve at his pleasure.

However, there is no requirement that these U.S. Commission members be confirmed by the Senate. I have written a letter to Senator JOHN STENNIS, chairman of the Armed Services Committee, proposing that the requirement of Senate confirmation be included in the bill when it is reported out of the Armed Services Committee.

Beginning in the year 2000, tolls will then be set under procedures to be established by the Republic of Panama.

Let me now explain the need for the understanding I am proposing.

Article III, paragraph 1(c), of the Neutrality Treaty establishes rules governing the security, efficiency, and maintenance of the canal. This provision states that:

Tolls and other charges for transit and ancillary services shall be just, reasonable, equitable and consistent with principles of international law.

This treaty language refers to broad principles but gives very little, if any, practical guidance to the Panama Canal Commission or the Government of Panama on the factors which are to be taken into consideration in setting tolls for transiting the Panama Canal.

It is generally agreed that the tolls will have to increase in order to comply with the obligations imposed by these treaties. However, such future toll rates will directly determine the degree to which the Panama Canal remains a viable waterway in international trade and commerce. Therefore, it is crucial that the United States and Panama make clear the factors which are important in determining future toll rates.

My understanding to the resolution of ratification has the effect of interpreting and supplementing article III, paragraph 1(c) and its general reference to "principles of international law" by enumerating the considerations that any future increases in tolls must encompass. This measure will require that the effects upon short- and long-term trade patterns of the United States and Panama be considered before any toll adjustment is made.

It is important to note that the total trade patterns of the United States and Panama must be examined. This means the trading activities of all ships, regardless of their registry, transporting goods to and from either of the two countries. This distinction is significant because much of the cargo shipped to and from U.S. ports through the Panama Canal is carried by vessels flying the flags of third nations. This cargo, though carried by foreign-flag vessels, nonetheless forms a substantial part of the total trade of the United States and consideration must be given to the effect of any toll adjustments upon such trade.

The understanding further provides that the costs of operating and maintaining the canal and the competitive position of the canal vis-a-vis other means of transportation also be among the factors considered in toll rate changes. These are clear-cut economic considerations customarily evaluated in determining a just and equitable toll rate. In addition to these economic factors, the United States and Panama also have mutual interests in maintaining their domestic fleets, in mitigating any adverse regional impact of a change in tolls, and maximizing their international commerce. The critical importance of these interests to both our countries requires that they be given due consideration in any decision to alter existing tolls.

This is not a proposal that the Panamanian Government will find difficult to accept. The understanding does not violate the substance or the spirit of the Neutrality Treaty. Rather, it clarifies and reaffirms the obligations placed upon the Canal Commission and the Republic of Panama to maintain the tolls at a just, reasonable, and equitable level.

My amendment does not seek to specify future toll rates or detail procedures by which they shall be determined. Consideration of such matters are more properly handled under the implementing legislation which the Senate will subsequently consider.

The implementing legislation can outline set procedures whereby public hearings are held and public comments are received concerning any proposed adjustments in the toll structure.

This understanding merely insures that any toll adjustments will be enacted only after careful thought and study is given to the effect of these changes would have on the total trading postures of both the United States and Panama.

Mr. President, I wish to direct myself to the treaty itself.

Mr. President, the framers of the U.S. Constitution knew what they were doing when they assigned the function of ratifying treaties to the U.S. Senate.

They knew that there would be times when the future of the Nation might depend upon agreeing to a treaty that was unpopular at the moment but necessary in the Nation's interests.

They provided that in the House of Representatives each Member would be required to offer himself for reelection every 2 years, while in the Senate only one-third of the Members would face reelection at any one time every 2 years.

Two-thirds of the Senate would have another 2 or 4 years for passions to subside and for the long-term wisdom of a controversial decision to become apparent.

The framers of the Constitution, such men as George Washington, Benjamin Franklin, James Madison, and John Adams, expected a very high degree of statesmanship in the Senate, and that is why they provided 6-year terms for Senators.

In my judgment, it is my duty to vote to ratify this treaty if I am to be equal to what the framers of the Constitution expected of men like me. I make this point, because I am fully convinced both by my mail as well as by the telephone calls I am receiving from my closest and dearest friends that my vote at this time may not reflect the view of the majority of the voters of Louisiana.

Their view may be more correctly reflected by that of my colleague, J. BENNETT JOHNSTON, a man whom I much admire, respect, and will proudly support in his campaign for reelection.

An editorial in the Shreveport Journal on February 28, 1978, thoughtfully points out the reasons why two good friends may differ on an issue like this and still remain very good friends. I ask unanimous consent that that editorial be printed at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. LONG. Mr. President, my vote is dictated by facts which are now clear to me, although they may not be fully understood by the average American citizen.

First of all, we do not own the Panama Canal. We have a lease on the property, and the landlord is demanding that we get out.

I realize that the lease has not expired—from our point of view—but if we expect to stay there forever, then we should be willing to have our rights and our differences with Panama adjudged by an impartial international body such as the International Court of Justice, of which we were a creator, a sponsor, and a supporter.

In my view, the World Court would decide against us, just as practically all friendly nations of the world do not agree with us about our continued presence in Panama.

The Security Council and the General Assembly of the United Nations have both addressed the Panama Canal issue back in 1973. The Security Council overwhelmingly voted for a resolution to condemn our present arrangement with Panama.

Only our close ally, Great Britain, chose to abstain from voting on this resolution. Every other member of the Security Council voted against us. Thus, the United States found itself in the uncomfortable position of having to veto this resolution.

The General Assembly and the Security Council of the United Nations subsequently passed a weaker resolution of general principles but fully intended to condemn what they considered to be our impingement on the sovereign rights of Panama. Only France and Great Britain joined the United States in abstaining on this vote in the Security Council, otherwise, the world would be unanimously against us.

The nations of the world have already passed judgment on this matter, and we stand alone as a great power of 217 million people imposing its will on a small nation of less than 2 million people.

Admittedly we could maintain our present posture for many years to come by merely taking the view that we refuse to bend our knee to world opinion and that even if every nation on Earth wants us out of Panama, we just dare any of them or all of them to try to throw us out.

How long can the United States maintain that position before the family of nations?

Since the end of World War II, almost 33 years ago, we have considerable evidence to support our claim to moral leadership throughout the world.

We have assumed both the right and the duty to pass judgment on others.

We have pressured Israel to return land it acquired in recent years in wars. We have passed judgment on Rhodesia, Ireland, Mexico, Great Britain, Turkey, Greece, and a great number of other nations. Should we now be so hypocritical as to decline to be judged even by our best friends among the nations of the world?

If the United States had intended to refuse to eventually return the property to Panama, then we should have conducted our relations with Panama far differently than we have during the past 20 years.

If that had been our ultimate intention, then the United States should never have permitted the Panamanian flag to fly alongside the U.S. flag over the Canal Zone.

If the United States had intended to stay there forever, then following the riots and bloodshed of several years ago, we should not have offered to negotiate about withdrawal. Instead, we should have sent reinforcement to make it clear that nothing short of overwhelming military force could evict us from the premises.

However, President Johnson, President Nixon, President Ford, and President Carter chose to send emissaries to Panama to engage in negotiations that produced the bilateral treaty which is now before the Senate.

During the previous Congress, I was among 37 Senators who proposed a resolution expressing our displeasure with the direction that the negotiations were heading. I was hopeful that our negotiators and our Presidents would not have gone so far in making concessions to Panama as they did. I feared we were giving more than we were getting in return.

During the course of the Panama Canal debate, I have voted for amendments, reservations, and understandings in order to make this treaty a better arrangement for the United States.

Some of these provisions are essential to our national security and to assure the free flow of international trade through the Panama Canal. Fortunately, some of these changes have been agreed to by the Senate. Panama will have to accept them if the treaties are to become effective.

Mr. President, after all of this, if these treaties are not ratified, then the United States will have lost its place as the moral leader of the community of nations. Our President will have lost credibility as a national and international leader.

In addition, our Senate will appear to be a body which is incapable of rising above emotionalism and misunderstanding to provide the wise leadership our Founding Fathers entrusted to us.

The United States, which graciously returned liberty and self-determination to the Philippines and has offered independence to Puerto Rico whenever that island wants it, would be perceived by many as the only remaining colonial power in the free world.

At the end of World War II, the United States stood not only as the world's unquestioned military power, but also its moral leader. At that time, this Nation stood ready to leave any land where we were not welcome and to restore independence to all those who preferred not to become a part of the United States.

What has happened to change all that?

The emotional demands that we remain in Panama in perpetuity arise out of frustration that we failed to prevail in a military venture that we were foolish to undertake, the Vietnam war, and because today some doubt our military capability.

That is no excuse for America to compromise its moral leadership.

This great Nation should lead mankind away from warfare as the answer to disputes among nations and toward an

era of international law where nations are willing to be judged by others.

Significantly, we do not relinquish total control over the canal until the turn of the year 2000. Most of us here will be in our graves by that time. But let us hope that we will leave to our children and our grandchildren a world where right, conscience, justice, and kindness prevail among nations.

Let us hope that by the year 2000 this Nation will have provided the leadership to realize the prophesy of Isaiah:

. . . They shall beat their swords into plowshares; nation shall not lift up sword against nation, neither shall they learn war any more.

Mr. President, I am proud that America is a great military power, capable of defending itself against the whole world. I voted for the appropriations and helped provide the taxes to pay for this capability to defend ourselves.

I am proud that the United States possesses more economic wealth than any nation on earth. As one Senator, in my own way, I have done what I could do to keep it that way.

More importantly than just power and wealth, the United States is the most respected Nation on Earth. It is satisfying to be powerful; it is very satisfying to be rich; but it is even more important to be right.

Mr. President, as I finished preparing these remarks, I remember seeing a statement by my respected colleague, Senator RIBICOFF, in the RECORD of last Thursday.

In it was a quote from one of the truly great international statesmen of our generation, Israel's Abba Eban, calling upon his fellow countryman, Menachem Begin, to measure up to the challenge of statesmanship.

One sentence I found most inspiring, and I am sure it will be to my colleagues:

A statesman must build a bridge between his experience and his vision, between ancient fidelities and new hopes, between echoes of the past and the call of the future.

We have a choice. We can cling to this relic of the past and the gunboat diplomacy that it represents to everyone other than us.

Or we can provide the leadership that this world must have if the hopes and prayers of mankind are to prevail.

EXHIBIT No. 1

[From the Shreveport Journal, Feb. 28, 1978]

NO TIME FOR STATESMEN

There is an old adage that a U.S. Senator can afford to be a statesman only during the first four years of his term. The last two he has to worry about being re-elected.

It's not surprising, then, that Sen. J. Bennett Johnston has chosen to oppose the Panama Canal Treaties. Disappointing, perhaps. But not surprising.

Sentiment remains heavily against the treaties in this part of the country. Our own Journal polls have indicated that little headway has been made against this opposition. This has not been the case nationwide, as informed opinion has shifted in favor of the pacts. Because of this development, prospects for passage of the treaties are fairly bright.

But back to Sen. Johnston. His decision to join the opposition most likely is in keeping with the view of the majority of his constituency. And it probably reflects the way our representative form of government is supposed to work.

But public opinion is not always an accurate gauge of right or wrong. So we can have a representative vote that is correct democratically but wrong philosophically. We believe that this is the case with Sen. Johnston's decision.

Perhaps Sen. Russell Long will be more inclined to support the treaties. For the sake of America's best interests as well as hemispheric cooperation, we hope he casts a positive vote.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator yield?

Mr. LONG. I yield.

Mr. ROBERT C. BYRD. I want to compliment the distinguished Senator on his sagacious remarks. As I said the other day, Senator MCINTYRE's speech was one speech that I would remember from my now 20th year in the Senate.

The speech which has just been made by Senator LONG is a speech I will remember because how can one refute the thesis, the basic theme, of that speech, how can one be politically right if he votes for something that is morally wrong?

The Senator places his position on that unshakable pillar of what is morally right.

Now, we can say many things about these treaties, that they are economically right, they are commercially right, they are politically right, and they are militarily right from the standpoint of the security interests of our country.

But I say that he who stands right on the great moral issues of the day stands on an unshakable foundation.

I salute the Senator because I think his speech is based on that unshakable foundation. I commend him.

Mr. LONG. Mr. President, let me thank the distinguished majority leader for those kind words. He knows that I had very serious doubts about this treaty, and it was the Senator from West Virginia, as well as many of his colleagues in this debate, who have persuaded me that they are right about this issue.

I want to make it clear that as far as this Senator is concerned this treaty stands strictly on its own bottom. I am not interested in anything except this one issue. But I honestly feel that the way the Senator from West Virginia has conducted himself in the course of all of this makes those of us who supported him to be our majority leader extremely proud of ourselves.

He has provided leadership which is worthy of the great majority leaders of the past, and I am proud to support him in this matter not just because I admire him and respect him but because, in my judgment, his position has been right and has been tremendously courageous.

May I say the same thing about our distinguished majority whip (Mr. CRANSTON). We have been receiving about 100 long-distance calls a day from California in the office of the Senator from Louisiana. I assume that was because people there hear that I was regarded as doubtful, and the same thing was not true of the Senator from California.

The Senator from California also is measuring up in this situation to the demands of statesmanship.

I am not here to cast aspersions on any others, but we on this Democratic side of the aisle, are doing our duty as the good Lord gives us the light to see it, and I have no doubt that if we lose in this battle we will leave lots of soldiers on the battlefield by having done what we think the Founding Fathers expected of the Senate of the United States.

I am also extremely proud that the Republican leader (Mr. BAKER) felt that it was his duty to support the treaty, and I know he is doing it for that reason, and that reason alone.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. LONG. Yes.

Mr. CRANSTON. First, I thank the Senator for his very generous remarks.

More importantly, I want to join in stating how much I admire the Senator from Louisiana for the courageous stand he has taken and the eloquent way and forceful way in which he has stated it.

I am also proud of the way the Senator cited the wisdom of the Founding Fathers in giving Senators 6-year terms and expecting them to vote their consciences even when that led them to do something unpopular.

We might also bless the Founding Fathers, those of us who have a bit of time and are not seeking election this year, for giving us that bit of time after we vote on a matter that in a way is seemingly not the way that people would who have not had the opportunity we have had to consider the matter in total depth and spend the time on it that we have.

The Senator has made a great speech, has taken a great position, and I compliment him.

Mr. LONG. May I say there are some of us who have the space of time to support our statesmanship. For our side to prevail there are going to have to be a lot of courageous men running this year who are going to have to have the courage, and it seems to me the demands made upon people like me to do what we think is right on this matter is very, very small compared to what would be the call upon particular Senators running in States where this is a very controversial item at this time.

But we cannot have it both ways. The Nation has a right to expect something of us as Senators here. When it sends us to the Senate, it has a right to expect statesmanship of us.

The PRESIDING OFFICER. Under the previous order, the Senators from Utah (Mr. GARN and Mr. HATCH), are recognized for a total of not to exceed 45 minutes.

Mr. GARN addressed the Chair.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. GARN. I yield.

ORDER FOR RECESS UNTIL 9 A.M. TOMORROW, AND FOR RECOGNITION OF SENATORS LUGAR AND METZENBAUM

Mr. ROBERT C. BYRD. I ask unanimous consent that when the Senate resumes its consideration of the treaties on tomorrow, the Senator from Indiana (Mr. LUGAR) be recognized for not to exceed 15 minutes, and that he be followed by the Senator from Ohio (Mr. METZENBAUM) for not to exceed 30 minutes, and that when the Senate completes its business today it stand in recess until the hour of 9 o'clock tomorrow morning.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. ROBERT C. BYRD subsequently said: Mr. President, earlier today, I secured an order for the recognition of Mr. LUGAR tomorrow morning. It was my understanding that his order was to occur after the resumption of the consideration of the treaty.

I now understand that Mr. LUGAR wishes to make his remarks as in legislative session. Therefore, I ask unanimous consent that following the prayer on tomorrow, Mr. LUGAR be recognized, as in legislative session, for not to exceed 15 minutes, after which the Senate resume consderation of the Neutrality Treaty.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that following the remarks of Mr. METZENBAUM tomorrow, the order for which already has been entered, Mr. HART be recognized for not to exceed 30 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GARN. Mr. President, all indications are that the vote on the Panama Canal treaties will be very close, that one or two Senators, at present undecided, hold the balance, and will determine whether the treaties are ratified or fail. These Senators have a tremendous responsibility, of course, to examine the treaties in detail, judge them on their merits, and reach reasoned conclusions. These Senators have another responsibility, and again, it is one we all share. That additional responsibility is to consider the impact of a failure to ratify on the conduct of our overall foreign policy for the next few years.

There may be a temptation on the part of some Senators to make their decision on these treaties not on the merits of the treaties themselves, but on their impact on the ability of President Jimmy Carter to conduct foreign policy for the balance of his term.

I will go farther, Mr. President, and say that I have actually heard talk, in the cloakrooms and on the floor of the Senate, to exactly that effect: that the treaties are bad, and that in the abstract they should be voted down, but that the results of their failure would be the destruction of the ability of our President to conduct foreign policy. Failure of the treaties, it is said, would demonstrate to the world that Jimmy Carter is not in charge of foreign policy in the United States, and would put an end to any initiatives or influence we might want to have in the world.

Mr. President, that is a serious charge, and one that needs to be addressed. It may well be that the treaties have acquired more significance than they actually deserve, that both the President and the opponents have invested the issue with such an overriding significance that Presidential prestige is on the line. Be that as it may, the situation is as it is, and nothing can be done about that. What we must do now is assess the impact of failure of the treaties, to see if it is worth it to the Nation to accept bad treaties, in order to forestall even worse developments in foreign affairs.

Certainly I would concede that it is important for a President to be able to conduct foreign policy. There have been some instances in our history when failure or inability of the President to lead have produced a drift in foreign affairs that has threatened peace and stability in the world at large. For that reason, I have carefully gone over, in my mind, the possible impacts on our ability to conduct foreign policy of a failure of the Panama Canal treaties. Since I am still opposed to the ratification of the treaties, obviously, I have concluded that, on balance, our Nation will be aided, but I would like to take a moment of the Senate's time to explain why I reached that conclusion.

Basically, it is because I have concluded, Mr. President, that the United States really has no foreign policy today.

Rather, our foreign policy appears to have but one goal, one aim in view: to avoid offending the Soviet Union.

I can see no other explanation for the events I see taking place around me. Let me just mention a few.

Last Wednesday, the Belgrade Conference on Europeon Security and Cooperation completed its work and issued a declaration. This Conference was held to monitor the observance by signatory nations of the Helsinki agreements signed in 1975. The United States, of course, signed the Helsinki agreements, as did the Soviet Union.

I am informed that while our delegate to the Conference, Mr. Arthur Goldberg, did bring up the issue of Soviet violations of human rights at the meetings, the final declaration does not so much as mention "human rights" because of fears that the Soviet Union would refuse to approve the document. Back in the old days of the Kissinger realpolitik, that might have been expected, though it would certainly have been decried by the advocates of a "moral" foreign policy. But now the White House is inhabited by one of those advocates of a "moral" foreign policy. Jimmy Carter's pronouncements on the subject are too well known to need repeating here. Our refusal to offend the Soviet Union by forcing her to veto a strong statement on human rights contrasts strangely with the rhetoric which was heard from the White House at the beginning of the Carter administration.

As another example, consider the course of affairs in the Mideast. During most of last year, the administration's efforts appeared to be geared to getting all parties to the negotiating table in Geneva. By all parties, the administration clearly meant to include the Soviet Union, without whom, it was argued, there could be no comprehensive settlement.

It is not clear to me, Mr. President, why an agreement satisfactory to the U.S.S.R. should be the object of our foreign policy. The true parties to the Mideast conflict apparently were not happy with the idea that the Soviet Union should be given such a prominent part in shaping the outcome. It was this unease which drove President Sadat to open his historic negotiations with Israel directly, and for at least some of the other Arab States to support him. In fact, had the United States not initially hesitated, it is conceivable that Arab support for Sadat might have been greater than it was. The majority of the Arab nations recognize, even if our own State Department does not, that the interests of the Soviet Union in the Mideast will not be served by an amicable agreement, and that giving the Soviet Union a veto over any settlement is to guarantee continued conflict.
